WILDLIFE NECROPSY
WILDLIFE HEALTH ID: 20-008
March 26, 2020

A mature adult, male wolf was provided to the wildlife veterinarian by CO Kissinger at 8 AM, March 26, 2020. s.16 in a fresh state and transported to the Nanaimo Regional office for necropsy.

NECROPSY FINDINGS:

The necropsy was performed at noon. The carcass (as presented) weighed 65 lbs. There was significant subcutaneous fat. A bullet entry site was noted caudal to the left shoulder with the trajectory wound passing through the thorax and into the right shoulder area. A large blood clot was covering the lungs and heart on opening the thorax. The left upper lateral 2nd to 5th ribs were fragmented by the bullet and the ventral trachea and both cranial and middle lung lobes were lacerated. On removal of the lungs and heart, 10 hard, oblong, pale masses from 1 – 2.5 cm in size were observed on the right 10 ribs, midway up the thoracic wall in a lateral chain. While the ribs were rigid, the bone was easy to cut through, above and below the masses. There was significant fat in all body depots. The stomach contained most if not an entire adult beaver. The remainder of the gastrointestinal tract was not examined. The carcass was labelled and frozen.

COMMENTS:

The wolf was in excellent body condition and appeared to have been feeding on natural food sources. There was a significant pre-existing injury of the thorax where 10 ribs on the right side of the animal appeared to have been fractured and subsequently healed. However, it is also possible that the rib lesions are from a chronic infection so laboratory work is needed to confirm the cause of these rib lesions. The cause of death was gunshot and the death was immediate.

Thanks Mike...I am available on cell at s.22

From: Liedtke, Michael ENV:EX
Sent: March-27-20 9:46 AM
To: Norris, Scott ENV:EX
Subject: RE: trespass and possession

As I understand it, the person has not acquired a "right of property" - the animal needs to be "lawfully" harvested, which can't be the case if you were in trespass at the time it was hunted/killed.

s.14

You can seize the animal.

I can recall a case in the Kootenays where a hunter was otherwise in compliance with the Wildlife Act, but shot an elk in a no shooting area under a regional district or local municipality bylaw.s.14

s.14

Property in wildlife

- 2** (1) Ownership in all wildlife in British Columbia is vested in the government.
- (2) A person does not acquire a right of property in any wildlife except in accordance with a permit or licence issued under this Act or the *Animal Health Act* or as provided in subsection (3) of this section.
- (3) A person who lawfully kills wildlife and complies with all applicable provisions of this Act and the regulations acquires the right of property in that wildlife.

(4) If a person by accident or for the protection of life or property kills wildlife, that wildlife, despite subsection (3), remains the property of the government.

(5) Despite anything in this Act, no right of action lies, and no right of compensation exists, against the government for death, personal injury or property damage caused by

(a) wildlife,

(a.1) controlled alien species described in paragraph (a) of the definition of "species", or

(b) an animal that escapes or is released from captivity or is abandoned

in British Columbia.

Subject: trespass and possession

Hi Mike

Do you have any case law regarding trespassing and possession of an animal harvested?

Basically, if you harvest an animal while trespassing, do you still retain the right to possess it?

Thanks,

Scott

WILDLIFE NECROPSY
WILDLIFE HEALTH ID: 20-008
March 26, 2020

A mature adult, male wolf was provided to the wildlife veterinarian by CO Kissinger at 8 AM, March 26, 2020. s.16 in a fresh state and transported to the Nanaimo Regional office for necropsy.

NECROPSY FINDINGS:

The necropsy was performed at noon. The carcass (as presented) weighed 65 lbs. There was significant subcutaneous fat. A bullet entry site was noted caudal to the left shoulder with the trajectory wound passing through the thorax and into the right shoulder area. A large blood clot was covering the lungs and heart on opening the thorax. The left upper lateral 2nd to 5th ribs were fragmented by the bullet and the ventral trachea and both cranial and middle lung lobes were lacerated. On removal of the lungs and heart, 10 hard, oblong, pale masses from 1 – 2.5 cm in size were observed on the right 10 ribs, midway up the thoracic wall in a lateral chain. While the ribs were rigid, the bone was easy to cut through, above and below the masses. There was significant fat in all body depots. The stomach contained most if not an entire adult beaver. The remainder of the gastrointestinal tract was not examined. The carcass was labelled and frozen.

COMMENTS:

The wolf was in excellent body condition and appeared to have been feeding on natural food sources. There was a significant pre-existing injury of the thorax where 10 ribs on the right side of the animal appeared to have been fractured and subsequently healed. However, it is also possible that the rib lesions are from a chronic infection so laboratory work is needed to confirm the cause of these rib lesions. The cause of death was gunshot and the death was immediate.

DISTRICT OF ELKFORD

BYLAW NO. 747, 2014

A bylaw to regulate the discharge of Firearms

The Municipal Council of the District of Elkford, in open meeting assembled, enacts as follows:

1. Citation.

This Bylaw may be cited for all purposes as "District of Elkford Firearms Regulation Bylaw No. 747, 2014".

2. Definitions:

In this bylaw:

Bow means a longBow, recurve Bow, short Bow, compound Bow or crossBow from which any arrow or bolt may be discharged by means of a Bowstring and that is capable of causing serious bodily injury or death.

Bylaw Enforcement Officer means any member of the Royal Canadian Mounted Police, British Columbia Conservation Officer Service, a Bylaw Enforcement Officer or any Person appointed by Council to enforce this bylaw pursuant to s. 264 of the *Community Charter*.

Council means the Mayor and Council of the District of Elkford.

District means the District of Elkford.

Firearm means a barreled weapon from which any shot, bullet, or other projectile can be discharged by means of an explosion, compressed gas or spring and that is capable of causing serious bodily injury or death to a Person. This includes rifle, shotgun, handgun, pellet gun, BB gun, spring gun, paintball gun and includes any frame or receiver of such a barreled weapon and anything can be adapted for use as a Firearm.

Person means any individual, corporation, partnership, association or other legal entity and includes any trustee, executor, administrator or other legal representative.

3. Discharge of Firearms

3.1 No Person shall discharge or cause or permit to be discharged a Firearm or Bow within the area of the District of Elkford as shown on Schedule 'A' attached hereto.

3.2 Notwithstanding 3.1 a Peace Officer, an employee of the Province of British Columbia, Government of Canada or the District may discharge Firearms, within the District of Elkford, when required to do so in the performance of their duties.

3.3 No provision of this Bylaw shall prevent or restrict the discharge of a Firearm under the Livestock Act, in the District of Elkford.

4. Permits

4.1 Notwithstanding Section 3.1 a permit may be issued to a Person or organization for the discharge of Firearms within the No Discharge of Firearm Boundary for a special event or festival and the permit issued shall be in the manner of Schedule 'B' attached hereto.

4.2 Any permit issued pursuant to the provisions of Section 4.1 may be cancelled by the Bylaw Enforcement Officer or Corporate Officer for any just cause or reason.

4.3 Applications for a permit must be made in writing and deposited with the Corporate Officer and must clearly indicate the purpose for which the permit is required; the time and place at which the use will take place; the Person who will be responsible; and any further information which the Corporate Officer or the local police department may require.

5. Enforcement and Entry

5.1 A Bylaw Enforcement Officer is authorized to enforce this bylaw and to enter, at all times, on any day, upon any property within the District if the Bylaw Enforcement Officer has grounds to believe that the provisions of this bylaw are not being complied with to ascertain whether there is compliance with the provisions of this bylaw.

6. Offence

6.1 A Person is guilty of a contravention of this Bylaw and commits an offence who:

- a) violates any provisions of this bylaw;
- b) causes or permits any act or thing to be done in contravention or violation of any provisions of this bylaw; or
- c) neglects or omits to do anything resulting in contravention of this bylaw.

6.2 For each day that a contravention of this bylaw occurs, such shall constitute a separate and distinct offence.

6.3 Every Person who commits an offence under this bylaw is liable to:

- (a) a fine and penalty of not more than \$1,000.00 and not less than \$100.00 for each offence if issued a municipal ticket under the District Ticket Information Bylaw or any amendments thereto; or
- (b) a fine and penalty of not more than \$10,000.00 and not less than \$500.00 for each offence if prosecuted pursuant to the provisions of the *Offence Act*, R.S.B.C., Chapter 338.

6.4 The District may restrain a Person who contravenes this bylaw by making application to a Court of competent jurisdiction for injunctive relief in addition to any penalty that may be imposed pursuant to s. 6.3 hereof.

7. Repeal

1. 7.1 The District of Elkford Firearms Regulation Bylaw No. 276, 1984 and all amendments are hereby repealed.

Read a first time this 9th day of September, 2013.

Read a second time this 14th day of July, 2014.

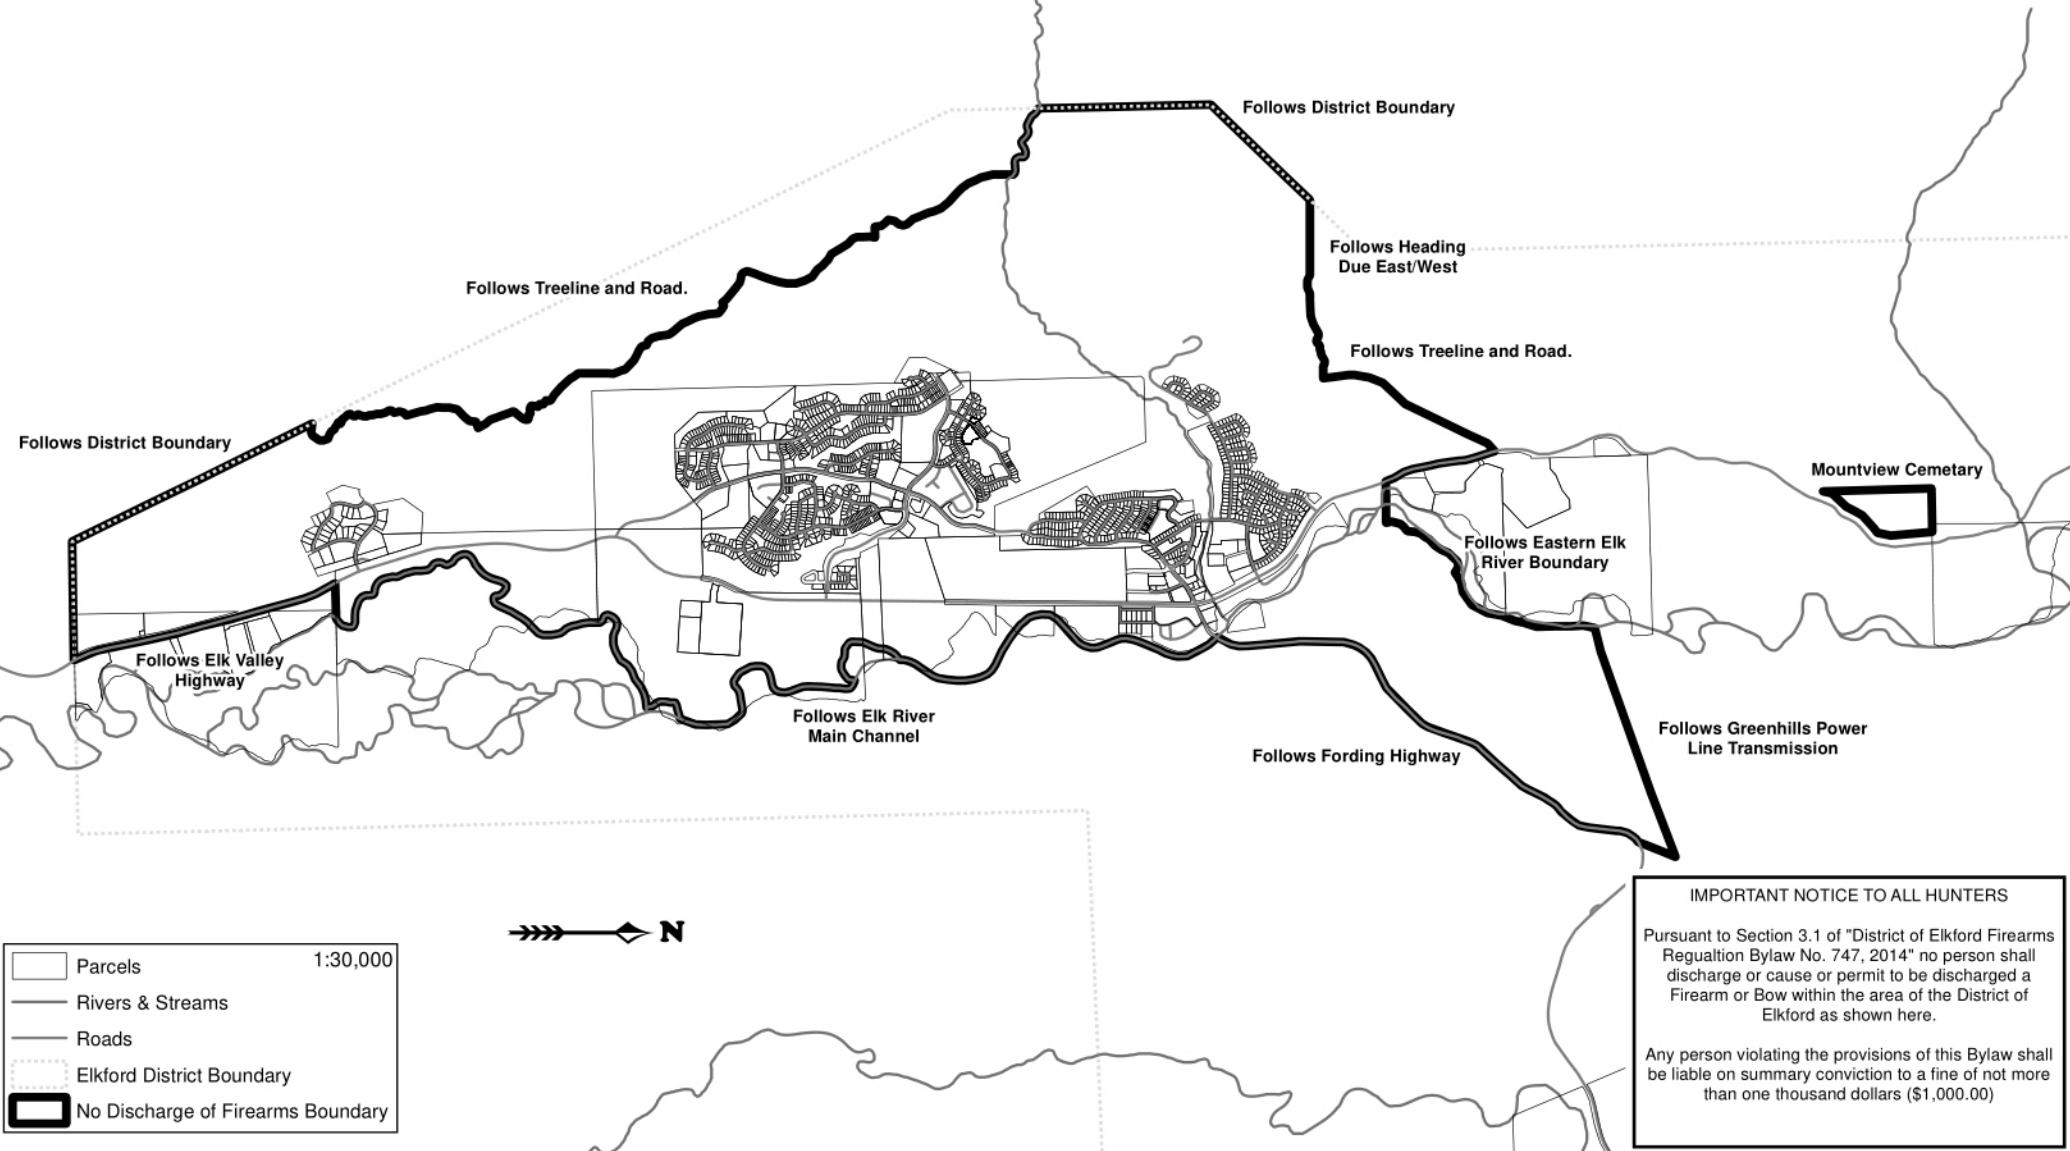

Read a third time this 14th day of July, 2014.

Adopted this 28th day of July, 2014.

Hi Robin,
This is Cheryl Alexander. I met you out in Port Renfrew a couple of weeks ago when you were attending a call about Takaya.

i've just received word that Takaya may have been shot up near Shawnigan. This wolf apparently had an ear tag.

Is Takaya the only wolf with an ear tag?
I am very upset and would like to speak with you about this.
Please call me urgently at ^{s.22}
Thank you,
Cheryl

I just spoke to Cheryl
Mike she will likely call you
She is highly interested in a legacy for this wolf and wishes to purchase the hide And or bury him on the island
Stay tuned

Helen

Subject: Filmed interview request for Knowledge Network - documentary on wolves

Dear Mark,

I am a writer and filmmaker based in Vancouver currently working on a feature documentary for the Knowledge Network on the relationships between people and wolves and wolf dogs. Through this film, we hope to raise awareness, and examine the nature of our engagement today with the wild through different lived experiences in which people get closer to wolves and wolves get closer to people, and the impacts.

We have followed the recent developments about the wolf that appeared in James Bay, and I am wondering if you would be available for a filmed interview to discuss the presence of this wolf in an urban neighbourhood and how you handle relationships with residents when things like this happen. I am also wondering if you have had experience with wolves or wolf dogs in the past that you could share.

If you are willing to do this, we would be happy to travel to Victoria to meet you. Sometime between February 6 and 13 would be great if you have time then. If there are other people that you think we should also speak to about this please let me know.

Please let me know what you think, and if you would like, I will be happy to have a phone conversation first about the film we are making.

Many thanks, and I look forward to hearing from you.

Best,

Isabelle

Subject: FW: Takaya / wolf in Port Renfrew
Date: March 4, 2020 8:42:39 AM

FYI

I got a excellent trail camera of Tanaka on private property just off Island road Pt. Renfrew last Thurs.

I received another picture from a guy who swore there was no ear tag when he saw a similar wolf exhibiting habituated non natural behaviour around his great pyrenes around the same time.

The coat and markings looked to me like tanaka. This wolfs interest in dogs and no real fear of humans made me question if there were two wolves.

I agree after being on scene and having her verify the markings.

Only one lone wolf being sighted in this area.

According to residents, local dog, walkers, first nations, and photographers there is another active pack in this area. Not seen much....

Subject: Takaya / wolf in Port Renfrew

Hi Robin,

Really appreciated meeting you yesterday and also that you took time to talk and provide the conservation perspective.

I have viewed the video from the property owner at the end of the road and it is definitely Takaya - there are not two wolves on Island Road.

Hopefully this makes it easier to address this challenging situation and find a way for Takaya to stay safe.

I will be in touch again shortly with further thoughts.

with gratitude,

Cheryl

Subject: Enquiry about Takaya for BBC News

Dear Mark,

I hope this email finds you well. I am contacting you from the BBC in London. Our channel released a film about Takaya last year and it had a great impact amongst our audience. The ratings for that film doubled the average and people still have a strong interest about the fate of Takaya.

First of all I would like to praise your conservation efforts and the fact that the wolf was not shot but relocated. Our viewers are very pleased about that.

We are preparing another piece about Takaya, after the recent events, and I would like to kindly ask for your assistance with information.

- Why do you think that Takaya left the island after 8 years ?
- where was he released and is it similar to the coastal habitat where he is used to hunt ?
- Our viewers were very moved by Cheryl Alexander's relationship with Takaya. Was she involved in Takaya's release ? Did she play a role in identifying that it was Takaya ? Was she allowed to see him at any point ?

Thank you so much for your help on this matter and I am looking forward to hearing from you. I am happy to give you a call if you prefer to talk over the phone.

Best wishes

Subject: RE: TAKAYA

Hi s.22

Thanks for the photos! He does look like he is less than two in the initial photo. Since that makes him at least 8 years of age, lets go with that. His challenge is to find a new habitat. Wolves do this all the time. Packs get broken up and they redistribute. If he encounters an established pack he will likely avoid them but no one can predict that he will be accepted or attacked. If he finds another single wolf he may have company. He is quite a unique fellow so I think the best result is that we never do know – I wish him well.

Subject: Re: TAKAYA

Hello Helen...

Thank you for responding to my query and the information you provided. The one question I have concerns his age and whether it is possible to ascertain what that might be? I have sent you some images of Takaya that you can do with as you please.

This image is of Takaya when I first encountered him on 19 September 2012. He seems fully formed to me, but to a Veterinarian he may show some immaturity. For some reason we thought he might be a least two years old. What is your more knowledgeable assessment based on the image?
<image001.jpg>

Over the many years that I have observed him from my kayak, he doesn't seem to have altered in any significant way regarding his physical structure. His fur coloration has

altered slightly over the years.

<image002.jpg>

This image provides details about his head and upper body. Although it seems that I am fairly close, the lens I employed was 600mm.

<image003.jpg>

From our observations over the last seven and a half years, his nose seems to be the one part that has been injured most often. Encounters with River Otters and Harbor Seals would I suspect be the cause. He also had a burden of fleas as we would see him scratching himself on numerous occasions.

He is certainly a remarkable, adaptable and intelligent animal. Hopefully those characteristics will insure his continued survival.

From your own prospective and years of study, what do you think his biggest challenges will be in the coming months? Kindest regards, s.22

On Jan 28, 2020, at 10:07 AM, Schwantje, Helen FLNR:EX
<Helen.Schwantje@gov.bc.ca> wrote:

Hi s.22

I have not and did not plan to produce anything formal. What was it you were looking for?

The wolf was an adult male of a similar coat colour to the wolf on Discovery/Chatham Is. He had one partially broken canine tooth, again similar to that wolf. He had recovered from an anesthesia the previous night and was alert and stable. I did not resedate him but after a visual examination and discussion with the Conservation Officer confirmed the wolf to be in good body condition, with a good haircoat and no injuries.

Due to his history and behaviour there was no reason not to release him. A hair sample was collected from between his shoulder blades and that is now archived at this time. He has a small yellow standard BC Wildlife ear tag as is done routinely after immobilizing wildlife. I do not have any photographs but know that there are lots out there.

Best,

Helen

Hello Helen...

Could you inform me about the availability of any report concerning the recent assessment prior to release of Takaya, the western wolf that had resided on the Oak Bay Islands beginning in June 2012. I first encountered Takaya on 19 Sept. 2012 and have had numerous encounters with him while kayaking amongst The Islands. If you would please inform me about any report and if a person could purchase it I would be most appreciative. Kindest regards, s.22

To: Schwantje, Helen FLNR:EX <Helen.Schwantje@gov.bc.ca>

Thanks Helen,

It is kind of amazing ...whether it is Takaya or not!
The CO has said the ear tag is in the right ear???
I'm assuming you know which one you put it in...

Would the ear tag be visible from the back or side?
Or is it just inside the ear?

I have only seen one photo and it isn't of good enough quality to say for sure whether it IS or is NOT Takaya.

Could be.

It also could be that lone dispersing wolf that showed up on the end of 10Mile Point and then lived in the Blenkinsop valley for nearly four months. Last report of her was Sept near Elk Lake.

If they get some good images I will be able to tell whether it is Takaya, her or an entirely new wolf all together.

All quite fascinating.
Hope you are enjoying being in the field!
thanks for getting back to me

Good Afternoon Sean

Just wondering if you had received confirmation of the exact release location yet. We had discussed the SJ river yesterday. Our Wildlife dept. is diligently trying to keep our management team, stakeholders and First Nations liaisons duly informed with pertinent information. We will not be disseminating the release location as we know it. However, unconfirmed information has been also flowing inwards locally and from the West Coast Trail/ Renfrew area in regards to the release location. The common concern is that the wolf was released within proximity of a one of the communities without notification to the appropriate local Wildlife representatives.

I understand that the situation is fluid and that this consideration has probably already been accounted for.

Personally, I still have hope that he will make his way into the Park on the West Coast Trail. More chances for survival and a lot less urban hazards for him.

Thanks.

Jason (Jake) McIndoe

Sean

Thanks for that. The tag was one of the recent topics of discussion that we were wondering. Could you let us know if the release location is anywhere near the West Coast Trail. I was hoping as much – that way I could keep a watch out while I am on patrol.

Subject: FW: HWCR 19-30736 - WOLF - SIGHTINGS - VICTORIA - PORT RENFREW

Got.

On February 29, 2020 CO SANO(SANO) called COM. COM stated the following:

Two weeks ago his close friend who walks multiple dogs was walking on private trails and land at the end of Island rd. north east of Port Renfrew. She saw a wolf approach and her dogs were barking at it. It appeared and disappeared into the forest and shadowed her dogs parallel as they were walking. No aggressive behaviour noted by the wolf. The dogs with COM chased the wolf away. The female then contacted s.22 who attended this property to look for the wolf.

On Thursday February 27 2020, the same female was walking multiple dogs on island rd. On the North (park) side of the road she noticed that the wolf was intrigued by her dogs and was paralleling her movements as she moved up the road. The female then departed without incident. She then contacted her friend the COM for this report. He stated he then attended Island road with his husky and small dog. He was walking up the road when the wolf appeared to follow his dogs from the treeline. The wolf and his dog were communicating both making whimpering noises. COM's little dog charged at the wolf and the wolf exhibited no aggressive behaviour the two dogs were nose to nose. COM called his dog back and his dog would not come to him. The wolf then ran away at high speed into the forest. COM continued his walk up the road for 10 minutes without seeing the wolf. He then notices 80 ft behind him the wolf was walking up the road behind him. The wolf and his dog was wining back and forth to each other. At 30 feet away COM yelled at the wolf who responded and would stop or run off into the bushes. The wolf would continue to follow COM at a distance. For the whole encounter the wolf was on the North side of Island road. The COM turned around to go back to his vehicle and at 30 ft the wolf stood its ground. COM approached and the wolf ran off and continued to follow until they reached the vehicle. He then yelled at the wolf who went into the treeline. As soon as COM was in motion in his vehicle was heading down the road the wolf emerged and trotted and followed the vehicle as COM left.

COM stated he owns dogs, s.22 and is not an expert in wolf behaviour. He did not note to SANO that he felt the wolf was not predatory towards his dogs.

CO SANO spoke to Sargent NORRIS at 0930 am to discuss next steps.

Subject: Heads up - "Takaya" the Discovery Island wolf shot by hunter today

We have credible information that the wolf relocated from Victoria area by COS in January has been shot and killed by a cougar hunter near Shawnigan Lake this morning. SIZ officers are investigating to determine circumstances and legality. Probably a legitimate hunter kill (currently open season) in which case we will not seize it. Information (including a pic of the ear tag) is currently circulating on local cougar hunter social media sites. This community is fairly "porous" so we can assume it will eventually become public knowledge with subsequent backlash.

More info as it becomes available. Recommended messaging is COS is investigating to determine legality, all other questions regarding wolf hunting or special protection diverted to FLNRORD.

Subject: Enquiry about Takaya for BBC News

Dear Chris,

I hope this email finds you well. I am contacting you from the BBC in London. Our channel released a film about Takaya last year and it had a great impact amongst our audience. The ratings for that film doubled the average and people still have a strong interest about the fate of Takaya.

First of all I would like to praise your conservation efforts and the fact that the wolf was not shot but relocated. Our viewers are very pleased about that.

We are preparing another piece about Takaya, after the recent events, and I would like to kindly ask for your assistance with information.

- Why do you think that Takaya left the island after 8 years ?
- where was he released and is it similar to the coastal habitat where he is used to hunt ?
- Our viewers were very moved by Cheryl Alexander's relationship with Takaya. Was she involved in Takaya's release ? Did she play a role in identifying that it was Takaya ? Was she allowed to see him at any point ?

Thank you so much for your help on this matter and I am looking forward to hearing from you. I am happy to give you a call if you prefer to talk over the phone.

Best wishes

I am unfortunately unavailable...just got on the water taxi to Mayne Island open house and not back until four or later.

Mark could possibly handle when he returns but we have other calls to attend to so he may be tied up too.

Thanks

Hi Scott
Could we please speak by phone?

On Mon, Jan 27, 2020 at 9:26 AM Norris, Scott ENV:EX <Scott.Norris@gov.bc.ca> wrote:
Hi Cheryl

Thank you for providing these great photos. It does appear to be the Discovery Island wolf but we are still not 100% sure.

The vet assessed him earlier this morning and he is in transit now to a new home.

I am sorry we could not wait to meet you but in the interest of the wolf's health and safety we wanted to get him back out as soon as possible.

Do you by any chance have DNA samples? Hair with roots intact would be ideal?

The Vet is going to analyze the DNA we collected and it would be great to compare so we can confirm.

Please let me know so we could meet to pick it up the sample if you have any.

Thanks,

Scott

Subject: Re: Takaya wolf ... James Bay capture

Good morning Mike,

I am sending a couple of other images of Takaya's teeth which will likely confirm it is him.

After sending you these previous images I looked at other footage where you can see his teeth and I realized that the footage I sent you previously has been flopped in editing and so the missing or broken top tooth is really on the right as you can see from the attached images.

I hope to hear from you soon about being able to come to where he is at the vet.

Many thanks,

Cheryl

Hi Mark,

As promised, here are some stills that show Takaya's teeth.

I thought you said that the wolf was missing a top right tooth? But Takaya's is top left.

Perhaps I misheard? It was an emotional moment for sure.

It is extremely important to me to be able to come and see Takaya tomorrow. I hope that the

Conservation Service will honour my request. This wolf is not just a wildlife statistic ...s.22
s.22 and news of him and his unique life has spread far and wide.

You indicated that you'd seen the film and know Takaya's mouth and teeth. In case your supervisors have not seen the film i am sending a link to the BBC version of the film ... it is the longer version and only available in the UK. It is only to be used for the information of the Conservation Service as it is copyright protected by Cineflix media who own the worldwide rights. The password is s.15

<https://vimeo.com/364214552>

Since the wolf in James Bay event, I have received an avalanche of correspondence from all over the UK and Canada, via social media. There are many people who have been following Takaya's story and really care about what happens to him.

I need to be able to communicate with them about how Takaya is and what will happen to him.

s.22

I am cc'ing my request to your superiors as you indicated that they are the ones who will consider my request.

Many thanks for being so careful and sensitive in how you handled this situation tonight. The Conservation Service should feel very proud of the skill and compassion with which you treated this magnificent animal.

With respect and gratitude,
Cheryl Alexander

How did you provide the information?	By Phone
Summary	Reporter asked if the COS radio collared the wolf Sgt explained no - COS wanted to minimize handling time and ensure animal was released as soon as possible. Reporter asked how we will know if it dies or survives Sgt explained that an ear tag was put in but also that the wolf was at least 9 years old and wolves typically only live 10-12 years in the wild Sgt explained about capture myopathy as well. Reporter asked why it left the island - Sgt explained there were many theories such as loneliness but this is an unknown. Further that the wolf was healthy so food was likely not an issue. Reporter asked how often this happens - Sgt explained very rare but there are wolves close to Victoria and is possible in the future. Discussed corridors for wolves (and other wildlife) which funnels them into downtown Victoria. Discussed cougar sightings being much more prevalent in Victoria as well.

Officer Name	YORK, Ben
Rank	Inspector
Region / Unit	West Coast
Office Location	Nanaimo
Cell #	s.22
Media Format	Print; Online news
Media Outlet	Globe and Mail, Justine Hunter
How did you provide the information?	By Phone
Summary	Initiated by Insp. York at direction of MO. Called to notify reporter of the following: The Discovery Island wolf, that was relocated from James Bay earlier this year has been shot and killed by a hunter, the Conservation Officer Service can confirm. We understand many British Columbians and people around the world shared care and concern for the well-being of this wolf and this update will affect many people. The wolf was killed on Tuesday March 24 near Shawnigan Lake, approximately 50 kilometres away from where it was released in late January. Conservation Officers released the wolf in rugged and remote wilderness outside of Port Renfrew, on the west side of Vancouver Island. This isolated coastal habitat similar to Discovery Island was carefully chosen to give the wolf the best chance possible. This decision was made in consultation with biologists from the Ministry of Forests, Lands, Natural Resource Operations and Rural Development (FLNRORD), as well as the Provincial Wildlife Veterinarian. The wolf was not taken back to Discovery Island as it left for a reason – it may have been looking for food or resources. For the safety of the public and the animal, the wolf was relocated out of the urban environment in Victoria. The provincial hunting regulations are administered by

FLNRORD.

The COS investigation is ongoing and further details will be released as they become available.

Subject: Media request - CBC Nature of Things - Takaya wolf - follow-up questions
Date: March 16, 2020 9:48:13 AM

Hi Mark,

I'm filling in for David Karn on the media phone and I just got a call from a freelancer working for CBC's the Nature of Things named Laura Boast.

She was hoping you – or someone else who's dealt with Takaya the wolf – could give her a call sometime this morning.

She had a few questions she let me know in advance – she wanted more on the rationale for returning him to Vancouver Island; she had heard a rumor Takaya likes dogs and wanted to chat about that, in case COS has advice for people with dogs; and she had heard concerns that Takaya may come into contact with hunters/trappers.

Let me know if you're able to connect with her this morning – her phone –s.22 email:
lauraboast@bell.net

Deadline ASAP

Request

I'm hoping to be clear today to write my wolf story. So I just wanted to check in with conservation services to see if anything has changed since I talked to them – any sightings, reports of Takaya?

I've heard that there has been a wolf sighting on Sidney island, and Conservation is involved. Also that there is an approved hunt starting on Saturday on the island, and that shooting the wolf would be permitted. So would really appreciate some details on that. Would CS relocate a wolf from Sidney island?

Subject: RE: Enforcement intel ASAP please
Date: March 23, 2020 10:57:59 AM

Ben,

For SIZ we had a total of 3 charges and 1 warning last week:

- s.22 w/o licence, charge by VT
- s.22 charge by VT
- Fail to have proof of competency on board a pleasure craft, charge by Fed Contravention Ticket
- OBSCR , burn contrary to venting index, warning ticket

Significant files or issues:

- Unauthorized harvest of 2 cow elk at Youbou, no suspects at this time
- Takaya (Discovery island Wolf) still hanging around Port Renfrew. Not generating HWCR's or complaints but being observed displaying habituated behaviour. Documentary film maker Cheryl Alexander is in the area working on Part 2 of her Takaya project. Part 2 will likely be critical of COS actions, specifically in not taking the wolf back to Discovery when it was captured in February.

Zone specific enforcement concerns:

- Unauthorized elk harvests – 2 last week, 2 the week before, that we know of. Seems quite a bit higher than normal for this time of year. Could be an indication that some people are using the real or perceived shortage of meat in the grocery stores to justify filling up the larder with some high quality protein.

Observations or anecdotes:

- Extremely busy at SIZ parks and recreation areas. Parking lots jammed beyond capacity over the weekend. Probably due to a combination of good weather and people needing a way to get out of the house with few other options remaining for entertainment. Very busy at local marinas as well.

PP

Subject: Enforcement intel ASAP please

Sgt's

This last weekend saw a significant spike in ERS's province-wide; all sorts of violations from open burning to ORV's and everything in between. Probably a combo of good weather, folks away from work, and maybe even a post-apocalyptic WROL mindset. Deputy Chief Doyle is looking for intel to assess how much our overall enforcement workload is increasing.

Please send me ASAP:

- Number of charges/tickets/warnings from the previous week
- Significant files or issues arising in the last week
- Region/zone specific enforcement concerns from last week or anticipated upcoming
- Any other observations or anecdotes that might be relevant to Doyle's ask

ASAP means early afternoon today (latest) please.

Sorry but could you please give me a shout after?

Being asked from GCPE/MIRR on a couple things:

1. Below CTV story (1:30) has news/Chief Sam saying CO indicated this was a legal hunt on Mosaic property and they want the body returned to the nation.
2. What are plans about returning to nation?

Thanks

Hi Mark,

I have just spoken with Cindy, and we are planning to meet her at her house on Tuesday February 11 at 11 am. Would you be available to meet with us that same day for the interview? We thought we could meet you at Cindy's yard -- if that works for you? (she has already given us permission to film you there). We could meet you at 9 am or 10 am that morning, or later in the afternoon at your convenience.

Please let me know if that works for you? I can be reached at 604 816 6903 for details.

Many thanks, and we look forward to meeting you.

Best,

Isabelle

Hi David,

It was great speaking with you yesterday. I am wondering if it might be possible to schedule the filmed interview with Mark Monday or Tuesday next week (February 10 or 11) in Victoria. Ideally we would like to film Mark on site, where he captured the wolf.

Please let us know the options.

Many thanks, and I look forward to hearing from you.

Best,

Isabelle

Wildlife Act Sec 97.6 Disposition of wildlife seized and detained as evidence - "... dispose of as Minister directs"

COS Policy and Procedure – Disposition of Wildlife Seized under the Wildlife Act Sect 8.

8.0 DISPOSED OF AS THE MINISTER DIRECTS

1. Where seized wildlife may be disposed of by the COS, pursuant to section 97.3, 97.6 or 84 (6.3), it must be disposed of "as the minister directs".
2. Generally, "as the minister directs" means disposal of seized wildlife in accordance with policy and procedure approved by the minister for the Wildlife Act.
3. Officers will refer to Appendix 2, Wildlife and Habitat Branch Procedure - Disposal and Storage of Dead Wildlife and Parts, for guidance.

Wildlife and Habitat Branch Procedure – Disposal and Storage of Dead Wildlife and Parts Section 4(3)

(3) Priorities for disposal of parts of wildlife other than meat are:

- (a) Government uses — e.g. research, education, museum exhibits and collections etc.
- (b) Bona fide scientific or medical uses
- (c) Traditional ceremonial or dress purposes; aboriginals receiving first priority
- (d) Commercial sale (Disposal by Government Auction)
- (e) Private possession — in accordance with Policy and Procedures
- (f) Natural decomposition
- (g) Destruction in accordance with community by-laws and practices, as in 4 (1)(e) above
- (h) Fur bearers and their parts are to be given to the B.C. Trappers Association.

Get rid of "regular" in bullet three. Subject to interpretation, but implies more than we have been doing.
Communications is good enough.

s.16

How about "If the COS acquires the wolf during the course of the investigation or otherwise, it will be disposed of as per policy when no longer required for law enforcement purposes. This could include turning it over to the Songhees Nation." They already know they have priority consideration. And even this I wouldn't say if we don't have to.

And should we really say that we are going to proactively release details as they become available? I prefer "Still under investigation"

Got, please cross reference 29599, 29616, 29614, 29617 and any others

Co Kissinger took call and spoke with Vic PD member Const Millard. Millard believes they have the animal contained and that it's the same animal as yesterday. Co Kissinger requested CO Dekelver to assist. Attended **s.22** in James bay. Police and media on scene. Animal still present. Vic PD assist in keeping public and media back. Co Dekelver and Kissinger mix drugs and decide on best approach. Two darts made with 1.5 of zol each. Only safe shot was a lower left neck shot. Shot was good. Animal showing signs of sedation after 8min. 12 min approach and bring animal out. Examine animal, no injuries, dart removed. Mature Male, broken right upper canine. Transported to vehicle then to goldstream. CO Pauwels assisted at goldstream. Animal assessed again and ear tagged and DNA taken. Left Ear 1-295. Animal had to be topped up with another 1.5 of Zol. Info sent to Helen and Scott. Animal to Duncan over night, assessed then released on West Coast.

Ill send in the Vial numbers asap

Total time
Kissinger 12
Dekelver 2.5
Pauwels 1.5

Hello,

A heads-up that COS has credible info that the wolf relocated from Victoria by COS in late January has been shot and killed near Shawnigan Lake this morning, although this is not yet confirmed.

COS investigating circumstances/legality. It could likely be a legitimate hunter kill, as it is currently open season. Apparently there is some info/pics (including ear tag) circulating on social.

I will put together some KM's – questions on wolf hunting or protection, etc should go to FLNRORD.

There have been no media inquiries yet.

Thanks

Subject: Heads up - "Takaya" the Discovery Island wolf shot by hunter today

We have credible information that the wolf relocated from Victoria area by COS in January has been shot and killed by a cougar hunter near Shawnigan Lake this morning. SIZ officers are investigating to determine circumstances and legality. Probably a legitimate hunter kill (currently open season) in which case we will not seize it. Information (including a pic of the ear tag) is currently circulating on local cougar hunter social media sites. This community is fairly "porous" so we can assume it will eventually become public knowledge with subsequent backlash.

More info as it becomes available. Recommended messaging is COS is investigating to determine legality, all other questions regarding wolf hunting or special protection diverted to FLNRORD.

Subject: Re: Media request - The Narwhal - Statement from COS re: Discovery Island wolf

Thanks Andrew.

Given the potential misinformation swirling around on this issue, can you provide any further clarification on whether there were complicating circumstances at play here? My understanding is the hunter said his dog was attacked by Takaya. I also have another report from a contact in Port Renfrew who says Takaya attacked his dog a few days earlier. He reports that Takaya was acting strangely, doing things like running alongside his truck, a behaviour not regularly seen in non-habituated wolves in Port Renfrew.

The impression left by the statement saying the Discovery Island wolf "has been shot and killed by a hunter" seems to be leading people (including [CBC](#)) to conclude it was a trophy hunting kill, when perhaps that's not the case?

I'd appreciate any clarifications you can provide. I'm hoping to interview the hunter in question, as well as the man who ran into Takaya in Port Renfrew days before the wolf's death.

Thanks,

Emma Gilchrist

On Thu, Mar 26, 2020 at 3:57 PM Patrick, Andrew GCPE:EX <Andrew.Patrick@gov.bc.ca> wrote:

Hi Emma,

As mentioned on the phone, you can attribute the following to the B.C. Conservation Officer Service:

The Discovery Island wolf, that was relocated from James Bay earlier this year has been shot and killed by a hunter, the Conservation Officer Service can confirm. We understand many British Columbians and people around the world shared care and concern for the well-being of this wolf and this update will affect many people.

The wolf was killed on Tuesday March 24 near Shawnigan Lake, approximately 50 kilometres away from where it was released in late January.

Conservation Officers released the wolf in rugged and remote wilderness outside of Port Renfrew, on the west side of Vancouver Island. This isolated coastal habitat similar to Discovery Island was carefully chosen to give the wolf the best chance possible. This decision was made in consultation with biologists from the Ministry of Forests, Lands, Natural Resource Operations and Rural Development (FLNRORD), as well as the Provincial Wildlife Veterinarian.

The wolf was not taken back to Discovery Island as it left for a reason – it may have been looking for food or resources. For the safety of the public and the animal, the wolf was relocated out of the urban environment in Victoria. The provincial hunting regulations are administered by FLNRORD.

The COS investigation is ongoing and further details will be released as they become available.

Hi Cheryl

Thank you for providing these great photos. It does appear to be the Discovery Island wolf but we are still not 100% sure.

The vet assessed him earlier this morning and he is in transit now to a new home.

I am sorry we could not wait to meet you but in the interest of the wolf's health and safety we wanted to get him back out as soon as possible.

Do you by any chance have DNA samples? Hair with roots intact would be ideal?

The Vet is going to analyze the DNA we collected and it would be great to compare so we can confirm. Please let me know so we could meet to pick it up the sample if you have any.

Thanks,

Scott

I am getting a few of these emails about the James Bay wolf. Have we captured it? And if so, did we determine it was the animal from Discovery Island?

Subject: Re: Takaya wolf ... James Bay capture

Good morning Mike,

I am sending a couple of other images of Takaya's teeth which will likely confirm it is him.

After sending you these previous images I looked at other footage where you can see his teeth and I realized that the footage I sent you previously has been flopped in editing and so the missing or broken top tooth is really on the right as you can see from the attached images.

I hope to hear from you soon about being able to come to where he is at the vet.

Many thanks,

Cheryl

On Mon, Jan 27, 2020 at 12:03 AM Wild Awake <cheraalexander@gmail.com> wrote:

Hi Mark,

As promised, here are some stills that show Takaya's teeth.

I thought you said that the wolf was missing a top right tooth? But Takaya's is top left.

Perhaps I misheard? it was an emotional moment for sure.

It is extremely important to me to be able to come and see Takaya tomorrow. I hope that the Conservation Service will honour my request. This wolf is not just a wildlife statistic ...^{s.22}

^{s.22} and news of him and his unique life has spread far and wide.

You indicated that you'd seen the film and know Takaya's mouth and teeth. In case your supervisors have not seen the film i am sending a link to the BBC version of the film ... it is the longer version and only available in the UK. It is only to be used for the information of the Conservation Service as it is copyright protected by Cineflix media who own the worldwide rights. The password is ^{s.15}

<https://vimeo.com/364214552>

Since the wolf in James Bay event, I have received an avalanche of correspondence from all over the UK and Canada, via social media. There are many people who have been following Takaya's story and really care about what happens to him.

I need to be able to communicate with them about how Takaya is and what will happen to him.

^{s.22}

I am cc'ing my request to your superiors as you indicated that they are the ones who will consider my request.

Many thanks for being so careful and sensitive in how you handled this situation tonight. The Conservation Service should feel very proud of the skill and compassion with which you treated this magnificent animal.

With respect and gratitude,
Cheryl Alexander

Hi Dawn, COS advised F&W where the wolf was going to be relocated once it had been immobilized in James Bay. The location chosen was suitable from a biological standpoint, and a decent distance away from any communities. F&W staff did not provide input to the release location. Parks Canada was also advised of the release location due to the proximity to PacRim Park.

Subject: Re: Wolf update from today

Copy. One other thing came in later last night - s.22

s.22 Said he was trying to have SOC relinquish hide (again, w/o suggestion or recommendation of CO). I gave direction to accept it if brought in, but to ensure a release of demands form was signed off.

A couple points of clarity

- any seizure of hide by action of CO (vs spontaneous relinquishment) would be for evidence of unlawful possession under WLA stemming from trespass violation, not evidence of trespass itself.
- no seizure has been made or contemplated for the sole or primary purpose of turning the animal over to the Songhees Nation. My statement to the Chief pertained to eventual disposal of any seizure if not required for LE or lawful for SOC to possess. I suppose that would now also apply if SOC relinquished wildlife to Crown voluntarily.
- carcass had already been disposed of by SOC by dumping on rural property, not placed or stored for COS. SOC told COS to take it if we wanted it. Helen requested it for necropsy and we collected it for that purpose. Given that there was no informed consent and investigation had not progressed to RPG of trespass, there is no intent to use as evidence.

Hope that helps. Happy to discuss further. I have my daily RLT call 9-10, but flexible thereafter. Let me know what time works for you.

Couple things Chris

They need to be careful about seizures made for one reason and held out for another.

Also lots of case law around a hunter acquiring rights to wildlife and if it isn't taken lawfully they have no right to it. Tons of case law similar where elk shot on private land by legal and licensed hunter. He does not acquire legal rights to that wildlife. The question here is about the evidence of the trespass and the tightness of the permission. Sounds weak to me.

We should not even entertain where any part of the wildlife goes at this time.

Just a couple thoughts.

Thanks Chris,

Am not sure how the hide and skull would afford evidence of trespass considering we already have the carcass. Kyle would be a good resource to run this by but I think it is a long shot and a bit disingenuous given then real reason is to return it to the FN.

Good Afternoon Sean

Just wondering if you had received confirmation of the exact release location yet. We had discussed the SJ river yesterday. Our Wildlife dept. is diligently trying to keep our management team, stakeholders and First Nations liaisons duly informed with pertinent information. We will not be disseminating the release location as we know it.

However, unconfirmed information has been also flowing inwards locally and from the West Coast Trail/ Renfrew area in regards to the release location. The common concern is that the wolf was released within proximity of a one of the communities without notification to the appropriate local Wildlife representatives.

I understand that the situation is fluid and that this consideration has probably already been accounted for.

Personally, I still have hope that he will make his way into the Park on the West Coast Trail. More chances for survival and a lot less urban hazards for him.

Thanks.

Hi Ben

I just spoke with Todd Windle at Parks Canada and discussed the wolf sightings, behaviour and COS plans. They want to be kept up to date in case behaviour escalates and/or the wolf starts hanging around PC campgrounds.

For now no aggressive behaviour but no real fear of humans either (see attached video). It is habituated to people due to years of Discovery Island well wishers encroaching on its space.

s.16

Thanks,
Scott

Subject: update on HWCR 19-30736

Charlene;

Please update HWCR 19-30736.

On February 29 2020 CO SANO attended s.22 Port Renfrew. SANO encountered on the road the COM who gave COS the ear tagged trail camera photos taken on private land at the end of s.22 He stated that his friend just had another adult wolf with similar markings approach his s.22 it sat on his lawn he took his dog inside and returned with his phone. The wolf without an ear tag sat 10-15 feet away from him looking at him then trotted off into the woods. In the video and in his statement to SANO there was no ear tag.

SANO believes with the photographic evidence that there are two wolves that do not have a fear of humans that has appeared to residents in the past week. One ear tagged and one not.

There are s.22 residents on this road. The last house took the video of the non ear tagged wolf on February 22. The other video footage from this area shows another wolf with an ear tag in its left ear.

SANO spoke to Cheryl ALEXANDER s.22 She stated that the ear tagged wolf has not been reported seen since February 27th. She stated that the port Renfrew facebook group was how the community was alerted to the wolf being inquisitive to dogs. This group could be a good means to disseminate messages for COS. Another local was mentioning that half the community wants the wolf to coexist and some in the community will most likely come looking for the wolf to hunt it.

The road was quiet with few vehicles as the facebook post told residents not to walk their dogs in this area as there is a wolf.

In speaking with the local FN and the residents there appears to be ample food in this area and the presence of an existing pack.

s.16; s.22

This wolf with the ear tag in the statements I have heard is not demonstrating aggression towards humans or dogs presently.

Here is the other Wolf that approached my friends^{s.22} that
was on a lead. This video was taken on Feb. 22 on the Remote Renfrew property.

On Fri, Feb 28, 2020 at 7:20 PM s.22

wrote:

Thank you for your thanks and appreciation, that speaks volume to me.

I know that there has been another large Wolf that has been sighted along
s.22 and quit regularly. I know that he has been approaching dogs and
has gone as far as attacking an off leash dog as recently as today. It is not
Takaya but another robust Wolf of similar coloring and markings. The big
problem we have here is that there are many people, at least 7 that I have
seen. That regularly run their dogs in front of their car as they travel up and
down^{s.22} That road is soaked in dog urine and with ^{s.22}
that live at the end of ^{s.22} It's no wonder that Wolves that travel
through that area are drawn to this location. I strongly suggest that signs be
put in place warning visitors and residents about proper dog and owner
etiquette while being in known Wolf country. They do this in Pacific Rim
National Park and perhaps they should think about signage down in this
section of their park. I've talked to Bob Henson from Wildsafe BC. as well as
Todd Windle of Pacific Rim National Park about this situation. They both
realize that something should be done.

I will continue to monitor the Wolf activity in this lower estuary and will keep
you up to date on anymore of Takaya's activity. If the company of other
Wolves is what he was seeking then he has most certainly found it. I don't
think that we have seen the last of him.....for now at least.

Here's a photo of him taken with a still camera.

On Fri, Feb 28, 2020 at 3:38 PM Sano, Robin ENV:EX <Robin.Sano@gov.bc.ca> wrote:

Dear Sir;

Thank you very much for sharing your excellent photos with the Conservation Officer
Service. We hope that this animal integrates itself back into the natural environment.
Your discretion in this matter was greatly appreciated. I have spoken the Sargent for the
south island and he wished for me to personally convey to you that the location your
provided to us will not be made public by COS.

Subject: Ear tagged Wolf

The Wolf was travelling East as he came past my camera. He was photographed in Port Renfrew on Feb. 25 @ 12:21 pm. Approx. 20 mins. walk North of the end of Island Road.

There were reports of Wolves howling on two occasions days before this image was taken. Once coming from the Deerling Road bridge area and on another occasion up towards the Fairy Lake area. There is an established Wolf pack already in this area that in 2018 consisted of 7. I often get pictures of these Wolves on this same stretch of game trail. I'll keep you posted if I get any further pictures of this ear tagged Wolf.

Rest assured I have no intentions of disclosing this location to anyone.

The ear tag only confirms that it was the James Bay wolf. We do not know for certain that the James Bay wolf was the Discovery Island wolf as far as I know. Unless I am missing something? I know it has been assumed but not confirmed?

I received the following inquiry from Cheryl Alexander. I have offered to respond on behalf of WCR but want to make sure I am on the same page as what has been provided previously. I am playing a bit of catchup here as I was away when the harvest occurred. See below in red. Can either of you provide any additional info to the questions asked?

Was there ever DNA confirmation that this was indeed the Discovery Island wolf?

Thanks, Feel free to call me on my cell if you would prefer.

Subject: Re: wolf Takaya

I had a conversation with Mike Stalberg after Takaya was killed. It was regarding my questions about what would happen to the wolf's remains and also what was known about the incident.

Could you please confirm the following:

1. I understand that Helen is conducting a necropsy on the 'internal' remains of the wolf that were provided to her by the hunter - when and how will the results of this be available? To my knowledge the necropsy has been conducted and the results provided to the Conservation Officer Service. I will look into how and when the results can be released.
2. I know that the Songhees are requesting those remains to be returned to them for proper burial on the islands - Is this what will happen, and when? I am not sure about this. I will have to ask the COS what the

final disposition of the carcass will be.

3. I believe that the hunter has a legal right to keep the hide and skull of the animal, should he wish to do that - is this what is happening? I am not aware of what the hunter decided to do or retain. As you have stated, the hunter has a legal right to keep the hide skull or any other part of the carcass they wish to retain.

4. I asked that i be put in touch with the hunter and do realize that you are not able to give me his name due to protection of privacy laws, but that you would be able to speak with him and give him my contact information. Has this been done? I am not aware if this has been done or not. I was not involved in any of the investigation surrounding the harvest of the wolf. COS may have the hunters information and may have contacted them. I can follow up on this for you.

5. What kind of investigation is the Conservation Service or Wildlife branch doing? Can you confirm that the hunter had dogs and whether or not the hunter has said that they were 'attacked' by the wolf. I am not currently aware of what form of investigation COS are conducting if any. I am not aware if the hunter stated they were attacked by the wolf or not. I can try and verify this.

6. How can people be assured that this was not a 'trophy hunt'? I am not sure what you mean by this. Hunters are able to harvest wolves in BC under the current regulations and utilize the animal as per the regulations.

7. Can you provide me with specific about the location where the wolf was killed? I would like to visit the spot. I am not sure of the specific location where the wolf was harvested. I will see if I can find this information but hunters are only required to provide a 'nearest landmark' when reporting a harvest. Ie: 'Shawnigan Lake'

I thank you very much for your time.

And hope you are staying well in these difficult times.

Dear Mark - Thanks so much for your time! There was one last theory of Cheryl's I wanted to run by you. She said possibly a hunter (she said there's a duck hunter known to hunt - illegally - on Discovery Island) may have accidentally scared Takaya. What's your take on that? Is it possible?

Cheers,

Laura Boast
Ph: s.22

Dear Officer Mark Kissinger -

I'm writing an article about Takaya for CBC The Nature of Things as a followup to their documentary with Cheryl Alexander and the wolf. Producer Graham Duggan wanted me to do an update given Takaya's return to Vancouver Island.

I just interviewed Cheryl and said she thought you would be a good person to talk to regarding Takaya's reappearance and relocation on the island (without mentioning where Takaya is currently - she didn't tell me and I respect the discretion about the wolf's location).

Would you be willing to tell me about Takaya's reappearance, the possible reasons the wolf may have ended up back on the island, how BC Conservation located the wolf and relocated it, and how the wolf is doing (I understand he's very healthy from all accounts, with access to food). Is there a possibility he could mate? Could he go back to the islands?

I'm 3 hours ahead of you in Toronto. Would you be available to talk this afternoon at 1 p.m. or after (your time, PDT), or any time tomorrow morning (your time)?

Yours truly,

Hi Mark,

It was great meeting you yesterday, thank you so much for your time and for sharing your amazing knowledge and connections to wolves.

After you left we realized we forgot to have you sign our model release form. I am attaching it to this email, and it would be great if you could take a moment to review, sign and send it back to me.

Also, I wanted to ask -- we discussed the fact that in James Bay where the wolf ended up, there is quite a bit of wildlife moving through the area. I am wondering if there is more information on this place historically being a wildlife corridor, or if you know of any research being conducted about this area, monitoring the movement of wildlife in perhaps what used to be ancient migration corridors for species that they are still finding even in what has become a built up/developed area. If you know of anybody who is looking into this, please let us know, as it is an interesting theme for us to pursue.

Thanks again, and I will be in touch to discuss more about Sweden wolves and reindeer sometime soon.

Subject: Re: Filmed interview request for Knowledge Network -
documentary on wolves

Hi David,

It was great speaking with you yesterday. I am wondering if it might be possible to schedule the filmed interview with Mark Monday or Tuesday next week (February 10 or 11) in Victoria. Ideally we would like to film Mark on site, where he captured the wolf.

Please let us know the options.

Many thanks, and I look forward to hearing from you.

Best,

Isabelle

PERSONAL RELEASE FORM
THIS IS A LEGAL DOCUMENT – PLEASE READ IT CAREFULLY BEFORE SIGNING

DATE: _____ **LOCATION:** _____

PARTICIPANT NAME: _____

In consideration of my appearance in the documentary program being produced by Wolf-Dog Productions Inc. (the "Producer") for Knowledge Network about the relationship between wolves and people, currently entitled "WOLF | DOG" (the "Program"), and without any further consideration from the Producer, I hereby transfer to the Producer all rights whatsoever which I have in the motion picture footage, video footage, audio recordings or photographs which the Producer or its representatives have taken of me.

Furthermore, I expressly grant the Producer the right to use, simulate, dramatize and portray my likeness, my personality, biographical information and personal experiences, incidents, situations and events which have occurred, or hereafter occur, and any existing archival footage or audio recordings of me, in whole or in part.

I consent to the use of the above-said material for all purposes whatsoever, in any and all manner and media now know or hereafter devised, throughout the universe in perpetuity, including without limitation in connection with the exhibition, theatrically, on television or otherwise, and also for use in advertising, exploitation and/or publicity and promotion.

I consent to the use of my name, likeness, voice and biographical material in connection with the Program publicity, advertising, and for any related promotional purposes.

I agree that the Producer may have sole discretion over editing the said material, which includes the right to delete, juxtapose, change the sequence and make other changes as deemed appropriate.

I hereby waive and relinquish any "moral", "authors" or analogous rights to which I may be entitled, now or in the future, to the Producer, and I expressly release the Producer, its agents, employees, representatives, licensees and assigns from and against any and all claims which I have or may have in invasion of privacy, defamation or any other cause of action arising out of the production, distribution, broadcast or exhibition of the Program.

The Producer may assign this release to any person or party.

I agree that in the event the Producer breaches this agreement, I will be limited to my remedy at law for damages (if any) and in no event will I be entitled to rescind or terminate this agreement, or the rights and privileges granted hereunder, or to enjoin, restrain or otherwise impair the development, production, distribution, advertising or other exploitation of any Production, or any exercise of other exploitation by the Producer of all or any of the rights granted herein.

If these are what we go with maybe soften line 3:

- If the COS comes into possession of the wolf, it's disposition will be determined according to the Wildlife Act and policy. This could include transferring it to the Songhees First Nation.

What do you think?

Chris

I anticipate further conversations but just wanted to send this along for your review please.

Note highlighted line below – thoughts on possible inclusion?

Thanks and talk soon!

The Discovery Island wolf that was relocated from James Bay earlier this year has been shot and killed by a hunter, the Conservation Officer Service can confirm.

We understand the public shared care and concern for the well-being of the wolf and this update will affect many people.

The COS has verified this was a legal hunt by a licenced hunter. There is no investigation underway. The wolf was identified through its ear tag.

The wolf was killed near Shawnigan Lake, approximately 50 kilometres away from where it was released in late January. Conservation Officers released the wolf in rugged and remote wilderness outside of Port Renfrew, on the west side of Vancouver Island. This isolated coastal habitat similar to Discovery Island was carefully chosen – in consultation with biologists – to give the wolf the best chance possible.

The wolf was initially not taken back to Discovery Island as it left for a reason – it was looking for food or resources. For the safety of the public and the animal, the wolf was relocated out of the urban environment in Victoria.

Inquiries regarding hunting regulations should be directed to the Ministry of Forests, Lands, Natural Resource Operations and Rural Development.

Done. Called her at res. Told her our agency felt it was a courtesy to call her because of all the work she had put into the story. Not a lot of questions since she already has most of the background. Only thing not in messaging below was a question regarding why people hunt wolves (food vs pelt). Told her I could not speak to the particulars of this case, but in general recreational hunting of wolves is for the hide, not for food. Otherwise she just expressed that^{s.22} Told me it was all hands on deck for Covid and she wasn't going to do anything on it tonight.

I'll do a proper media contact webform first thing tomorrow.

Sorry Ben it's so late but can you please try and give Justine a shout? Feel free to copy/paste and email this statement as well if she wants, which I've also put below.

If you do get ahold of her, a short blurb on how it went would be super appreciated.

Thank you!

PS – thanks for putting up with me today guys!

Please attribute to the Conservation Officer Service:

The Discovery Island wolf, that was relocated from James Bay earlier this year has been shot and killed by a hunter, the Conservation Officer Service can confirm. We understand many British Columbians and people around the world shared care and concern for the well-being of this wolf and this update will affect many people.

The wolf was killed on Tuesday March 24 near Shawnigan Lake, approximately 50 kilometres away from where it was released in late January.

Conservation Officers released the wolf in rugged and remote wilderness outside of Port Renfrew, on the west side of Vancouver Island. This isolated coastal habitat similar to Discovery Island was carefully chosen to give the wolf the best chance possible. This decision was made in consultation with biologists from the Ministry of Forests, Lands, Natural Resource Operations and Rural Development (FLNRORD), as well as the Provincial Wildlife Veterinarian.

The wolf was not taken back to Discovery Island as it left for a reason – it may have been looking for food or resources. For the safety of the public and the animal, the wolf was relocated out of the urban environment in Victoria. The provincial hunting regulations are administered by FLNRORD.

The COS investigation is ongoing and further details will be released as they become available.

Danielle. We've confirmed COS is lead. For the purposes of MSF's call, please take out the last sentence about FLNRO. For media, we are working on providing background information on re. hunting regulations (we can assess on a case by case basis).

Yes – ENV (COS) is lead on that as well. Including Paul and Courtney.
Cheers - D

Any concern with my below suggested responses for potential media? Feel free to take a stab at Q2 lol.

- **Were local First Nations upset about what happened to this wolf?**

It is not appropriate for the COS to speak on behalf of the local First Nations.

- **Has this happened before? Where a known and recognized wolf was shot after it have been re-located?**

As this is a unique situation, the COS is unaware of any similar incidents.

- **Will this situation have any impact on how wolf re-locations are done in the future?**

The decision to relocate the wolf was done in consultation with biologists from the Ministry of Forests, Lands, Natural Resource Operations and Rural Development, as well as the Provincial Wildlife Veterinarian.

- **FLNRORD to add info on bio decision**

Hi Cheryl

Thank you for providing these great photos. It does appear to be the Discovery Island wolf but we are still not 100% sure.

The vet assessed him earlier this morning and he is in transit now to a new home.

I am sorry we could not wait to meet you but in the interest of the wolf's health and safety we wanted to get him back out as soon as possible.

Do you by any chance have DNA samples? Hair with roots intact would be ideal?

The Vet is going to analyze the DNA we collected and it would be great to compare so we can confirm. Please let me know so we could meet to pick it up the sample if you have any.

Thanks,

Scott

Hi Scott,

I was hoping to get an update on the wolf sighting in James Bay. Would I be able to interview you today?

Cheers

Ben

The Discovery Island wolf, that was relocated from James Bay earlier this year has been shot and killed by a hunter, the Conservation Officer Service can confirm. We understand many British Columbians and people around the world shared care and concern for the well-being of this wolf and this update will affect many people.

The wolf was killed on Tuesday March 24 near Shawnigan Lake, approximately 50 kilometres away from where it was released in late January.

Conservation Officers released the wolf in rugged and remote wilderness outside of Port Renfrew, on the west side of Vancouver Island. This isolated coastal habitat similar to Discovery Island was carefully chosen to give the wolf the best chance possible. This decision was made in consultation with biologists from the Ministry of Forests, Lands, Natural Resource Operations and Rural Development (FLNRORD), as well as the Provincial Wildlife Veterinarian.

The wolf was not taken back to Discovery Island as it left for a reason – it may have been looking for food or resources. For the safety of the public and the animal, the wolf was relocated out of the urban environment in Victoria. The provincial hunting regulations are administered by FLNRORD.

The COS investigation is ongoing and further details will be released as they become available.

The James Bay wolf has been safely released back into the wild, in a coastal habitat on the west side of Vancouver Island. Conservation Officers are confident this is the same wolf that once lived on Discovery Island, due to several factors.

The mature male wolf was assessed by the provincial wildlife veterinarian on Monday morning. The wolf had no apparent injuries, was in good body condition and was considered healthy and suitable for release.

The wolf had not shown any aggression towards people while it was roaming the Victoria neighbourhood over the weekend.

Although Conservation Officers believe the wolf swam to the capital, it is not being released on Discovery Island as it left for a reason – the wolf was looking for food or resources, and for the safety of the public and the animal, it was relocated out of the urban environment.

The Conservation Officer Service recognizes the public's care and concern for the well-being of the wolf. A similar coastal habitat was carefully chosen, in consultation with biologists, to give the wolf the best chance possible.

The Conservation Officer Service would like to thank the Victoria Police for their help and assistance, as well as the residents of James Bay for reporting sightings of the wolf.

WILDLIFE NECROPSY
WILDLIFE HEALTH ID: 20-008
March 26, 2020

A mature adult, male wolf was provided to the wildlife veterinarian by CO Kissinger at 8 AM, March 26, 2020. s.16 in a fresh state and transported to the Nanaimo Regional office for necropsy.

NECROPSY FINDINGS:

The necropsy was performed at noon. The carcass (as presented) weighed 65 lbs. There was significant subcutaneous fat. A bullet entry site was noted caudal to the left shoulder with the trajectory wound passing through the thorax and into the right shoulder area. A large blood clot was covering the lungs and heart on opening the thorax. The left upper lateral 2nd to 5th ribs were fragmented by the bullet and the ventral trachea and both cranial and middle lung lobes were lacerated. On removal of the lungs and heart, 10 hard, oblong, pale masses from 1 – 2.5 cm in size were observed on the right 10 ribs, midway up the thoracic wall in a lateral chain. While the ribs were rigid, the bone was easy to cut through, above and below the masses. There was significant fat in all body depots. The stomach contained most if not an entire adult beaver. The remainder of the gastrointestinal tract was not examined. The carcass was labelled and frozen.

COMMENTS:

The wolf was in excellent body condition and appeared to have been feeding on natural food sources. There was a significant pre-existing injury of the thorax where 10 ribs on the right side of the animal appeared to have been fractured and subsequently healed. However, it is also possible that the rib lesions are from a chronic infection so laboratory work is needed to confirm the cause of these rib lesions. The cause of death was gunshot and the death was immediate.

Subject: wolf update
Date: January 27, 2020 11:22:40 AM

Hello Mark,

Can you update me please on:

- 1) Next steps for the James Bay wolf
- 2) What are the possible areas for relocation – Discovery Island? When might that happen. What are considerations – challenges.
- 3) Confirm wolf is cleared medically by vet please
- 4) Identify of wolf; whether it's yet known if he's the Discovery Island wolf
- 5) Gender and weight and possible age of wolf.

Thanks! Cindy
