Occurance Location
SAME ADDRESS

[-]

Details:

COM reports a bb and 2 cubs have broken into her shed 11 times since September 1. It was back again Tuesday morning. She is upset that the garbage contractors and the municipality are not cooperating. The current situation with no dumpster is not working. There are 150 people sharing 8 garbage cans. Cleaning up the garbage regularly is costing her a lot of money. She does not want these bears destroyed and is hoping the Conservation Service can discuss with the city or contractor.

1.	klassen	2.5	Hours
2.			Hours
3.			Hours
Total Time Spent (hours):		2.5	Hours

Narrative:

2019-12-06 15:00 CO KLASSEN contacted COM. COM stated that the bear is still in the tree and is very small. She believes it is a COY. CO KLASSEN advised he would attend.

1530 CO KLASSEN attended residence. Bear was a COY and appeared to be very emaciated and lethargic. CO KLASSEN observed some hair loss on the snout. CO KLASSEN attempted to immobilize the cub, without success. CO KLASSEN contacted Sgt. MILLER who advised that rehabilitation center was full.

1551 CO KLASSEN contacted Helen SCHWANTJE, provincial vet, and informed her of the situation. CO KLASSEN gave an estimated guess of the COY weight as 35-45 lbs. Helen stated that there was a zero (0) percent chance that the COY, at that weight, would survive the winter.

1600 CO KLASSEN returned tot he office to get a live trap.

1655 CO KLASSEN returned to the residence. The COY was still up the tree. CO KLASSEN set the live trap at the base and covered it with a tarp. CO KLASSEN advised the COM to call the RAPP line if the COY was caught.

2019-12-07 09:03 Update #1, CO KLASSEN contacted COM and advised that he would come and get the bear cub as soon as possible.

1030 CO KLASSEN arrived at the residence. Bear was not very energetic in the trap and appeared emaciated. CO KLASSEN immobilized the COY for transport (Vial #19-04) and removed from the residence.

1050 CO KLASSEN euthanized the COY. The cub was a male, very skinny (est 30-40 lbs), was missing fir on its snout and his teeth were in very poor condition.

CO KLASSEN took photographs.

Narrative:

2019-11-27 MILLER attends Café. Find garbage all over rear of business. Inspect garbage containment area. No sufficient to prevent WL intrusion. MILLER at Pender Hbr area to deal with large bear that has been FC and HH for months. (Mostly related to garbage and prawn/fish bait). MILLER assesses bear that is day bedding in green space between café and homes. School children nearby and getting on bus. MILLER notes that bear ear is torn and indicates a previously tagged bear. Considering situation and obvious FC and HH MILLER immob bear with dart and moves to forested area for disposal and destruction. Miller notes that bear had significant brown teeth (older bear and obviously FC). Bear considerably fatter than most bears this time of year.

Narrative:

2019-11-27 MILLER attends COM property. Considering behaviour (long term FC and HH- charged COM 80yo) of bear and location MILLER sets trap for capture and removal.

Update 1

2019-11-28 1000 CO KLASSEN attended the property and picked up the bear caught in the trap. Bear was euthanized. Bear was a healthy smaller mature male.

Narrative:

2019-11-05 2048 MILLER calls COM. COM trying to get out of store. Lets employees out through mall entrance and needs to set alarm and head out back. SOW is outside corridor and cannot leave. COM has a meeting in 30 minutes and would like assistance.

MILLER 10-17 to Gibsons. MILLER contacts RCMP for assistance but they are busy.

2135 MILLER 10-8 at Super Value garbage bin. No bear on site. inspect garbage note bear prints all over ground. Ring door bell to SV and no answer. Call com no answer. MILLER about to leave when he notes sow between high school and mall parking lot. SOW is pacing back a forth staring at MILLER. COY up tree.

MILLER and KLASSEN have removed COY(s) out of bins in business area of Gibsons on three occasions previously. No second COY- unknown reason for death (MVA? Ingestion of Garbage or Toxins?). Sow down to one COY.

Dart SOW and COY on site. Call Klassen to discuss conflict history and assess removal.

Considering PS and HH and FC MILLER elects to euthanize SOW and COY. Of note there was several piles of scat loaded with plastics around mall lot.

Disperse carcasses in forest as carrion.

Narrative:

2019-10-21 10:20 s.22 in Gibsons re: bear busting in garbage storage shed area. It is stick frame construction with horizontal tongue and groove siding. Plastic wheeled garbage totes inside. Main access door opens outward. Bear has torn siding off to expose studs and try and access garbage.

Spoke to s.22 who advises that their handyman will come and do repairs today. She advises they will put plywood sheathing over the studs and then cover that with "barnboard". The entire structure will be re-sided on the weekend.

Spoke to tenants who advise there are two bears, one smaller and one very large. The large one was seen chasing and killing a deer. They also advise that the town of Gibsons provides the plastic garbage cans, but in the past they had provided steel top dumpsters.

10:30 Check RCMP to determine if there is a bear trap there. No. Contact CO KLASSEN to request the bear trap at the complex tomorrow. LISTER unable to do today due to ferry connections.

2019-10-22 14:00 KLASSEN set bear trap at the location beside the garbage enclosure. Noted that repairs had been done. Spoke to s.22 who stated that the bear had returned again last night, but was not successful in accessing the garbage. Advised s.22 to call the RAPP if a bear is caught.

2019-10-23 0910 KLASSEN picked up the bear caught.

1130 KLASSEN euthanized the bear. Bear was a healthy male.

2019-11-29 1440 KLASSEN contacted bylaw in Gibsons. She advised that she had already call s.22 and got them to put a metal bin at the complex.

1450 KLASSEN contacted the COM and informed her to rebuild the structure again and once the metal bin comes, the bear issues should dissipate. COS to monitor.

Narrative:

2019-08-26 13:05 LISTER attempted to contact com but no answer and no vm option. Email sent to CO KLASSEN requesting he follow-up tomorrow. A site visit should be made to inspect the enclosure and provide advice on better construction and design.

2019-08-27 1000 KLASSEN contacted COM. COM stated that the district took away their old metal garbage bins and replaced them with plastic residential bins. As a result, an enclosure has been built and broken into on at least three occasions, each time rebuilt. COM stated that the district cannot issue a metal bin as it cannot be picked up. CO KLASSEN advised that he would do a site visit soon. COM sent CO Klassen photographs of the enclosure. CO Klassen suggested using electric fencing. Enclosure appeared adequate. No ATB reported; bear causing property damage. This bear is know to COS.

CO Klassen spoke the District of Gibsons and they stated that the new company they switched to cannot issue metal bins.

2019-08-29 CO Klassen attended the site and looked at the structure. CO Klassen set a culvert trap at the address.

2019-08-31 0800 CO Klassen received a call stating a bear was caught in the trap.

1000 CO Klassen attended and removed the bear. Bear euthanized. Healthy male BB. no injuries.

Narrative:

2019-06-25 1300 MILLER receives call from ECC of bear in park accessing kids packs. COM reports that bear has returned 3 times and does not appear to be interested in leaving. MILLER aware of bear conflicts in park for past 3 months. HH and FC bear that has entered vehicles and accessed coolers where public nearby. MILLER phone call to Insp SMITH who is at office. Request Insp SMITH attend and assess situation while MILLER on route. 1325 MILLER arrives at lower park. SMITH identifies bear in day use area. MILLER loads SG with Slugs and follows bear into forested area adjacent to parking lot. MILLER finds high point looking down on bear and discharges two slugs into bear. Bear hauled out in Insp SMITH truck. MILLER remains on site to speak with bystanders and school teachers. Explain the potential safety risk with HH FC bear and need for destruction. MILLER returns to Office and transfer bear into Sgt PV. Bear healthy male approximately 230lbs+. Speak to BC Parks Rod Daziel who will erect bear in area signs in park to alert users of potential for bears to be in area and contain food in controlled space. PFO's who run park are notified of destruction. Bear taken to forested area above HMBay and dumped for carrion.

Narrative:

2019-06-24 1900hrs CO MILLER and KLASSEN attend farm on s.22 . Speak briefly with residents who confirm two sheep kills. Walk to site of kills. Both noted to be killed by cougar (guts out, precision cuts to torso, neck puncture wounds). COM confirms that kill happened in last 18 hours as did a count last night of all 16 sheep. Other sheep moved to paddock for safety. COS drag mostly intact carcass to forested area adjacent to kill site to protect from vulture feeding. Set group anchor with 6 foot holds. Set sheep carcass as bait. Safe site approx. 200m from house. Bear approaches CO's who scare bear off and then make attempt to destroy. No destruction. Advise farmers of protocols with traps on property (dog, do not approach trapping area).

2019-06-26 17:00 CO Klassen arrived at farm. No new activity seen by COM. CO Klassen went to pull trap. Upon approach heard huffing. Closer inspection showed a capture of a black bear that was the same size with the same tan muzzle as the bear that had silently approached officers setting the trap on the 24th. CO Klassen euthanized the bear. Black bear was a healthy female with no signs of injury. Both bear and trap were removed from the property.

1620 hours CO Klassen disposed of bear.

Narrative:

2019-06-21 12:40 called and spoke to COM who will wait for someone to arrive. Sgt Miller advised he was 10-17. AA

2019-06-21 1240 MILLER signed on with RCMP. ECOM has file member attending. MILLER drives to office to get work PV. Suits up and 17 to site. 1320 arrive and not sow alive on side of road but cannot move. Significant damage to torso. Meet with COM RCMP and Hwys. COM points out three COYs in tree on lower side of hwy. RCMP assist with sow destruction. MILLER walks down to COY tree. Note three small cubs. Return to SOW- note very skinny which explains the limited growth of COYs. MILLER uses Telizol to immob one of the three COYs. Load in bear carrier. Bring hava heart style trap to base of tree. considering COY's too high in tree for immob attempt. Bait and anchor trap. Load SOW and dispose of in forest as carrion. Take COY to home shop as Parks office not appropriate with staff and heat. Able to feed COY apples and carrots and water. Keep cool in shop.

2030 Return to site with trap. No COY in trap. Up tree. Good height for capture. Dart one COY safely. Return home to put in same cage with sibling.

2019-06-22 1000hrs. Check trap for second time for last COY. Not in trap and not in same tree. Check hwy for MVA. Assume COY travelled on. Wait for report from public if COY ventures into HMBay residential areas. Phone Critter Care. Able to take COYs will be in tomorrow

Feeding intervals- every 6-8 hours (water, apples, bananas, milk and bread.

2019-06-23 0900 Bring two coy to office. Place ear tags in each bear. 2-170 male right ear. 2-180 female left ear.

1100 ferry to LML. to Critter Care.
 1330 drop off COYs at CC.

Officer(s) Assigned	Time Spent	
1. Klassen	.25	Hours
2. LISTER	.25	Hours
3. anaka	.5	Hours
Total Time Spent (hours):	1	Hours

Narrative:

2019-05-31 1100 hours CO Klassen called COM. Provided information on attractant management; advised that attracting dangerous wildlife is an offence under the Wildlife Act; no aggressive threatening behavior reported; bear is food conditioned to non natural food sources. COS to monitor.

COM advised that they would empty the freezer and get the door fixed immediately. Advised COM to report future sightings. Trap to be set in this location when available.

2019-06-15 1630 hours. CO Klassen set a culvert trap at the residence.

2019-06-16 2130 hours bear in trap. CO Klassen responded. Bear removed from property and euthanized. BB was a healthy female with no visible injuries. Yellow Tag in right ear 2-072. No history of this tag number could be located.

2019-06-18 09:56 LISTER contacted com re: UPDATE 6!!!! Com states that garbage bin was "wired to a post, had garbage in it, and they've never had a problem before." LISTER stated that everyone says they've never had a problem, but when bears are hungry, then they do. Reminded her that other officers have spoken to her about attractants and that her situation does not sound acceptable. She advises that the can is no longer there and is now stored inside. Com could not listen to the lecture she was about to receive as she had to go on a conference call. She is around tomorrow until about 14:30, so LISTER advised her than an officer may stop by....

2019-06-20 14:47 Attend, gate closed. Garbage bin receptacle beside driveway/road. 3 empty trash cans inside, not bear resistant, plywood construction with steel doors and gate latch. Immediately waived over by neighbour directly across the street. She stated that the people were not home. But she stated that a few days ago her husband cleaned up the garbage from the bin, strewn all over street. There is now a second bear in the area. She has questions about bear safety as she has grand children (pre teen) attending. Suggested visiting Wildsafe BC website and sitting down and having a talk with the kids when they arrive. Purchase a can of bear spray and an air horn and have on hand. Call RAPP# is bear becomes aggressive. AA

Narrative:

2019-05-27 0900 MILLER pc to COM. Details on bears up tree. Not a family unit. Two adult bears. COM reports that bears continue to B+E homes and sheds in area for past month. The gated community is bear aware but bear continues to be active. MILLER aware from previous year that bear B+E homes in area and COS failed to capture using live trap during summer and fall 2018. All reports indicate that a smallish 3-4yo bear the one B+E homes. 1145 MILLER attend site. Bears up tree at waters edge. No significant ATT noted other than a bag of paint balls that bears consumed. Considering the number of reports and the level of conflict and the remoteness of the cabins MILLER elects to destroy smaller of two bears as described in all reports. Remove bear from site. Issue DWPO to COM and her sons and explain the need to clean up all food "like" substances and any items that has food smells (namely fridge).

Narrative:

2019-05-27 0750 MILLER attends with RCMP members. Bear in car since 3 am. Bear adult male. Bear lethargic as limited OX in car (no windows down). Miller uses dart and shoots from rear door into rear qtr. Bear becomes dazed but does not go fully down. Wait another 30 minutes and instruct RCMP that COS is going to destroy as bear exits vehicle. MILLER opens door and bear walks out then full run up hill. No safe opportunity to shoot bear. Advise CO KLASSEN to set trap.

2019-05-28 1230 CO KLASSEN set culvert bear trap at the COM's property. Advised COM to call the RAPP line of a bear is successfully trapped.

2019-05-30 2100hrs MILLER advised by ECC that bear in trap. MILLER attends to find very similar sized bear to one found in car. MILLER destroys bear and dumps carcass in forested area.

Total Time Spent (hours):	0.25	Hours

Narrative:

2019-05-15 1643 hours CO Klassen called COM and left voicemail. Requested a call back to gather more information. COS to monitor.

1650 CO KLASSEN received a call back from COM. COM stated that this bear has been an ongoing issue. The bear has already broken into his brothers van, which was written off (not reported to COS, but to RCMP), and has made numerous attempts to break into his mother in laws car. The bear come onto the property at least twice a day during daytime hours.

COM's mother in law did have a hummingbird feeder on the porch, but has since removed it and the bear continues to come onto her property and her porch.

Bear in residential area, with immediate escape route and caused property damage. Trap to be set.

2019-05-16 1500 CO KLASSEN set a culvert trap at s.22 .

2019-05-17 1052 MILLER receives call of bear in trap. Attend to find large male bear who COM confirms looks very similar to bear in conflict. MILLER destroy and dump carcass in forested area above Sechelt.

3.		Hours
Total Time Spent (hours):	2	Hours

Narrative:

2019-05-14 16:00 CO KLASSEN responded to the reported area. Nothing seen upon arrival.

16:12 CO KLASSEN contacted COM from update 1. COM stated that the last known location of the bear was climbing over the fence at s.22

16:20 CO KLASSEN walked up the driveway of s.22 and located the injured Black Bear. The bear was the size of a yearling, with no Sow in sight. The bear was bedded down underneath a bush beside the residence. Observed that the front right paw was noticeably deformed and not weight bearing, Observed blood coming from the nose and observed that the bear was not moving much, shaking and could not climb the near by fence to escape. The residents at the address stated that the bear had gotten into residential garbage the previous night.

16:40 CO KLASSEN immobilized the yearling (Zoetel #18-534). CO KLASSEN assessed the animal and a decision was made, based on it physical condition, to euthanize. Bear taken off site.

17:30 CO KLASSEN euthanized the yearling bear.

		3.		Hours
		Total Time Spent (hours):	12.5	Hours

Narrative:

2018-11-14

0900 MILLER receives pc from s.22 (RP Biologist - contractor) stating that Narrows camp hydro project has habituated a bear in its camp. Conversation regarding violation in permit conditions concerning camp set up and lack of e-fencing. s.22 to provide email with details to MILLER. Ask s.22 to contact camp and ask safety manager to report to RAPP which initiated this HWCR.

0945 MILLER phone call with camp safety mgr s.22 . Discuss the situation.s.22 describes human habituation and food conditioned bear. Camp has an in ground grease waste system with a lumber top that the bear has ripped apart on several occasions. More extreme conflict in the last 4 days. Bear no longer responding to air horn or human presence (yelling). No bluff charging but bear described as very large. Confirmed features of a black bear but s.22 admits there is a grizzly bear with COY within 2 kms.

MILLER and DEPTUCK look at Bear Resp Matrix and determine E-3/4. Considering remote location (marine access) COS to make action priority.

1245 MILLER/DEPTUCK 10-17 to camp via parks open vessel.

1350 Meet with s.22 at camp. Run through conflict patterns once more and potential attractants. s.22 states that camp with out conflict for last 3 years. Note two waste containment tanks below ground with 6" openings accessible above ground. Camp maintenance fitted framed 2x6 plywood skinned covers over openings. Openings appear to have considerable bear claw and teeth marks. Unknown how and if bear actually accessed grease inside tank considering narrow opening created in plywood. Current attractant containment considered to be bear resistant not bear proof. Note two generators running near conflict site. Conflict location within 5' of occupied area and adjacent to staff walk ways. Manager concerned that some staff have been surprised by the bear while returning from the work site. Bear appears to have lost all fear of humans and human activity. Sgt MILLER asks if staff have been seen feeding bear. Considering the level of habituation and the likelihood that the bear has not received much food reward from the grease containers it is possible another food source exists. Manager explains that garbage is either burnt or shipped off site. Set snare at one location. Attempt to set second but broken piece from pot snare. Review safety protocol with snare. s.22 set barrier to snare location using heavy machines around snare site.

2018-11-15

0830 Phone call with s.22 reporting conflict that occurred overnight. Bear focused on two other areas of camp, did not go by snare. MILLER explains that bear may try later.

1710 MILLER phone call from s.22 Bear in snare. Consider light conditions (darkness) for safe marine operations. MILLER and s.22 arrange for transportation with Marine Fast response vessel.

1840 MILLER meets Mike at Sechelt dock. 10-17 in 9m RIB to Camp.

1940 MILLER meets s.22 at site. Assess bear. 300-350lb male bear. Use immob dart. Bear slowing down at 10minute mark but does not go out fully. Second dart in bear 15 min mark bear still not totally out. Elect to destroy bear on site. Remove from snare. Clean up site and remove equip.

2040 Place bear on RIB vessel. 10-17 to Sechelt Inlet . Sink eviscerated bear in deep waters.

2210. 10-35

2018-11-16 0830 Various phone calls to s.22 and Band Project manager to discuss conflict and outcome. COORs file to notify Camp company of attractant management issue.

Complainant Contacted:	Yes	2.		Hours
		3.		Hours
Total Time Spent (hours):			3	Hours

Narrative:

2018-09-01 1300hrs CO MILLER during time off noted a large black bear in his neighbourhood between s.22 . The bear was noted walking into elderly neighbour s.22 backyard. MILLER observed bear reluctance to move when neighbours banging pots and yelling at the bear. MILLER attempted to move bear with banger from PV. Bear moved into treed area below s.22 .

1830hrs. MILLER's wife received phone call from neighbour on s.22 reporting that bear has been in yard for 40 minutes. Bear will not move with noise from callers husband s.22 . Neighbour is concerned because she has 2 kids and there are several families out walking in the evening.

1845 MILLER Attends on foot with hazing gear. MILLER attempts to push bear off property with physical dominance presence. Bear bluff charges MILLER.

Considering human habituation and ATB MILLER elects to remove from population.

Bear immobilized and transported to HMB FSR and destroyed. Carcass disposed of in forest.

Narrative:

2018-08-01 10:00
 DEPTUCK Called COM and requested COM to call back for more information.

2018-08-01 10:27
 COM returned call. COM described larger black bear that entered studio around 1600 July 31, 2018. When COM approached studio he witnessed a black bear with a bag of raspberries in its mouth. COM yelled at bear and waived his arms and the bear ran away. Once COM entered studio he noticed the deep freeze was tipped over. COM mentioned that studio door may have not been latched closed.

2018-08-05 1030 MILLER attends bear in trap to find adult male bear. Prior to leaving with trap Miller attends COM residence to inspect for o/s attractants. Nobody home. Did not see anything from walk up to house.
 Assign CO DEPTUCK to follow up with COM on potential attractant issues.

Outcome Report

Action Required: Yes**Sergeant Reviewed:** Yes**Ref. Report #:****Concluded On:** 2018-05-30**Attended:** Yes**Complainant Contacted:** Yes**Officer(s) Assigned****Time Spent**

1. MILLER	7	Hours
2. LISTER	4	Hours
3.		Hours
Total Time Spent (hours):		11 Hours

Narrative:

2018-05-02 Miller phone call to COM who provided details of habituated bear pushing open the green house panels to access the tomatoes. COM is concerned that the bear is in confined area with his staff. COM would like to see trap for safety of staff and loss of income from crop loss. Matrix notes bear remove from population/destroy.

2018-05-03 MILLER sets trap near greenhouse. Advised com to keep dog a staff away from trap. Call in captured bear immediately.

2018-05-04 0800 bear in trap. 1300hrs Miller responds to Bear in trap. Large male bear in trap. Note significant amount of tomato skins on floor of trap. Link to property damage and HH conflict bear. 1430 Destroy bear and dispose on local FSR. Contact Wildsafe coordinator program (No coordinator working on coast for another two weeks). Provide issue and site details for action when coordinator starts.

2018-05-08 17:29

LISTER spoke to s.22 about the situation and advised he will be down there on Thursday and will stop in and figure out a course of action, and likely bring the bear trap back later in the day on return trip to Powell River.

2018-05-10 18:00

LISTER set bear trap set again at s.22 greenhouse

2018-05-11 12:16 reviewed by Insp SMITH

2018-05-12 08:15 MILLER notified that bear in trap. 0840 MILLER departs HMB to Gbay to pick up trap. Find large adult male bear. Discuss need for proper fencing around greenhouses with s.22. Concerned about price and safety. Explain rough prices and long term benefit on bear damage on equipment. Remove bear and trap. Destroy at Middle Pt FSR and dispose of carcass.

2018-05-15 MILLER responds to another conflict bear in s.22 greenhouse. MILLER sets trap and request than COM report any activity or bears entering greenhouse.

2018-05-20 MILLER called by RAPP OO. Bear in trap. 1000hrs pick up bear in trap. Bear #3 taken to Middle Pt FSR and set loose as scat in trap not consistent with tomato or cucumber- possible recent conflict bear. MILLER notify new Wildsafe coordinator of issue at s.22 seek longterm attractant solution. Explained that s.22 is open to e-fence install but does not know how to make it work.

2018-05-30 12:30

LISTER attended and began the conversation advising s.22 that COS could not continue to remove bears from the location unless s.22 takes steps to prevent the situation. LISTER provided s.22 with lots of advice regarding electric fencing around his greenhouses; use of motion activated shrill siren at front entrance; nail boards as temporary measure, and making contact with Ministry of Agriculture to inquire about assistance, either financial or with additional advice. Also advise him I will engage Wildsafe coordinator who can work with him on design and implementation. s.22 very receptive and appeared appreciative of the information and advice. Note he already has a heavy duty agricultural electric fence charger, and has been told by the BC Vegetable Growers representative that he needs to clear a 3 metre swath around the perimeter of his greenhouses, which of course is a good start for installation of e-fencing.
