The second part would have to be done manually – which is absolutely feasible, I could have it by the end of the day? And/or I could split it up with a couple of inv and have it even sooner.

Just had a quick discussion with Ross. If there are stats we can pull about the s.12; s.13  
s.12; s.13 that would be great.

If we could also pull stats on the s.12; s.13, that  
would be helpful. For example, we know that the site where there was s.13  
s.13. Could we pull stats, for example, on which s.12; s.13  
s.12; s.13

Please let me know what we can pull and what we simply do not have.

Hi Sue,

As I mentioned, Ally is briefing our minister this week on **s.12; s.13** . She has asked if we can include some back pocket information from your area. The briefing is just a general briefing but she wants to be prepared for any questions that might come up. Below are the questions I am hoping you can answer.

**s.12; s.13**

I know that the ALR is incredibly short staffed right now. **If it is easier to forward us the most recent s.12; s.13 , we are happy to pull together the bullets we need** and share them back with you in advance of the briefing.

**The briefing is on Thursday January 19, and we will need this information by end of day tomorrow** so we can include it in the briefing material package. I know this is tight but hoping we can do some of the work for you if you have a recent document you can share with us as a starting point.

Happy to connect and chat this through if that would be helpful.
