Subject: GABV Summit 2019 | An Invitation from Vancity

Dear Minister,

I am writing to invite you to attend the first-ever Global Alliance for Banking on Values (GABV) Summit—***Migrants, #MeToo, and Melting Icecaps...Redefining Banking for a Radically Different Future***—to be held February 19-20, 2019 in Vancouver, hosted by GABV member Vancity.

The [GABV](#) is an independent network of banking institutions with a collective goal of changing the banking system so that it is more accountable and transparent, supports economic, social and environmental sustainability, and serves the real economy. GABV members are committed to advancing positive change in the banking sector, exploring what needs to be done to holistically redefine the industry and its ecosystem to put it in service of people and the planet—while keeping it healthy and profitable for continued investment.

At this global gathering of bankers, regulators, policymakers, academics, social entrepreneurs, civic actors and youth, we will co-create pathways of change in banking to meet the global challenges of the future, all to answer the question: how can we put banking in service of people and the planet, while making the financial sector itself a resilient partner of society?

Visit www.gabvsummit2019.com for more information and to register.

I hope to see you in Vancouver later this year, where together we will explore how values-based banking can help us address some of the most pressing challenges of our time.

Regards,

Tamara Vrooman

President & CEO

Subject: **Protect Reed Rd Forest and Clack Creek Forest - Sunshine Coast Region**

Dear Minister Donaldson,

In a Dec. 21, 2018 letter sent to the Sunshine Coast Regional District (SCRD), the Executive Director for the Coast Region, Mr. Allan Johnsrude, address two forestry issues facing the lower Sunshine Coast - The Reed Rd Forest and The Clack Creek Forest area. These 2 forests are proposed BCTS blocks, however each has been deferred for over 4 years due to community concerns and ongoing new information bringing to light their unique ecological and recreational values.

You're aware that the SCRД is opposed to any 'forestry development' in each area. In the letter Johnsrude writes: **"Cognizant of the expressed concerns, a response to these SCRД resolutions from Minister Donaldson is expected in the near future."**

Minister, residents are wondering what the time-frame of the "near future" might be? We're concerned that if this near future is 6-10 months out, then current forest development proposals on the 2 blocks may proceed under current land use & management approaches.

We urge you to be cautious about supporting a land use plan for the Mt. Elphinstone area while at the same allowing logging to occur in the two most contentious areas. As you can appreciate - Log & Talk would not be welcomed

here.

Can you respond directly to ELF, as the lead group on these two forest protection campaigns, providing more certainty on the status of these two critical forests?

s.22

Science-based reporting by leading forest ecologist (Allen Banner, RPBio - RPF - ret.) states that the Reed Rd Forest and Clack Creek Forests are good candidates for protection due to being At-risk plant communities.

<http://www.loggingfocus.org/2018-research-reports/>

Science-based reporting by leading conservation-biologist (Wayne McCrory - RPBio) states that the expansion of the Mt. Elphinstone Provincial Park is necessary to capture diminishing bio-diversity. Clack Creek Forest is a central forest in the area providing critical connectivity between park islands #2 and #3.
<http://www.loggingfocus.org/wp-content/uploads/2011/06/Elphinstone-Conservation-Review-June-2015-McCrory-Wildlife-Services.pdf>

Thank you for your ongoing attention to The Reed Rd and Clack Creek Forests and I await more information from you on this matter.

Ross Muirhead
ELF - Forest Campaigner

Dear Honourable Members,

This could be the most important information that has come across your screen in a very long time, information from biologist Dr. Kyle Artelle who lives and works in the Great Bear Rainforest in the territories of the Haida, Gitksan, Nuxalk and Wuikinuxv First Nations:

https://www.americanscientist.org/article/is-wildlife-conservation-policy-based-in-science?fbclid=IwAR1Q3QqcCidDbb_3l0JeC3orV2O-FpFhtPG5r-lmiHJRLCFdFKexoCPlIKQ

The science that Dr. Kyle Artelle and other young scientists like Christina Service are conducting right here in BC, is done on the ground, not just from antiquated models on their computers. This is real, ground breaking science.

“Super Natural British Columbia” can either lead in conservation or we can continue to look like the country to the south of us where dangerous, antiquated policies are heralded by those that like to kill for cash, kicks and trophies, using the over used idioms that what they do is “conservation”.

Let’s please, be leaders.

Today we filed our final argument in the NEB's reconsideration of TMX. The Province's focus remains on defending the interests of British Columbians and protecting its environment, economy and the coast. Our submission outlines concerns about the ability to effectively respond to an oil spill and its impacts. It also highlights the potential impacts that increased oil tanker traffic would have on southern resident killer whales. You can read our full submission here: XXXX

Subject: Draft communique from today's meeting

Representatives from the PRRD and Concerned Citizens for Caribou Recovery met with the Provincial Ministers of Environment and Forests and Lands on January 23 at the BC Natural Resources Forum.

The meeting concluded with a commitment from the Province to initiate public and stakeholder engagement in early February on the draft Partnership Agreement to recover caribou in the Peace region. As part of the engagement the Province committed to sharing data and analyses on potential impacts of the Agreement and made a commitment to work with the PRRD on the evaluating impacts of the Agreement on Peace communities. The Agreement will not be finalized until engagement is complete and potential impacts on communities and workers are understood.
