7	<b>OccurrenceLocation</b>	<b>OccurrenceNotes</b>
8	SAME ADDRESS	Advises that the bear broke into the callers truck. The bear got into the bins in the garage also. She know feels like she has to lock her doors.
9	SAME ADDRESS	COM advised that there has been a bear 'cub' running around the area for the past two weeks or so. They've seen it the last couple of days up an apple tree eating apples. Way smaller than a German Shepard. COM has spoken with Northern Lights Wildlife Shelter who will step in with the COS permission
10	SEE BELOW DESCRIPTION	Complainant reporting a bear with an injured leg. It's hopping a few feet then sits down. Described as a full size black bear. No signs of aggression and no attractants noted. The bear is trying to cross the road and Com is concerned it will get hit.

	N	O
11	SAME ADDRESS	Advises that last night the bear got into the callers vehicle and destroyed the inside.
12	SAME ADDRESS	COM advised there has been a sow and cubs that have been frequenting the above location several times this year. COM states recently he has seen fresh tracks in the snow from one of the BB. COM states there are no attractants the bear is accessing (BB used to access the tree on the neighbours property but the new owners are good at cleaning it up). COM states no aggression has been noted and does not want harm to come to this bear. COM is concerned as he has a <sup>8.22</sup> year old and the neighbours also have young kids. COM is requesting a call from a CO.

	N	O
13	SEE BELOW DESCRIPTION	Reporting a bb cub hanging around the above location. No sign of the sow for the past couple of hours.

	N	O
14	SAME ADDRESS	Complainant reporting a lot of bear activity in the above mentioned neighborhood over the past week. Just yesterday Com saw a sow and 2 cubs on his porch. No signs of aggression. They seem to be looking for garbage and have been able to move some cans around.
15	SAME ADDRESS	Caller is reporting she was outside burning Christmas paper and cardboard in her fire pit when a black bear came from around the house and chased caller back into the house. It then took off into bush but 5 minutes ago caller went next door to s.22 and the bear had been in the carport and ripped a freezer out of the wall and shoved it across the carport. 3 nights ago the same bear broke into the freezer and stole pizza and ice cream. s.22 put a heavy duty lock on it after that happened. Bear also shredded stuff in carport.

	N	O
16	SEE BELOW DESCRIPTION	Complainant reporting a brown bear cub on it's own hiding by a water pump house at the above mentioned location. It looks to be in distress, it appears to be trying to stay warm, is hobbling and keeps burying itself in bushes. Caller as eyes on it right now. Described as a the same size or smaller than a german shepherd dog. Sow has not been seen.
17	SAME ADDRESS	Advises that there is a bear that has been hanging around for about a year last saw the bear this morning. Bear has been getting into garbage and tried to drag the garbage below caller's house at 04:00. Caller says this has been an ongoing issue and it has become completely habituated. Bear has broken into sheds and broke fences to get at garbage. ** Requests a callback.
18	SAME ADDRESS	COM advises that there is a small bear, probably a cub, at her property looking for food. COM has already spoken to Northern Lights rescue who can assist with COS permission. **While on the phone with COM, s.22 could hear the bear hissing and COM stated that the bear was trying to get in a window.
19	SAME ADDRESS	2200 yearling black bear came to front door. Circling the neighbour's house. Perhaps vacant lot nearby. Perhaps avalanche blasting nearby(1km) woke the animal up. Was receptive to advising neighbours about potential attractants.

	N	O
20	SAME ADDRESS	Caller travels through the area fairly frequently and has been hearing on the radio of the bear being sighted at the above location and again today. He is hoping someone can have a look at it and maybe get it some help.
21	SEE BELOW DESCRIPTION	Advises that yesterday they noticed a bear cub sitting under a tree looking stunned and shaky. The bear looks to be 1 year old. This is just down from a logging site. They returned after 5 or 6 hours and the bear was in the same spot. The caller will look today to see if the bear is still there and call back.
22	SAME ADDRESS	COM stated Black bear dragging both rear legs. Rear legs dont appear to be working at all.' Called CO Carter Elder
23	SEE BELOW DESCRIPTION	COM advised of a black bear with a snare wrapped around its neck. The bear was extremely skinny and struggling to climb over a fence nea rthe above location.

	N	O
24	SAME ADDRESS	COM calling to report that there has been a black bear hibernating under their deck and seems to be some activity there. Would like a call back please. Regional Call Tree Message
25	SAME ADDRESS	Complainant reporting a bear 2 doors down from her address. Com advises that this bear has gotten into garbage and compost in the past and is known to frequent the neighborhood. Com did not see it getting into anything today and no signs of aggression were witnessed. It was last seen 10 minutes ago. Described as a full size black bear.
26	SEE BELOW DESCRIPTION	COM advises that a small bear cub was on it own near the highway. COM pulled over to observe and could not see a sow anywhere. COM is concerned by the cub's proximity to the highway that it could be struck by a
27	SEE BELOW DESCRIPTION	Advises that a small cub is currently in a building at the above location where chips are processed. Caller is not sure how it got in there and they are giving it space as it is frightened.

	N	O
28	SAME ADDRESS	Advised there is a BB getting into garbage on Reserve IR 4 across from the village of Chase. s.22 have expressed concern about the BB.

	N	O
29	SAME ADDRESS	Advises that there is a bear at the above location. COM said that they are BBQ and the bear is walking around under the deck. COM said that the bear is living under the neighbours house. COM is looking for a call back**
30	SEE BELOW DESCRIPTION	Reports of a black bear with two young cubs. Sow has been hit by a car and is needing to be dispatched. RCMP stated that the two cubs are hanging around the sow. COM <sup>s.22</sup> RCMP will be attending.
31	SEE BELOW DESCRIPTION	RCMP received a complaint that there's a bb living under a mobile home at Christina Lake.

	N	O
32	SEE BELOW DESCRIPTION	Advises that the bear broke the fence to get into the garbge.
33	SAME ADDRESS	COM advised that a bear accessed some garbage in the neighbourhood and brought it into their yard, where the bear is currently sleeping.
34	SAME ADDRESS	BB around (accessed garbage & feed). COM concerned about her goats, pigs & children. Questioned if the BB would eat her goats. Currently penned.
35	SAME ADDRESS	COM advises of an orphaned black bear (< 80 lb) that has been on the <sup>s.22</sup> property for the past 3 days. He notes that it doesn't appear to be eating and is looking very skinny. Requesting CO callback.
36	SEE BELOW DESCRIPTION	COM advised RCMP that there is a bear that has broken through a fence and is currently trying to rip the door off of the residence at the above location. COM is armed with a rifle and intends to shoot the bear if it gains access to the house. COM: <sup>s.22</sup> **RCMP are attending but are requesting COS attend as well

	N	O
37	SAME ADDRESS	Yearling bear cub has been sleeping in a hole in the COMÆs yard. No interactions // attractants û COM notes BB appears to be digging at a location COM has attempted to haze via yelling û no effect. Emailed for hazing discussion.
38	SAME ADDRESS	COM picked-up a BB cub, and placed it in a box. Cub was on the front porch û breathing but not moving
39	SAME ADDRESS	CO Owens requested an ERS (XREF 21-9742) be converted to an HWCR. Bear had accessed a car at <sup>s.22</sup> in Kelowna (Friday, April 8th, 2020 - Evening), same bear accessed the back of a pickup truck where there was unprotected garbage. Same bear accessed garbage in an 800 lb apple bin.

	N	O
40	SAME ADDRESS	RCMP dispatch received a call from the above reporting a bear attempting to access the garbage stored inside a garage. It is banging against the door and was there last night doing the same thing so they suspect it to be the same animal.
41	SAME ADDRESS	Complainant reporting that a bear killed 2 chickens at the above mentioned property and is currently up a tree. Com's dog chased it up there. Described as a slim looking 4 year old black bear.
42	SAME ADDRESS	COM advised that around 0200, COM heard his truck horn honking at the above location. While investigating, COM spotted a bear walking down the driveway and away from the property. It appears that the bear entered the truck, shredded the interior, honked the horn, and broke out the back window. COM stated that there was no attractants in the truck.

	N	O
43	SAME ADDRESS	Advises that there are two bears wandering around getting into garbage bins.
44	SEE BELOW DESCRIPTION	COM advises that there is a small bear (larger dog sized) lying in the yard at the above location and barley moving. COM is concerned that something is wrong with it. COM has been watching the bear for about 10 minutes now. **COM will call in again if the bear starts moving along or there are any other changes to the situation.

	N	O
45	SAME ADDRESS	COM advised that the grizzly is a female with 1 cub. In 2 days they lost s.22 from their property. Last night was the latest attack/kill.
46	SAME ADDRESS	Non alarmist caller believes black bear from last year(broke fence 7 times) has not hibernated and back. Caller has educated neighbour about leaving garbage out, without success. Bear bangers and mace are not having desired effect.

	N	O
47	SAME ADDRESS	Reporting a tiny bear cub sleeping in caller's yard. No sign of the sow or siblings. Caller wondering if there is a rehab place for him? She would like a call back.
48	SEE BELOW DESCRIPTION	COM is reporting a citizen call of an aggressive black bear that chased him into his house and pushed at the door and tried to knock the door down. RCMP called CO Smienk and he requested a file open by calling the line.
49	SAME ADDRESS	Non alarmist caller reporting a large black bear for past couple of weeks. On security footage. Accessed son's truck and ate seat at 0110 last night. Destroyed stuff at hotel/motel.
50	SEE BELOW DESCRIPTION	Complainant reporting a bear that was hit by a vehicle at the above mentioned location. It looks like it's back legs are broken and front legs are not. It pulled itself over to the bushes but Com does not believe it will be mobile after that. This just occurred a few minutes ago.
51	SAME ADDRESS	Advises that a bear has broke into the garage multiple times to get into the garbage.
52	SEE BELOW DESCRIPTION	Advises that there are two bear cubs all alone beside the bakery. No sign of the sow.

	N	O
53	SAME ADDRESS	Advises that they had a bear at their house last night at 23:30. RCMP was called as the bear ripped off the side boards of the garbage. COM said that the garbage is locked up in the garbage. Caller said he threw a board at the bear and the animal was not worried about him. Com said that the bear comes through every night. COM said that if the bear went into the garage the bear would be right beside his daughters bedroom. RCMP # 2022-1237 ***COM would like a call back ***
54	SAME ADDRESS	Advises that there is a bear in the trap that was set.
55	SAME ADDRESS	COM advises that there have been several encounters with bear at the above location. COM stated that workers have been utilising proper attractant disposal procedures. COM stated that workers have been using bear bangers to try and deter the bears, but they keep coming back.
56	SEE BELOW DESCRIPTION	Caller advised he was out quadding and came across a small bear cub that was very weak and struggling to stand. Caller advised there was no sign of a sow. Caller is open to show the COs where the bear was located.

	N	O
57	SAME ADDRESS	<p>Caller advises that there are several bears that are coming around the reserve and have been slowly becoming more aggressive towards each other and the dogs. They have also begun to chase some of the dogs and learned how to open the garbage cans. They seem to come around mostly early morning or at dusk, she has also heard that someone has seen what they say was a grizzly in the field near the school.</p>

	N	O
58	SAME ADDRESS	Caller advises that there has been a bear in the trailer park for three weeks now and the supervisor of the park won;t deal with it. Third night in a row for the bear to be here. Caller walked out for the bear to be right outside her door.
59	SAME ADDRESS	COM advised that they live in a duplex at the above location with plenty of kids. Recently a bear has been accessing the garbage, and shows no fear of people. COM has had to clean up the garbage for the past 4 days or so. ***COM would like a callback to discuss this bear and issues***
60	SAME ADDRESS	COM advised that there are two dead alpacas on the property at the above location. COM's s.22 is down at the barn, and suspects it was a cougar.
61	SAME ADDRESS	Caller advised there has been a problem BB in the above location for over one month. Caller states around 0400 this morning the bear entered her house through an unlocked door and accessed her garbage. Caller states no aggression was made towards her and when she noticed the bear had been in the house it had moved to the driveway. Caller states no damage was done to the property. Caller advised on the weekend the bear attempted to enter into her car and damaged the bumper and the passenger door handle. Caller is requesting a call from a CO (Caller will be at work and will do her best to answer, if not she will call back)
62	SAME ADDRESS	Bear in CO trap.
63	SAME ADDRESS	Advises that there is a bear up the tree right now. It was trying to come onto the property and chasing the dogs. The neighbour was having problems with it trying to fight the dogs. Tomorrow is garbage day. The caller will load up his shotgun with buck shots in case it tries to come onto the property again.

	N	O
64	SEE BELOW DESCRIPTION	Black bear cub seen walking alone / climbing trees in the above area at time of call.
65	SAME ADDRESS	COM reported a BB tried to get in the front door then a window 15 minutes later. BB stood on the door with its front paws and on a window to swat at a hanging plant inside while the COM was sitting next to the window. It has been coming for 4 days. When the COM made noise the BB came to see what the noise was. COM has a s.22 the BB also tries to get in. COM has not left any garbage/compost outside. COM said they will try bear spray, but doesn't know what to do at this point.

7	<b>Narrative</b>
8	2021-12-02 12:49 CO Smienk spoke with cn. No food or attractants outside. Cn has bear resistant bins from the city of Nelson. Bear has opened vehicle several times and has been in back of truck pulling out childrens stroller. Cat 2 bear. Consistent attempts to entry of vehicles in community. Recent HWCRs within area of bear accessing part of residence. 2021-12-04 0910 Trap removed from residence. Brown phase bb euthanized. Male. Decent body condition, no visible injuries.
9	<p>2021-12-07 12:27 CO Owens called c/n leaving message for return call. Cub(s) of the year not assumed to be orphaned and provided every reasonable opportunity to reunite with their mother or should be given 48 hrs. After Aug 1 all efforts to leave healthy cubs of the year in the wild should be considered. Cub(s) of the year must be in good health and of adequate size for that age class with no serious injuries or obvious illness. Cub(s) of the year orphaned during august or later and is over 20 kg should be self sufficient and can be released/left in wild. 12:50 hrs. CO Owens contacted by c/n who advised she has known about bear cub in area past week and one half. Recently bear cub observed half the size of a German Shepard dog up an apple tree on the <sup>s.22</sup> property. C/n has contacted Northern Lights Wildlife Society who has put her in touch with closer rehabilitation facility Critter Care. C/n advised of above information as it may not be best situation for bear to be caught and transported to local rehabilitation facility. C/n forwards 2 images of bear cub and address bear cub observed at yesterday <sup>s.22</sup> West Kelowna. Bear cub also frequents <sup>s.22</sup> <sup>s.22</sup> CO views images of bear cub observing cub appears to be of not of adequate size and weight for age class. CO further determined Critter Care Wildlife Society operating with an expired permit since Oct 15, 2021. Northern Lights permit expires Dec 31, 2021. C/n advised of decision and will monitor and report future bear cub sightings in area. Weather last week mid teen temperatures with temperatures going below freezing past several days with snow noted on ground. 16:45 hrs CO Owens and Seitz attended <sup>s.22</sup> residence at <sup>s.22</sup> West Kelowna, <sup>s.22</sup> had <sup>s.22</sup> and neglected to remove apples on two apple trees on property this fall. Loch advised bear cub has been observed feeding on apples on property and he would have to pick apples from tree and on ground ensuring bear not further habituated and food conditioned on site. <sup>s.22</sup> agreed this would be done tomorrow morning. 16:50 hrs. Bear cub treed on site next to residence. 16:53 hrs Bear darted 2 cc dart <sup>s.15</sup> vial 19-395 100 mg/ml. Dart 1 missed approx. 15 yards. 16:54 hrs. Dart 2 - 2 cc dart right hind. 16:57 hrs bear tranquilized and hung up in tree 20 yards up. CO's with latter and pole remove bear from tree. Bear underweight approx. 30 lbs. CO's were dealing with Cat 1 sow black bear and two cubs in close proximity to occurrence area. Sow and one cub initially caught and dealt with. Considering bear euthanized and disposed of. 18:15 hrs CO Owens contacted Caley Thacker, wildlife vet, B.C. Earlier call made to Thacker considering comments northern lights rehabilitation society made</p>

HWCRs

	Y
	disputing cubs after Aug 1 cubs of adequate size and health low levels of habituation and food conditioning left in wild. Thacker advised each situation assessed on its on merits and above directive still considered. Thacker will discuss issue with <sup>s.22</sup> Northern Lights Wildlife Society. 18:30 hrs ago CO Owens briefed Sgt Myroniuk HWCR concluded. 2021-12-11 07:39 Reviewed by Sgt Myroniuk .
10	2021-12-09 11:49 CO STARK was briefed on the report and attended immediately. STARK called the COM of update 1 to get a detailed description of exactly where the bear was. The COM explained its near a large yellow barn closest to the driveway of the next house. STARK was able to locate the bear with that description. STARK has been monitoring this bear since the first report was received on Saturday December 4th. STARK observed that the bears condition had declined significantly. On December 4th the bear was able to run (with a limp) and today it could only walk one or two steps before laying down. STARK euthanized the bear for humane reasons. The <sup>s.22</sup> told STARK they had been watching this bear for the last few days and felt its condition was worsening each day. The bear was a large female. She was missing teeth on the left side of her mouth. There was a large, deep laceration to her back end that was causing her immobility. Unclear what caused the laceration but start will send photos to the provincial vet for clarification.
11	2021-12-12 15:54 CO ADAMS attended Quatsino with a bear trap. CO ADAMS called number provided in the report, no answer. CO ADAMS spoke with a variety of community members stating the bear frequents the whole community on a regular bases. CO ADAMS picked the safest location to set the trap based on the amount of unplowed snow. Trap was set <sup>s.15</sup> <sup>s.15</sup> CO GUDBRANSON attended to <sup>s.15</sup> parking lot where bear trap was set. Met outside with <sup>s.22</sup> who advised she has been the contact person for the near in trap. <sup>s.22</sup> <sup>s.22</sup> Had discussion regarding conflict bear breaking into vehicles. Advised <sup>s.22</sup> that COS was advised the conflict bear was a large bear and that COS was told this is not the same bear. CO GUDBRANSON had brought another bear trap to set on Quatsino First Nation land. While in parking lot another <sup>s.22</sup> <sup>s.22</sup> advised CO GUDBRANSON that this was the bear he saw break into <sup>s.22</sup> vehicle this morning at 4am. <sup>s.22</sup> <sup>s.22</sup> advised that he has had this bear in his carport and it is captured on home video. <sup>s.22</sup> showed video of from his iPhone to CO GUDBRANSON and bear on video appeared to be same as bear in trap. <sup>s.22</sup> advised that he drove his car over to <sup>s.22</sup> vehicle to to scare the near away. Discussed verification of bear in trap as COS has been told the conflict bear is large. Advised <sup>s.22</sup> that bears look smaller in the large culvert trap. While discussing with <sup>s.22</sup> advised that <sup>s.22</sup> had the bear break into her vehicle. <sup>s.22</sup> attended to the bear trap and viewed bear. <sup>s.22</sup> <sup>s.22</sup> advised that on December 10th at 2230hrs <sup>s.22</sup> went to get into <sup>s.22</sup> and bear was in back seat of the vehicle. <sup>s.22</sup> had a container of <sup>s.22</sup> in the vehicle. <sup>s.22</sup> messaged <sup>s.22</sup> and <sup>s.22</sup> advised that the bear was not a big bear it was a medium sized bear and not a small one. <sup>s.22</sup> requested file number for <sup>s.22</sup> Discussed trying to verify if bear in trap is conflict bear and by information bear described as conflict bear. Discussed possibility of resetting the other trap after this bear removed. Discussed messaging for attractants in vehicles and in general. <sup>s.22</sup>

	Y
	<p>s.22 and wants have a CO attend a band meeting to present to council and then to community members when save to do. Advised COS would work with leadership and provide presentations. Other community members s.22 had discussion with CO GUDBRANSON. One member, s.22 advised s.22 damage done to s.22 vehicle. Bear was also into s.22 car on Friday night as well. Inquired about bear that did damaged to s.22 and s.22 advised it was a plump-round bear. CO GUDBRANSON illuminated the bear in the trap and s.22 advised it could be but s.22 knew it was round and black. Discussed information with Sgt. NEWTON and high probability of two conflict bears in community as experienced in other areas of NIZ with same vehicle B&amp;E behaviour. Discussed information with Shelley MARSHALL Regional Wildlife Biologist. Based on all information COS has received high probability of 2 different conflict bears and bear in trap was identified by s.22 as observed entering a vehicle at 4am today. CO GUDBRANSON parked 2nd bear trap at s.15 and removed bear in trap. CO GUDBRANSON went to secluded location and when viewing bear in trap prior to euthanasia, he observed a plastic yoplait yogart package in the bear's feces. 225lb sow BB euthanized. CO ADAMS was updated on actions taken and PM bear trap s.15 s.15 at Quatsino for pick up or redeployment if required.</p>
12	<p>2021-12-14 17:17 CO EAGLES contacted COM, call went straight to VM. CO EAGLES left message with advice to ensure all attractants are secured in bear resistance manner and to announce presence on property by speaking loudly. Cat 2/3 as no mention of food conditioning has been made. CO EAGLES provided file number and RAPP line should conflict escalate. CO EAGLES expressed that in cities with vehicles and disturbance it is justifiable that a family unit may take slightly longer to enter dormancy. COS to monitor. CO EAGLES concluded file. ADE</p>

13	<p>2021-12-21 16:16 CO Anderson called Sgt. Sanderson discussed cub. Cub same as HWCR 21-32183 still in area and now been fed.</p> <p>2021-12-21 16:24 CO Anderson called COM from Update 1. COM told CO cub there since yesterday. That he fed it dog food since it is so small and lethargic. COM thinks cub is about 30lbs. CO warned COM not to feed the cub dogfood or anything and that doing so is a violation under Wildlife Act. COM commented that the only choices he had was shoot it or feed it. CO warned COM not to shoot the bear as that would also be an offence. CO advised COM she would follow up the following day and assess further. Advised to not approach cub. 2021-12-21 16:33 CO Anderson called COM from original HWCR. COM is <sup>s.22</sup> (COM from update 1) COM told CO that she understood the cub had been around a few days and that it got into dog food. That she had just seen it herself for the first time today. COM described the bear as being smaller than a large border Collie. Advised COM important the bear is not fed as it will not leave if it is. 2021-12-21 16:44 CO Anderson called KOOT and discussed bear. Advised the bear has now been fed, and thinks bear will remain in area without chance of denning. CO informed reported size consistent with it being a COY. Advised that COS will not be attending at this time as cub is not currently presenting a public safety risk and no resources available to attend. KOOT advised that she will plan to attend and work with Norther Lights to get it to Smithers. CO advised she would follow up with COM at location cub at, gain permission to share contact information and get pictures to send KOOT. 2021-12-21 17:51 <sup>s.22</sup> from Northern Lights update CO Anderson that KOOT will be attending Princeton and she will keep CO updated. 2021-12-22 08:31 CO Anderson called COM from Update 1 and left voicemail requesting a callback. 2021-12-22 08:34 CO Anderson called COM from HWCR 21-32183 and left voicemail requesting a callback. 2021-12-22 08:55 COM from Update 1 called CO back. COM advised cub still on site. CO advised that CO would like to forward COM's information to a group that does bear rescue. COM advised he was good with that. CO requested photos of the cub. 2021-12-22 10:00 CO Anderson updated Sgt. Sanderson that KOOT will be attending and cub will be going to Northern Lights. 2021-12-22 11:01 CO Anderson reviewed photo. Bear size from photos most consistent with a COY or a very small stunted yearling. Photo of bear forwarded with contact information of COM to KOOT. KOOT updated she would be attending asap and will keep CO updated. 2021-12-22 13:35 16:00 KOOT updated CO that she and another volunteer attended the property and were waiting for COM to get back home to get permission to set trap. 2021-12-23 13:35 08:06 KOOT called CO Anderson and advised that the bear was caught, but it is a yearling and not a COY. CO advised CO would attend or arrange another CO to attend. CO attempted to call Merritt CO Pike. No CO in Merritt available. 2021-12-23 08:14 CO Anderson called Sgt. Sanderson and advised him the bear was caught and believed to be a small yearling. CO &amp; Sgt. discussed bears recent history in context of age class. History of food conditioning to non-natural food and history showing signs of increasing habituation concerning. CO Anderson to attend, assess history further, and immobilize bear and check health and age class. 2021-12-23 11:00 CO Anderson attended site and met with KOOT. KOOT advised that the COM told her about concerning bear behaviour the morning before and the bear had a injury on its nose that she thinks came from the COM scaring it off the poach and using a stick or a broom and hitting the bear with it. CO advised CO would follow up with COM's. CO Anderson spoke with COM <sup>s.22</sup> informed that the cub has been around at least 4 days. <sup>s.22</sup> informed CO that the morning before <sup>s.15</sup> wanted to go out on deck to get firewood. That he opened the door and scared the bear off the deck. That the bear scared off the deck so he went out on the deck and the bear ran up onto the deck towards the open sliding glass door. That <sup>s.15</sup> kicked at the bear (no contact reported) and she closed the door quickly as the bear ran into the glass door with it head. CO inquired if <sup>s.22</sup> hit the bear with anything to move it back. <sup>s.22</sup> indirectly implied that he had because the bear wouldn't get off the deck, but wouldn't provide details. CO spoke with</p>

	Y
	<p>s.22 was reluctant to share any details of the incident with CO, CO advised s.22 CO was wanting to understand what happened to assess bears behaviour. s.22 shared that he scared the bear off the deck and went out onto the deck to get firewood and the bear tried to run into the house. CO Anderson visually assessed bear in trap. Bear overall size, body shape and muzzle shape consistent with a yearling. Weight estimated by CO to be between 35-60lbs CO used jab stick and immobilized bear with s.15 vial 18-610. Very fast deep induction. CO examined bear. Bear was a boar, very underweight with no extra fat stores, fur condition was good. All paws showed peeling of a layer of pad tissue with fresh tissue beneath. To CO Anderson it looked consistent with a healing cold injury or a burn injury. Very small fresh minor injury on nose with a couple small abrasions and no noticeable swelling in area. Teeth in good condition with some minor staining. CO Anderson discussed history and body condition with KOOT. CO advised KOOT that CO would be euthanizing bear due to a combination of age class, habituation in conjunction with concerning dangerous behaviour, food conditioning to unnatural food, and poor body condition. 2021-12-23 12:00 KOOT and her volunteer assistant departed site. CO Anderson euthanized bear on site. CO Anderson met with COM's again. Provided attractant advised again and strongly advised that they are required under Wildlife Act to ensure all dog food and attractants are secured at anytime a bear is present. CO removed bear carcass and departed. 2021-12-23 12:32 s.22 from Northern Lights texted CO Anderson indicating she was updated on the outcome (by KOOT). 2021-12-23 12:41 CO Anderson spoke with Sgt. Sanderson and updated on the findings and outcome.</p>
14	<p>HWCR and Update #1 Accepted by CO Bjarnason. Outcome pending. 2022-01-04 09:20 BJARNASON reviewed report and updates and contacted COM. COM stated the bears, a sow and two yearlings, have been hanging around the general area for approx. 1 month. They had seen the bears on their security camera showing interest in the porch of their house. The COM had reinforced the skirting around the porch but the bears dug underneath the plywood to den under the porch. The bears have been seen coming and going from the porch but most recently the sow seems to be denning while the cubs still come and go. The bears can be heard moving items underneath the porch, "playing" with each other and snoring. COM indicated that the bears have not acted aggressive in any way. COM mentioned bears had been in some garbage but was unsure of the extent of food conditioning and habituation. COM advised he hasn't been looking under the porch and that he has been in contact with bear bios. COS to attend. 09:57 Sgt. Newton attended COM's residence. Fresh bear tracks/family unit noted across the street in neighbours driveway. Tracks in last nights snow. Tracks up driveway and s.22 to front door of residence. Tracks also present at COM's house, up on front porch at main entrance to home. Sgt. Newton spoke to COM s.22 who was home. s.22 explained the recent bear behavior, describing the bears as "extremely habituated". Bears up on deck, knocking wooden box/recycling container around (only cardboard in this box), peering in window, paws on window of residence. Bears have accessed enclosed deck and walked around to far side of house (elevated porch) to look through these windows as well. COS has fielded several calls over previous month regarding family unit in s.22 area accessing garbage. s.22 indicated that he'd heard the same, and confirmed knowledge that these bears have been into garbage. He has since ensured his garbage is locked away, but the bears keep coming back to his house as they have found</p>

	Y
	<p>a comfortable bedding site under his front porch. s.22 used plywood and 2x4's to block access a few days ago, but the bears returned and simply dug under the plywood so they are now contained by all sides when using this day bed. s.22 has contacted Lana/bear biologist who told him to try and board them out, but that they will likely come back; which they now have. (Lana had then briefed FLNRO bio Shelley Marshall). Very limited options at their current location/bears present at time of Sgt. Newton's visit; visible at front door of house by using flashlight and looking straight down between decking boards. Bears cannot be hazed out of this location, cannot be darted, nor can the plywood be removed/too close to bears/safety issue. only viable solution is to set multiple culvert traps in hopes the entire family unit is captured. Sgt. Newton discussed file w/ WLB Biologist Shelley Marshall. Garbage habituation history limits options as these bears are not translocation candidates. Cubs are 2 yrs old/sub adults. Shelley agreed to try culvert trap option as bears cannot remain at this location and must be removed. Sgt. Newton discussed file w/ Inspector Norris. Traps will be set overnight. Bjarnason conducted search in HWCR database and found 21 reports from December regarding family unit accessing garbage, hiding under a porch, and sniffing at windows. 2021-01-05 No overnight capture. Bjarnason and Petrovic attended and refreshed traps and conducted a bait burn. Fresh tracks seen coming out of "den" and going around the back of the house into the back yard. Spoke with neighbour from street below who advised that two bears were in his garbage "last night". COs provided education and advice. Bears still under front deck bedded down. 2021-01-06 Call received OCC regarding bears in traps. Bjarnason called COM who lives down the road. COM stated that there was a bear in each trap. Bjarnason, Adams, and Newton attended. Both juveniles dispatched- both appear to be very healthy COY. BJARNASON, NEWTON, ADAMS, and PETROVIC attended address and removed plywood that was blocking the view underneath the deck. No other bears were found under the deck. Suspected that sow is denned up nearby. COs spoke with homeowner and asked them to keep the area open and to monitor cameras to see if the sow comes/goes at all and to report to RAPP with updates.</p>
15	<p>2021-12-29 @ 1230 hrs. WSRO BLAKE called COM. Rural, forested areas nearby. COM stated a decent sized black bear, approximately 2x bigger than a German shepherd has been causing a multitude of problems at COMÆs property and surrounding neighbours. COM stated the bear ran at her recently while out burning some items in her yard. COM ran from bear and tripped while bear kept coming towards her. COM made it to safety as the bear continued towards s.22 nearby. No noted aggressive behaviours. Bear has had food rewards and has been continuously causing problems since May 2021. COM stated since May, it has been seen attempting and entering vehicles, attempting to open a door to a neighbours house, it has cause damage to her house and vehicle, it is unafraid of higher level hazing techniques such as bear bangers, physical stimulants of rocks, sticks. Bear is candidate for removal for being highly food conditioned, habituated and itÆs escalating behaviours. Trap has been set previously with no success. Advised to secure all attractants, anything with food scent. Advised to continue to call in sightings and incidences to RAPP line, have neighbours call in as well. Trap to be set again, to discuss other options with another officer. Will monitor. 2021-12-30 @ 1100 hrs. WSRO BLAKE attended location. Set trap #3. COM is familiar with reset procedures as trap has previously been set at location. Will monitor. Please keep open until bear is captured or timeline expires. 2022-01-01 @ 1511 hours HWCR 21-17616 update 2 rec'd - bear in trap 2022-01-02 @ 1600 hours - CO Eichstadter attended and collect bear trap with adult male bear. Bear dispatched and carcass disposed of in wilderness area. NFAR</p>

	Y
16	<p>2021-12-29 1445 CO KOPP called and spoke to COM. COM advised Brown BB the size of a german shepard dog in area. Visdibly in distress. KOPP advised no COS available at this time. Give the bear a chance to move off and den. Monitor the situation and report if its health decreases. Animal is too large to be rehabilitated and if COs attended it would be to euthanize for humane reasons. 2021-12-30 1042 KOPP spoke to COM for update 1 and 2. BB still present and has now denned under COM's porch. COS attending. 1341 KOPP arrived at the state address. Met with COM, multiple others. Located brown BB cub denning underneath porch. Extremely slow, barley responds to noise. Snowball used to ge the animal to lift its head. Euthanized for humane reasons. Upon further inspected the bb cub of the year was extremely imaciated and thin, would not have survived the winter. Too old and large to be rehabilitated. Advised people present. Persons present advised that the cub had been into community compost, food conditioned.</p>
17	<p>2021-12-30 1211hrs CO Gudbranson called com back. Com advised that large bear has broken into<sup>s.22</sup> shed and gotten garbage and at 0400hrs this morning, com was awoken by the bear ripping the skirting off of this mobile home. Com observed black garbage bags being drug under his home. Com advised that bear is not present now and had plugged hole with recycling container. Com advised bear has been getting into other sheds and garbage and is very habituated and not scared of hazing. Com advised bear got garbage from house across the street and dragged garbage to his yard, and then under his home. Com advised that many community members are commenting about this bear causing conflict. Update Sgt. Newton regarding Category 1 bear. 1500hrs CO Gudbranson attended to coms and met <sup>s.22</sup> shed door ripped off last week and bear accessed garbage stored inside. Bear also damage fence at side of residence. While at coms, <sup>s.22</sup> attended location and advised that he reported a sow and 2 cubs getting into garbage earlier and that they cross a fence at his place. Sow and cubs were last seen 1 week ago in area. Set bear trap in <sup>s.15</sup> for security. Tested trap door 3 times. Com will call RAPP. Com advised <sup>s.22</sup> have been left voicemail messages that Conservation set trap <sup>s.15</sup> (GG). 2022-01-01 0727hrs ECC called that bear in trap HWCR 21-32691. 0800hrs CO Gudbranson called com back to advise CO will be attending shortly. 0945hrs CO Gudbranson attended com's. Com advised bear was at trap door on night of December 30th but would not go into the trap. Com placed some garbage in the trap on Dec. 31st and bear went into trap at 0200hrs. CO Gudbranson observed single large bear tracks in snow at <sup>s.22</sup> and at com's property. Verified with com that bear in the trap is conflict bear, white chest patch. Removed bear trap <sup>s.15</sup> and attended Caribou mainline near Oyster River. Adult male bear 250lbs euthanized. CO Gudbranson contacted local First Nations contacts and made inquiries about bear being utilized form ceremonial use. No request for ceremonial use. Due to stat holiday,severe weather conditions and safety, CO contacted Mainroad Contracting North Island and made arrangements to have bear taken to landfill with other road-killed wildlife from their works yard. 1354hrs CO attended to Cumberland Mainroad Contracting office and moved bear into wildlife recovery vehicle for transport to landfill for disposal with other deceased wildlife from roadways. 1440hrs Bear trap washed and cleaned and stored inside Black Creek warehouse. (GG).</p>

	Y
18	<p>2022-01-01 14:17 CO SMALL called COM, COM stated a COY was spotted trying to access her house and sleeping by the propane exhaust vent from house by neighbor. 2022-01-01 14:30 CO SMALL grabbed dart gun and cage, informed A/Sgt KNIBBS and asked for backup as unsure if COY or yearling with possibly a sow, BB possibly under deck. 2022-01-01 16:05 CO SMALL at residence, COM shows CO SMALL where BB was sleeping, CO SMALL caught movement to his right, a 50 ish LBS BB was watching COM and CO SMALL. BB went back around house when CO SMALL approached, CO SMALL got COM into house and mixed a 3cc dart. KNIBBS arrived as CO SMALL finished mixing<sup>s.15</sup> CO SMALL darted BB as it was heading up a tree in yard, 30 second induction time. Inspection of the BB revealed severely emaciated, pelvic bones protruding, has adult teeth. CO KNIBBS placed BB into back up his pickup and will euthanize at safe spot due to BB being unhealthy and public safety risk as it was peering/pushing on house windows.</p>
19	<p>2022-01-09 16:30 1701 SANDERSON (on Vacation) received text from Lydia KOOT advising she received information from<sup>s.22</sup> from Round Lake (24km north of Princeton) advising he had a BBC in his garage. KOOT inquired if we received a report and if she could assist in capture and sending to rehab if needed. SANDERSON noted there were 2 reports - however they were not actioned - confirmed with the 2 officers on duty. SANDERSON gave KOOT ok to capture/trap the cub and assess. SANDERSON contacted A/Sgt. Jesse JONES and advised he gave KOOT permission to trap bear. JONES changed his A/L plan to be on the next day. 2022-01-10 1230 SANDERSON received text from KOOT advising she caught the cub - however she was not certain if was a COY. SANDERSON advised he would have A/Sgt. JONES contact her. SANDERSON provided KOOT's contact information to JONES 16:30 JONES attended the Kamloops office to meet Northern Lights Volunteer to assess the BBC that was trapped in Princeton near round lake. Bear was drugged and teeth were inspected. BBC was yearling and Northern Lights could not take it. It was agreed that the most humane option was to euthanize the bear. JONES euthanize on site. Bear is currently being stored at the Kamloops office. Bear is extremely under wait and size for its age. JONES estimates weight to be between 35 and 45 pounds. 2022-01-28 12:06 File Reviewed. documented drug use in drug ledger corrected vial number (last digit is z not 7) no mention of amount of drug used - remained was disposed of.</p>
20	<p>2022-02-03 12:30 CO DYKE patrolled down Sukunka FSR. No BB observed. CO spoke with security company at the Blind Creek camp. Observations of the BB were coming in daily, but the BB seemed to be mobile between 2km and 6km. At 17:30 CO DYKE spoke with the gravel operator who advised the BB was seen this morning at 6.5km. At 18:00 CO DYKE observed the BB sitting under a tree above the ditch line at 6.5km. CO approached the 2 yrd old BB who moved in behind the tree. The BB attempted to climb the tree approx 2 ft from the ground when noise hazed, but allowed the CO to get within 6ft of it without making noise or signs of stress. CO delivered 2x .22 to male black bear for humane dispatch. CO observed three carcasses 5ft from the tree in the ditch above the snow. Two deer and one coyote. CO retrieve the small, thin male BB and returned to the warehouse with the carcass for a pending necropsy, weight and measurements. Upon brief physical check, all four paws appeared cut and blistered. The pelvic bone ribs and skull/jaw bone could be keenly felt beneath thick, winter fur. 2022-02-04 10:30 CO DYKE and WSRO LAFFERTY conducted a necropsy of the juvenile, male BB. Body weight was 49lbs. The hide appeared in fair condition, no patches or mites. All four paws had cuts, frostbite burns and blisters. Measurements for body length 1250 mm unskinned skull length 320 mm unskinned skull width 215 mm Teeth appeared in good condition and pointed. No tooth sample removed. Photos taken. COs identified fat content was poor to</p>

	Y
	minimal, no visible fat depositions over organs or in muscle. CO could feel bone beneath the hide and observed the scapula, pelvic bone and femurs to be boney and atrophied muscle groups. Liver appeared black in some places. The intestine were clear and transparent, not material inside, stomach content included: apple sticker, trail mix/almonds, and deer hair. The lungs, a pale pink, were extremely light and spongy. CO noted that the mucas plug was intact in the rectum. The bladder was small and shriveled. CO returned carcass back to natural environmental for disposal. Photos attached to HWCR file folder 21-33897. File concluded at this time. COS reference to COORS file 202200610.
21	0826 hours called provided number mailbox full, no message left. 1005 hours call received from cn is looking at the bear right now. If CO BOOTH can attend he will wait at the location, access from Buffalo Creek. 1030 hours CO BOOTH attended and noted a year old cub at the base of a fir tree. CN told CO BOOTH the bear appeared perky today compared to yesterday and asked what CO BOOTH was going to do. CO BOOTH advised that since the bear was not a cub of the year, did not try to retreat or tree and did not have a fear of humans the only option was to euthanize it. CN did not like this response and then left the site. CO BOOTH dispatched the bear with 2 head shots from his issued 22 magnum rifle and then removed the carcass. Carcass provided to CO KLINE for PAT Training purposes.
22	2022-02-16 12:12 CO ELDER Briefed on injured BB that is dragging rear legs and has no movement of hind end of body. CO ELDER contacted COM who advised BB was still present and using its front paws to drag itself along the ground and into the green space behind the COM's address. COM to send photos of BB to CO ELDER who reviewed photos of BB. CO ELDER and STARK to attend. 1235hrs CO ELDER and CO STARK located BB. assessed bears condition, unable to walk properly, dragging both hind legs and no movement in entire back half of bear. unable to climb and struggling to move. 1326hrs CO Elder fired 3cc dart of s.15 at bears right hip/leg and successfully delivered drug. 1330hrs bear is asleep, co STARK approached bear to confirm asleep, bear was then covered up with bear blanket and moved to a suitable position to allow a clear airway. 1353hrs. CO ELDER hand injected BB with 3cc of s.15 as there was some movement in head and eyes, COS then began transport of BB to roadway where truck and bear trap was waiting. COS loaded bear into bear trap for transportation. 1446hrs. due to urban surroundings and public safety risks associated, the bear was transported to wilderness setting and humanely euthanized. 1515hrs. CO Elder disposed of BB at mission landfill.
23	2022-02-24 15:00 JONES contacted COM and confirmed the bear was still in the area - last seen 1 hour prior and obtained a description of the location. ~1545 SANDERSON and JONES located the bear and confirmed it was in very poor condition with visible wounds to its neck area, laying down at the base of a fir tree. JONES dispatched the bear. SANDERSON and JONES removed a coyote snare from the neck. The snare was not closed - ie it was broken, however the cable was lodged deeply in the bears neck. The bear was removed from the scene and disposed of along s.15

	Y
24	<p>2022-03-03 16:03 JONES called Com and spoke about the report. Bear was seen entering and leaving the den in the last week. No indication that it had accessed any garbage in this strata as all have garages. Main dumpster was accessed last year by a bear and JONES suggested they use carabiner when closed to make access less easy. JONES asked the com to remind residents to not approach the den or the bear if it is still around. JONES stated that an officer would attend the site tomorrow and assess the possible den site. The officer should be able to determine if the bear is present or frequenting the den. 2022-03-06 14:45 JONES attended the site and inspected the den. JONES found an adult BB in the den. Eyes open. BB is very close to the entrance and facing the small entry point. JONES not able to tranquilize the BB. Area residents have stated that the bear looks "very skinny" and "unhealthy". This is likely as the bear denned very late in the season and has been leaving the den to look for food. JONES suspects that the bear is hungry and accessing the only food available which is garbage in the area. JONES closed the area around the den with police tape and advised all the residents of the complex the bear is denning under. JONES also spoke with the manager of the strata s.22 stated that she has already put out messages to the residents on the strata community page. JONES set a live trap in the immediate area. JONES asked residents to call into RAPP with any sighting. JONES to reassess 2022-03-07 2022-03-15 Trap removed with no catch. No evidence of activity around the trap. No further calls to this date and time. COS will monitor. 2022-03-24 09:48 Com called stating the bear was emerging from den briefly then going back in. JONES and CONATTY arrived and inspected the den. Bear had returned to the den. Officers tranquilized the bear inside the den and removed for assessment. Bear was a mature but undersized and very skinny male. Bear's pelage was in poor condition. No winter pelage. Bear had some hair loss due t mites. This bear is strongly believed to be a bear that was frequenting the immediate area all summer and fall. Officers set several live traps but this bear would not go into lie traps. This bear was believed to be accessing garbage in the surrounding neighborhoods. This bear was up several times this winter and did not den until the middle of December. The overall behavior indicates that this bear was accessing unnatural foods and not getting the proper calories needed to sustain itself long enough to den.</p>
25	<p>2022-03-06 @ 1645 hours - CO STERLING left a message for COM s.22 advising the COS was aware of the bear, and that garbage and compost need to be secured indoors in a garage or shed. Requested that COM report future sightings, and CO informed that it was an offence under the wildlife act with a 230.00 fine. Also to visit wildsafebc.com for more information. NFAR update 1 rec'd @ 1556 hours 2022-03-06 @ 1710 hours - CO STERLING contacted COM HWCR 21-35232 update 1 - s.22 , concerned for the neighborhood, everyone should be fined for attracting the bear. bear is a candidate to be removed, to comfortable, not aggressive at this point, living in the area under houses. COM is concerned for peoples safety, traps have been in the area, no success due to food availability, education for neighborhood and audits and fines. No officer available at the time. 2022-03-07 @ 1630 hours - Sgt. BATES and CO ADAMS attended. Adult male black bear located sleeping under s.22 No Aggressive or threatening behaviour exhibited. Location not suitable for darting or euthanizing. Gained permission from s.22 to place live trap in their parking spot along the road. s.22 Provided safety and attractant advice to residents. Also provided RAPP number on cards. Trap to be set 2022-03-08. 2022-03-08 @ 1230 hours - Sgt. BATES and CO ADAMS attended and set trap #3. Bear still under house. Awake and moved to nearer the entrance. 2022-03-11 @ 1230 hours - Sgt. BATES, CO GUDBRANSON, CO ADAMS, CO BJARNSON and WSRO BLAKE attended. Trap still set. Bear still under house. Tranquilizer dart mixed up using entire Vial #19-55 of s.15 . Assessment made. Risk to officers to tranquilize bear under house was too high. Bear has</p>

HWCRs

	Y
	<p>shown no aggressive behaviour. Safest method is to rebait trap and live capture bear. Drugs in dart withdrawn and disposed of. 2022-03-15 @ 1515 hours - Sgt. BATES and WSRO BLAKE attended. Bear still present under house. Scat outside indicates bear has been active. Re-baited trap. 2022-03-16 @ 0830 hours - Sgt. BATES advised bear reported in trap (HWCR 21-34423 update 2). 2022-03-16 @ 1000 hours - Sgt. BATES and WSRO BLAKE attended; hooked up bear trap and removed it. Local resident stopped to advise Sgt. BATES that the<sup>s.22</sup> 2022-03-16 @ 1200 hours - Sgt. BATES reviewed bear's history over the past 3 months in HWCR reports. No aggressive behaviour. Bear did show little to no fear of people, was day active in a very residential community, accessed non-natural food sources and entered a garage to access groceries that were being transferred from car to home. Bear has also been denning under several homes over the past 3 months. Bear has above moderate behaviour in an urban area and meets Category 1 criteria in both accessing non-natural foods (garbage, compost bins) and entering dwellings. Adult male bear euthanized. Carcass returned to the wilderness.</p>
26	<p>2022-03-12 10:20 BARTOL attends location and finds small black bear. As BARTOL approaches the bear climbs a tree. BARTOL leaves to collect immobilization equipment. Upon return bear is on the ground in the same spot as earlier. As BARTOL approaches bear trees again. Immobilizing drugs administered. BARTOL and HALL determine the bear is starved and unlikely to survive, therefore euthanize. 2022-04-27 15:22 reviewed by Sgt. Kruger-good Prov Drug Inventory Log updated.</p>
27	<p>2022-03-14 2145 CO HARRIS attended the pulp mill and located a juvenile black bear sleeping under a large conveyor belt. Belt was shut down, CO HARRIS snare poled the cub and captured inside steel kennel. CO HARRIS sent information regarding age, health and weight to supervisors. CO HARRIS stored cub in secure kennel over night while awaiting direction. 2022-03-15 CO HARRIS was instructed to dispatch cub by<sup>s.15</sup> , as it was cub from last year, not a candidate for rehab, and no food available due to snow cover. CO HARRIS dispatched with one round from duty issued side arm in remote location, ground and large treed area as back drop. Carcass returned to nature. 2022-04-04 10:57 ASGT McArthur reviewed file.</p>
28	<p>2022-03-15 14:00 JONES and Sanderson attended the Adams Lake Band and spoke with<sup>s.22</sup> and<sup>s.22</sup> SANDERSON explained that it was most likely habituated to humans and was accessing garbage. SANDERSON stated he and JONES would attempt to capture the bear and assess its condition. SANDERSON advised that per the reports the bear was likely in poor condition - also given that it was out of its den early. SANDERSON explained that due to a very healthy bear population due to favorable weather supporting natural food sources in 2019 &amp; 2020. 2021 saw very unfavorable weather conditions that impacted the bear's natural food sources. As a result the COS have been seeing/hearing of incidents where bears have been impacted such as orphaned cubs at denning and now bears emerging early - likely due to lack of fat reserves. Officers were not able to tranquilize the bear safely or humanely. A live trap was set and left over night. COS advised MOYER that they would be setting a trap and the Band advise they would have it monitored by security. 2022-03-16 12:30 JONES attended as there was no report of a catch. JONES spoke with a neighbor of where the trap was set and they stated that the house owner was out at the trap often and the bear may not of gone in due to that. The bear was still in the same location near the trap. JONES could not safely or humanely dart the bear where it was as its condition was so poor that it made it very hard to hit a large enough muscle with a dart. JONES instead fed the bear a donut with drug in it to partially tranquilize the bear so he could approach and dart the bear more humanely and accurately. When the drug</p>

	Y
	<p>took effect orally JONES was able to approach the bear and administer a dart in the neck. Drug took affect and JONES quickly determined the bear was severely under weight and had several physical injuries. The bear was missing approximately 40% of it's fur. Bear was a female yearling and weighed approximately 45 lbs. Due to the bears very poor condition the bear was humanely euthanize. Body condition was photo documented. 2022-03-17 16:25 - Sanderson called with s.22 and advised CO Jones was able to tranquilizer the bear and found it to be in very poor condition (emancipated/very thin, missing significant hair, sores on paws, legs, hips) therefore it was euthanized. Sanderson confirmed s.18.1 (was on route to do so). Sanderson also asked if there was anything else that could be done, and s.18.1 stated nothing else was necessary. s.15; s.18.1 2022-03-18 1400 Sgt. Sanderson received a call from s.22 asking if Sanderson could send an email addressing questions that he received via email from s.22 Sanderson agreed. Sanderson provided the following information: Upon tranquilizing the bear, Conservation Officer Jones was able to inspect the bear and determine it was in very poor health. The bear was believed to be 2 years old and was very emaciated and missing a significant amount of hair due to mites and stress. As a result of being so thin, the bear had several open sores caused by abrasion and frost bite. The bear was euthanized away from where it was found/captured. I took the bear s.15; s.18.1; s.22 s.18.1; s.22</p> <p>I don't believe the bear had a communicable disease that would be a risk of spreading to other animals. We currently have a strong population of bears in the region and unfortunately the spring, summer and fall of 2021 was not favorable to black bear's natural food sources. As a result we saw several situations where smaller/younger bears were being orphaned during the denning season last fall/early winter. Unfortunately some bears that were able to den, may not have been able to put the fat reserves on that were necessary to survive the winter and are emerging sooner than normal. We believe this was the case for this bear. Thank you again for opportunity to work with you in your territory. [The email chain is saved in the TFZ investigation folder]</p>
29	<p>2022-03-17 12:26 - WSRO TUCK contacted COM, no answer. Will try again later. 2022-03-17 14:45 - CO OWENS contacted COM who stated that the bear was around in the fall and had been seen entering under their neighbors home multiple times and had then hibernated under it. The neighbors do not live there during the winter so the home has been vacant. COM stated that the bear is cinnamon in colour and has a white face. Northern Lights advised COM that this is normal in bears and that it is caused by having their face down while hibernating. COM sent photos of bear to OWENS, the hair around the bear's face is completely gone. COM advised that she believes the bear is under there at this time. 2022-03-17 15:30 - CO OWENS and WSRO TUCK arrived at site and conducted assessment of the house under which the bear was hibernating. There are multiple access points and hiding spots underneath the house and officers were unable to locate bear. Officers spoke to COM's s.22 who advised that this bear had been around for a while and that last fall he had come within three feet of it. s.22 stated he saw the bear enter underneath the house the previous night around 18:30hrs. Officers left to grab live trap. COM called before officers reached Kelowna and stated the bear is sitting outside the entrance to underneath the house. 17:45 officers returned and tranquilized the bear at 17:51 hours. Officers located the bear at 18:06 and started assessment on the bear. Bear was found to have no hair left on it's face, thinning hair</p>

	Y
	<p>on it's chest and belly, scabbing throughout the body, severely on the top sides of the rear paws and cracked metacarpal pads on all feet. The bear also had burdock throughout it's body. OWENS consulted with Caeley THACKER who stated that it appeared to be a severe case of mange mites, which is usually associated with an underlying health problem. Officers hand injected another dose of tranquilizer at 18:15 and allowed COM and neighbors to view the animal and provided them with education on bear safe practices. WSRO TUCK collected email addresses to send out information on bear safety. Officers left the community and decided that the best course of action was euthanasia. Officers collected a hair sample as well as the tip of the bear's ear as per request from THACKER. The bear was then euthanized. 2022-03-18 08:22 hrs CO Owens sends the following e-mail to provincial wildlife vet Cailey Thacker and wildlife health vet, Cait Nelson: Cait, recently we had an adult bore black bear den under a residence in Fintry. We tranquilized and off site euthanized this bear following our response guidelines considering the conflict history and actions of this bear. Can you provide some guidance to us on the animal welfare front related to this matter. I see some states are reporting mange mites in bears, not sure how common it is in BC? IÆve seen it in the past in some of <sup>s.22</sup> that have come back to zoneÆs for release. This bear denned under a home this past winter and pets (dogs and cats) would have access to area. Is mange mites transferable to pets/people? Is it only transferable through direct contact or do homeowners have to take special clean up efforts where bear denned where mange mites might be transferable to pets? Just the questions homeowner is asking. Of course, we are providing the standard prohibit non natural attractants to bears. DonÆt habituate and food condition bears increasing the public safety and property damage risk and ultimately jeopardizing bears lives message to the public. Any direction or information you can provide to us on bear mange mites moving forward from an animal welfare piece would be greatly appreciated. Thank you. 08:28 hrs. Caeley Thacker, provincial wildlife vet advised the following: Hi Ken, Mites tend to be species specificà they may get onto other animals or people, but generally donÆt live long or cause an issue. If people have elderly pets or are immune compromised themselves, they may wish to treat their pets for parasites and treat their home if theyÆve been in contact with an infected animals, but generally this is not necessary. Freezing, drying, and UV light will kill them in the outside environment. Severe infections are a welfare concern for bears as (apparently) they are incredibly itchy and uncomfortable. Severe infections like the one on this bear are usually associated with some underlying condition, so poor immune function. I think, for anyways, severe infections are rare and more mild infections often clear up when the animal has access to better nutrition in the spring. Hope that helps, let me know if there are any other questions! Thanks, Caeley 2022-03-19 14:11 - Reviewed by Sgt Myroniuk. In future, as a best practice, summarize pertinent points in emails versus cut and pasting them verbatim in outcome reports.</p>
30	<p>At 2022-03-16 19:25 CO DYKE received a call from RCMP dispatch and ECC regarding an injured sow with cubs. 2022-03-16 19:31 CO DYKE contacted COM who reported a black bear sow was laying in the ditch across the road from West Fraser Mills in Chetwynd. COM reports had been laying there since 18:00 and had not moved. COM said she had tiny cubs with her. At 19:41 CO attended West Fraser Mills Road where Cst LACHARITE and COM were waiting with a black bear sow who was immobile on her side in the ditch. Two very small COYs attached to her abdomen. With human noise, the sow could only raise her head and move her front paw to push cubs under her. CO DYKE left the area to gather the kennel and net. CO contacted Northern Lights Rehab <sup>s.22</sup> center to advise of situation. At 20:30 CO DYKE attended to dispatch the sow with 1 dispatch of 12ga shotgun and 1 dispatch of .40 pistol for quick and humane euthanasia. CO collected both black bear cubs, one male and one female, and placed them in the kennel. CO contacted permitted WL Rehabber - Northern Lights WL Shelter <sup>s.22</sup> (Smithers, BC) to update of possession of two</p>

	Y
	<p>small cubs. s.22 provided advice on how to care for the cubs over night. Transportation was arranged for cubs - WSRO LAFFERTY to meet s.22 in Prince George for nourishment and vet care. 2022-03-17 08:26 CO DYKE contacted COM for follow up of outcome. COM was relieved and happy to hear the cubs were able to make it to the rehab center. At 10:30 s.22 advised that she had the cubs with her. At 16:00 CO DYKE examined black bear sow body. Injuries were consistent with MVI strike.</p>
31	<p>2022-03-17 13:00 RCMP referred file. Bb has ripped s.22 in Christina Lake and is living under the s.22 Cn is s.22 and has seen the bb come and go from under the s.22 CO Bueckert attended and observed the damage to the s.22 and fresh bb tracks and scat. Cn was not home at time of attendance and CO Bueckert does not have phone number. LBT set. RCMP member who lives in neighbourhood will check LBT in morning and evening. CO Bueckert believes this is the bb that was causing issues late into the season in 2021. Category 1 bb due to property damage and food conditioning. 2022-03-17 16:00 CO Bueckert received vm from neighbour advising that bb was now in the trap. CO Bueckert attended and euthanized 2-3 year old male bb in poor condition. Carcass disposed of at s.15</p>
32	<p>2022-04-01 1532 hrs BICKFORD called COM. Detailed VM left advising com to secure garbage in locked receptacle and visit wildsafe.com for more information. CO number left in case they wish to call back for more information. 2022-04-01 1541 BICKFORD received call back from com. Com stated that a large bb is continuously getting into garbage in the neighborhood. BB has broke the COM's fence and garbage cans. COM stated that when the bb is confronted that the bear is not fearful of humans and just stares. COM does not have the ability to secure their garbage in a shed or garage. BB is food conditioned to unnatural food sources, moderate conflict history, and is starting to show signs of habituation to humans. According to the COS matrix, the bb is a candidate for removal. BICKFORD will attend tomorrow to set a trap at the COM's residence. 2022-04-02 @ 1130 hours - CO BICKFORD attended and set trap #4. COM briefed on how trap works and to call RAPP. COM notified that BB will be euthanized if caught. COM to monitor trap set in driveway of residence. CO BICKFORD noted compost can and recycling that were full of food waste and unclean refuse. CO BICKFORD provided education to clean bins and secure attractants or bear will not go into trap. COM does not have a way to freeze or store garbage other than inside house. COM stated they would be doing dump runs more frequently. Trap to be set for a week or until BB is caught. UPDATE 1 &amp; 2: 2022-04-12 09:00hr CO Eichstadter attended trap, bear in trap is large, not small. Com did not approach trap and just assumed it was small. Bear in trap is target animal. Co removed trap, dispatched animal, and disposed of carcass in wilderness area. Bear was large adult male black bear. Nfar.</p>
33	<p>2022-03-30 14:15 - HARBICH attended the above address and found a large black BB (very small white chevron on chest, only visible when the bear is on its back lying down) sleeping in the yard. Same description as the bear that has been at the Burnaby Equestrian Centre. No escape routes to shepherd the bear into a creek, nearest green space was blocked by several houses and busy roads. BB eventually got up and began walking around the neighbourhood. HARBICH followed bear from a distance but could not pressure bear towards any direction due to the high amount of people and houses around. HARBICH followed the bear and advised people of its presence until the bear returned to the above address at 16:30. HARBICH mixed 3cc of s.15 (at 1.8ml concentration). Dart was</p>

	Y
	<p>deployed at 17:20h and hit low abdomen/high thigh area and BB climbed up a hemlock tree. BB then wedged up the tree and the drug slowly took effect with no way to get the BB down safely. HARBICH and MILLER set a culvert trap at s.15; s.22 in hopes of capturing BB when it comes down the tree. Wildlife biologists Josh Malt and Nicola Bickerton have stated that translocation is the best option for this bear. BB to be captured and translocated to either the s.15</p> <p>s.15 . 21-36180, 21-36182, &amp; 21-36200: 2022-04-01 08:00 - HARBICH responded to hwcr 21-36180 and was unable to locate bear. HARBICH drove to north vancouver to get a culvert trap and found the bear at Seaforth Elementary. MUELLER arrived on scene and her and HARBICH tracked the bear through the neighbourhood. MUELLER located the bear sleeping in the yard at s.22 2022-04-01 13:18 - HARBICH mixed a 3cc dart of s.15 (1.5ml water per vial). MUELLER darted the bear in the front left shoulder at 13:18 and the drug took effect at 13:24. Bear had mobility of its head and front legs while MUELLER was retrieving the trap, so HARBICH gave bear hand injected 1cc s.15 (1.8ml water per vial) at 13:35. Bear still had mobility of its head and front legs so HARBICH gave bear hand injected 1cc s.15 (1.8ml water per vial) at 13:41. BB was tagged (2-236), put into the recovery position in a culvert trap at 14:00, and taken to north vancouver office where HARBICH monitored its recovery (fully recovered at 17:45h). s.15; s.22 culvert trap also removed. 2022-04-01 17:30 - HARBICH unable to relocate bear today because Rice Lake gate staff are unavailable to let HARBICH out of the watershed at this hour. HARBICH placed bear trap under a carport at the north vancouver office so that the bear is warm and dry. Bear is standing on four legs, breathing regularly, no visible health concerns. Bear to be released in the morning 2022-04-02 08:03 - HARBICH released bear 18.5km up the s.15 . Bear was fully mobile and running upon release. 2022-04-06 09:38 Sgt gravel reviewed and updated tracking sheet.</p>
34	<p>2022-04-01 @ 1422 hrs. Sgt. BATES attended. Bear GOA. Nobody home. Called complainant and provided advice. Keep livestock and feed secure to prevent predation. Keep garbage secured or face fine. Attacks are extremely rare. Allowing dogs to play with children in yard is great idea. Report future sightings or incidents. If bear persists it will be removed. 2022-04-26 @ 1057 hours - update 1 rec'd 2022-04-26 @ 1400 hours - Sgt. BATES attended. Confirmed it was a bear attack. Complainant secured carcasses. Sgt. BATES set live trap #2. Demonstrated reset procedure. Advised to secure goat barn better and get electric fencing. 2022-04-26 @ 1947 hours - update 2 rec'd - bear in trap 2022-04-26 @ 1958 hours - Sgt. BATES called COM. Large bear in trap. Advised COM a CO would come out in the morning 2022-04-27 @ 0915 hours - CO Eichstadter attended and collected trap. 1020 hours - CO Eichstadter and Sgt. Bates dispatched bear and disposed of carcass in wilderness area. NFAR</p>
35	<p>2022-04-04 13:30 CO Smienk called and spoke with cn. Advised to ensure bear does not access attractants and to let neighbors know as well. COS will not be moving bear. Not COY. Asked cn to call RAPP if condition deteriorates.</p>

	Y
36	<p>2022-04-09 2300 CO KOPP received call from ECC. 2339 KOPP attended. Tribal police present. BB GOA. Large foot prints in snow. Followed trail back into wooded area. Found a garbage bag with food stuffs inside. Went to residence. Property damage present. Witnesses described large, black in color, BB. No distinct characteristics beside the size of the animal. Advised about attractants. Advised to let neighbours know bears are in the area, manage attractants, keep pets and children close. BB food conditioned and habituated. COS to set trap in AM. 2022-04-10 1050 KOPP set CT near the residence. Advised resident of how to operate trap. Check morning and night. Card given, call RAPP if BB in trap. 2147 Update 1 KOPP called and spoke to COM. BB in trap. COS to attend in AM. 2022-04-11 0850 KOPP attended. BB matches description of offending BB. Large mature male BB euthanized. 0930 KOPP s.18.1</p>
37	<p>2022-04-09 1626 hours CO BOOTH called provided number, left voice mail advised he will call and then attend tomorrow. 2022-04-10 0946 hours CO BOOTH called provided number, left voice mail advised he is on his way. 1030 hours CO BOOTH at residence, door knock, answered s.22 CO BOOTH located bear and walked to within 1 metre of it. Bear did not move other than to attempt to lift it's head. 1040 hours cn arrived home. CO BOOTH advised that he will put the bear down as it is not afraid of humans and appears to be sick. CN advised bear has been around for 2 days and did not move very much. CO BOOTH killed the bear with 2 head shots with his issued 22 magnum rifle. Carcass loaded into patrol truck and later returned to natural environment. Bear was a yearling and weighed approximately 20 pound.</p>
38	<p>2022-04-09 17:55 hrs. CO Owens advised by ECC c/n picked up a BB cub that was on her porch and has placed it in a box and now has it inside her home. 17:57 hrs CO Owens called c/n confirming a possibly injured BB cub was on her porch adjacent to residence, possibly injured and she picked it up and is now in a box in house. CO asked c/n if sow BB observed in area or other bear(s) this spring? C/n advised no other bear(s) observed in area. C/n advised CO will attend property and further investigate. 18:15 hrs CO references draft cub guidelines. TJ Gooliaf, wildlife biologist advised of occurrence. CO will assess BB cub attempt to reunite with mother. 18:30 hrs CO Owens attended c/n's s.22 residence. C/n s.22 C/n provided CO with box from within house with CO determining alleged BB cub in fact a small bird that recently hit the window?? CO provided advise preventing future birds from hitting entrance door window to residence as large mirror in back of door reflecting forest giving birds the impression they can fly through glass. 19:00 hrs CO attended forest fringe pond area near occurrence area and released uninjured bird. HWCR concluded. 2022-04-11 reviewed by SGT HANRATTY.</p>

39	<p>2022-04-09 19:09 C/n contacted ECC advising adult BB three/four days ago April 7, 2022 mid day accessed a car at <sup>s.22</sup> Kelowna. Chicken feed was in car with BB dragging bag of poultry feed out of car and feeding on feed adjacent to residence mid day. Poultry feed has since been secured making un available to future bear(s). Bear has accessed unprotected garbage stored on property in back of pick up truck and in <sup>s.22</sup> with top this passed week. Garbage has been secured now being unavailable to bear(s) on property. Recently 2022-04-09 18:30 hrs an adult black bear came back onto property showing high levels of habituation and was very hard to persuade off property. C/n concerned related to bear(s) behavior considering c/n's <sup>s.22</sup> frequently on property. C/n informed of WLA sec 33.1(2) offence provisions ensure moving forward all unprotected garbage and livestock feed unavailable to bear(s) as it will further habituate and food condition bears and jeopardize public safety. 19:30 hrs. BB classed as a CAT 1 bear with trap set on property. Numerous bear c/n's recently received to RAPP line in neighborhood. C/n will monitor trap and call RAPP line when BB caught. 2022-04-10 21:30 hrs <sup>s.22</sup> advised bear in trap. 2022-04-11 06:30 hrs. CO Owens attended occurrence location determining adult bore black bear in trap. C/n advised second adult bear on property 4 am. CO observed bear had accessed unprotected garbage adjacent to house dragging bag of garbage between house and barn adjacent to goat pen. Further bear accessed unprotected <sup>s.22</sup> feed stored in <sup>s.22</sup> tote. Bear drug and broke tote feeding on grain contained in unsecured tote. C/n <sup>s.22</sup> placed bag of garbage in unprotected garbage container next to residence bear accessed. CO advised everyone on property needs to do better at securing non natural attractants making them unavailable to bears which ultimately jeopardizes public safety and jeopardizes bears lives. 07:30 hrs CO Owens removes adult black bear from site euthanizing and disposing of. 10:30 hrs CO Owens issued <sup>s.22</sup> WW WLA sec 33.1 dealing with garbage and <sup>s.22</sup> feed accessed by bears DWPO related to garbage and livestock feed issued with c/n immediately coming into compliance with DWPO. Bear trap reset on property for second CAT 1 bear accessing property. 2022-04-12 06:37 hrs <sup>s.22</sup> contacted CO Owens advising second bear in trap. CO Murdock attended occurrence area determining 2-3 yr old male BB in trap. BB removed from site, euthanized and disposed of. HWCR concluded. 2022-04-14 17:30 JONES called COM and discussed the report. JONES stated he would attend the property the next day and set a trap; possibly two. 2022-04-16 15:30 JONES attended <sup>s.22</sup> JONES set one live trap on property in same area other trap were set and caught. Com stated the bear was in the pen with the <sup>s.22</sup> last the previous night. Com stated the bear was large. JONES also set a trap at <sup>s.15; s.22</sup> This property is also large and has had bears traveling through on a regular basis. This property has not reported conflict as they are managing their attractants well but, there property is private and out of public view making it a good spot to target cat one bears in the immediate area. this trap is <sup>s.15; s.22</sup> Property has bears move through the property on a regular basis. There are several piles of bear scat on property. Property is directly between <sup>s.22</sup> 2022-04-23 trap pulled from above area by CO Kopp and power washed and set in <sup>s.15</sup> for three cat 1 bears. 2022-04-19 14:19 reviewed by Sgt HANRATTY</p>

40	<p>2022-04-16 09:42 CO MUELLER reviewed report and contacted COM. COM advised he is care taker for the Cooper Ridge Conference center. COM advised for 3 consecutive days a BB was attempting to access garbage from the garbage garage. COM advised the center was built in 2020 but this is the first year of operations due to COVID. COM stated they currently have guests and it is a large center. COM advised the smell from the garbage garage attracted the bb. The BB caused damage to the building and COM also stated the bear damaged one of the doors at the front entrance. COM advised there a more then one bear present on the site but has photo/video of the BB that caused the damage. COM stated it was a single bb ( unknown if tagged - will confirm once photos received via email.) No A/T behaviour reported. 2022-04-19@1400hrs CO MUELLER attended location and set culvert trap. Target BB to be assessed. Outcome to be determined by condition/behavioral history and FLNRO bio. Contact COM for front reception for access to trap behind first gate. CO MUELLER will attend location to assess damage and conduct attractant audit to ensure building it a secure and strong facility to prevent any further conflict. Another report was received in Britannia ( HWCR 21-36813 @ s.22 ) Tagged left ear/yellow bb broken into aluminum shed. Unknown at this time if same bb. Further follow up required. CO MUELLER to attend site today and meet with COM. s.22 2022-04-20 15:11 Reviewed by Sgt Gravel</p> <p>2022-04-27 09:26 Gravel attended. Bear was present 2 days ago but didn't go in the trap. Gravel reset trap for an other few days. 2022-05-01 1840 Gravel was advised that bear is in the trap. Gravel travelled to location to find un targeted bear in the trap with tag # 1-1038. Bear was relocated twice in 2021. Gravel released bear by s.15 Tracking sheet updated. Advice provided to location manager to deter bears from the property.</p>
41	<p>2022-04-18 15:15 CO CALDWELL spoke to COM and determined that there is a black bear hanging around the COMS house. The COM has chickens, horses and dogs s.22</p> <p>s.22 in the last two days, the bear has been around and today has killed at least two chickens. The bear shows no fear of humans yelling, clapping or making loud noises - human conditioned. The dog eventually chased it up a tree on the property. 2022-04-18 16:30 CO CALDWELL arrived and confirmed that the chickens were killed by a bear. CO CALDWELL observed the black bear running in the bushes adjacent to the property. CO CALDWELL set a trap in the COMs' yard and advised to phone the RAPP line if the door is closed or the bear continues to display abnormal behavior. CO CALDWELL advised COM to clean up all attractants, most notably the grain bags in and around the shed. 2022-04-19 14:16 A/Sgt KNIBBS and CO LEBLANC arrived at the residence and moved the trap to a more suitable location, s.15 where the bear was last seen. 2022-04-20 CO's set foot snares at the location. the bear was captured on camera walking around the culvert trap and did not go in. The bear has killed one additional chicken overnight. 2022-04-28 07:30 CO CALDWELL received a call from ECC that indicated there was a live fox captured in the bear foot snare and that the door on the bear trap was also closed. CO CALDWELL and A/Sgt KNIBBS attended location and learned that the offending bear was captured in the culvert trap. The bear seen on trail camera footage is consistent with the bear captured this morning in the culvert trap. CO CALDWELL and KNIBBS euthanized the male, food conditioned black bear and disposed of the carcass. CO CALDWELL and KNIBBS tranquilized the snared fox with a jab pole. 8 CC's of water was added to the vile of s.15 and 3 CC's of mixed drug was used to tranquilize the Fox. Officers determined that the fox was uninjured and would survive. The female fox was relocated to the s.15 The remaining mixed vile of s.15 (21-3872) was discarded.</p>

42	<p>2022-04-20 15:04 CO HAWKES reviewed HWCR and phoned COM. COM heard his truck horn and went outside to find a skinny bear ripping apart his truck. COM not sure how bear got into truck but it smashed the rear window to get out. CO discussed options and COM would have a bear trap on property. CO HAWKES discussed with CO SMIENK and SMIENK is enroute to set LBT. 2022-04-24 CO HAWKES notified bear in LBT. CO attended and met with COM. Bear matched size and color of bear that ripped apart truck. Bear also matched description of bear getting into garbage in nearby area last few weeks. Bear destroyed and disposed of <sup>s.15</sup></p>
43	<p>2022-04-20 @ 1150 hours - CO BICKFORD attended and spoke with several people in the community about attractant management. There are two bears frequenting the community during the day. One bear is coming in at night. CO BICKFORD provided advice and will attend to set trap for food conditioned bears being seen during the day time. Moderate conflict history. Candidates for removal based on COS matrix. Two bears being seen together appear to be the same size. <sup>s.22</sup> (21-36632 update 3) - trap to be set at this property <sup>s.22</sup></p> <p>2022-04-21 @1040 hours - CO BICKFORD attended and set trap #2 at <sup>s.15; s.22</sup> CO BICKFORD left detailed vm on <sup>s.22</sup> phones about trap and monitoring. <sup>s.22</sup></p> <p>. CO BICKFORD briefed two neighbours to call RAPP lines if they hear or see door is closed. CO BICKFORD delivered Wildsafe BC pamphlets to several houses on the crescent. Many houses in the area storing cans outside of their garage. CO BICKFORD provided education to some neighbours that if the mess continues, she would be back to issue DWPOs or fines. ***2022-04-24 @ 1309 hours - HWCR 21-35532 u4 rec'd advising trap needs to be removed immediately*** 2022-04-24 1350 hours -CO Eichstadter reviewed report. Trap needs to be moved ASAP. CO to attend and move bear trap immediately. 2022-04-24 @ 1830 hours - CO Eichstadter attended and removed trap - no other location that trap could be moved that would be accessible if bear entered trap without causing significant damage to COM's property. Trap removed - to be reset at COM property in same spot on 2022-04-26 as garbage p/u will be two weeks away **culvert trap 2 set 2022-04-21 - removed 2022-04-24** 2022-04-28 @ 1140 hours - CO Bickford attended and reset trap # 2 as it had been pulled due to garbage day. 2022-05-07 @ 0619 hours - update 5 to HWCR 21-36632 rec'd -bear in trap 2022-05-07 @ 0840 hours - update 6 to HWCR 21-36632 rec'd 2022-05-07 @ 0845 hours - CO Bickford called COM and explained that she would be attending as soon as possible but has to deal with a public safety matter first. CO Bickford requested if COM could do some crowd control for her until Bickford could arrive. COM stated that she would not and that she has had to look at the bear in the trap for the last 2 hours and that the COS needed to attend now. Bickford stated she could not and advised she would send RCMP to do crowd control around the trap. Sgt. Bates also called Com and explained we were aware of bb in trap. Will attend when public safety matter resolved in other location. @ 1120 hours - CO Bickford attended and collected trap. Relieved RCMP of crowd control duty. Transported bear to safe location. @ 1200 hours - Euthanized approx imately 350 lb boar bb. Disposed of in wilderness.</p>

44	<p>2022-04-20 @ 1500hrs CO MUELLER attended location and met with COM. COM advised sow with cubs ( 2) have been in area since yesterday. Sow appeared to be very lethargic and not moving from area. Sow was seen feeding on grass and is lactating ( feeding cubs) Sow appears weak but still mobile and feeding. CO MUELLER assessed sow and cubs from distance as cubs were sleeping on sow. Bears appeared quite small in size - unable to determine if COY or Yearlings. Unable to get closer look at sow as didn't want to disturb family unit. No report of injury to sow. Family unit is located in backyard that borders wilderness interface. MUELLER advised COM and concerned residents to give bears space and to ensure no dogs or people approach bears. MUELLER advised sow is possibly lethargic from hibernation and needs time to recover. MUELLER advised she will attend in am to assess sow condition. MUELLER advised residents if sow no longer mobile or feeding to contact RAPP if condition worsens. UPDATE 2 @0711hrs CO MUELLER received call from ECC. COM advising they believe the sow has passed and the cubs are present. @0800hrs CO MUELLER attended location. Sow was laying in middle of open yard. Cubs were not present as large propane truck had scared them off when it used air brake. MUELLER assessed sow. Sow did not have any reaction (no movement or vocalizations) to CO presence and allowed CO to handle sow. Sow was still breathing but slow and labored. Sow was extremely emaciated and suffering. MUELLER determined sow needed to be humanely euthanized. MUELLER hand injected sow with s.15 in order to transport sow out of area to be euthanized. Residents were extremely upset and location was not desirable to euthanize. Sgt. GRAVEL and CO SCHUMACHER arrived to assist CO MUELLER with cub capture. Sow was taken to s.15 and euthanized by CO MUELLER. Sow weighed total of 44lbs and was taken to s.15. Cubs were located in tree sleeping. It was determined after discussions with Prov. Vet and Bio best option for cub survival was to capture and take to Critter Care for short duration. CO SCHUMACHER set 2 havahart traps under tree where cubs were present. Still unable to determine if COY. 2022-04-23@0720hrs CO MUELLER received call from ECC. Bears are in traps. CO MUELLER attended. 2 cubs trapped in havahart (1 each trap) MUELLER advised Sgt. GRAVEL and Biologist BICKERTON. MUELLER hand injected and jab stick to 1st cub. Cub was very small in size approx 15 lbs/ female. Photos of molars sent to Prov. Wildlife vet - Caley confirmed yearlings however very small in size for age. Yearling was placed into crate for recovery. MUELLER and GRAVEL attempted to sedate 2nd cub with no success. s.15 had minimal effect on cub. CO's were able to move 2nd cub into crate for transport but unable to handle and determine sex. Yearlings were taken to Critter Care - sexed and tagged. 2 female yearlings 9 kg/7.4 kg Residents advised of outcome. Provincial drug tracking sheet updated/ South Coast Bear relocation tracking updated. 2022-04-25 09:29 Reviewed</p>

45	<p>2022-04-21 1445 Sgt Beetlestone called c/n. Information provided was two bears believed by c/n to be a sow and a yearling grizzly have killed <sup>s.22</sup> in the last week. About 2 weeks ago the bears first showed up and <sup>s.22</sup> used on the property. c/n could not provide a reason why he did not call earlier. c/n confirmed he has not electrified any part of the farm <sup>s.22</sup> Sgt advised he will attend tomorrow morning. 2022-04-22 0600 Sgt Beetlestone and Inspector Van Damme respond to <sup>s.22</sup> and meet with c/n and <sup>s.22</sup> at approx 0920 hours. Met with c/n on <sup>s.22</sup> where the bears had gained access to the <sup>s.22</sup> the night prior. CO's began to obtain information from c/n and investigated the property and determined the following: two different sets of grizzly bear tracks; one large set which appeared to be too big for a female; tracks on <sup>s.22</sup> going both directions; tracks on farm property roads going both directions; <sup>s.22</sup> killed in different <sup>s.22</sup> fencing is page wire and ranges in 4-5 feet in height; no electric fencing observed; <sup>s.22</sup> had both sets of grizzly tracks from that morning (after the rain event); no electric fencing at <sup>s.22</sup> remainder of carcasses were burned last night; c/n claims he has a <sup>s.22</sup> : c/n provided video of one of the grizzlies which appear to be a large male; no videos of the two bear together provided; <sup>s.22</sup> over night in <sup>s.22</sup> removed and used for bait. CO's had a lengthy discussion with c/n and advised the <sup>s.22</sup> NEEDS to be rectified <sup>s.22</sup> and electric fence. Sgt Beetlestone asked c/n if Gillian Sanders attended the property in 2021 or 2020 to assist with electric fencing and c/n agreed she did. No fencing was ever erected. Inspector Van Damme specifically spoke to c/n about the action COS can take to order c/n to electrify <sup>s.22</sup> to prevent the bears from being attracted to non natural foods upon being in the valley bottom. c/n claims he understood this requirement. CO's set a snare and a culvert trap and explained to c/n the safety precautions and messages around the site. c/n to call Inspector van Damme in the morning upon safely checking the sets. 2022-04-23 06:00 Insp. Van Damme was briefed by COM that he awoke to find another <sup>s.22</sup> in the enclosure and that a large grizzly bear was captured in snare set. CO SOUCY and Insp. Van Damme responded and attended the site. Upon arrival grizzly bear was observed caught in the snare set and behaving relatively calm. The bear was successfully immobilized without any unusual adverse effect or otherwise. A biopsy of the left ear was collected and ear tag inserted. Hair sample was collected. Bear was transferred to LBT for transport to relocation site. Two snare sets were established to continue capture efforts as video, paw prints, and kill sites evidence relating to a second grizzly bear still actively predating <sup>s.22</sup> Continued phone communication and direction gained from discussions with wildlife biologist Lindsey DEWART regarding response and outcome. DEWART provided GPS coordinates for suitable relocation release site. COs successfully released the bear <sup>s.15</sup> as <sup>s.15</sup> from one of the site suggested by DEWART. Bear exited the LBT with full strength/speed and headed down hill and out of sight. April 25, 2022 Sgt Beetlestone and CO Thin attended to <sup>s.22</sup> around 1700 hours. <sup>s.22</sup> had advised Sgt Beetlestone that morning <sup>s.22</sup> were killed and no bears were caught. CO's set a trail set by the <sup>s.22</sup> and moved the culvert trap to the trail the bear used that morning to <sup>s.22</sup> CO's to saty during the night for any bear activity. Patrols conducted at 2200, 2400 and 0200 hours with the <sup>s.22</sup> at 0200 patrol. No bears observed. 0500 hours Sgt Beetlestone patrolled, no bears captured. <sup>s.22</sup> - later confirmed not killed by the bear. <sup>s.22</sup> attacked the night before died in the barn and in the <sup>s.22</sup> killed by bear located. Sgt requested all 3 new deaths <sup>s.22</sup> and all snares and trap will remain as is for another night. Heavy rain and Sgt unable to determine route of grizzly. April 26, 2022 Sgt Beetlestone received text from <sup>s.22</sup> there was a bear in <sup>s.22</sup></p>

	<p>trail set snare. Sgt informed CO Thin and Soucy whom responded. 2022-04-27 06:30 CO SOUCY was advised by CO THIN that snare set had captured grizzly bear. COs responded and attended the site and arrived on scene at approx. 09:30. CO SOUCY spoke with s.22 who explained that the bear in the snare is likely the offending bear as he observed bear in the s.22 last night which he scared away and exited the s.22 leaving obvious tracks which he marked/isolated with flagging tape for COs to measure/inspect. COs confirmed grizzly bear s.15; s.22 Bear acting relatively calm, and successfully immobilized with s.15 Bear was identified as an adult male. Hair sample was collected, ear tag inserted, and various body measurements obtained. The paw measurements matched the ones isolated by s.22 from the night before from the bear that was in s.22. All that information was passed on to Sgt. BEETLESTONE whom was liaising with wildlife biologist DEWART. Based on totality of conflict history (Cat 1), male sex, and livestock predation, DEWART decided the bear would need to be euthanized. COs euthanized the bear.</p>
46	<p>2022-04-22 09:22 CO KRENZ called COM. COM advised there has been a black bear accessing garbage at two residences in the immediate area and has caused property damage while accessing garbage. COM described the bear of normal size black in colour with a white patch on the chest. COM used a bear banger on the bear a few days ago and used bear spray on the same bear last fall. 2022-04-22 12:30 CO KRENZ on site. Provided attractant management advice to residents in the area. CO set a culvert trap on the property. COM to monitor trap and call RAPP upon capture. 2022-04-25 13:30 CO KRENZ onsite. Inspected trap and refreshed bait. 2022-04-28 13:00 SGT MELENKA removed culvert trap from area. No capture. 2022-05-07 01:09 sgt Melenka notified bear in trap 2022-05-07 09:43 sgt Melenka attended location and removed adult male black bear. Euthanized off site.</p>
47	<p>2022-04-23 14:18 BARTOL visits site and finds small bear in yard as he drives in - bear runs away immediately. BARTOL sets cougar live trap. 2022-04-25 17:00 BARTOL collects small black bear cub in trap. Transports to Golden warehouse, provides food and water. 2022-04-26 09:30 BARTOL assess black bear which is young of last year, very slim and small, in unhealthy condition. After consultation with Sgt Kruger bear is euthanized. 2022-04-27 15:06 reviewed by sgt. kruger-good</p>
48	<p>2022-04-22 1230 CO Smienk called and spoke with cn. Bear lifted lid on grey water tank. When cn yelled at bear, bear charged cn and chased him to the house. Bear then pushed on door to house with cn and his wife pushing on the other side. CO Smienk advised that he will bring a trap out. 1450hrs LBT set. Cn walked CO Smienk through occurrence. Bear chased cn approx 150-200m to house. Cn explained that he leaned out a second window with a 410 shotgun and shot the bear in the hind end with bird shot. CO Smienk unable to located and fur or blood from the shot. Category one black bear. 2022-04-28 1020hours CO Smienk attended. Bear in trap. Called in as HWCR21-37735. Removed trap. Adult male BB. Healthy. Euthanized.</p>

49	2022-04-22 1430 hours CO BOOTH spoke with cn bear has been into garbage at hotel as well as neighbor's bbq. Bear did significant damage to interior of <sup>s.22</sup> . CO BOOTH to attend tomorrow. 2022-04-23 1400 CO BOOTH attended, set culvert trap, advised cn to call RAPP if bear goes in trap. CO BOOTH spoke with 7 residents of Goldbridge, learned that the bear had also broken into a small freezer outside of another residence and took a package of hamburger. Bear also has accessed numerous residential garbages and received food rewards. 2022-04-24 0803 ECC called CO BOOTH, bear in trap, CO BOOTH enroute. 1230 hours CO BOOTH attended site and pulled trap. Residents expressed appreciation for rapid response and removal of bear by COS. 1300 hours CO BOOTH killed the bear with 1 head shot from his issued 12 gauge shotgun. Carcass later returned to natural environment.
50	2022-04-23 1315 MILLER receives phone call from CO Klassen. Provided details on bear injured Hwy 101. Cannot attend. MILLER phone call to COM for more details. COM confirms bear cannot use back legs after being struck by car. High traffic area. Bear described as 2 year old. MILLER attends. Track bear drag marks up bank on high side of 101 to a bluff where he finds bear (300m) from hwy. MILLER euthanizes BB considering injuries and suffering. MILLER radio RCMP to notify of shots fired. Bear left on site considering wooded area with no human traffic. Expose carcass for carrion feeding. Notes and phone calls to follow up.
51	2022-04-27 1700 CO Thin contacted and discussed issue with CN. Bear has broken into and accessed garbage in his garage 4-5 times this past spring. Advice provided. 2022-04-28 10:14 Attended. Assessed damage to garage. LBT set <sup>s.15</sup> 2022-04-30 re update and bear in LBT CO SOUCY attended and removed LBT. Bear was euthanized based on matrix and conflict history. Bear found to be an older adult male with severe damage to teeth likely from accessing unnatural food sources. Assessed as Category 1 Single Bear: Highly food conditioned and human habituated bear in urban area with moderate conflict history having caused property damage.
52	2022-04-25 16:30 CO Butcher spoke to RCMP, turns out it is the same yearling brown cub that has been around all winter. GOA at the time of the call to RCMP. 2022-04-29 11:30 Butcher received a cell call from local resident, same cub up telephone pole on <sup>s.22</sup> <sup>s.22</sup> Butcher attended, darted and removed. Yrling, stunted growth, emaciated and not doing well. Euthanized in forest area out of town.

53	<p>Trap set at s.15; s.22 Port Hardy. CO Adams attended and set trap. 2022-04-27 08:30 hours: HWCR Update reviewed by CO's BJARNASON and PETROVCIC. CO BJARNASON made calls to COM and to CO ADAMS. Attempts to reach CO ADAMS (who was on a time-management day / day-off) was in an effort to ascertain more information about the bear involved in the initial attempted break and enter at the residence. CO BJARNASON conducted HWCR (database) review so she could assist CO PETROVCIC in understanding the conflict history in the neighbourhood. CO PETROVCIC communicated with Sgt. NEWTON and it was determined that CO PETROVCIC would travel north to deal with the bear. (NOTE: significant travel delays due to work on Hwy 19 north of Sayward). CO PETROVCIC attended to the COM's residence and met with COM's s.22</p> <p>s.22 initially of the opinion that the bear that tried to break into the home a few days earlier was a larger bear. CO reviewed the bear in the culvert trap and it appeared to be a large male. s.22 described the bear's behaviour from earlier in the morning. s.22 advised that s.22 first observed the bear in her neighbour's fenced yard at 07:00 hours. s.22 described how the bear had walked out of the neighbour's fenced back yard and into their s.22 front yard. s.22 stated that the bear was in the front yard (about 10 feet from her front door) and it mulled around for a bit. s.22 said it appeared as though the bear ate a couple of dandelions and then proceeded to walk s.15 the culvert trap. s.22 described the bear as be absolutely indifferent to human presence and was walking around that close to the residence in broad daylight. Both s.22 shared that they thought bear in the trap was likely a bear that had been frequenting people's yards and accessing garbage last fall.. The CO reviewed good attractant management practices with s.22 CO advised that the dirty recycling being stored in an open s.22 garbage can would certainly emit an odor that the bear would be attracted to. Advice provided in regards to attractant management practices. CO reviewed the C&amp;E tools available to officers to influence compliance. CO reviewed adjacent yards for insecure attractants. CO hooked onto the trap and the towed the bear to a remote location. The bear was subsequently destroyed. The bear was determined to be a large adult male. CO PETROVCIC towed the culvert trap back to Port McNeill where it was in need of major scrubbing. Trap washed out with cleaner and a brush. CO noted what appeared to be a toonie sized hole in the trap floor. The hole is suspected to be the result of a slug round being used to dispatch a bear. CO PETROVCIC had utilized SSG rounds to dispatch the bear. Trap parked back in Port McNeill. NFAR - CH (SJP). NOTE: File written-up by CO PETROVCIC on 2022-04-28. (SJP).</p>
54	<p>2022-04-27 07:30 CO HANRATTY attended and retrieved CULVERT TRAP and bear. SGT HANRATTY took to euthanize and dispose of bear. s.15 Delayed by search for new location in snow covered roads. Bear disposed of on side of s.15 Bear was a small adult brownish tinge but primarily black. Small adult estimate 2 yo. male. 08:30 Returned to office cleaned trap and attend Save on Foods purchase bait for two traps. Reset trap at Coms address and then attended s.22 and rebaited that trap. 13:30 return to HQ On 2022-05-10 at 1530, CO Murdock attended the above address and removed trap. File concluded</p>

	Y
55	<p>2022-04-30 15:55 -CO MILLETT attends and speaks with COM. -COM reports that there is a larger black phased black bear that has been frequenting the camp and will not leave. -Attractant audit completed and all attractants have been properly secured. -BB in question continues to dig under a chain link fence to access and break PVC grey water and sewage pipes. -Bear had been sprayed with bear spray and still continues to come into camp and up to the cook house. -Due to the high level of habituated behavior, and damage to property, this bear was assessed as a Cat. 1 bear. 2022-05-01 09:00 -CO MILLETT attends with a culvert trap and speaks with a cook. -Cook states that there was now a brown phased black bear that was digging under the chain link fence at the cook house to access the broken sewage lines. The bear was sprayed with bear spray. -Cook took CO MILLETT to the fence to assess the damage. Upon arrival CO MILLETT observed a black phased black bear actively digging under the fence to access the sewage pipe. -CO MILLETT assessed this bear as a Cat 1 due to the habituated behavior and damage to property. -The bear was pushed to a safe location where the bear was euthanized and removed. Male bear, approx 4yo, -Due to there still being a brown phased bb, CO MILLETT set a culvert trap<sup>s.15</sup> 2022-05-05 10:50 -CO MILLETT attends and removed trap. -no further damage observed to the sewage system.</p>
56	<p>2022-04-30 15:14 Pike phoned com at 17:20hrs on the 29th and left a VM stating for the com not to collect the bear and to leave the area and that PIKE would attend in the morning. PIKE attended and spoke with the com, com showed PIKE where the bear was seen. It was still alive and in the same location as yesterday. The bear is described as a COY, very skinny, not able to stand or to keep its head up while PIKE moved it around to access its body for visible injuries, PIKE could feel the bones under the fur. PIKE explained his findings to the com and advised that the best thing for the bear would be for PIKE to euthanize it, the agreed. Once euthanized PIKE picked up the bear and estimate the weight to be 15lbs? The area where the bear was located was in the center of a 3 line, Powerline with no cover. Concluded. 2022-05-06 16:07 file reviewed OT call - ..5 @ 1.5 phone call</p>

	Y
57	<p>2022-04-29 15:00 -CO's MILLETT and WALKOSKY attended and patrolled Kluskus. -While in the community they spoke with s.22 states that there are a couple BB and GB's in the community accessing garbage. s.22 the plywood bins that the community stores their garbage in. -No other unsecured garbage observed. -A brown phase BB was observed but s.22 stated it was not the conflict bear and it was left alone. -It is believed that this brown phased black bear could be the GB the community has been talking about but cannot confirm. 2022-05-01 13:45 -CO MILLETT spoke with the s.22 states that the bear activity has gotten worse since my visit and that a black phase BB was chasing dogs and the brown phased bb. HWCR 21-37974 was created for this call. -This BB has flipped over and ripped apart one of the plywood containers. -He also states that a dog has been attacked. 2022-05-01 13:51 -CO MILLETT calls s.22 and leaves a voicemail. 14:25 s.22 calls back and requests the COS attends and euthanizes the conflict bears. -Several Cat 1 bears in the community ripping apart plywood bins and attacking dogs. -Community concerned for their safety. 2022-05-02 17:50 -CO MILLETT attends the Williams Lake office to discuss the bear activity in the Kluskus area with Acting Deputy Chief BUTLER. -It is determined that if there is a GB involved in the Kluskus area, we would be the Wildlife Branch involved to assist with it's hazard assessment. -CO MILLETT picks up the Grizzly Bear culvert trap. 2022-05-04 08:30 -CO MILLETT receives a call from ECC from RCMP Const. WILLIAMS who has received several calls from the Kluskus members about an aggressive Grizzly Bear. Const. WILLIAMS wanted to speak with a CO because he felt enough was being done. -CO MILLETT calls WILLIAMS to get up to date information on what he has heard. A voicemail is left with WILLIAMS. CO MILLETT calls RCMP dispatch who states WILLIAMS is not on the dispatches board. CO MILLETT calls the Quesnel detachment and no one knows where WILLIAMS is. -CO MILLETT contacts Acting Deputy Chief BUTLER and an over time call out is approved due to the lack of information regarding the Grizzly Bear in Kluskus. -CO MILLETT gets a hold of Const. WILLIAMS who states he has observed tracks of a GB close to the community stalking a moose and received calls from s.22 who is concerned for the community's safety because of the bears. 12:40 -CO's MILLETT and WALKOSKY arrive in Kluskus. -Due to the mixed information the COS had received about the bears in the community, their behavior, and species officers split up and try to organize a meeting with as many community members as possible. -CO MILLETT is waved down by s.22 and COM for HWCR 21-37974, who states the Grizzly Bear is currently behind the school and will not leave. -CO MILLETT arrives at the school and observes a brown phased black bear sitting next to the school approx 10 meters from the school entrance. -CO MILLETT asks s.22 if this was the Grizzly Bear he was reporting. s.22 confirmed the brown phased black bear sitting next to the school was the Grizzly Bear. s.22 brings BAPTISTE outside and CO MILLETT explains that a meeting is needed with community members to get everything sorted out and to confirm the communities wishes with the bears. -CO WALKOSKY arrives at the schools. s.22 When WALKOSKY arrives he informs CO MILLETT that there is currently a Black Bear on s.22. -At this time the meeting between CO's, s.22 BAPTISTE and s.22 starts. Everyone in attendance feels that there is a threat to the community's safety from these two bears and they agree that they need to be euthanized. -CO's MILLETT and WALKOSKY attend s.22 and observed a black phased black bear on a s.22 eating a bag of garbage. Due to the bear being in a confined space, accessing garbage, and showing signs of habituation the bear was assessed as a category 1 bear as per the HWCR matrix and was euthanized and removed. -CO's MILLETT and WALKOSKY then went after the brown phased black bear that had been staying around the school area. Due to the bear staying around the school yard, showing extreme signs of habituation, and reports of it attacking a dog the bear was assessed as a Category 1 bear as per</p>

	Y
	<p>the HWCR matrix and was euthanized and later removed. -When officers returned to the school, it was reported by community members that a second bear was <sup>s.22</sup> Upon arrival officers located a black phased black bear along side the house. Due to the bear accessing the <sup>s.22</sup> to access non natural food sources, and signs of habituation the bear was accessed as a Category 1 bear and was euthanized as removed. -Officers returned to the school to debrief the community when they were approached by community members stating that there was a bear behind the school that had tried to access <sup>s.22</sup> residence through <sup>s.22</sup> a couple days prior. CO MILLETT asked how <sup>s.22</sup> knew this was the bear. <sup>s.22</sup> showed CO MILLETT a photo he took with his cell phone of a black phased Black bear as it was <sup>s.22</sup> the photo was taken about 4 feet away from the bear. The bear had a a scar on it's nose and had a limp. -Officers confirmed the non of the black phased Black Bears that had been euthanized had a scar on it's nose. -CO MILLETT located the bear under the steps of the school. The bear left and officer's confirmed it had a limp. -Due to the bear being in a confined space, not leaving a school yard, attempting to enter a house, and showing signs of habituation the bear was assessed as a Category 1 bear as per the HWCR matrix and was euthanized and removed. -Officers met again with the community members who expressed that they would like the COS to attend the community to provide bear safety talks and help with bear smarting their community. -All four bears were confirmed to be adult male black bears 2022-05-06 15:45 -CO MILLETT e-mails the Wild Safe Coordinator for assistance with a bear safety talk with the school and community members as well as assistance with attractant management strategies. 2022-05-09 12:21 -CO Keenan-Toop called COM <sup>s.22</sup> in regards to HWCR 21-37974. <sup>s.22</sup> states a larger 4 or 5 year old black bear (completely black but with a lighter brown muzzle) has been very comfortable around houses lately. <sup>s.22</sup> stated that bear went underneath a house across from the school yesterday and spent a couple hours there before leaving. COM believes the bear has been accessing peoples attractants and getting close to other people as well as he has heard continual pots and pans banging and yelling since the CO's were last out. CO Keenan-Toop to attend when possible and conduct patrol for bear.</p>
58	<p>2022-05-01 1030 CO DAMERT attended <sup>s.22</sup> and met with COM who <sup>s.22</sup> COM stated the bear came to her residence four times last night attempting to access her garbage stored by the door. COM yelled at the bear but it was hesitant to leave. COM stated the bear went across the road and <sup>s.22</sup> the truck to access garbage there. CO DAMERT provided tips to COM on storing the garbage, COM had already taken the garbage inside but stated she was then catching mice in the house. COM also stated that some residents have been putting out feed for the deer. CO DAMERT visited the neighbour <sup>s.22</sup> but there was no answer. CO DAMERT noted the <sup>s.22</sup> and garbage that had been stored inside accessed. There were also bear prints along the side of the truck. CO DAMERT walked over to <sup>s.22</sup> where another bin had been knocked over and advised the resident who stated it had happened over night. Resident immediately cleaned it up. CO DAMERT walked along the east side <sup>s.22</sup> CO noted several garbage bags that had been dragged off into the busy and torn apart that were not there yesterday. CO also noted a deer eating the garbage. Another bag was dragged into the busy at the entrance and along the <sup>s.22</sup> CO DAMERT believes the access to garbage had caused habituation and food conditioning to the area. CO will set a trap and contact <sup>s.22</sup> 2022-05-01 11:30 CO DAMERT contacted <sup>s.22</sup> and relayed observations of morning patrol and advised a trap would be set. Manager will send out another email advising residents to be diligent with garbage and that she is looking into getting a large communal bin for summer months. 2022-05-01 13:00 CO DAMERT</p>

	Y
	<p>visited <sup>s.22</sup> as she had noted garbage in the back yard. CO spoke to resident and issued DWPO to clean up garbage behind house and bin and advised that it needs to be taken out and secured elsewhere if the garbage bin cannot be secured. Resident complied immediately and cleaned up all garbage before CO left the area. 2022-05-01 13:26 CO DAMERT attended with CO Mayowski and set trap <sup>s.15</sup> 2022-05-04 10:00 CO DAMERT attended park and moved trap <sup>s.15</sup></p> <p><sup>s.15; s.22</sup> Park manager reported that the bear had been there last night and was wandering though the back yard. Unsure if the bear had accessed any more garbage's at this time. CO spoke to other residents in the park who stated that the bear had come back and accessed their garbage, CO DAMERT provided tips such as using a ratchet strap to secure bins to deter access. 2022-05-08 23:16 COS received report of the bear in the trap - HWC#21-38760. CO DAMERT to attend in the morning. 2022-05-09 09:30 CO DAMERT attended <sup>s.15; s.22</sup> and found a black bear in the culvert trap matching the 2 y/o description of the target bear. CO DAMERT removed trap and spoke to <sup>s.22</sup> about providing a letter to residence about attracting wildlife. CO DAMERT advised she would send a letter to her for distribution. CO DAMERT transported the black bear to <sup>s.15</sup> and euthanized with one pistol round to the head. CO DAMERT assessed bear and found to be approximately 150 lb boar.</p>
59	<p>2022-05-01 16:00 CO CALDWELL and Sgt CORBETT attended location on the way back from Stewart. Officers learned that there is a severely food conditioned/habituated black bear accessing garbage and approaching people. The bear is not afraid and has been seen on multiple peoples porches. The bear has been seen for the last four days displaying this abnormal behavior and has become a significant public safety concern in the community. 2022-05-02 20:00 CO CALDWELL returned to location and set a culvert trap. Just as CO CALDWELL finished setting the trap, the black bear came out of the bushes and was not afraid of CO CALDWELL. 2022-05-03 05:00 CO CALDWELL received a call from ECC indicating that the bear was in the culvert trap. CO CALDWELL attended location and confirmed the bear in the trap was the target bear. CO CALDWELL euthanized the severely habituated, adult male black bear and discarded the carcass.</p>
60	<p>2022-05-02 @ 1030 hours - Sgt. BATES attended 2022-05-02 @ 1200 hours - Sgt. BATES examined carcasses and areas. Sent photos to WC COS for opinions. Determined bear was most likely. Advised COM Sgt. would return with trap 2022-05-02 @ 1600 hours - Sgt. BATES set live trap #3 Demonstrated reset procedures. Advised to check from safe distance at daylight and before bed. Call RAPP when caught. COM will bury remaining carcasses. 2022-05-03 @ 1020 hours - Sgt. BATES attended and removed trap #3. Adult boar put down. Carcass disposed of in wilderness.</p>
61	<p>2022-05-03 11:10 CO called and spoke with the COM. The COM explained that she lives in a rural area and is used to having bears. Over the weekend the bear broke into her car because there was a bag of garbage in the back. Then, This morning the bear broke into her house. The bear opened the front door that was closed, walked into the house and stole a bag of garbage. The bear is described as a large black bear with a thick luscious coat. 2022-05-03 13:12 CO STARK and CO FERGUSON attended the property. The Officers did not find any attractants around the property. Officers set a culvert trap. STARK discussed with the COM and she will monitor the trap. 2022-05-06 12:49- CO FERGUSON and CO STARK attended residence, bear in trap matching description given by COM of bear</p>

	Y
	that accessed house. CO STARK administered <sup>s.15</sup> to confirm sex of bear due to reports of sow and cubs in area. Bear confirmed to be male. Bear removed from property and taken to remote area to humanely dispatch.
62	Trap set by CO Adams. 2022-05-03 @ 06:00hrs: CO Adams attended trap after it was report that a bear was captured. Home owner confirmed with officer that bear in trap was the bear that had been an issue. CO Adams removed trap, dispatched bear and left as natural carrion in remote location. Trap taken back to Port McNeill office cleaned and stored. Bear was ear tagged (tag #1-194)
63	2022-05-03 16:39 Insp. Van Damme attended coms residence. Talked with <sup>s.22</sup> Bear involved in chasing <sup>s.22</sup> during daylight hours. Bear in yard for the past several days. Com experiences bears regularly and advise this bear had no fear of <sup>s.22</sup> . Insp. Van Damme discussed conflict with Sergeant Kruger. Sgt. Kruger advised bear has been in this neighbourhood in conflict and a public safety threat <sup>s.22</sup> school. Assess bears behaviour as a category 1 public safety. Insp. Van Damme euthanize two-year-old boar. Dark brown colour phase with white chest patch, poor condition. Discuss response with four neighbours all thankful of COS response. Remove bear. 1730 hrs dispose of bear off <sup>s.15</sup>
64	2022-05-03 14:45 CO MILLER phoned RCMP detachment and requested officers take a look outside for bear as it was heading right to the police station. 15:00 CO MILLER and CO ELDER on scene. RCMP unable to locate. COs drove area looking for bear. 15:15 HWCR 21-38276 - bear sighted. Phoned COM, obtained exact location of bear. COs located small bear in abandoned fenced in lot in downtown Coquitlam. CO MILLER mixed dart with 2 cc <sup>s.15</sup> vial 21-319Z. 15:39 CO MILLER fired dart into bear's right thigh. 15:50 Observed bear laying down in bushes, head still up and looking around. 16:09 Drugs did not take full effect, head still up and moving around. CO MILLER fired dart with 1.5 cc <sup>s.15</sup> into bear's left rear neck muscle. 16:12 Bear under full induction. CO HARBICH on scene. COs assessed bear, male approx 2 years old, dispersed from sow already, not orphaned. No injuries observed. Ear tagged left ear with # 2-283. Removed darts and loaded into trap for transport. 18:30 CO MILLER released bear at <sup>s.15</sup> <sup>s.15</sup> Utilized chalk ball hazing upon release. Bear ran away. CO MILLER advised Coquitlam Urban Wildlife. Concluded.

	Y
65	<p>2022-04-05 1230 hrs CO HARRIS attended the property and spoke to COM. COM decribed an adult bear which continues to come to the property, bear is coming onto the small porch and smelling around everywhere. Bear put its face against the window to try to smell a hanging plant through the glass. COM scared it away and bear left. Bear has been coming around for about 4 days, but is not getting into any attractants. COS aware of problem bear with similar behaviour from last year. COM stated the bear shows little signs of fear of people. CO HARRIS provided BSA, and demonstrated how to use bear spray. COM does not want the bear destroyed and is willing to attempt to scare the bear away. Behaviour described is a greater concern, but no ATB or attractant issues at this time. cell number provided to come and RAPP line. COM will keep COS updated if the bear returns or if issues persist. 2022-04-05 18:56hrs COM called CO HARRIS directly. Bear came back for the second time today. Attempted to enter through front door. Left went around back. Tried a window. Tried back door. Tried kitchen window. Com bear sprayed bear and it left. Increasing activity/ aggressiveness. This is the fifth time itÆs been back in four days. No attractants visible. Clean property. No garbage down embankment etc. CO HARRIS attends and sets LBT behind COM's house where bear is attempting to break into home. COM to monitor. Cat 1 BB, ATB, attempting repeatedly to enter occupied dwelling, to be removed from population as poses a significant public safety risk. 2022-05-05 10:00 CO CAITHNESS attends location and removes LBT with mature adult bear inside. Bear euthanized in trap<sup>s.22</sup> and RTN on scene. Cat 1 mature male bear, estimated 250lbs, very skinny, CO Caithness observed bloodshot eyes, likely from bear spray, so appears to be target bear.</p>
