

# IPM Act Inspection Form - Agricultural Pesticide Storage

Date: October 9, 2015 Time: 11:45  
 Inspection address: \_\_\_\_\_ City/town: Smithers  
 Name of individual inspected: \_\_\_\_\_ Title/position: Owner  
 Type of farm (e.g. orchard, vineyard, etc.): Grain Farm / oilseed  
 General description of storage facility: Barn

Product name	P.C.P. #	# of containers	Notes
MCPA Amine 600	28384	4 cases	
MCPA Ester 600	27802	3 cases	
DuPont refine SG	28285	2 bottles	

Is the facility locked when unattended? ☒ Y ☐ N  
 Does it have a "WARNING - CHEMICAL STORAGE" sign clearly posted on the door? ☒ Y ☐ N  
 Is the facility vented (either passive or active) to the outside? ☒ Y ☐ N  
 Are commercial pesticides stored separately from food for human or animal consumption? ☒ Y ☐ N  
 Are all pesticides in original containers, or in containers clearly labelled with pesticide name, active ingredient, and PCP #? ☒ Y ☐ N

## Compliance & Enforcement Details

Is the storage facility in compliance with the IPM Act and Regulation? ☒ Y ☐ N If no,  
 Section of IPM Act/Regulation contravened (see reverse for details): N/A

Enforcement action taken: ☒ None ☐ Advisory issued ☐ Warning issued ☐ Ticket issued ☐ Investigation initiated

## Presence of Obsolete or Unwanted Pesticides

Does the grower have any obsolete or unwanted pesticides? Y ☒ N ☐ If yes,  
 Does the grower wish to be contacted by phone or email when a free disposal event occurs? ☒ Y ☐ N If yes,  
 Phone number or email for contact: \_\_\_\_\_ s.22

Inspection conducted by: Inspector/Conservation Officer (name) Manuel Mariotto

## Some definitions and guidance for IPMA agricultural storage inspections:

- **Commercial pesticides:** these will have the word "COMMERCIAL", "AGRICULTURAL", or "INDUSTRIAL" on the label. These are concentrated pesticides that require dilution and mixing, and specialized spray equipment like an airblast sprayer for application. The majority of pesticides used in agriculture are commercial products. Common examples in agriculture include Diazinon, Cygon, Roundup, Captan, etc.
- **Restricted pesticides:** these will have the word "RESTRICTED" on the label. These are typically highly-toxic pesticides, and a grower is required to have a valid pesticide applicator certificate in order to purchase and use these products. The two most common Restricted pesticides used in agriculture today are Guthion (azinphos-methyl) and Gopher Getter (strychnine).
- **Domestic pesticides:** Domestic pesticides have the word "DOMESTIC" on the label. These are generally pre-mixed and ready to use pesticides available at hardware stores or garden centres, such as Roundup, Killex, Pounce, etc. They are generally used by homeowners for non-commercial purposes.
- **P.C.P. number:** this is the federal *Pest Control Products Act* registration number. Every pesticide registered in Canada has one, and it is found on the front panel of the pesticide label.
- **Storage requirements:** All Commercial and Restricted pesticides must be stored in a facility that is **locked, signed, and vented**. These requirements do not apply to Domestic pesticides. Storage requirements also do not apply to pesticides that are mixed and loaded into the tank of a sprayer.
- **Venting requirements for storage:** in general, either active venting (e.g. a powered fan) or passive venting (e.g. holes or cracks that allow some air flow) are acceptable for a storage shed.
- **Presence of Obsolete or Unwanted Pesticides:** it is legal for the grower to store properly-labelled obsolete pesticides in a compliant storage facility. We collect contact information for those with obsolete pesticides, and send them a reminder to dispose of their products at free disposals that occur approximately every five years.
- **Digital photos:** Photos of the inspection are important, including pictures of the storage area, and photos of the front label of any pesticides present in order to verify the pesticide name and PCP number.

Common IPM Act infractions relating to agricultural pesticide storage			
Type of non-compliance	Section contravened	Section to warn/charge under	Offence description
Pesticide storage not locked	Section 66 (1) (b) of the IPM Regulation.	Section 3 (1) (b) of the IPM Act	Unlawfully store pesticide
No "Warning – chemical storage" sign on pesticide storage	Section 66 (2) (a) & (b) of the IPM Regulation	Section 3 (1) (b) of the IPM Act	Unlawfully store pesticide
Pesticide storage not adequately vented	Section 66 (1) (b) of the IPM Regulation.	Section 3 (1) (b) of the IPM Act	Unlawfully store pesticide
Pesticides not stored separately from food	Section 66 (1) (a) of the IPM Regulation.	Section 3 (1) (b) of the IPM Act	Unlawfully store pesticide
Containers not labelled with the pesticide name, active ingredient, and P.C.P. #	Section 65 (2) (a) (b) & (c) of the IPM Regulation	Section 3 (1) (b) of the IPM Act	Unlawfully handle/store pesticide
Any other situation with a high level of risk to human health and/or the environment (e.g. pesticides stored beside a child's toys, storage close to a stream or other waterbody, etc.), discuss with IPM staff. Non-compliance can be charged under Section 3 (1) (a) of the IPM Act – store pesticide in a manner causing or likely to cause an unreasonable adverse effect.
