Hello,

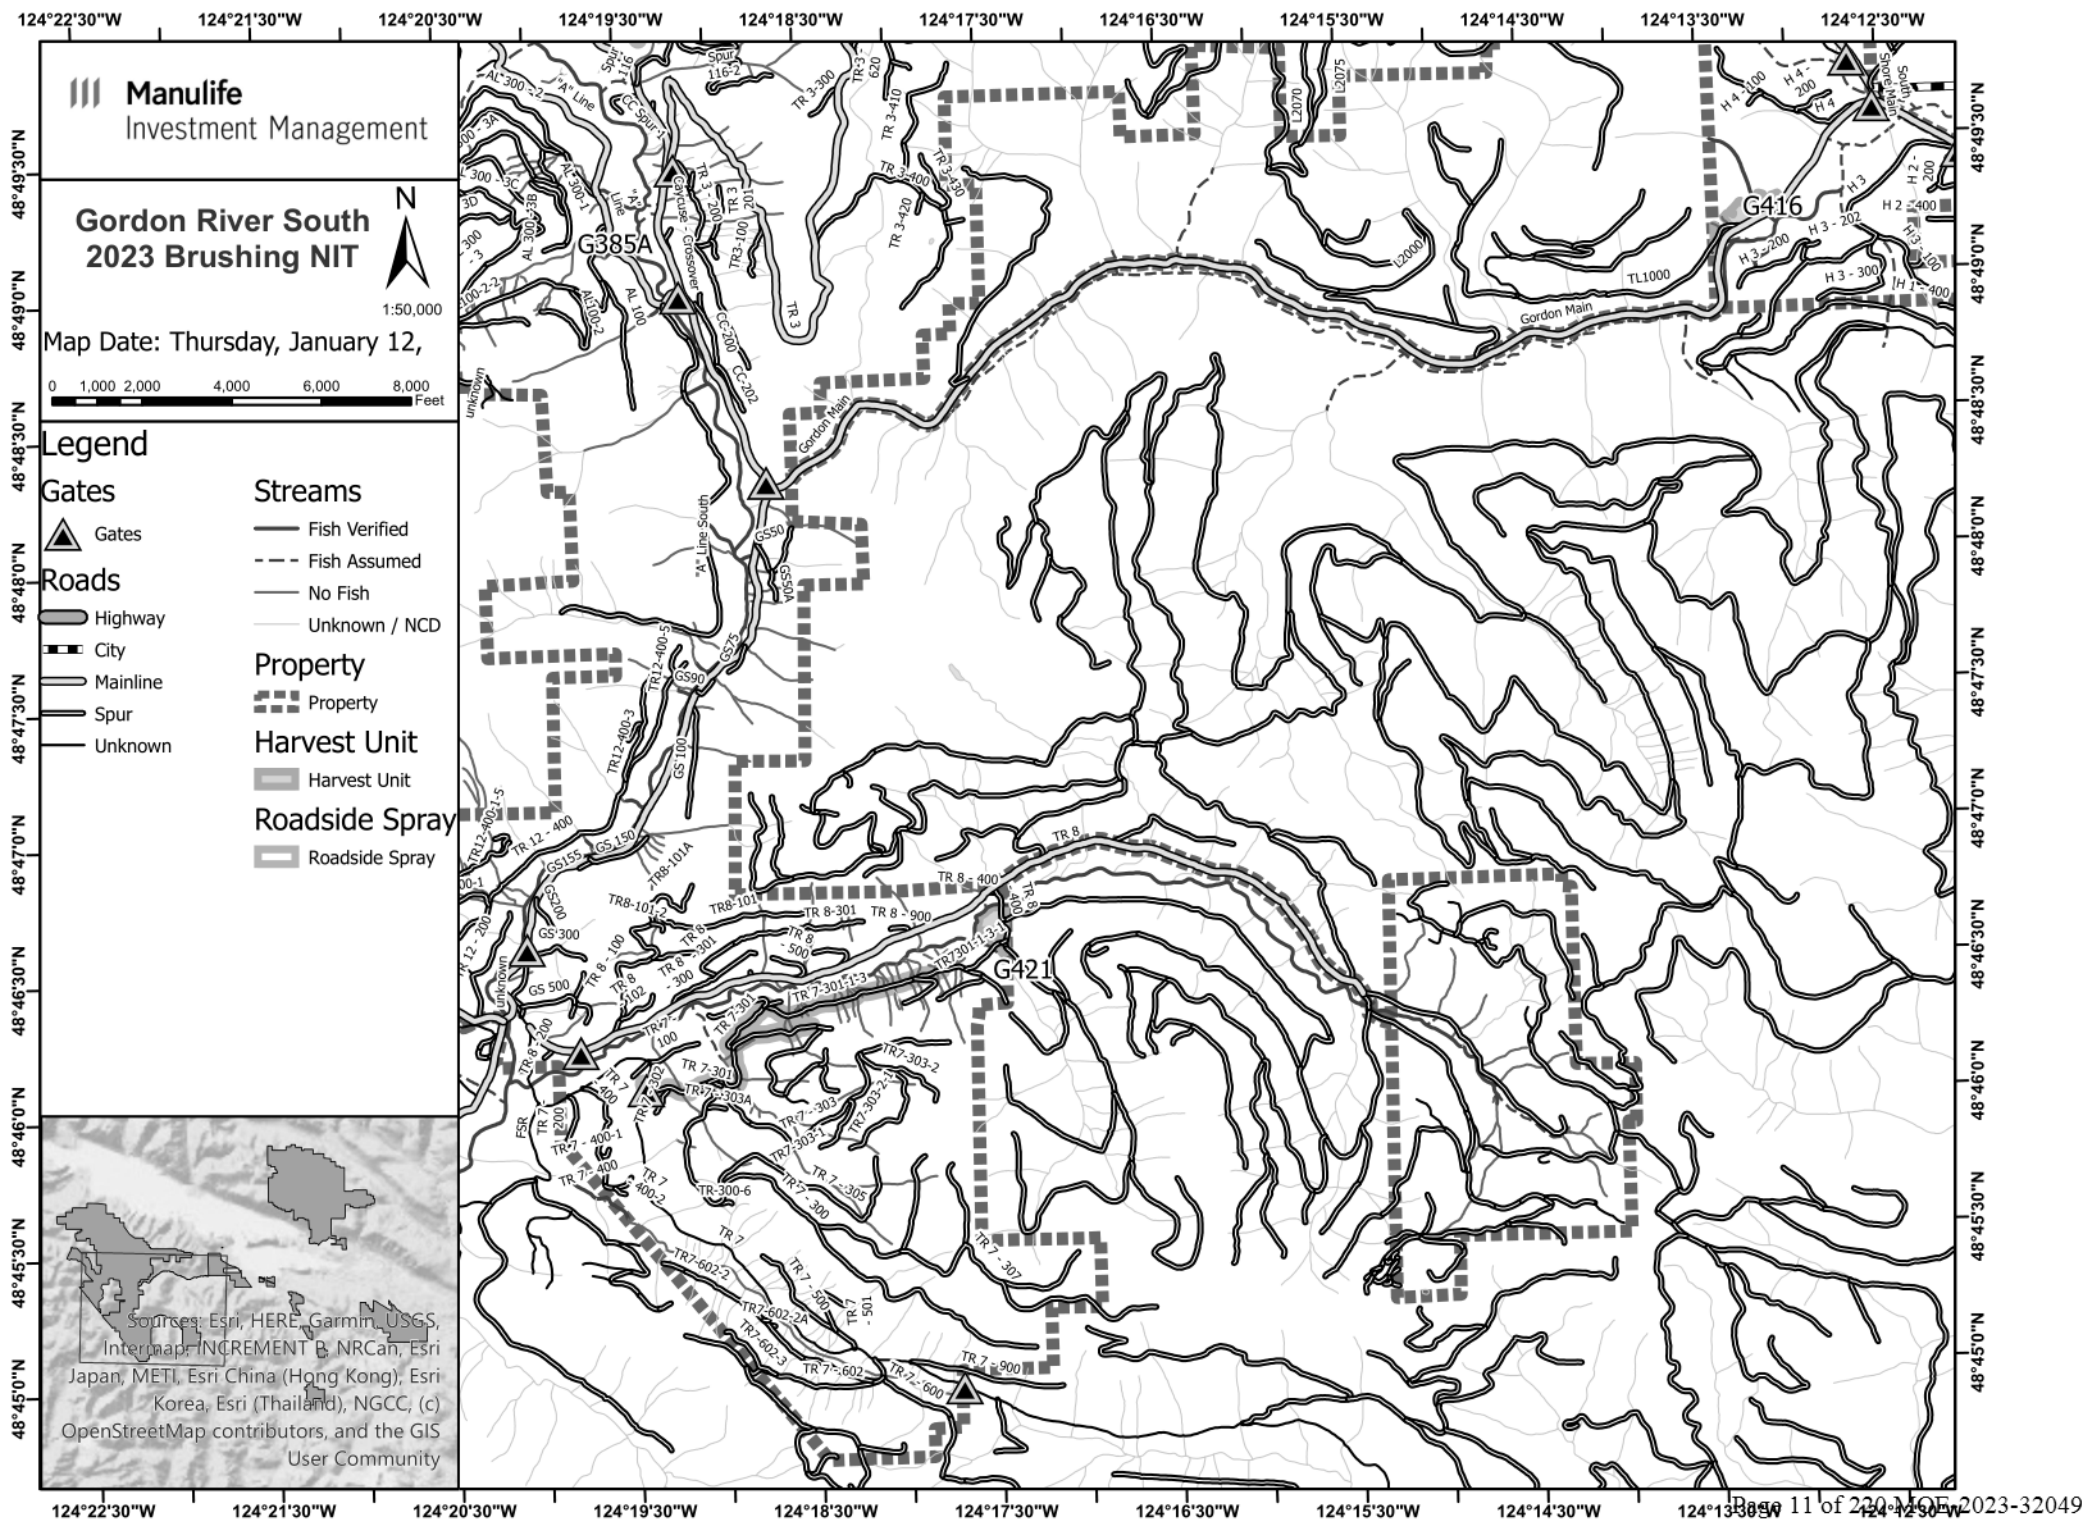

Attached is Manulife Investment Management's Notice of Intent to Treat with Pesticides as per S. 41 of the *Integrated Pesticide Management Regulation*. Please note our intent to treat is on private land where a Pesticide Use Notice and Confirmation is not required. Further information, including pesticide license numbers, can be found in the attached cover letter. If you have any questions about the submission, please feel free to contact me directly. Please confirm, via email, receipt of this notification.

Thank you,

RE: Manulife Investment Management: 2023 Notification of Intent to Treat with Herbicides

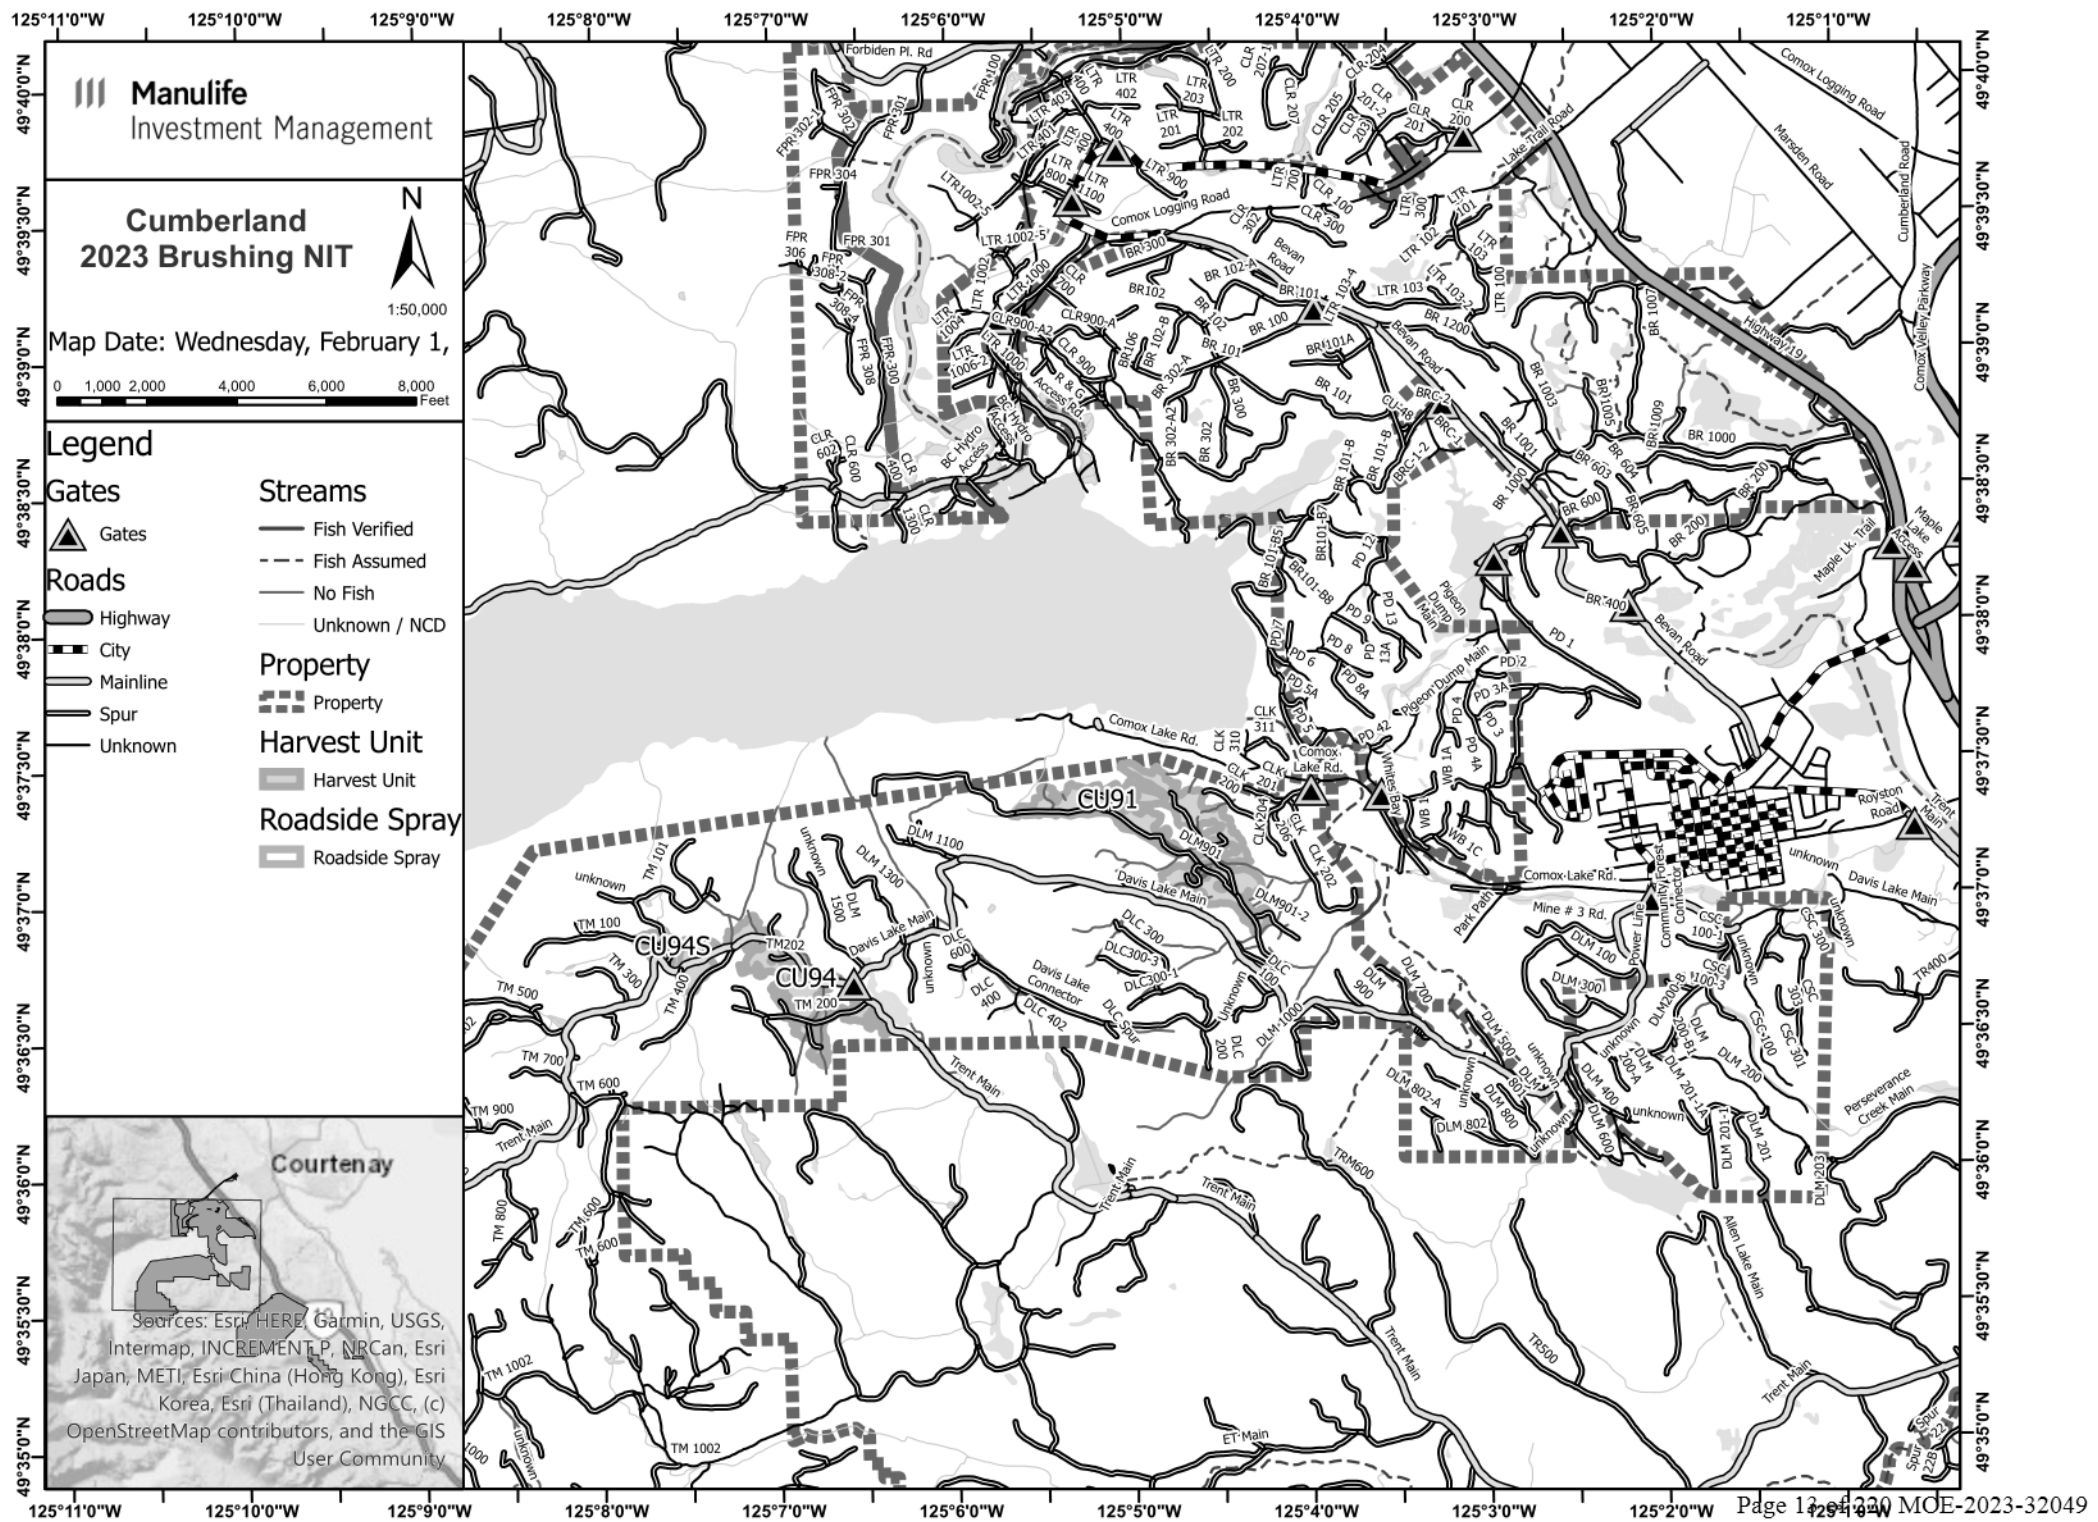

To whom it may concern,

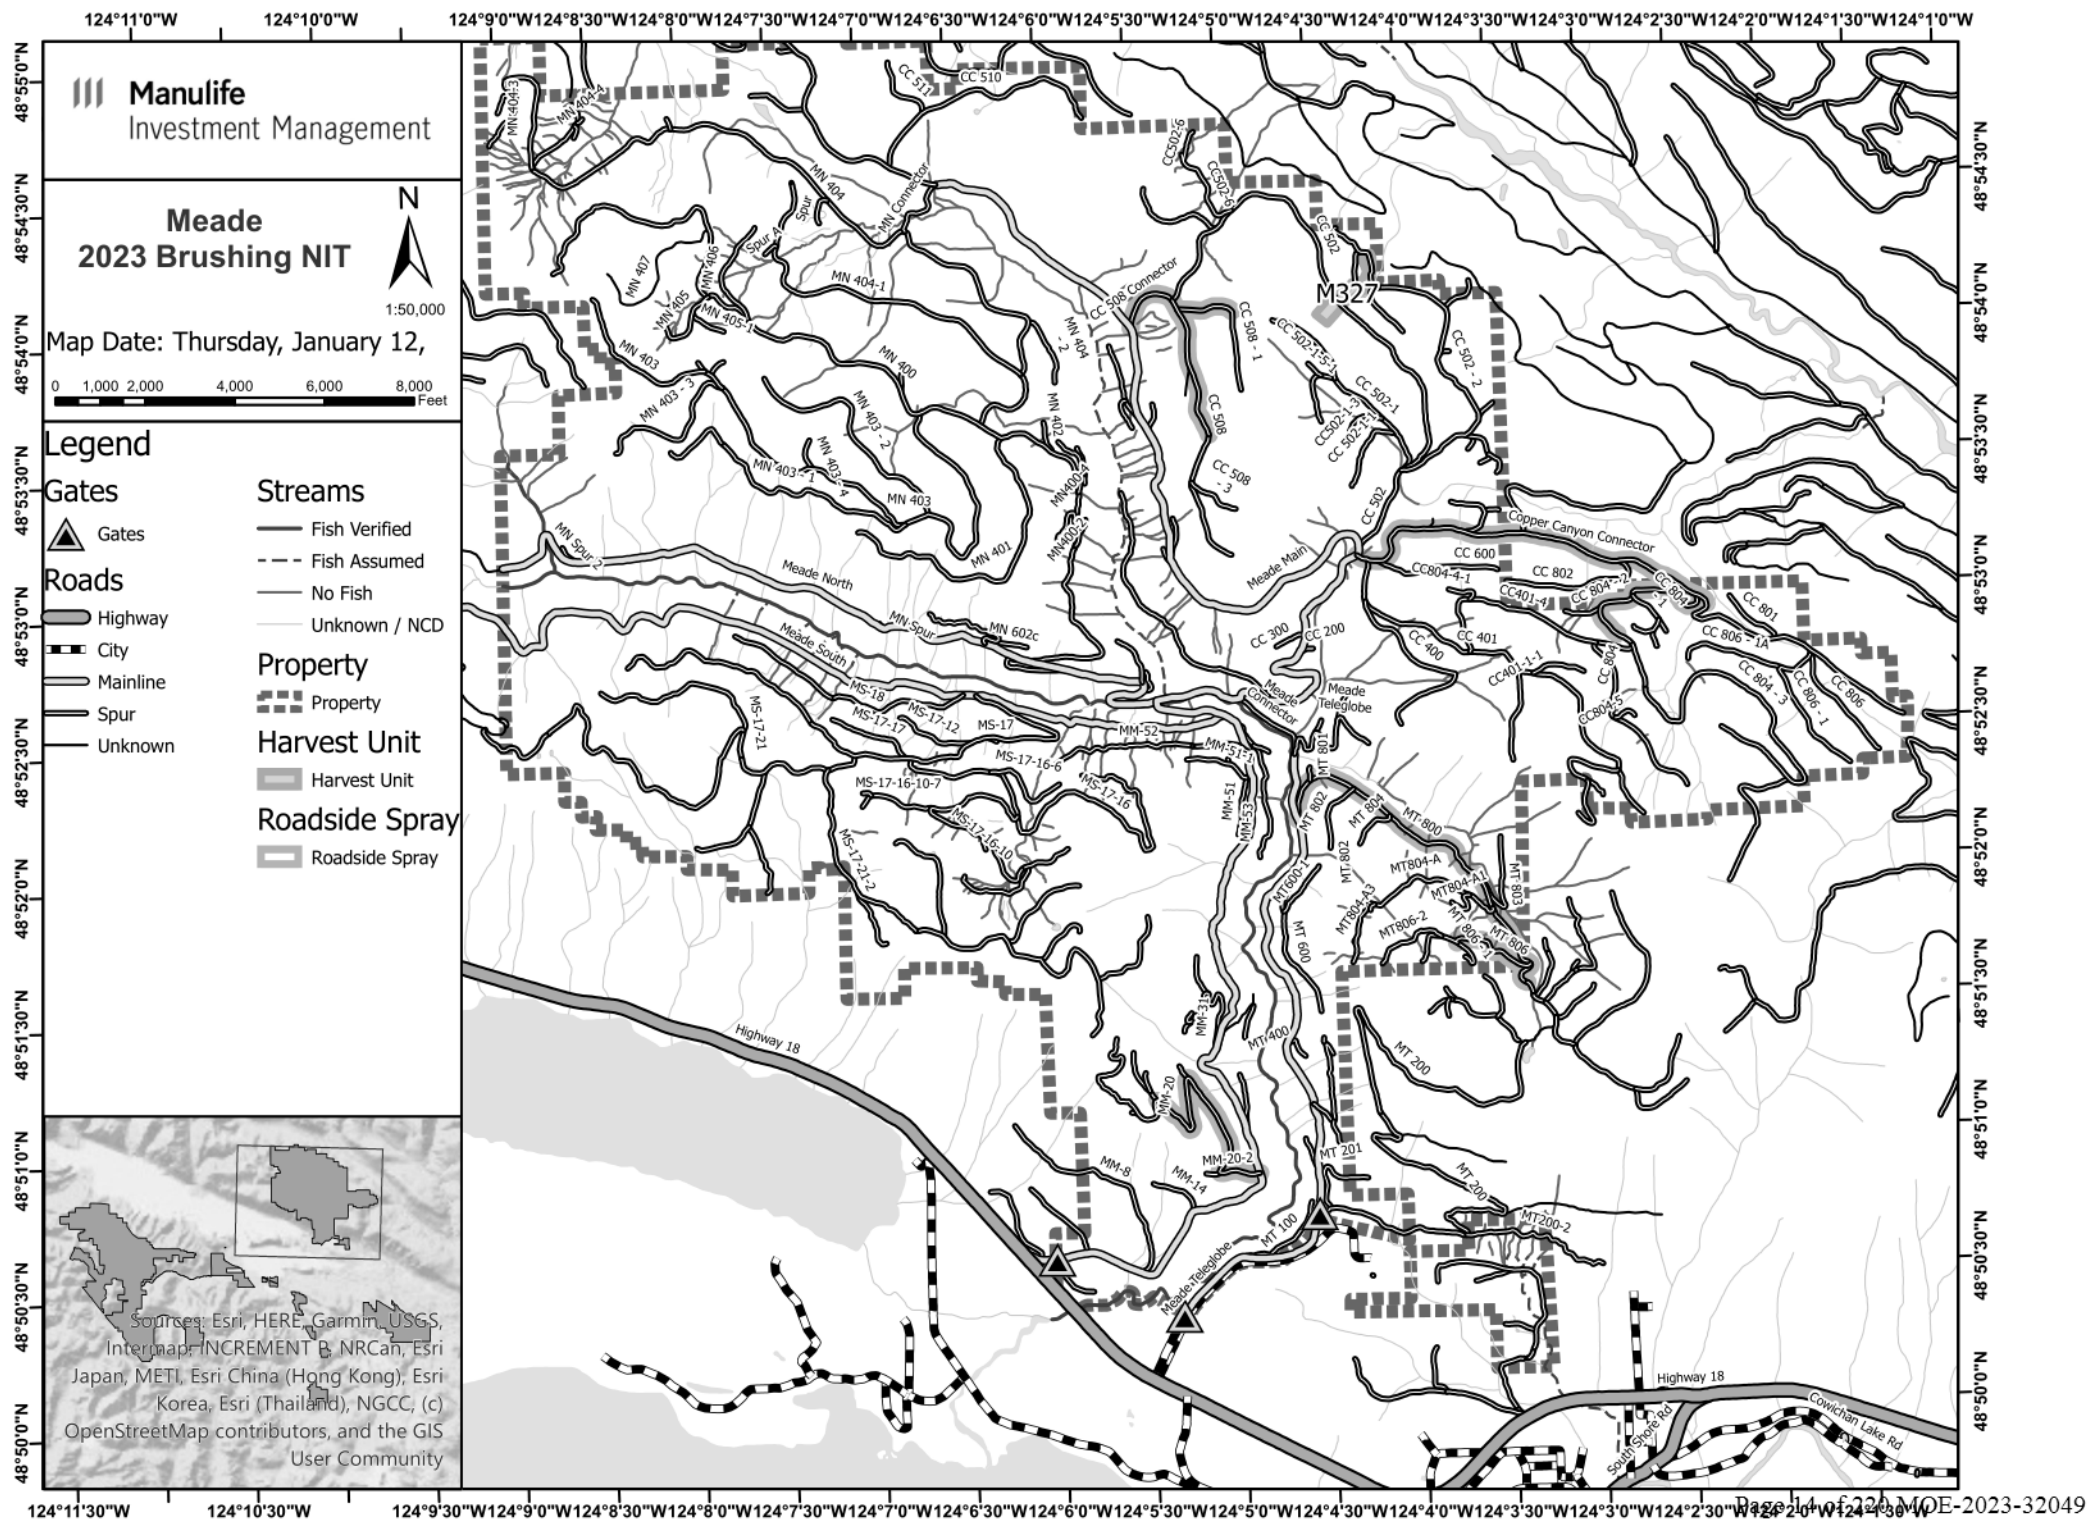

Please accept this notice of intent to treat (NIT) using herbicides on private land owned and managed by Manulife Investment Management (MIM). Treatments are required in order to maintain road access, control competing vegetation, and control invasive and/or noxious plant species. Target species are alder, maple, cottonwood, knotweed and scotch broom.

Products being used are from Corteva Canada and Bayer Crop Science Inc. The active ingredients are *Glyphosate* (Reg. numbers: 28840, 29498, 27736) and *Tryclopypyr* (Reg. numbers: 28945, 29334). MIM takes proper care to ensure water quality and fish habitat are protected. Stringent “No Treatment Zones” will be employed which meet or exceed all legislated requirements under the *Integrated Pest Management Act*, *Integrated Pest Management Regulation* and all other provincial and federal legislation. This includes water intakes and wells used for either domestic or agricultural purposes.

The earliest application date is February 27th, 2023. MIM contracts certified forestry pesticide applicators to apply herbicides on MIM property. Contractors applying herbicides on MIM managed land in 2023 include: Blackfish Silviculture Ltd. (license #2692), Silvifor Resource Consultants Ltd. (license #15122), and Diverse Forest Contracting Ltd. (license # 11082). For more detailed information of sensitive areas, licenses, and certificates, please contact me at your convenience.

Hello,

I found a mistake on the first page of the submission, further I have added additions.

Thanks,

To whom it may concern,

This is the NIT for 2023 on behalf of the TimberWest - Johnstone Strait Operation (managed by Mosaic Forest Management). Please find attached the NIT form, table and map.

Blackfish Silviculture has been CC'd because they will be the company applying the herbicides.

We will plan for the start of this year's herbicide work to be no earlier than 9:45am on March 16th as this will be when the 21-day period will end.

Kind regards,

Jamie Somerville, RPF

Notice of Intent to Treat for Confirmation Holders

FORM REFERENCE CODE: EPD-IPM-06.3

INSTRUCTIONS:

A confirmation holder must submit a Notice of Intent to Treat to the Ministry of Environment and Climate Change Strategy at least 21 days before the first use of pesticides in a calendar year.

Please submit the Notice of Intent to Treat (this form) electronically to IPMReporting@gov.bc.ca. Files in PDF format are preferred.

Please follow this format when naming the subject line of your email:

- YYYY NIT Confirmation#
- E.g. 2020 NIT 126-343-19-24

Maps and additional information must be submitted electronically with this form. If large files prevent email submission, please use the ministry's File Transfer Service: <http://www.env.gov.bc.ca/csd/imb/soft/soft.shtml>.

In this section:

"confirmation holder" means the applicant as identified in section 1 of this form;

"agent" means the agent as identified in section 2 of this form.

I/we (the confirmation holder) hereby authorize the above-named agent to deal with the ministry directly on all aspects of this Notice.

Confirmation Holder Name <i>NOT the Agent</i>	Jennifer Peschke (Mosaic - TimberWest Forest Corp.)	10
Date signed (YYYY/MM/DD)	2023/02/23	11
Signature of Confirmation Holder		12

Section 3: Treatment Location Information

Treatment Year (YYYY)

2023

Please provide a general description of the treatment locations for the year below

For example, regional district, nearest community, watershed

Strathcona Regional District

Regional District of Mount Waddington

Provide a description of the proposed treatment for each treatment area, including the pesticide to be used and the method(s) of application in the provided table.

- Treatment location identifier refers to where the pesticide is to be used. (e.g. cutting permit and block # in forestry; lease site identifier in oil & gas; mile-markers for railway, etc.)
- Treatment locations noted should be identified on an attached reference map.
- Use an additional page if further description is required.
- As an alternative to filling out the table below, it is acceptable to submit an Excel file or other spreadsheet, provided that the data is submitted in the same format as the table below and is accompanied by the completed and signed form.

Treatment location identifier	Pesticide product name	Active ingredient(s)	P.C.P. Registration Number	Size of area treated (ha) ¹	Method(s) of application
See	attached	NIT	table	and	map.

Treatment location identifier	Pesticide product name	Active ingredient(s)	P.C.P. Registration Number	Size of area treated (ha) ¹	Method(s) of application
See	attached	NIT	table	and	map.
Total area treated with pesticides (ha):				9840.4	

Section 3: Map

A map or diagram must be submitted that identifies the proposed treatment locations that are listed in the table above. This map or diagram does not need to go down to the level of detail that would show exact treatment areas and the geographic features that require a pesticide-free zone (PFZ) or a no-treatment zone. This type of detailed map must be prepared and retained by the confirmation holder and must be provided to a ministry inspector upon request. However, if the confirmation holder chooses, it is acceptable to submit these detailed maps with this Notice of Intent to Treat. For example, this may be the case if the confirmation holder is sending the Notice of Intent to Treat to other stakeholders as well.

This information should be consistent with the pest management plan and the pesticide use notice that relate to this confirmation.

Map is attached to this form or provided as an electronic attachment.

Section 4: Wood Poles

Only complete this section if you intend to treat wood poles as a confirmation holder.

Number of poles proposed to be treated:

To whom it may concern,

Please find the attached NIT for Mosaic Forest Management. Mosaic is acting as an agent on behalf of our contractors who hold pesticide service licences (see licence numbers below) and will be doing treatments on Mosaic's behalf. This submission relates to the 2023 herbicide program taking place on Mosaic managed private lands for **TimberWest Forest Company and Island Timberlands Limited Partnership**. A portion of these planned survey blocks may require treatment during the 2023 treatment window. While the identified hectares are substantial to cover potential treatment areas, we currently have 4358ha of brushing activities planned (includes manual and herbicide treatment) in 2023.

Herbicide applications will be completed by companies with Pesticide Use Licences and Certified Applicators who adhere to the IPM Act and Regulations. Mosaic is acting as the agent for our contractors who hold the pesticide service licences and who will be applying herbicides to the listed settings. Mosaic Forest Management does not apply herbicide. We will also have a mechanical brushing program to address some sensitive urban interfaces, sensitive community watersheds, water intakes, fish habitats or wildlife protection areas.

Please note the common herbicides used are stated on the NIT report. In addition to the list, the following may be used:

Garlon XRT 28945
VP480 28840
Gateway 31470
Katana (Trial only) 32910
Habitat Aqua (Trial Only) 32374

We will also be administering a Roadside Access Management (RAM) program along with any and various roads/right of ways (ROW's) on Mosaic managed private lands.

Overviews showing the location of the blocks listed in our NIT can be viewed and downloaded through the following DropBox link:

<https://www.dropbox.com/scl/fo/wfbbh09e2wumbq6ipo8lq/h?dl=0&rlkey=78ar74qe0azmnavh236xq4lnm>

In 2023, the following Contractors may apply herbicide on Mosaic managed private lands:

- 1. Impact Reforestation Ltd - #3847**
Business Address: 3846 Island Hwy, Campbell River, BC, V9W2J3
- 2. Blackfish Silviculture Ltd - #2692**

Notice of Intent to Treat for Confirmation Holders

FORM REFERENCE CODE: EPD-IPM-06.3

INSTRUCTIONS:

A confirmation holder must submit a Notice of Intent to Treat to the Ministry of Environment and Climate Change Strategy at least 21 days before the first use of pesticides in a calendar year.

Please submit the Notice of Intent to Treat (this form) electronically to IPMReporting@gov.bc.ca. Files in PDF format are preferred.

Please follow this format when naming the subject line of your email:

- YYYY NIT Confirmation#
- E.g. 2020 NIT 126-343-19-24

Maps and additional information must be submitted electronically with this form. If large files prevent email submission, please use the ministry's File Transfer Service: <http://www.env.gov.bc.ca/csd/imb/soft/soft.shtml>.

Section 3: Treatment Location Information

Treatment Year (YYYY)

2023

Please provide a general description of the treatment locations for the year below

For example, regional district, nearest community, watershed

The 2023 NIT is for herbicide treatment in Tree Farm Licence 44 within the South Island Forest District of Vancouver Island. Treatments areas are northwest of Port Alberni on the north side of Great Central Lake, as well as south of Port Alberni near Camp B at the Carmanah/Bamfield junction, on Francis Main and the beginning of Flora Lake Main.

Provide a description of the proposed treatment for each treatment area, including the pesticide to be used and the method(s) of application in the provided table.

- Treatment location identifier refers to where the pesticide is to be used. (e.g. cutting permit and block # in forestry; lease site identifier in oil & gas; mile-markers for railway, etc.)
- Treatment locations noted should be identified on an attached reference map.
- Use an additional page if further description is required.
- As an alternative to filling out the table below, it is acceptable to submit an Excel file or other spreadsheet, provided that the data is submitted in the same format as the table below and is accompanied by the completed and signed form.

Treatment location identifier	Pesticide product name	Active ingredient(s)	P.C.P. Registration Number	Size of area treated (ha) ¹	Method(s) of application

Treatment location identifier	Pesticide product name	Active ingredient(s)	P.C.P. Registration Number	Size of area treated (ha) ¹	Method(s) of application
Total area treated with pesticides (ha):					

Section 3: Map

A map or diagram must be submitted that identifies the proposed treatment locations that are listed in the table above. This map or diagram does not need to go down to the level of detail that would show exact treatment areas and the geographic features that require a pesticide-free zone (PFZ) or a no-treatment zone. This type of detailed map must be prepared and retained by the confirmation holder and must be provided to a ministry inspector upon request. However, if the confirmation holder chooses, it is acceptable to submit these detailed maps with this Notice of Intent to Treat. For example, this may be the case if the confirmation holder is sending the Notice of Intent to Treat to other stakeholders as well.

This information should be consistent with the pest management plan and the pesticide use notice that relate to this confirmation.

Map is attached to this form or provided as an electronic attachment.

Section 4: Wood Poles

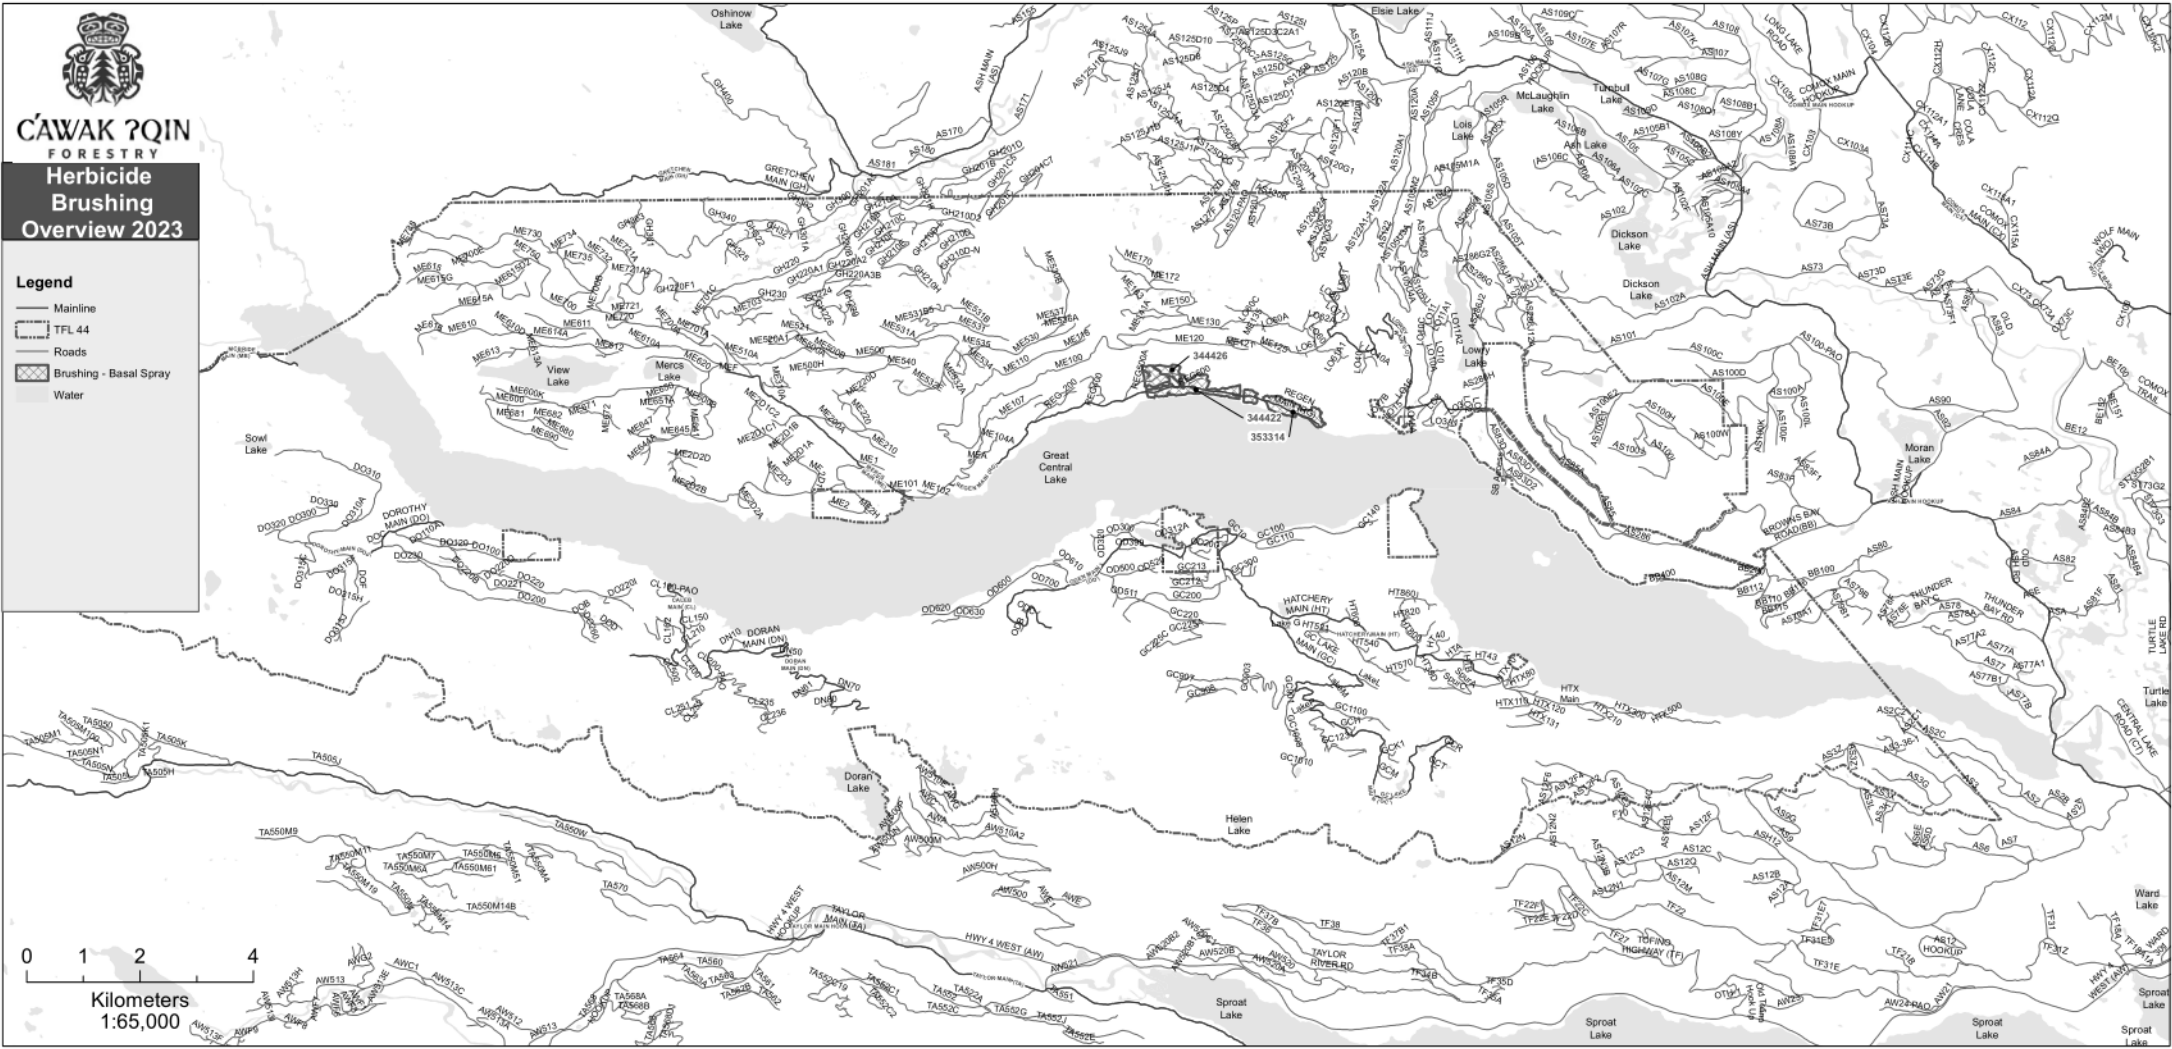

Only complete this section if you intend to treat wood poles as a confirmation holder.

Number of poles proposed to be treated:

Re: Notification of Intent to Treat WFP's Proposed Brushing Treatments.

Please find attached a Notification of Intent to Treat for brushing proposed by Western Forest Product's Quatsino Sound Forest Operation (Formerly North Island Forest Operations, Holberg and Jeune Landing operating areas) under Pest Management Plan #1 (2022-2027). An overview map indicating potential treatment areas has also been included. Pesticide use is to be conducted under the authority of the Ministry of Environment's Confirmation No. 111-0233-22-27.

Treatment is anticipated to commence shortly after May 15, 2023. We request that you contact our office by May 15, 2023, if you have any concerns regarding the locations or proposed treatments. You can reach Carolina Silva at (250) 230-4884 or by email at csilva@westernforest.com.

Yours truly,
Western Forest Products Inc.

[EXTERNAL] This email came from an external source. Only open attachments or links that you are expecting from a known sender.

To whom it may concern,

Please find the attached NIT for Mosaic Forest Management. Mosaic is acting as an agent on behalf of our contractors who hold pesticide service licences (see licence numbers below) and will be doing treatments on Mosaic's behalf. This submission relates to the 2023 herbicide program taking place on Mosaic managed private lands for **TimberWest Forest Company and Island Timberlands Limited Partnership**. A portion of these planned survey blocks may require treatment during the 2023 treatment window. While the identified hectares are substantial to cover potential treatment areas, we currently have 4358ha of brushing activities planned (includes manual and herbicide treatment) in 2023.

Herbicide applications will be completed by companies with Pesticide Use Licences and Certified Applicators who adhere to the IPM Act and Regulations. Mosaic is acting as the agent for our contractors who hold the pesticide service licences and who will be applying herbicides to the listed settings. Mosaic Forest Management does not apply herbicide. We will also have a mechanical brushing program to address some sensitive urban interfaces, sensitive community watersheds, water intakes, fish habitats or wildlife protection areas.

Please note the common herbicides used are stated on the NIT report. In addition to the list, the following may be used:
Garlon XRT 28945
VP480 28840
Gateway 31470
Katana (Trial only) 32910
Habitat Aqua (Trial Only) 32374

We will also be administering a Roadside Access Management (RAM) program along with any and various roads/right of ways (ROW's) on Mosaic managed private lands.

Overviews showing the location of the blocks listed in our NIT can be viewed and downloaded through the following DropBox link:

To Whom It May Concern:

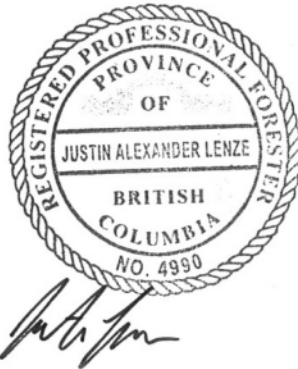

NOTICE OF INTENT TO TREAT

Please find included in this package the 2023 Detailed Site Assessment and associated Overview Maps.

The purpose of the herbicide applications is to reduce severe competition over planted conifers in the Jervis Inlet operating area. The combined maximum area of proposed treatment is approximately 933.8 ha however actual treatment area is predicted to be far less. Interfor's Coastal Woodlands operation is committed to minimizing its herbicide use to only those areas where competing vegetation are negatively affecting the growth of crop trees, to meet its statutory silvicultural obligations under the Forest and Range Practices Act of BC and if there is no other practicable alternative.

If you require further information, please do not hesitate to contact me at 250-830-7612.

Sincerely,

Justin Lenze, RPF

To whom it may concern,

Please find the attached NIT for Mosaic Forest Management. Mosaic is acting as an agent on behalf of our contractors who hold pesticide service licences (see licence numbers below) and will be doing treatments on Mosaic's behalf. This submission relates to the 2023 herbicide program taking place on Mosaic managed private lands for **TimberWest Forest Company and Island Timberlands Limited Partnership**. A portion of these planned survey blocks may require treatment during the 2023 treatment window. While the identified hectares are substantial to cover potential treatment areas, we currently have 4364ha of brushing activities planned (includes manual and herbicide treatment) in 2023.

Herbicide applications will be completed by companies with Pesticide Use Licences and Certified Applicators who adhere to the IPM Act and Regulations. Mosaic is acting as the agent for our contractors who hold the pesticide service licences and who will be applying herbicides to the listed settings. Mosaic Forest Management does not apply herbicide. We will also have a mechanical brushing program to address some sensitive urban interfaces, sensitive community watersheds, water intakes, fish habitats or wildlife protection areas.

Please note the common herbicides used are stated on the NIT report. In addition to the list, the following may be used:

Garlon XRT 28945
VP480 28840
Gateway 31470
Katana (Trial only) 32910
Habitat Aqua (Trial Only) 32374

We will also be administering a Roadside Access Management (RAM) program along with any and various roads/right of ways (ROW's) on Mosaic managed private lands.

Overviews showing the location of the blocks listed in our NIT can be viewed and downloaded through the following DropBox link:

Good afternoon Scott,

Attached is the associated documentation for our 2023 NIT.

Once the advertisement window and any potential feedback to the program has concluded I will provide an update of any changes and follow up with Conrad to line up any field inspections of our contractor/treatment areas that he'd like to perform.

Thanks,

Shawn Crawford

Subject: 2022 Notice of Intent to Treat
PUN Reference ID# 111-0232-21-26 / WFP-MIFO-PMP-2020

Please consider this letter our Notification of Intent to Treat (NIT) for 2023.

Information sharing with First Nations was carried out as outlined on page 5 of our PMP on March 9th, 2023. Public advertisement of the NIT in the Campbell River Mirror will take place between June 28th until July 19th and advertisement in the Sayward Valley newsletter will be for the full month of July. Upon completion a letter summarizing any public enquiries, comments, or revisions made will be submitted.

Attached are the '2023 NIT Tables' which contain both the chemical and manual treatment blocks, target species, and the primary method of treatment. Additionally, we have included a '2023 MIFO NIT Chemical Block Overview' map and a '2023 MIFO Brushing Program Overview' map which includes our manual treatment block locations as well within TFL 39-2.

If you have any questions, concerns, or general feedback, please contact me at 250-287-5037 (office) or 604-767-4597 (cell).

Sincerely,

A handwritten signature in black ink, appearing to read 'Shawn Crawford', with a long, sweeping underline.

Hello,

Please find attached for Canfor FSJ 2023 Notice of Intent to Treat and electronic submission of the map extent. I have attached treatment information in a separate excel spreadsheet.

Please note – blocks will be laid out with pesticide free zones and no treatment zones prior to treatment, and maps will be maintained as per IPMR.

If you require any addition information, please let me know.

Section 3: Treatment Location Information

Treatment Year (YYYY)

2023

Please provide a general description of the treatment locations for the year below

For example, regional district, nearest community, watershed

Cutblocks under tenure and/or managed by Canadian Forest Products Ltd. (Canfor) within the Fort St. John Timber Supply Area, the Dawson Creek Timber Supply Area and TFL 48

Provide a description of the proposed treatment for each treatment area, including the pesticide to be used and the method(s) of application in the provided table.

- Treatment location identifier refers to where the pesticide is to be used. (e.g. cutting permit and block # in forestry; lease site identifier in oil & gas; mile-markers for railway, etc.)
- Treatment locations noted should be identified on an attached reference map.
- Use an additional page if further description is required.
- As an alternative to filling out the table below, it is acceptable to submit an Excel file or other spreadsheet, provided that the data is submitted in the same format as the table below and is accompanied by the completed and signed form.

Treatment location identifier	Pesticide product name	Active ingredient(s)	P.C.P. Registration Number	Size of area treated (ha) ¹	Method(s) of application

Treatment location identifier	Pesticide product name	Active ingredient(s)	P.C.P. Registration Number	Size of area treated (ha) ¹	Method(s) of application
Total area treated with pesticides (ha):					

Section 3: Map

A map or diagram must be submitted that identifies the proposed treatment locations that are listed in the table above. This map or diagram does not need to go down to the level of detail that would show exact treatment areas and the geographic features that require a pesticide-free zone (PFZ) or a no-treatment zone. This type of detailed map must be prepared and retained by the confirmation holder and must be provided to a ministry inspector upon request. However, if the confirmation holder chooses, it is acceptable to submit these detailed maps with this Notice of Intent to Treat. For example, this may be the case if the confirmation holder is sending the Notice of Intent to Treat to other stakeholders as well.

This information should be consistent with the pest management plan and the pesticide use notice that relate to this confirmation.

Map is attached to this form or provided as an electronic attachment.

Notice of Intent to Treat for Confirmation Holders

FORM REFERENCE CODE: EPD-IPM-06.3

INSTRUCTIONS:

A confirmation holder must submit a Notice of Intent to Treat to the Ministry of Environment and Climate Change Strategy at least 21 days before the first use of pesticides in a calendar year.

Please submit the Notice of Intent to Treat (this form) electronically to IPMReporting@gov.bc.ca. Files in PDF format are preferred.

Please follow this format when naming the subject line of your email:

- YYYY NIT Confirmation#
- E.g. 2020 NIT 126-343-19-24

Maps and additional information must be submitted electronically with this form. If large files prevent email submission, please use the ministry's File Transfer Service: <http://www.env.gov.bc.ca/csd/imb/soft/soft.shtml>.

In this section:

"confirmation holder" means the applicant as identified in section 1 of this form;

"agent" means the agent as identified in section 2 of this form.

I/we (the confirmation holder) hereby authorize the above-named agent to deal with the ministry directly on all aspects of this Notice.

Confirmation Holder Name <i>NOT the Agent</i>		10
Date signed <i>(YYYY / MM / DD)</i>		11
Signature of Confirmation Holder		12

Section 3: Treatment Location Information

Treatment Year (YYYY)

2023

Please provide a general description of the treatment locations for the year below

For example, regional district, nearest community, watershed

Cutblocks under tenure and/or managed by Canadian Forest Products Ltd. (canfor) within the Fort St. John Timber Supply Area, Dawson Creek Timber Supply Area and TFL48.

Provide a description of the proposed treatment for each treatment area, including the pesticide to be used and the method(s) of application in the provided table.

- Treatment location identifier refers to where the pesticide is to be used. (e.g. cutting permit and block # in forestry; lease site identifier in oil & gas; mile-markers for railway, etc.)
- Treatment locations noted should be identified on an attached reference map.
- Use an additional page if further description is required.
- As an alternative to filling out the table below, it is acceptable to submit an Excel file or other spreadsheet, provided that the data is submitted in the same format as the table below and is accompanied by the completed and signed form.

Treatment location identifier	Pesticide product name	Active ingredient(s)	P.C.P. Registration Number	Size of area treated (ha) ¹	Method(s) of application

Treatment location identifier	Pesticide product name	Active ingredient(s)	P.C.P. Registration Number	Size of area treated (ha) ¹	Method(s) of application
Total area treated with pesticides (ha):				176.7	

Section 3: Map

A map or diagram must be submitted that identifies the proposed treatment locations that are listed in the table above. This map or diagram does not need to go down to the level of detail that would show exact treatment areas and the geographic features that require a pesticide-free zone (PFZ) or a no-treatment zone. This type of detailed map must be prepared and retained by the confirmation holder and must be provided to a ministry inspector upon request. However, if the confirmation holder chooses, it is acceptable to submit these detailed maps with this Notice of Intent to Treat. For example, this may be the case if the confirmation holder is sending the Notice of Intent to Treat to other stakeholders as well.

This information should be consistent with the pest management plan and the pesticide use notice that relate to this confirmation.

Map is attached to this form or provided as an electronic attachment.

Section 4: Wood Poles

Only complete this section if you intend to treat wood poles as a confirmation holder.

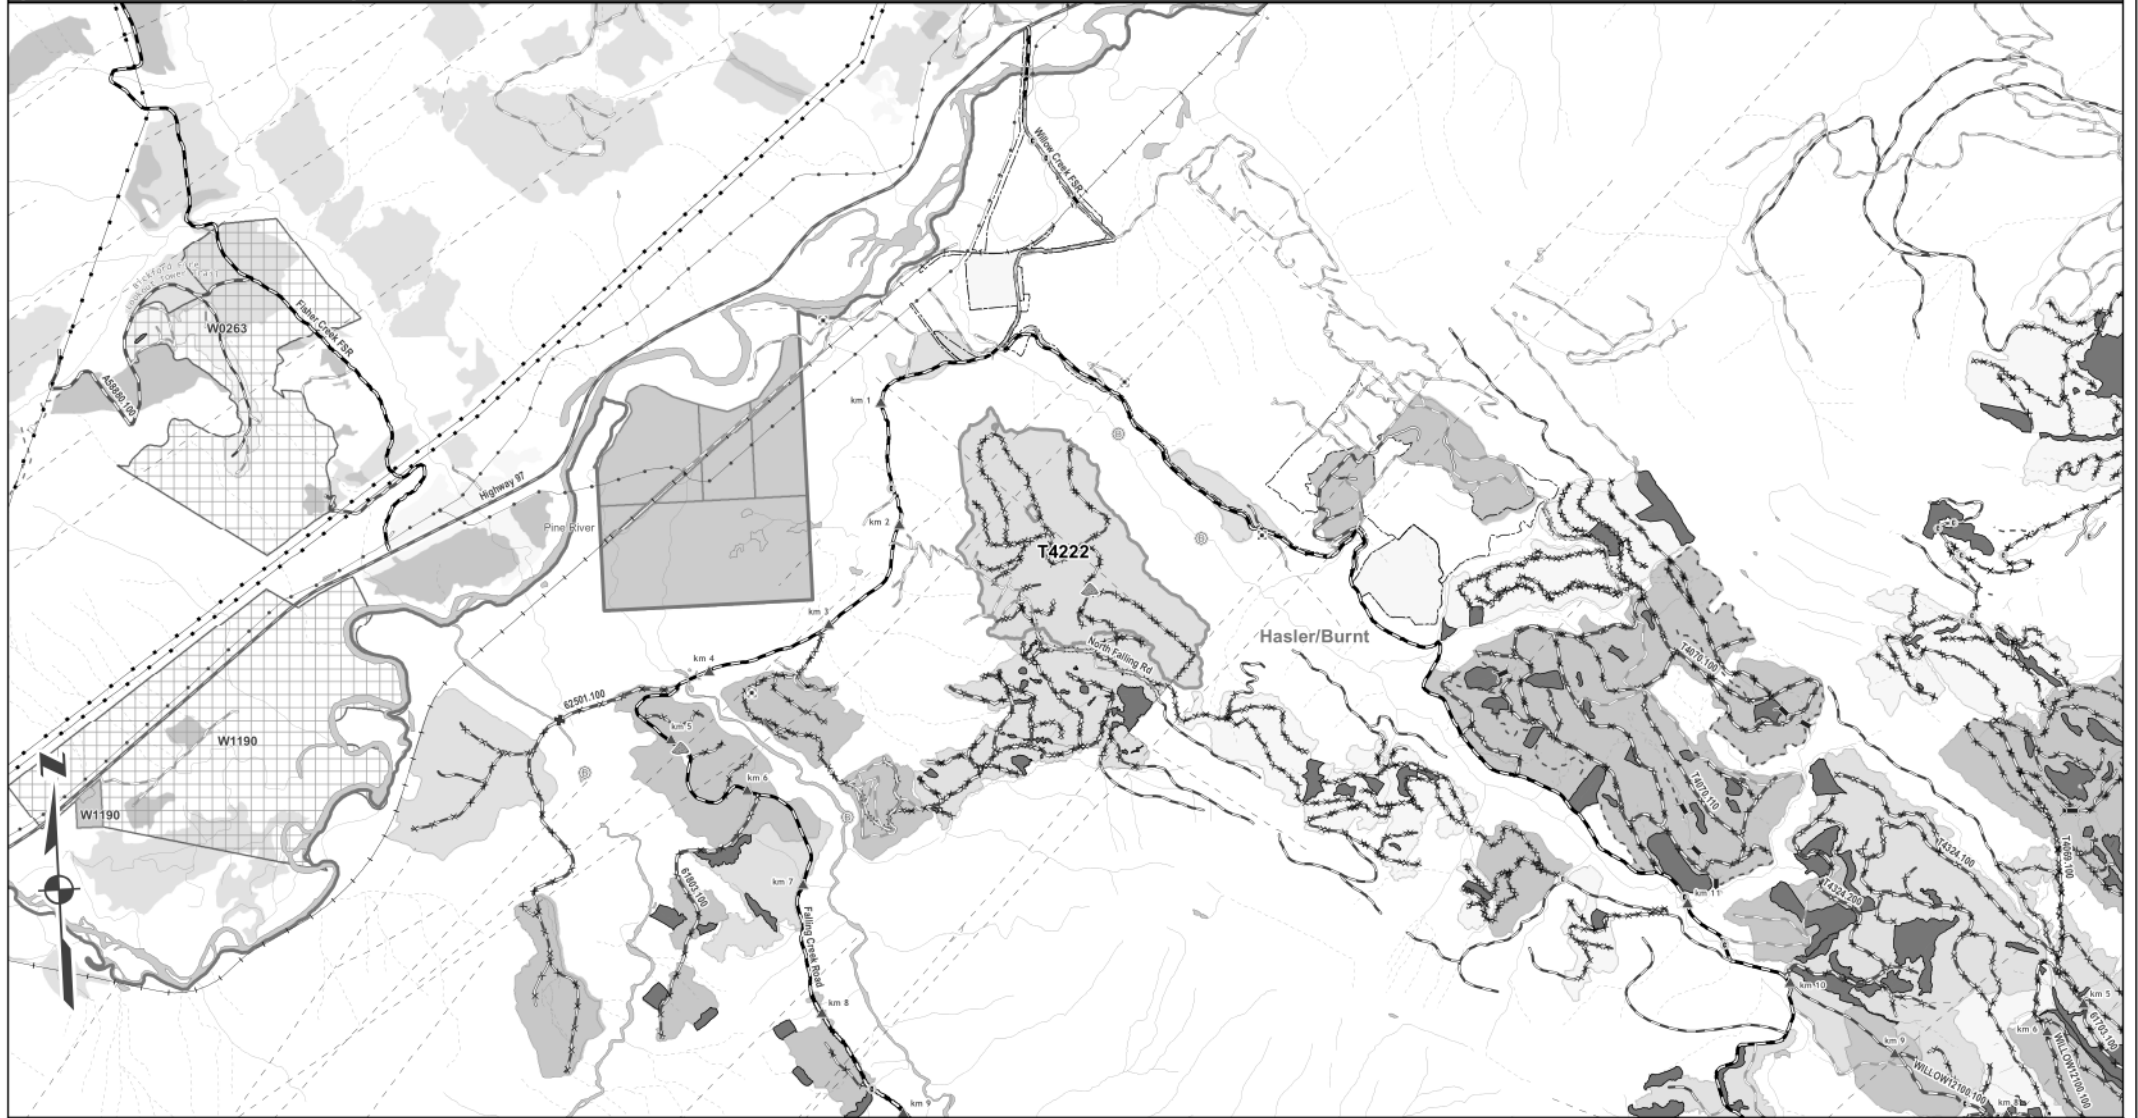

Number of poles proposed to be treated:

Section 3: Map

A map or diagram must be submitted that identifies the proposed treatment locations that are listed in the table above. This map or diagram does not need to go down to the level of detail that would show exact treatment areas and the geographic features that require a pesticide-free zone (PFZ) or a no-treatment zone. This type of detailed map must be prepared and retained by the confirmation holder and must be provided to a ministry inspector upon request. However, if the confirmation holder chooses, it is acceptable to submit these detailed maps with this Notice of Intent to Treat. For example, this may be the case if the confirmation holder is sending the Notice of Intent to Treat to other stakeholders as well.

This information should be consistent with the pest management plan and the pesticide use notice that relate to this confirmation.

Map is attached to this form or provided as an electronic attachment.

Section 4: Wood Poles

Only complete this section if you intend to treat wood poles as a confirmation holder.

To whom it may concern,

Please find the attached NIT for Mosaic Forest Management. Mosaic is acting as an agent on behalf of our contractors who hold pesticide service licences (see licence numbers below) and will doing treatments on MosaiCs behalf. This submission relates to the 2023 herbicide program taking place on Mosaic managed private lands for **TimberWest Forest Company and Island Timberlands Limited Partnership**. A portion of these planned survey blocks may require treatment during the 2023 treatment window. While the identified hectares are substantial to cover potential treatment areas, we currently have 4452.5ha of brushing activities planned (includes manual and herbicide treatment) in 2023.

Herbicide applications will be completed by companies with Pesticide Use Licences and Certified Applicators who adhere to the IPM Act and Regulations. Mosaic is acting as the agent for our contractors who hold the pesticide service licences and who will be applying herbicides to the listed settings. Mosaic Forest Management does not apply herbicide. We will also have a mechanical brushing program to address some sensitive urban interfaces, sensitive community watersheds, water intakes, fish habitats or wildlife protection areas.

Please note the common herbicides used are stated on the NIT report. In addition to the list, the following may be used:

Garlon XRT 28945
VP480 28840
Gateway 31470
Katana (Trial only) 32910
Habitat Aqua (Trial Only) 32374

We will also be administering a Roadside Access Management (RAM) program along with any and various roads/right of ways (ROW's) on Mosaic managed private lands.

Overviews showing the location of the blocks listed in our NIT can be viewed and downloaded through the following DropBox link:

Hello

The post herbicide flight to review blocks from Canfor Prince George 2022 spray program was completed Aug 8th 2023. There were no outside treatment infractions on any of the blocks from last year's spray program.

Should you have any questions regarding the audit please contact me

Thanks

Mike
