Narrative	2017-04-29 09:45 CO Barber spoke to c/n. The bear cub is about 2 kms east of the summit top. The cub was seen just around the chain up area on the Creston side. CO Barber gathered up his tranq supplies and headed up. Located the cub about 2.5 kms on the Creston side of the summit. Definitely last years cub. Small and skinny. CO Barber was able to get within 5 feet of it and fed it some meat scraps to hold it in the area. Left it and got the jab stick ready. The cub must of had a sixth sense because it took off when CO Barber got close. The officer followed the cub, but it could scamper on the snow, while the officer fell through. The bear headed back up the mountain. CO Barber couldn't catch up. Try again another day. 2017-04-29 12:52 updated c/n. 2017-05-04 at 1300. CO barber went back up the summit to deal with the bear. It had been seen eating garbage on the side of the road. The bear was GOA. 2017-05-05 at 1230. CO Barber got a call that he bear cub had been hit on the highway at the chain up area. 2017-06-12 10:14 File reviewed by CO Mann

Caller threw rocks at the bear from 50' and the bear ambled off back into the bush. Caller would be happy to have a trap in his yard and thinks this is the same bear as they had trouble with last year.</p>

	<p>2017-05-11 10:48 CO LACEY called and left a message with C/N requesting call back, update as to attractants and possibility of trap set. Sgt. BRINSKY able to assist with trap set 17-05-12 - check on attractant management as well.(BAL) 017-05-12 13:00- Sgt Brinsky at residence. Knock and ring door bells on upper and lower door , no answer. Call residence no answer. phone disconnects as though voiced mail full. inspect yard. feeder in a tree, some attractants noted, but a typical rural residence. yard walked, no scat found or other evidence of bear. Decision made to not set trap. no guarantee someone is home this weekend, and residence to far off hwy to rely on police. Remain in yard for 50 min. no one arrives. At 13:55, depart residence. Will attempt to call and update COM upon trip back to Dawson Creek. 2017-05-13 13:35 No return calls from C/N to CO LACEY - discussions with Sgt. BRINSKY determined no trap set as no confirmed resident to assist in monitoring. Matter closed at this time. (BAL) 2017-06-15 Human Wildlife Conflict Report #17-1807 Update #3 Complaint Received By: DAWN (Admin ECC) Original Call Received: 2017-05-10 17:39 Update logged at: 2017-06-15 7:47 Area: CHETWYND - CHETWYND - PEACE REGION 1300 hours CO BOOTH called c/n, left voice mail. 1600 hours CO BOOTH was on his way to this complaint, called c/n again and spoke with him, advised CO BOOTH is responding. It should be noted that the c/n has been calling on behalf of s.22 whose bird feeder the bear had gotten into. 1607 hours CO BOOTH attended the Peace Christian School which is very close to the area of this complaint, s.22 CO BOOTH spoke with Vice Principal ,s.22 and advised s.22 that there has been a bear in the area. s.22... was not surprised and told CO BOOTH that there had never been a problem with bears vs students at the school. CO BOOTH reminded s.22... to keep all food inside the school and keep grounds clean. CO BOOTH then did a walk around on the school grounds to check for attractants, none found. 1621 CO BOOTH attended the s.22 which was where the bear had got into bird feeders. CO BOOTH spoke with s.22 and was shown where the bird feeder was located that the bear got into. The bird feeder is approximately twenty feet above the ground on a sundeck which is not accessible from the ground. The bear had climbed a tree then walked down the roof of the house to get to the bird feeder. When s.22 yelled at the bear, the bear jumped off the deck and into lilac bushes on the ground. CO BOOTH told s.22... that the sunflower seeds he was feeding the birds are what brought the bear onto his deck. CO BOOTH told s.22... to remove the bird feeders completely until late December. s.22 told CO BOOTH he would do so. 2017-06-16 1110 hours CO BOOTH st the culvert trap and provide s.22 with his business card and requested that s.22 call the RAPP line right away if the bear went into the trap. s.22... agreed to this. 2017-06-20 DC Clerk calle (s.22) s.22 has not seen the bear since 2017-06-15. s.22 beleives the bear has left the area. 2017-06-22 1327 hours HWCR 17-8026 received, bear in trap. CO BOOTH attended, removed trap, destroyed the @ 2 year old sow caught in the trap and then returned the carcass to the natural environment. CROSS REFERENCE TO HWCR 17-8026.</p>

Narrative	<p>2017-05-23 17:08 CO McArthur received ECC call. CO Eagles contacted CO McArthur and advised that he was able to attend. Update #1 added by A/Sgt. LACEY(BAL)</p> <p style="text-align: right;">Human</p> <p>Wildlife Conflict Report #17-3231 Update #1 Complaint Received By: JIM (Operations 2 ECC) Original Call Received: 2017-05-23 17:04 Update logged at: 2017-05-23 17:09 Area: BEAR LAKE - PRINCE GEORGE - OMINECA REGION PERSONAL INFORMATION Location: SAME ADDRESS Location Description: Caller Name: s.22 / Street Address / City: , Postal Code: Referred By: CONTACT NUMBERS Cellular: s.22 - - - - - OCCURRENCE INFORMATION Incident Date Time: 2017-05-23 17:04 Species Involved: BLACK BEAR Attractants Noted: NOT APPLICABLE Nature of Complaint: INJURED/DISTRESSED - IMMOBILE/PRESENT Action Taken: PHONED CO Details: Advised the bear is on the s.22 ACTIONS TAKEN 2017-05-23 17:10:55 CO Eamon McArthur</p>

	<p>(BAL) 2017-05-23 17:17 CO Eagles contacted COM regarding call. COM provided updated information on state of bear cub. COM reported the cub was tied up in willows, COM and s.22 attempted to cut away willows until COM noticed wire was wrapped around front arm of cub. COM then decided to call the RAPP line. Black Bear cub was located at mile marker 465 on Weedon Forest Service Road. COM provided CO Eagles directions. CO Eagles advised COM CO's were going to respond. 2017-05-23 17:40 CO Eagles picked up CO Booth s.22 Mackenzie. 2017-05-23 18:35 CO Eagles and CO Booth on scene of complaint. Marker 465 on Weedon FSR. CO's assessed black bear cubs condition. Black bear cub was obviously entangled in willows and had been given human food including an apple and two granola bars. A snare was observed wrapped high on the front left hand leg of the black bear cub. The decision was to dispatch the cub. 2017-05-23 18:57 CO Eagles dispatched the cub under supervision of CO Booth. The snare was taken into evidence and after being documented of the damage it caused to the black bear cub. The snare was twisted and tight on the leg of the black bear cub. The leg was swollen and the paw's toes were splayed which indicated potential nerve damage. The mouth of the black bear cub had damage caused by biting on the cable. 2017-05-23 19:10 CO Eagles returned cub to natural environment after taking photos. 2017-05-23 20:15 CO Eagles returned to Mackenzie and dropped off CO Booth s.22 CO Eagles returned to residence and contacted COM to advise of outcome and gain any extra information from the COM. COM provided CO Eagles with contact information and advised COM would be willing to provide evidence in court should such proceedings occur. CO Eagles told COM not outcome was guaranteed but needed to cover those bases while on the phone from COM. 2017-05-23 21:05 CO Eagles received phone call from COM's s.22 CO Eagles advised of outcome and thanked s.22 for assistance but did educated on leaving human food for the black bear cub. COS to start file on complaint once CO Eagles returns s.22 2017-05-29 11:02 A/Sgt. LACEY review. Good follow up and decision to create COORs file on snare. This matter is concluded and closed.(BAL)</p>

OccurrenceNotes	COM reports a sow was getting into his garbage this morning. Caller walked out his front door to see the bear laying on lawn with bag of garbage 50' away. Caller tried to scare the bear off and it got up and charged towards the caller stopping 10' from the door as he jumped inside. Caller called a neighbour who came over with a gun. By then the bear had walked off towards the bush and they walked out onto the trail and saw the bear some distance off. When the bear saw them, it started walking towards them so they shot it. Now, the caller has found 2 this years cubs in a tree nearby.

Narrative	<p>2017-05-30 1633 hrs, CO HAMLYN receives the first of many HWCR's regarding possibly abandoned cubs at this location. CO HAMLYN contacted the COM - COM stated that two very small cubs are at the location and no sow is in sight. The cubs are close to the road and the COM is worried they will be hit. CO HAMLYN advised the COM to leave the cubs alone - not to approach or feed them and CO's will come to the location and access. (CH) 1645 hrs - update # 1 received. CO HAMLYN calls COM and advised the COM to leave the cubs alone - not to approach or feed them and CO's will come to the location and access. (CH) 1653 hrs - CO HAMLYN receives HWCR 17-4324 (regarding the same cubs). CO HAMLYN called the COM and left a VM. (CH) 1700 hrs, CO HAMLYN and HARRIS 10-23. Two "football sized" COY present at the site. One vehicle present - CO HAMLYN explained to the vehicle that the more people who hang around the scene the less likely the sow will return. CO HAMLYN also explained that it is normal for sows to leave their young alone for several hours or even 24-36 hours while they take care of business that the cubs are not able to do yet. The driver of the vehicle stated that she understood and left the area. CO's observed the cubs for approx. 30 mins. Cubs moved into the bushes and CO's departed. Cubs seemed to be staying around the 50 km/hr sign close to the road. One cub appeared lethargic and skinnier than the other. (CH) 1750 hrs, CO HAMLYN returned to the site and the cubs were back on the road. CO HAMLYN chased the cubs into the bush. One of the cubs ran away immediately and climbed a tree. The smaller lethargic cub took a few steps and laid on the ground. CO HAMLYN eventually made the cub move into the bush as well. CO HAMLYN looked around the immediate area - no sign of the sow. (CH)</p>
	<p>2017-05-31 0900 hrs, CO HAMLYN receives update #2 that the cubs are still present. CO HAMNLYN attends the scene and observed the same cubs in the same location - still no sow present. Two vehicles are also on scene - One truck and one van. CO HAMLYN spoke to the occupants of the van who stated that they are worried for the cubs. CO HAMLYN explained that the cubs are being monitored and we are giving the sow time to return. CO HAMLYN explained that is is normal behaviour and that if the sow is still alive she picked a poor location to leave her cubs. The occupants of the van then stated to CO HAMLYN that they fed one of the cubs chocolate because it looked hungry. CO HAMLYN told the occupants that is the worst thing that they could have done. The van then took off. (CH)</p>

	<p>0939 hrs, CO HAMLYN sent an email to Chris ADDISON (regional wildlife manager), Mike BRIDGER (wildlife biologist) and Sgt. Shawn BRINSKY advising of the cubs and requesting guidance. (CH) 0942 hrs, CO HAMLYN called ADDISON and explained the situation - ADDISON stated that he would meet with his team and come up with a course of action. (CH) 0956 hrs, CO's depart scene 1200 hrs, CO's return to the location - smaller lethargic cub is laying on the shoulder of the road. CO HARRIS approached the cub and it lifted its head and then laid it back on the ground. CO HAMLYN sent an email to ADDISON, BRIDGER and BRINSKY stating that CO HAMLYN has decided to dispatch the smaller cub as it is not doing very well, but will wait for direction on what to do with the second healthier looking cub. (CH) 1400 hrs, Sgt. BRINSKY calls CO HAMLYN and informs CO HAMLYN that SGT BRINSKY met with Director ADDISON, Biologist BRIDGER, and Insp Struthers explains the outcome of the meeting. Both cubs are skinny, have possibly been handled by people and were possibly fed by people. Also in consideration i the fact that the cubs have been likely orphaned for over 36 hours, dehydrated, malnourished and will have many more hours of such even if rehabilitation was an viable option. Location of Fort creates even greater challenges. CO's advised to catch and euthanize both cubs. (CH)</p>
	<p>1450 hrs, CO's attend scene and easily catch the smaller cub and place it in a dog crate. CO's search the area for the second cub and find a dead sow approximately 30 meters in the bush laying with its belly exposed. Judging by the smell, hair slippage and insects the sow has been dead for at least 3-4 days - taking the 30 degree weather into consideration. CO's find the second cub approx. 20 meters up a tree close to the sow carcass. CO HAMLYN dispatches the cub in the tree with .22 cal rifle. CO HAMLYN utilized the tree trunk as a back drop and fired towards the forest where no residences are. CO HAMLYN struck the cub under the chin - no exit wound. CO HAMLYN fired a second round once the cub was on the ground for assurance. (CH) 1525 hrs, CO's dispatch the second cub at the Clark Lake Road gravel pit with one .22 cal shot to the cranium. Both cub carcasses were returned to nature. (CH) 1827 hours, CO's return to the dead sow and utilize a metal detector to see if the sow was shot - nothing found. CO's examine the carcass for bullet/arrow wounds - nothing found to indicate the sow was hunted. Possible MVI. (CH) 2017-06-01 17:44 - Sgt Reviewed (SB)</p>

Narrative	2017-06-18 20:32 CO Kruger contacts com who states he is enroute and should be at this location within 15 minutes. He will assess and attempt to remove the cub which he believes is dead on the hwy. COM will call back with an update. 21:09 COM calls CO Kruger and states that the cub was dead and he was able to remove it from the hwy as the sow was not seen at the time. He has disposed of the carcass away from the hwy close to where it was struck so hopefully the sow will find it and move off. COM is thanked for doing this as it is outside of the National Park boundary. 2017-07-31 15:15 Sgt. Milne reviewed.

Narrative	<p>2017-05-16 - 1923hrs - CO BECK briefed and called the COM. COM observed a BB sow with 3 cubs of the year attack and kill a Goat and a Sheep on his property. Bear is in the process of dragging the Sheep carcass away. CO BECK 10-17.</p> <p>1935hrs - CO BECK arrived and spoke to the COM and his neighbour. Informed he will be destroying the bear if located. CO BECK followed the drag marks onto the neighbour's property and located the Brown phase Black Bear sow over the Sheep carcass. CO BECK destroyed the BB with his issue shotgun. 1 shot to vitals. CO BECK observed that the sheep was still alive. COM requested CO BECK put it down. Done with issue side arm. CO BECK then located 3 COY in a large fir tree near the sow. 2011hrs - CO RICHARDSON arrived with the .17 rifle. CO RICHARDSON destroyed the 3 COY 2males and one female. CO PLAMONDON arrived. Carcasses removed and disposed of on an FSR off of Silver star Rd. by CO RICHARDSON.</p>

Narrative	2017-06-21 16:45 LISTER called com who is hot under the collar. Within past two hours bears entered one of his properties and caused damage. Family with 2 children live in this hous. bears were previously in the gargae (broke through the wall) at the same house. Com demands to know what COS is going to do and threatens to deal with it himself if we don't. LISTER will attend to view the damage. 2017-06-21 18:15 LISTER attended - com still has not electrified his chicken run, though he has purchased the equipment. Some discussion about this had. LISTER viewed damge to garage, and then damage to house and confirmed bears were in the house through back door, which may have been closed, but not latched and went out through living room window. Discuss things to do in the future to prevent such habituation/conditioning from occurring - better garbage storage, hazing of bears etc. Discuss attractant management. Also discuss difficulty dealing with a familiy unit. At conclusion LISTER decided to set culvert trap and try to remove the bears.

	<p>2017-06-21 19:30 Culvert trap set. 2017-06-21 20:05 Call from ECC advising two bears in trap. Review HWCR û says two in trap, cub up tree, fourth bear trying to get into the trap. Call com and advise to stay in the house and I will attend after I s.22</p> <p>20:45 Attend. Sow and cub on ground outside the trap. Dispatch sow û two shots required (30-06). Cub runs off. Tenant helps locate it and tree it. Dispatched (30-06) Destroy second cub in trap (.22). No fourth bear. Determine door was likely not latched and sow was able to get out, but locked cub in. Tenants s.22 walked by and saw the two bears, then saw what they thought was a fourth, but it was the sow running by them. s.22 says LISTER really needs to impress upon people to stay away from the trap. LISTER reminded him that he was told him to stay away because of the possible scenarios. He said ôbut I didnÆt listenö. LISTER replied that he canÆt do anything about that. 21:30 Loaded up bears. Return to office and wash out and store bear trap. 22:15 Dispose of carcasses at dump spot on spur road off of Canoe Main 23:00 truck hosed out and stored. 10-35.</p>

Narrative	2017-07-20 12:32 - CO Cox set two culvert traps in the area and removed and destroyed two adult BB from the area. one sow and one boar. CO cox left traps set in an effort to capture the two remaining cubs. 2017-07-25 - 1100 - CO Cox attended location and chem immobilized both cubs from the noted location. CO Cox discussed the outcome of the bears with inspector Sprado. due to high level food conditioning and habituation the cubs were euthanized. CO Cox noted that reports were made of the sow and cub at Walmart downtown Penticton and a constant problem in high density urban environments and were primarily feeding on non-natural food sources.
