To: Minister, ENV ENV:EX; Frampton, Caelie PREM:EX
Cc: Aaron Robinson
Subject: Request to meet w/ Minister Heyman
Importance: High

Attention: Caelie Frampton

Ms. Frampton: Further to the August 3 letter to Minister Heyman from Metro Vancouver Board Chair Greg Moore and Vice-Chair Raymond Louie (see attached), I wonder if you and I might be able to work on scheduling a meeting between the Minister and a small (maximum 2-3 individuals) delegation from Metro Vancouver to discuss some of the issues referenced in the letter? I realize the Legislature will not be in session again until the fall, so perhaps we might be able to carve out an hour from Minister Heyman's schedule sometime in late August or early September, if that suits. Many thanks for your assistance with this request, and please don't hesitate to contact me should you have any questions or comments. I look forward to speaking with you!

Deadline ASAP

Request

I had a question about the carbon tax increase included the budget update yesterday. Will the tax also be expanded to cover fugitive emissions from the oil and gas sector, as called for in the agreement between the NDP and Green Party following the elections? Or is that a step that will occur later?

“Both the Minister of Finance and the Minister of Environment’s mandate letters include a commitment to take measures to expand the carbon tax to fugitive emissions. The Province will work towards this commitment over time while developing strategies with industries to support the transition of carbon intensive sectors to a lower carbon economy.”

Hi Caelie,

Great to chat with you as well. No problem going through you on issues that come to our attention.

This one seemed to be a cross-jurisdictional thing with VIHA as well so... wasn't quite sure who to talk to.

Just for your information, we have met with the property owner most affected and they provided us a sample of their water for us – we were left in no doubt as to the seriousness of the situation. I also want to point out that the individual raised numerous concerns with how the testing was done (e.g. from what was observed filtered water was tested, and several neighbours were not tested because they were

not home – apparently no effort was made to contact individuals ahead of time). There seemed to also be a lack of testing on her neighbours' properties as well as a general disinterest in finding possible sources of the contamination (e.g. old industrial sites) or informing the neighbourhood of possible health risks to their water supplies. In essence, it appears a lackluster investigation has been underway to date.

Thank you for letting us know about the Aquifer and please keep us informed of further testing as it unfolds and any next steps the Ministry is intending on taking.

Sincerely,

Aldous Sperl
Chief of Staff
Office of Adam Olsen, MLA

To: "Sperl, Aldous" <Aldous.Sperl@leg.bc.ca>

Subject: Pender Island Drinking Water

Hi Aldous,

Great to chat with you today.

Here's some of the information prepared by Ministry staff on the issue of Pender Island drinking water.

- ? Two residential drinking water wells ^{s.22} are known to have been impacted by hydrocarbons (likely gasoline) based on water quality results.
- ? The hydrocarbon concentrations are exceeding acceptable limits, and are indicative of high risk conditions at the residences in question, with concentrations at ^{s.22}
- ? There is no obvious commercial or industrial source of contamination or responsible person, and cross and downgradient drinking water wells are not showing impacts at this time.
- ? Homeowners of the properties with affected wells have been without use of their drinking water wells since April of this year and are having to seek water from alternate sources .
- ? The aquifer at Pender Island is located in heavily fractured sandstone and shale which has not been mapped. This type of subsurface geology makes it very difficult to determine the source of contamination, since any contamination (such as gasoline) can travel in unpredictable patterns along rock fractures.
- ? VIHA (Vancouver Island Health Authority) along with the Water stewardship group from FLNR have collected several samples from downgradient and cross-gradient wells and so far only the 2 wells seem to be impacted. Upgradient wells were not sampled. VIHA is returning to the site in the near future to complete sampling of additional wells.
- ? ENV is awaiting further sampling information before assessing appropriate next steps.

If you have any follow up questions, please don't hesitate to get in touch.

Thanks,
Caelie

Carle,
Staff advised we'll take all but:
District of Kilmat:
Should be redirected to EMPR
Town of Princeton:
Justification for pushing Town of Princeton back to FLNR: after reviewing Princeton's briefing note, it appears they want to discuss wildlife management (urban deer). ENV does not have a management role regarding urban deer. Any deer cull would require permit to be submitted to FLNR for review and approval. The Conservation Officer Service (COS) will respond to deer conflicts if public safety is at risk (meeting 270 already scheduled to discuss COS presence in Princeton).

Subject: Media Request - CVR - Forbidden Plateau

Hi Caelie,

Please see the suggested response below.

Jim S. has approved.

Thanks!

Scott Strasser, Comox Valley Record

Deadline: Friday

Request - Can BC Parks confirm the Forbidden Plateau Reclamation Society has a permit to do the clean-up project at the old Forbidden Plateau ski resort near Strathcona? Apparently the group said they obtained a permit from BC Parks for this.

Suggested Response:

- A restoration project is ongoing at the site of the old Forbidden Plateau ski resort in Wood Mountain Provincial Park.
- BC Parks has a contract – not a permit - with the Forbidden Plateau Reclamation Society to clean up the old ski resort facilities there, which includes removing cables, towers, foundations, scrap wood and other debris.
- This contract has been in place since August 9, 2017.

Subject: Media Request - TC - More Rangers/CO's
Hi Caelie,
Jim S. has approved the below suggested response.

Thanks!

Lindsay Kines, Times Colonist

Deadline: N/A

Request - The new government promised additional rangers/CO's would be hired. Reporter is wondering when there might be movement on this?

Suggested Response:

- We will restore funding for BC Parks, which you will see reflected in the February budget. As part of this new funding, we will hire additional park rangers to help ensure B.C.'s provincial parks natural and cultural values are well protected, while ensuring outstanding recreational opportunities are well maintained for continued public access and enjoyment.
- We will hire additional conservation officers to help protect our natural resources and prevent human-wildlife conflicts, which will be reflected in the February budget.

Hi Bev,

Thank you for the great training today. Caelie fully agreed with what we had discussed and asks us to move ahead with the new process for policy heavy meeting requests. I expect this to affect 50-70% of the invitations that are flagged for review.

For now, I will touch base with Corinne and Kirsten about changing up the Meeting/Invite Request Form to include a section for “regrets, send back to CU”, and also “accept, send back to CU”. I think after that you may have to talk to Kirsten directly on the new process for e-approvals.

Cheers,

Eveline

Subject: Fwd: RE: Creosote Timbers in Upland Excavating Landfill Concern

Dear George Heyman, Allan Leuschen, Luc Lachance and Claire Trevena,

The City of Campbell River and I have received a reply from Stephen Watson of BC Hydro (below) that creosoted timbers were deposited in Upland's pit on advice from a representative from the Comox Strathcona Waste Management Board.

Upland's Ministry of Environment (MOE) permit only allows **Inert** Construction and Demolition Waste.

Creosote contains PAH's and by definition is not inert.

"Chemically treated wood waste is not an inert waste and should never be burned in open fires or disposed of in Class III landfills" Alberta Government

"Creosote-treated wood can leach chemicals that may dissolve in water, move through soil and contaminate groundwater. Creosote can also be taken up by

plants and animals and is considered a probable human carcinogen." USA National Pesticide Information.

BC MOE information states it must go to a specialized landfill. Upland's pit drains to Cold Creek, the water source for the DFO Quinsam River Hatchery and to the Quinsam River.

CREC also has concern that other timbers from the John Hart Project and the Paterson Creek wooden flume (part of the Salmon River Diversion Project) have also gone to the Upland Excavating Ltd's pit.

Would you please clarify and address this non compliance with Upland's Permit promptly as it is forecast to rain here this week.

Would you please respond to me on this issue.

Thank you,

Leona Adams,

President, Campbell River Environmental Committee

From:Watson, Stephen

To:Terri Martin , 'Leona'

CC: s.22

Hi Terri and Leona,

It is BC Hydro's understanding that creosote wood is exempted from hazardous waste.

It can go to landfills as long as the landfill is willing to accept and licensed to do so.

For some background, back in March, I spoke to the Comox Strathcona Waste Management. I talked to the rep about the potential for the Salmon River project materials from the decommissioning work going to the Upland site and all contaminated materials going to an approved site off of Vancouver Island. I did say our plan was to send the creosote timbers to the Upland site and the rep saw no issues with that - proper material going to the proper locations was our choice. The CVRD landfills can take creosote timbers but they need to be no more than 8' long, plus their disposal fees are more. Ours are longer timber lengths. The Uplands site was deemed better.

We have also been discussing the project during our community liaison committee meetings, with the last two being in February and June of this year. The next one is in October. We can discuss any issues that the committee members would like to discuss. The City and CREC are of course on the committee.

We are currently reviewing where the project will be sending the commercial and industrial material from the site, which is currently being stored in the Salmon River concrete canal.

Please let me know if you have any further questions.

Thanks,

Stephen

Hi Steve,

I had a call from Leona Adams expressing concern that creosote timbers being removed from the Salmon River diversion may have been taken to the Upland Pit for disposal.

Would you be able to find out if this information is correct? I don't believe that the Upland Pit on Gold River Hwy is authorized to take that material.

Thanks very much,

TERRI MARTIN, B.Sc., R.P.Bio.

Subject: Re: Current British Columbia NDP government needs to go further to transition citizens to a 100% Zero Emissions Economy.

Hi George (Heyman) and Katrina (Chen)

s.22 At this time I do not believe that the current British Columbia NDP Government is doing enough to help British Columbian's transfer away from fossil

fuel to a 100% zero emissions / renewable energy economy.

In our province of British Columbia this year (2017):

(1) We've seen the Worst Fire Season on Record.

(2) We've experienced more than 10 days of very bad smog.

(3) We've learned about the first, of many installments of a reported 9.5 Billion CDN that British Columbia taxpayers will need to pay for multi staged dikes along the coastline of British Columbia because of rising sea levels that are speed up through British Columbian's continued use of fossil fuel and our British Columbia Provincial governments lack of action on climate change.

Note: Please see report/articles:

http://www.env.gov.bc.ca/wsd/public_safety/flood/pdfs_word/cost_of_adaptation-final_report_oct2012.pdf

<http://www.richmond-news.com/news/richmond-s-300-million-dyke-plan-forges-ahead-1.15299874>

<http://www.cbc.ca/news/canada/british-columbia/metro-vancouver-dike-upgrades-to-cost-billions-1.1220516>

(4) We have yet to see the current NDP Provincial Government's principal election promise of, " the use of EVERY TOOL in the toolbox to stop the Trans Mountain Kinder Morgan pipeline expansion " fulfilled because our current British Columbia NDP Government has not pulled the permits to ensure the stopping of our hypocritical Canadian Prime Minister, Justin Trudeau (Climate leaders, do not build pipelines) who horse traded the approval of the pipeline.

Thus I'd like to know:

Is the current British Columbia NDP government ready to pull the permits for the Kinder Morgan Trans Mountain pipeline expansion project in British Columbia provided either Kinder Morgan starts building on British Columbia public land and/or the first nation NEB lack of consultation argument in Federal Court does not succeed in stopping the Kinder Morgan Trans Mountain pipeline expansion project from being built, " Yes " or " No "?

Note:

<http://globalnews.ca/news/3705579/b-c-granted-intervener-status-in-trans-mountain-pipeline-battle/>

Will the current NDP British Columbia Provincial Government launch a lawsuit against the Canadian Federal Government for Canadian climate rights, ensuring that our Canadian federal government takes the necessary steps for Canada to do its part to bring Canada's actions in line with the requirements of the " Paris Climate Change Agreement " in September 2017, " Yes " or " No "?

Note:

<https://cleantechnica.com/2017/09/05/james-hansen-issues-new-young-peoples-burden-report-climate-change-video/>

<https://www.nytimes.com/2017/08/10/climate/climate-change-lawsuits->

[courts.html](#)

https://en.wikipedia.org/wiki/Paris_Agreement

Is the current British Columbia NDP government going to increase the British Columbia Carbon tax to \$55 CDN per tonne in September 2017 " Yes " or " No "?

* Note the British Columbia Carbon Tax, to my knowledge, has not been increased above \$30 CDN per tonne since 2012, and at \$5 CDN per year, should have increased by 2017 to \$55 CDN per tonne, and while the last British Columbia Liberal government did not increase it past 2012, the current British Columbia NDP government is now in a position to correct this.

The point of this increase should be to enable a subsidy for:

(1) The purchase of Electric vehicles in British Columbia so more people can walk away from their gas vehicles.

(2) The purchase of Solar panels for people's homes in British Columbia so people can offset the cost of heating their home through electrical heaters at the same cost or less as LNG.

(3) The implementation of mass Solar, Wind, and Geothermal power plants so we can be ready for the sharply increased needs for local zero emissions electricity. Also I'd like to know if the current British Columbia NDP has a solid plan that it will implement in September 2017 for getting 1 Million gas vehicle drivers converted to 1 Million electric vehicles in the next 10 years at 100,000 gas vehicles to 100,000 electric vehicles per year, " Yes " or " No "?

Further, considering that it's my understanding that BC Hydro under the last Liberal British Columbia government during their term approved very few mass wind, solar, and geothermal projects, I'd like to know what the current NDP British Columbia government is going to do during it's term to be ready to handle the following sharp increase over the next 10 years:

(1) 1 Million electric vehicles charging on level 2 charging station at 1 Million homes in British Columbia.

(2) All pumps at all gas stations in British Columbia converting over to level 3 & 4 charging stations.

<https://cleantechnica.com/2016/06/15/whats-story-ev-fast-charging/>

<https://evobsession.com/electric-car-charging-101-types-of-charging-apps-more/>

(3) 1 in every 10 parking stalls in British Columbia being equipped with level 2 charging stations.

Please detail your response.

Latestly does the current NDP British Columbia Government have a plan, at this time, to dismantle the Chevron refinery in Burnaby during the next 10 years, " Yes " or " No "?

If " No ", will the current British Columbia NDP government be coming out with a date by when " the Burnaby Chevron Refinery " will be dismantled in before the end of 2017, " Yes " or " No "?

Note: According to Matt Horne of the Pembina Institute, the Chevron refinery in Burnaby produces 400,000+ tonnes of CO2 per year (equivalent of 80,000 cars). Please see article below.

<http://www.burnabynow.com/news/chevron-wants-a-tax-break-1.408477>

For further proof of my grave concern please see the photo taken ^{s.22} in Burnaby of the Chevron Refinery operating during the heavy smog on Tuesday September 5th, 2017.

This is nothing short of a horrible irony that the current British Columbia NDP Government can and should prevent.

Note: I'd like a separate set of answers to come directly from " George Heyman " and " Katrina Chen ".

Looking forward to your replies.

Hi Caelie,

A few small updates to the carbon tax note – added two validator quotes and adjusted a contrast line.

Small tweak to MO budget note.

Was there another note that you had asked me about that you are still waiting on?

Hello,

This is a follow-up to an earlier request.

Jim S. has approved the below suggested response.

Thanks!

Richard McGuire, Osoyoos Times

Deadline: this week please

Previous Request & Response:

I'm just checking in to see what the status is of discussions about a national park reserve in the South Okanagan between the province and Parks Canada since the change in government.

Response:

<!--[if !supportLists]-->•<!--[endif]-->We will work with the federal government, local Indigenous Nations and South Okanagan communities to create a plan to protect the large number of endangered species in that area, as the federal government develops a new national park.

<!--[if !supportLists]-->•<!--[endif]-->The Province will announce further details at a later date.

New Request:

MLA Linda Larson told me yesterday that there was nothing in the budget update relating to the proposed national park reserve in the South Okanagan.

Is she accurate on this?

I've looked at the estimates and I do note an increase in the Park Enhancement Fund Special Account, but I'm not sure if that's where the money would be.

Could you please clarify?

Suggested Response:

<!--[if !supportLists]-->•<!--[endif]-->As previously stated, the Province will announce details at a later date.

To: Frampton, Caelie PREM:EX; Minister, ENV ENV:EX
Subject: As requested: materials on Progress Energy's EAO exemption application
September 17, 2017.

Honourable George Heyman,
Minister of Environment and Climate Change Strategy,
Parliament Buildings Victoria,
British Columbia V8V 1X4

Dear Minister Heyman,

I am writing to provide you information on an important matter now before the Environmental Assessment Office relating to two large unlicensed dams in northeast BC. I have made the attached submission to the EAO's office, but felt it was also important to share it with you as Environment Minister and to offer some background.

Your ministerial assistant asked me to provide this information to you.

The information directly relates to an issue highlighted in your mandate letter, namely, to "revitalize" the Environmental Assessment process.

It also bears on another key government objective outlined in the mandate letters of all Cabinet members - to fully adopt and implement the United Nations Declaration on the Rights of Indigenous Peoples.

On September 21, the public comment period closes on an extraordinary application made to the EAO by Progress Energy.

The company has asked the EAO to exempt two large dams - which the company built in 2012 and 2014 in contravention of the Environmental Assessment Act – from provincial environmental assessments.

The Environmental Assessment Act stipulates that the EAO is supposed to assess all major projects well before projects go ahead, not considerably after the fact.

Such reviews determine whether applicants are granted certificates that allow projects to proceed to development. The reviews can, under the direction of the EAO or you as Minister, be wide in scope and can include other facilities and activities associated with the projects.

To grant Progress's exemption request would constitute a grave public disservice. The dams, built without proper authorizations, should be thoroughly assessed by the EAO. Moreover, the EAO should analyze the projects by looking very broadly at associated facilities and activities, as the legislation allows for.

I hope that the information provided here helps to convince you of that case. The information provided includes:

- Relevant background on the Progress dams that situate the dams in their broader context.

- A review of deficiencies or concerns raised in the materials submitted by Progress Energy in support of its extraordinary exemption application.

- Five recommended courses of action.

The five recommended courses of action are:

Progress's exemption request to the EAO should be denied. The EAO should conduct a review of the dams that fully takes into account whether or not they were built to sufficient engineering standards, especially in light of what the dams are there for. In assessing the Progress dams, the EAO should determine whether or not the earthen structures are properly built to withstand ground motions from induced earthquakes, given their proximity to fracking operations. If the EAO determines that this is not the case, then the company should either be ordered to dismantle the facilities or re-engineer them to accepted seismic standards. The EAO should also assess whether fracking exclusion zones are warranted around the two dams specifically and other fracking dams more generally.

Under the Environmental Assessment Act environmental assessments can be broadened to include related facilities and activities. Given that at least 57 unlicensed fracking dams have been built to date on Crown lands in northeast BC – half of them Progress Energy dams - a broad environmental assessment is warranted that examines water usage and water demand in natural gas industry fracking operations and that fully considers cumulative environmental impacts.

The EAO should include in its review a broad inquiry into the consultation record regarding the two dams. What were First Nations told was to be built? If First Nations were not informed that the projects were dams, how could they have possibly foreseen that key provincial acts and regulations were at risk of being violated, to say nothing of their Constitutionally-protected and treaty-protected rights?

The EAO should conduct a wide-ranging assessment of the Lily and Town Dams that seeks to answer why regulators allowed the projects to proceed without them first being referred to the EAO. This should include a review of the much broader network of unlicensed dams built throughout northeast BC in recent years to corral water used in natural gas industry fracking operations.

Under the Act, the costs of conducting a thorough assessment can be ordered paid for by project proponent. It is appropriate that the company should cover all such costs.

Thank you, in advance for considering this request and for reviewing other submissions to your office on this matter.

As mentioned at the beginning of this letter, the attached document contains more detailed background material and the rationale for a broader environmental assessment of Progress's Lily and Town dams, as submitted to the Environmental Assessment Office.

Thanks for considering this file.

I've tried the Smithers branch, Victoria communications and did a joint call with Sonia Fursteneau to see if there were any options we weren't aware of.

I do understand process and the duties of staff in the ministries but in this case, the issue is simply a homeowner who enjoyed clean water for years and through no fault of his own has contaminated water.

This is a last option for me to ask to see if there is anything you can do as the Minister of Environment as i feel i may have missed something.

Thanks

P.s; CC'ed here is my CA as she has been handling the bulk of this situation to date.

Mr. Nelless,

I must state that after all this time the response below is not what I was hoping for or expecting. As we discussed in phone conversation some weeks back, there are options open to you in getting compliance with the Order but yet you have refused to take action. I understand the appeal is to be heard in October, what I don't understand is why nothing has been done to enforce the order in the meantime. From my understanding the Order is legally enforceable regardless of when the appeal is to be heard. It will be approximately 6 months since the Order was issued to the Appeal hearing and then another time period before the Appeal Board makes a decision. If I had not written several emails to your office and the Appeal Board expressing concern over the length of time it was taking to set the Appeal dates, the hearing would probably have been held in February or March of 2018. In the meantime I would still be without water and my kids are returning to school in 3 weeks time! I don't see how anyone can deem this to be acceptable.

Regarding the neighbors having chickens, I honestly don't care if the neighbors have chickens, goats, pigs, and more horses (as they told MoE staff and me that

they would). What does concern me is that the having of these animals, as well as the 4 trailer loads of hog fuel, is polluting the ground, surface and well water coming onto my property and has caused extreme hardship and stress for me and my family. This is especially frustrating knowing that if the Abatement Order had been enforced from the beginning, the natural remediation process for my well could have been taking place for months now and the well could be that much closer to being remediated.

As requested of Ms. Glavina in email, has the results of the series of water samples that she took at my property been processed yet and when they do could I get a copy? Thank you.

Regards,

Apologies for the slow response to your email. Thank-you for sending us the well assessment for the new well you had recently drilled. I understand resolution of this issue has taken much longer than you or the Ministry would like. As you are aware the Pollution Abatement Order is currently under appeal with the Environmental Appeal Board and is scheduled to be heard Oct 12th and 13th, 2017. We all look forward to resolution of this appeal.

Please note that there is nothing in the Order that prevents your neighbours from having chickens.

Sincerely,

Brady

Subject: Fw: Source assessment of new well

Hi Brady,

I am forwarding you Dave Tamblyn's source assessment for the new well I had drilled this summer. As you can see, the water quality of the drilled well is in no way comparable to the quality of my old well. There will be a considerable up front cost to developing a treatment system for the new well (refer to attached well assessment report) as well as an ongoing financial and maintenance commitment. I have already spent an inordinate amount of time and money in dealing with this pollution issue, my kids will be returning to school in a month and I still do not have potable water.

I have long advocated for the start of natural remediation of my old well (refer to Dave Tamblyn's PHE- Engineering Assessment Report) so I can return to having the water quality I enjoyed before the s.22 polluted my property. I am presently in the process of installing a metal liner on the ditch I constructed between the s.22 and my properties, as per recommendations in the Northern Health PHE- Engineering Assessment Report. There is nothing more I can do from my end to aid in the natural remediation process of my old well.

From my understanding the site inspection report for the most recent site inspection on the s.22 property is complete. Why has the 6 March 2017 Pollution Abatement Order imposed on the s.22 not been enforced to date and what specific actions are going to be taken by your office/MoE to enforce the Abatement Order? With the Order not being enforced, the source of pollution is still in place, a large chicken coop has been built and the natural remediation process that is necessary if I am to have potable water on my property has not been able to begin. I believe I have been extremely patient in trying to obtain a satisfactory solution to this issue but this has not yielded significantly favorable results. **It is long past time for your office to**

act appropriately; enforce the Pollution Abatement Order that is in place/legally enforceable so that I can begin to have potable, safe drinking water for me and my family.

Thank you for your anticipated prompt attention to this matter and I look forward to your response in the near future.

Subject: Source assessment of new well

Hi s.22

As discussed, I have reviewed the well construction report (driller's log) and initial chemistry analysis for your new well (ID plate #39394). The best news is that I consider your well (screening level) low risk for containing pathogens. However, there are a few concerns with the raw water chemistry, as

you are aware, that make treatment necessary. Parameters of potential concern include iron, manganese, turbidity, pH and arsenic.

Fortunately, the solution doesn't have to be very complicated. I believe a whole-house greensand filter (more generally called oxidation-filtration) will address all of these issues. To be safe, I also recommend sediment pre-filtration using cartridge filter. If cost is a real problem the pre-filtration can be omitted at first, to see if the greensand alleviates the turbidity, but leave room to add it in later if required.

This is certainly not the only system that would work, and you should definitely consider a whole-house water softener with special resin to target iron and manganese, or a point-of-use reverse osmosis filter on your kitchen tap. The attached assessment report discusses all of these. I have written it at a rather high level, with rather more technical detail than I normally would for a single family residence, but you have shown an interest in the details of water treatment so I figured it would be appropriate in this case.

There may be innovative products out there that I'm not aware of – I'm a regulator, not a designer. Please discuss all options with an experienced and qualified water treatment designer before making your decision to purchase any equipment.

If you have any questions or would like to discuss anything further, please do not hesitate to contact me at your convenience by phone or email.

Best regards,

DRT.

Subject: Myra Bellevue Park - end of Stewart Rd E

Mr Thomson :

I have a matter that I hope you can offer some assistance...

This past winter our group have been accessing Myra Bellevue Provincial Park at the end of Stewart Rd E for the purpose of snowshoeing..

I need some assistance with getting the parking lot ploughed and the toilet facilities maintained over the winter..

Stewart Rd gets ploughed to the power substation and the park is open but never gets ploughed over the winter.

I contacted Kayola Contracting who maintain the lot

but they replied that they are contracted for summer maintenance only.

I also contacted the City of Kelowna and they say it's not with the city limits...(stops at the gate I guess).

So who does look after this parking lot..????

You may not think this is important but let me explain why it is...

Keeping fit is not just a summer trend, it is a year round trend... As a senior we are all doing our best to keep fit..

We use the park for summer hikes and biking and always meet people on the trails..

We were surprised how many we also met while snowshoeing this past winter.

There is a government "outhouse" facility on the property and last winter it was disgusting..

Obviously hadn't been cleaned in months..

The minor expense of keeping this lot ploughed and the toilet checked periodically throughout the winter would be offset by keeping people healthy and thereby helping keep our health costs down..

This makes sense to us, hopefully it does to you as well..

sincerely

Hi Caelie/Eveline,

Please find attached Minister's speaking notes for the Community Energy Association (CEA) Awards next Wednesday – they've largely been written by the CEA as it's more of a script to announce award winners and give the audience some details about the projects that have won the awards. The CEA will also be issuing a NR at the same time and would like a quote from MGH in it.

The draft quote is below so please advise of any edits by end of this week:

The Honourable George Heyman, Minister of Environment & Climate Change Strategy presented awards recognizing the leadership of B.C. local governments and public sector organizations at the Union of BC Municipalities convention. "Local governments across B.C. are leading the way in the fight against climate change and our government is committed to helping them in this fight and showing real climate leadership at a provincial level," said Minister Heyman. "These awards highlight the many innovative actions communities are taking to achieve their greenhouse gas emission targets."

Subject: Deer caught in hammock

Hi Caelie,

Just an update on the deer that was caught in a hammock in Prince Rupert last month and was somewhat freed by RCMP (because the nearest conservation officer is in Terrace.)

It seems to be surviving just fine but as you can see in this short video, I think a CO should come and deal with it properly.

Hi Caelie/Eveline,
Seeking your approval to send the response below.

Reporter

Jo Anne Malpass, Editor
North Shuswap Kicker

Request

Reporter notes the Shuswap Lake Provincial Park is closing early this year to start an expansion and has following questions:

How many new sites will there be?

Will there be other infrastructure added?

Will some of the spots be across the Squilax-Anglemont Rd. from the main park are?

Do you have graphics showing the expansion?

Why now, is the park always full during the summer and turning down a lot of reservations?

<!--[if !supportLists]-->•<!--[endif]-->Improvements to the park include an increase to the number of campsites by approximately 50, providing electricity to some of the campsites, refurbishment and upgrades to water and septic systems, improvements to the Sani-station, replacement of the end of life gatehouse, improvements to the entrance area for safety and entrance identification, an additional shower building and an improvement to the boat launch parking due to heavy use.

<!--[if !supportLists]-->•<!--[endif]-->This is a multiyear project that is planned to be completed by the spring of 2020. A specific final number of campsites and electrified campsites cannot be supplied as the installation is dependent on conservation and engineering factors that are being worked through. There will not be any sites added across the road in that park area at this time with this project.

<!--[if !supportLists]-->•<!--[endif]-->Campground reservations will commence

once the campground is open for public use. This year, areas of the campground were removed from the reservation system for short periods during low use times. This enabled construction activities to occur while the park was open to campers. There were more sites available by reservation than were actually used by the visitors. This may occur again during low use periods in the coming seasons to facilitate localized construction in the campground.

No reservations were turned down or declined.

Unluckily there is no graphic available.

Thank you,

Brian Cotton

Hi Caelie,

The below has been approved by Jim S.

Thanks!

Richard McGuire, Osoyoos Times

Deadline: This week

Request – In relation to budget and Park Enhancement Funding; reporter has looked at estimates online. This is a follow-up (below) to an earlier request about South Okanagan.

Please see questions and suggested responses:

<!--[if !supportLists]-->1. <!--[endif]-->**What accounts for the increase in both revenue and expense for the Park Enhancement Fund (PEF) special account as reported in the estimates?**

<!--[if !supportLists]-->• <!--[endif]-->PEF revenue and expense figures in the estimates are based on anticipated forecast amounts for each year.

<!--[if !supportLists]-->• <!--[endif]-->Actual revenues and expenses from PEF have exceeded forecasts for the past several years.

<!--[if !supportLists]-->• <!--[endif]-->This year's estimates for PEF were adjusted upwards to account for this, as well as anticipated increases in both revenue and expenses related to the Discover Camping reservation service and the new BC Parks licence plate program.

<!--[if !supportLists]-->2. <!--[endif]-->**Should the government decide to proceed with its platform commitment for protecting lands in the South Okanagan, would this fall within permitted uses of the Park Enhancement Fund (PEF) special account?**

<!--[if !supportLists]-->• <!--[endif]-->Land acquisition or park establishment is not an eligible expense for PEF. PEF funds are to be spent on enhanced services or projects related to existing provincial parks and protected areas.

Previous Request -

MLA Linda Larson told me yesterday that there was nothing in the budget update relating to the proposed national park reserve in the South Okanagan.

Is she accurate on this?

I've looked at the estimates and I do note an increase in the Park Enhancement Fund Special Account, but I'm not sure if that's where the money would be.

Could you please clarify?

GCPE responded:

• As previously stated, the Province will announce details at a later date.

Hi Caelie,

We have received a media request for consideration for an interview with Minister Heyman for CBC Radio – Vancouver.

Deadline: 6:00 am (taped interview) tomorrow for early morning show or a taped interview tomorrow at whatever time is best for Minister Heyman.

Request – We are looking to speak to George Hayman for a brief clip about the possibility of a ban on the sale of combustion vehicles in BC like the one being proposed currently in California.

Hi Caelie,

As discussed, please see below suggested response to multiple media requests on Bear 148.

The below approved quote was provided by FLNR.

Please advise on next steps, thanks!

Suggested Response:

Attributed to FLNR Minister Doug Donaldson:

In August, we committed to ending the grizzly bear trophy hunt effective [November 30](#), because the majority of British Columbians said it was inconsistent with their values.

Attributed to COS:

- The bear was shot by a guided non-resident on the afternoon of September 24th, near McBride, B.C.
- This was a legal hunt and no investigation is underway by the COS.
- The guide and hunter knew that the bear was collared prior to harvest.
- The COS obtained information from the guide and hunter.
- The COS retrieved the collar, and the collar information has been passed on to Alberta Fish & Wildlife.

Subject: RE: ATTN: Kevin Jardine, ADM, BC EAO Re: Provincial Environmental Assessment requested for the Centerm Expansion Project

Dear Strathcona Residents' Association,
Thank-you for your letter dated September 26th. I appreciate the concerns raised by the SRA regarding the Vancouver Fraser Port Authority's (VFPA) proposed Centerm Expansion Project and acknowledge your request that it be subject to a Provincial Environmental Assessment as prescribed in the B.C. *Environmental Assessment Act*. The B.C. Environmental Assessment Office (EAO) have been engaged with the VFPA regarding the proposed Centerm Expansion and are continuing to monitor its progress. I will ensure that, in light of your letter, the EAO will contact directly with senior executive at VFPA to assess the potential of any physical works or authorizations proceeding while the EAO considers your request and will respond accordingly. In the meantime, the EAO will, pursuant to s. 6 of the *Environmental Assessment Act*,

proceed to consider your request. I anticipate that we will be in a position to respond shortly (i.e. within approximately two weeks).

With very best regards,

K.
