Annual Use Report for Confirmation Holders

FORM REFERENCE CODE: EPD-IPM-02.2

INSTRUCTIONS:

The annual use report for a calendar year must be submitted to the Ministry of Environment & Climate Change Strategy by January 31 of the next calendar year.

Please do not complete this form if you are a:

- Licence holder reporting *annual sales* information - instead use **Annual Summary of Pesticide Sales**
- Licence holder reporting *annual use* information - instead use **Annual Use Report for Licence holders**
- Licence holder that has treated more than 20 hectares of private forest land and is reporting annual use information - instead use **Annual Use Report for Pesticide User Licence Holders reporting treatment on more than 20 ha of private forest land**

This report must be submitted to the ministry by email at IPMReporting@gov.bc.ca. Files in PDF format are preferred.

Please follow this format when naming the subject line of your email:

- YYYY AUS Confirmation#
- E.g. 2020 AUS 126-233-20-25

Maps must be submitted electronically with this form. If large files prevent email submission, please use the ministry's File Transfer Service. Instructions are located here: <http://www.env.gov.bc.ca/csd/imb/soft/soft.shtml>.

Section 1: Reporting Year Confirmation Holder Information

Report for the Year (YYYY)

Confirmation Number	829-0004-22/27	1
Confirmation Holder Name	Telus Communications Inc.	2
Address	Unit # / Street 3-4535 Canada Way	3
	City Burnaby	4
	Province BC	
	Postal Code V5G 1J9	
Contact First and Last Name	Craig Sexton / Alejandro Canedo	5
Contact Numbers <i>e.g. (999) 999-9999</i>	Phone 604-453-2670	6
	Mobile s.22	
Email Address	craig.sexton@telus.com / alejandro.canedo@telus.com	7

Section 2: Treatment Location

Describe the treatment location and attach one or more maps identifying the gross boundaries of the treatment location. The map(s) should contain enough detail for the ministry to be able to locate the treatment location(s) with respect to towns, major roads or other named geographic features.

Treatment locations are throughout British Columbia on crown land, lease and private land. The sites are Mobility, Wireline, RoW and associated infrastructure (see location maps and ID spreadsheets attached).

☒ Map(s) provided electronically with this report

Section 3: Annual Summary of Pesticide Use

- An annual summary is required each year a confirmation is held even if no pesticides were applied during that calendar year. If multiple confirmations are held, an annual summary is required for each confirmation number.
- Report all non-excluded class pesticides used over the previous calendar year (January 1 – December 31).
- Please enter information accurately. A common mistake is recording an incorrect *P.C.P. Act* Registration Number.
- The only acceptable units for reporting quantities used are kilograms (kg) of product (not "jugs", "cases", "L", "mL" etc.). Record the amount used from the product container before mixing. Do not report diluted quantities. Do not report the quantity of active ingredient. For this report you may consider 1 L of product to weigh 1 kg.
- If pesticide was applied by a licensee as a service for the confirmation holder, please provide the name(s) and the Pesticide User License Number(s) of each company that provided the service.

☐ Check this box if no applications were completed this year.

¹Report the total area treated for pesticide used to manage: forest pests on public or private land used for timber production; vegetation on facilities or rights of way for railways, highways, public utilities and pipelines on public or private land or other industrial sites on public land; and invasive or noxious weeds on public land. Total area treated does not need to be reported for other pesticide uses.

Section 4: Annual Summary of Non-Pesticide Pest Controls

Report all methods of non-pesticide controls used and the size of the area treated in hectares (ha). Examples of acceptable non-pesticide control methods are listed below.

Please choose one or more of the following non-pesticide control options: brush mats, burning, deer repellent/browsing guards, excavating, girdling, hand pulling, manual brushing, mechanical removal, mosquito traps, sheep grazing, or stem bending/knockdown.

☐ Check this box if no non-chemical methods were used.

RE: TELUS Confirmation # 829-0004-22-27, Annual Use Summary Report

The enclosed package includes the following:

2022 annual use summary report (AUS).

3 KMZ Provincial map files that identify site locations of the associated Mobility & Wireline operations.

3 Provincial spreadsheets that can be used as a legend in coordination with the maps provide.

1 TELUS Provincial Tenure Map.

The sites on these maps & spreadsheets are included in this IPM vegetation program, however they are not all scheduled to be treated each year. Control methods depend on site conditions, weed densities and other vegetation control considerations that TELUS considers for each individual site. Some sites may only be treated mechanically or manually while others may include herbicide treatments. Many site locations, facilities & RoW are accessed with gate & locked, and often gate access is limited excessively for authorized personal only, therefore contacting TELUS or E-Qwest Consulting would be a requirement to see when and if access is available to the individual site at that time.

If you require further information, please feel free to contact us at your convenience.

Section 3: Treatment Location Information

Treatment Year (YYYY)

2023

Please provide a general description of the treatment locations for the year below

For example, regional district, nearest community, watershed

Treatment sites include Telus associated operating area and Infrastructure such as; Telus Mobility, Wireline Operations, facilities, offices, rights-of-way, radio transmission sites, Fibre Optic line and storage yards. Treatments will include mechanical, manual and herbicide control methods.

Provide a description of the proposed treatment for each treatment area, including the pesticide to be used and the method(s) of application in the provided table.

- Treatment location identifier refers to where the pesticide is to be used. (e.g. cutting permit and block # in forestry; lease site identifier in oil & gas; mile-markers for railway, etc.)
- Treatment locations noted should be identified on an attached reference map.
- Use an additional page if further description is required.
- As an alternative to filling out the table below, it is acceptable to submit an Excel file or other spreadsheet, provided that the data is submitted in the same format as the table below and is accompanied by the completed and signed form.

Section 3: Map

A map or diagram must be submitted that identifies the proposed treatment locations that are listed in the table above. This map or diagram does not need to go down to the level of detail that would show exact treatment areas and the geographic features that require a pesticide-free zone (PFZ) or a no-treatment zone. This type of detailed map must be prepared and retained by the confirmation holder and must be provided to a ministry inspector upon request. However, if the confirmation holder chooses, it is acceptable to submit these detailed maps with this Notice of Intent to Treat. For example, this may be the case if the confirmation holder is sending the Notice of Intent to Treat to other stakeholders as well.

This information should be consistent with the pest management plan and the pesticide use notice that relate to this confirmation.

☒ Map is attached to this form or provided as an electronic attachment.

Section 4: Wood Poles

Only complete this section if you intend to treat wood poles as a confirmation holder.

Number of poles proposed to be treated:

0

Section 5: Authorization Declaration

IPM Program & Administrator,

Re: TELUS 2023 Notice of Intent to Treat (NIT) IPMP Confirmation # 829-0004-22-27

As per the IPM regulations we have attached the 2023 NIT for TELUS Communications Inc., complete with all required information. We have attached several full spreadsheets with all the required information, and they can be cross referenced with the digital KMZ map files provided. You can easily identify the site locations, geographical type, roads, etc. on each KMZ map provided. If you require further individual site maps, please let me know.

Attached information as required:

- Ministry Notice of Intent (NIT)
- Spreadsheet (1) – Proposed TELUS Mobility Site locations 2023
- Spreadsheet (2) – Proposed BGIS/TELUS Wireline Sites (Level 5 & 6) 2023
- KMZ Google Map File – TELUS Mobility Site Locations
- KMZ Google Map File– BGIS-TELUS Huts / Facilities Locations
- Overall TELUS Mobility Wall Map (BC Tenure map)

Note: the total herbicide treated area in **2022** was **65.37** ha., throughout the entire province. Much of the total IPM work is completed mechanically, including many of the sites scheduled in this NIT.

If you required any additional information or have questions, please contact one of us at your convenience.

Sincerely,
