Minister,

Our BC Park staff at Mt. Robson Provincial Park are tremendous. I was helping MLA Oakes' office checking to see if two people were stranded in the park. It's a long story.... and no one was found stranded there.

Park rangers really went above and beyond. They swept the park border, checked with the local dispatch and CN to make sure so they were taking it seriously. I asked staff to thank them and may do some recognition for them.

Some places on this Planet are priceless. The bad news is the province has assigned a \$0.00 value on this forest unless its logged!

Copyright

Stanley Park like forest conditions that would be instantly protected if found in Metro Vancouver. Easily should be valued at 1M per Ha, meaning this forest block is worth 25Million dollars, but the Crown is prepared to accept a mere 1.8M for it in stumpage! Is government getting an equivalent in goods & services in exchange for the loss of a world-class area?

Honourable Members,

Is THIS what you want for our "Super Natural British Columbia"??

By allowing the continued gratuitous killing of wolves and other carnivores, this is what you are condoning!  
(Some call wolves "predators" but as you can see in this photo, it isn't the wolves that are the predators!!)

Will you be a part of changing wildlife laws and hunting / trapping / snaring regulations to prevent this from happening?

I respectfully ask that you please answer me individually and not with a form letter or form ideas from the bureaucrats in FLNRO.

**Subject:** Please read and reconsider decisions made before it is too late

Dear Minsters Heyman and Donaldson,

I'm s.22 in favour of expanding the minuscule Mt. Elphinstone Provincial Park from 140Ha to 2,000 ha to protect red and blue listed plant communities and increase recreational opportunities for a growing regional population. The narrowly defined 'Identified Wildlife Species' approach that FLNRO used was not undertaken in good faith as it ignored broader ecological and social issues. This province faces a biodiversity deficit - this park expansion offers an opportunity to get us out of that hole. In addition, the Sunshine Coast needs to diversify its economy from resource extraction to more sustainable industries, such as tourism. First Nations could be partners in managing new campsites and an interpretive centre as a way to also diversify their base.

This forest is our last and only chance to preserve a significant low elevation natural forest ecosystem on the lower Sunshine Coast, everything else has been developed or converted to tree farms. The only sizeable parks we currently have are 3 mountaintop parks, not accessible for year round use nor are they close to where we live, work and play. We need this park to retain our connection to nature, to preserve our quality of life here, and for the generations that come after us. Planted trees farms do not meet our needs nor those of nature.

The Clack Creek Forest that connects 2 of the 3 small parcels that make up the existing Mt Elphinstone Prov. Park, is scheduled to be auctioned off to industry next month, which would permanently destroy the connectivity and integrity of an expanded park. We ask you to intervene and stop it's destruction. I also request that you instruct FLNRO staff to allow BC Parks to contribute missing information on the positive aspects of this park expansion. The additional land required for the park expansion would require less than 1% of the Sunshine Coast Forest Districts timber supply area, so little that I'm surprised we're still fighting for it.

The direction we are seeing around the globe politically with a return to the darkest of ages where violence and destruction against women, the planet and anything standing in the way of profit for the very few is seen as expendable will have future generations puzzling over the decisions made by those in power. These reflections will question why those who had the opportunities to make healthier, wiser and more life-giving decisions regarding these precious and rare stands of intact forest, that would preserve and enhance the quality of life for future generations, chose, instead, to deepen the cycles of violence and irreversible destruction. The time to decide on what side of history we all would like to find ourselves during this chapter is now. Standing by to hear some positive news from this government.

Sincerely,

s.22
