Subject: Statlu Resources - proposed landfill

Hello Allan:

Thank you for your phone call earlier this month.

As I understand it, management was to review the Environmental Protection Division's position on the Statlu proposal and landfills in general in terms of location within the South Coast Region (and beyond?).

Has there been any word as to whether MoE-EPD would even accept and consider an application for remediated soils from Statlu, especially in the area they have proposed?

We have heard from our Policy Branch that the FVRD refusal to consider zoning can be a rationale to not proceed with our standard process of referrals, etc. Before making a determination on our office's next step, it would be good to hear what your division's thoughts might be on this proposal, i.e. reject any future application or still go through the process. Apparently, Statlu had spoken with Jeff Fournier (former Section Head) shortly before he retired, but I was unable to speak with Jeff about his thoughts.

If you have any thoughts on this, any thoughts from Ashley's former experiences or happened to speak with Jeff, I would appreciate hearing from you in the next couple of days.

I will be sending an email back to my manager/director shortly on my findings for consideration of our options.

Thank you.

Hi Al,

I received a phone call from Kevin Walker. Kevin works for FLNRO and is the officer overseeing the Statlu application from their perspective. Please contact Kevin to discuss the application and how we can work together more efficiently. If anything comes up, don't hesitate to call me and bring me in for a short time.

Kevin – Al has been assigned the Statlu file, so you will be working with him

Cheers

Ashley Smith

I'll let you follow up. This is the application we have maybe it's not the correct one but that's what we have to go by.

Here is the application I downloaded from TRI's FTP site. Page 1 – purpose of application still contains demolition, land clearing and construction waste. Page 3 at the bottom does not contain a date when Earl signed the application. It's been mentioned on numerous occasions to make sure the application is correct and it being fully completed.

Jeff

I am not sure what Ashley is looking at, but we removed any reference to DLC from our application after our meeting with him last September. I am forwarding an email from Gary Lin which includes the link to the required information sent to Ashley in October and December.

Please let me know if you require any further information regarding this matter.

Thanks

Grant

Thanks for the quick response.

Ashley has seen the most recent application and it is within that document there continues to be inconsistencies that need to be rectified to ensure the efficient processing of the application. It is my understanding that a key discrepancy involves the potential inclusion/exclusion of DLC materials in waste stream that is planned for disposal. Such an inconsistency is problematic when determining the need to include/exclude the planned activities in the Fraser Valley Solid Waste Management Plan

Jeff

That is unfortunate, would have appreciated your input in this meeting. Look forward to meeting with you and Ashley regarding this application in the near future.

I checked with our consulting engineer, Gary Lin from TRI, and he did submit the revised application to Ashley in October and some other material in December. Ashley advised Gary that the application had been forwarded to Victoria.

Thank you

Grant

Thank you for the invite. Unfortunately, no one from my section will be able to attend this meeting due to prior commitments that I understand Ashley Smith had previously advised Jim about.

Despite our absence at the meeting, we will continue to work with FLNRO, local governments and other agencies to ensure that the processing of your application is accomplished in the most efficient manner. Accordingly, please continue to keep us updated on the progress of your associated consultation efforts.

On a related matter, we understand that the proposed waste stream associated with your landfill application may have changed. If that is the case, then we need a revised application form to reflect the apparent changes to ensure the application is processed in the effective manner possible.

Thanks again for keeping us informed on your activities associated with your authorization application.

Best wishes,

Jeff

Jeff Fournier

I realize that you are just back to your office, but wanted to confirm that you are available for a meeting with Statlu Resources and FLNRO at their offices February 17th per the emails from Jacqueline Cavill and Jim Johnson.

This is a follow up meeting regarding our landfill application to the April 13/15 meeting held at your offices where it was agreed both MoE and FLNRO would work together with Statlu in processing this application. Avtar Sundher and David O'Malley represented Ministry of Environment at that meeting.

Thank you for your attention to this matter.

Grant Johnston
Statlu Resources Inc.
