Hey Stu,

I am currently attempting to assist in the coordination of the logging truck incident that occurred last night. I have received a call from EMCON's Road Foreman Dean Archibald looking for assistance and guidance on the associated clean-up that needs to occur.

I have been attempting to make direct contact with ICBC Commercial Claims but have not made direct contact yet. I have forwarded the associated information required for them.

From my understanding it is located within the MOTI ROW a few things will need to occur for an environmental clean-up of the Diesel lost from the ruptured Saddle Tanks.

Emergency Response Clean-up Contractor – i.e. Heatherington Environmental, NuCor Environmental or a QM Environmental or response contractors that have an understanding of what needs to occur.

Continue to liaise with ICBC Commercial Claims – as they will have the file and will be working with the Trucking Company to ensure that the delineation of contamination concerns are mitigated.

If you have any questions regarding this process please contact me directly.

John Kervel,
Environmental Emergency Response Officer

Hello Kim,

See below – have a couple questions. I've also sent it to Brad as I am not sure if a file was created or not.

Cheers,

JK

Hey Guys,

So I had an opportunity to head out to this incident site this morning. I am not sure when or who conducted the recovery of the rig or if an assessment of impacts to the environment was done. There was a strong noticeable smell of Diesel and lots of debris from the wreck itself. If one of you has the time please get back to me **s.22**.

Cheers,

John Kervel,
Environmental Emergency Response Officer
