Details

Jan. 26, 1998 - 1428 h - Env. Can Referral.

Anonymous Caller - Modco Specialty (8129 River Way) is dumping the following into a floor drain.

Ethylene Glycol, Propylene Glycol, Methanol, Fungicides and Bactericides...

Jan. 27, 1998 - 1000 h T.Loo -(Corp. of Delta - ESD) met with s.22
Modco Spec. Coatings) s.22

[T.L. Inspected the facility on May 12, 1997. Met with s.22 The Chemicals listed above are used as part of the process for producing the stucco coating. These chemicals are poured into the mixing tanks. Left over materials are used for next batch run.]

Inspected the facility. Only two floor drains were found. These were located near the loading bay doors. Floor drains covered a small drainage trench. According to plans from Permits and Lic. Dept., the drains are both connected to the sanitary sewer.

I spoke with s.22 (Modco employee). He advises that all the wash water from the tanks and drums are emptied into the wash basin. The wash basin is connected to the Sanitary sewer. GVRD Source control has permitted this connection. Ms. Sherry (Lersich - Officer (Source Control)

No evidence to substantiate the callers claims.

*Note - s.22

Faxed copies to -

Env. Can - Corine McGill
BC Env. - Avtar Sundher

No further follow up nec.

MESSAGE:

Hi Avtar!

I do believe you owe me for this one :-)

No evidence of dumping was found at 8129 River Way. We are going to write this one off as a disgruntled employee. s.22

Ciao

Thomas
