Thanks – here are the draft bullets, let me know what you think:

- The BC Conservation Officer Service responded to a call from RCMP on Thursday, December 21, to the Buckley Bay area regarding an injured bear on Highway 19.
- An injured and emaciated black bear cub was wandering near the road, causing drivers to stop, and creating a traffic hazard.
- Conservation Officers were confident that the bear was too injured and weak to survive and euthanized the bear as a humane option.
- We continue to advise the public to stay away from bears and other wildlife.
- If you see a bear along the roadside, it may be trying to cross or it is feeding on lush vegetation or berry-producing shrubs. Use caution and slow down but do not stop, especially on highways.
- Pulling over to stop and take photos of bears can lead to habituation of both humans and vehicles.
- Remember, we all have a part to play in keeping wildlife wild.

Subject: Re: Re media request

Hi Mike,

Thanks for getting back to me. Is it safe to say the bear would not have survived the winter, and that's why it was euthanized? Or for a different reason?

I'll draft some bullets.

Matthew Borghese | Communications Manager

Subject: Re media request

Good evening Matthew
Merry Christmas!

I am thinking the media request is regarding the following incident:

Thursday Dec 21 at approx 11:15 hrs Conservation Officers in the Buckley Bay area were contacted directly by RCMP to attend an injured bear on the highway.

Location 1 km North of Rosewall Creek, north bound lane, Fanny Bay.

Bear was reported on center meridian; officers found it in the ditch when they arrived. Public were stopping, creating traffic hazard. Bear was emaciated and injured. CO's briefed bystanders regarding bears condition.

Officers euthanized the bear and the highways contractor removed it.

If you choose to create some bullets for media, please run those draft bullets by Inspector Milne and myself prior to releasing them.

Many thanks

Mike

Hi there, I'm looking for more information on a bear cub that was found on a highway in the Comox Valley. We interviewed someone who says they coaxed the cub onto the side of the road before calling conservation services. We were told that officers said to those who helped the cub that it was going to be euthanized but none of them stayed to watch it happen, can you confirm this was the outcome in this incident? Thank you

Hi,

We received a call from Global asking about a black bear cub they believe was put down in Comox this weekend. There is video attached.

Do we have any more info on this? Can we confirm COS was involved? See more details below,

Deadline ASAP

Request

Here's the footage of the bear cub in Comox Valley, hoping to confirm if it was euthanized or not, thanks.

MRB: Spoke to Emma on the phone who said someone reached out to Global to say that they saw a black bear cub on the side of the highway. They called COS, an officer arrived with a rifle and said they were going to shoot it. The people claim they argued with the officer, but left before seeing the bear put down because they did not want to witness the shooting.

To the persons responsible for euthanizing bear cub near Comox Valley highway,

The news that this bear cub was killed by Conservation Officers was very shocking and disturbing to me. I do not understand why it hasn't been brought to the Wildlife Rehabilitation Centre where his health could have been assessed properly before making a decision about life or death. Especially that they had room for this orphaned little bear. Instead you chose not to give this bear a chance.

I always was under the impression that Conservation Officers are called to help, to save lives and not to destroy. I wish I could understand your decision regarding this bear cub. Right now I feel that I have no confidence in you and therefore I would not call you if ever I would find wildlife in distress. That's a situation that shouldn't be like this

[EXTERNAL] This email came from an external source. Only open attachments or links that you are expecting from a known sender.

Shame on you for killing the orphaned bear cub at Buckley Bay. There was no excuse, other than pure heartlessness or laziness. There was a spot for it at a rehab centre and dozens of people willing to help. "Conservation" obviously means something completely different to you than it does to the rest of the world. I can (sort of) understand why bears have to be killed when they become habituated to human contact, although I think your officers are far too quick to pull a trigger; but to kill this cub was unfathomable and unforgivable.
Again, shame on you. I, and many, many others are angered and sickened by your action.

Narrative

2023-12-21

RCMP dispatch contacted CO Gudbranson directly and advised that they received a report of an injured bear cub on Hwy 19, north bound lane, approximately 1-2km north of Rosewall Creek. RCMP advised Bear cub was originally in center meridian of Hwy and now in the ditch with several people stopping. CO requested OCC call report into RAPP to generate file#.

1116 hrs, CO Hamlyn and Gudbranson attended location and observed small bear cub in fetal position, not moving, on bank of hwy, north bound lane.

CO's spoke with bystanders on scene and discussed observations. Information from one bystander was the bear appeared to have something wrong with one of its legs. CO Hamlyn proceeded to the bear's location and prodded the bear with an object to assess mobility. Bear, identified as a COY, lifted its head slightly, looked at the CO and then went back into a fetal position. CO Hamlyn nudged the bear with his foot, bear did not respond. CO Hamlyn made a field assessment based on info available at the time (road injured, lethargic, extremely underweight, sow not observed). Due to the perceived poor health (extremely underweight) and reported injury CO's decided the most humane outcome was euthanasia.

CO's discussed and advised the bystanders of the poor health of the bear and explained it is likely the runt of a litter and was probably pushed out of the den by the sow. CO's advised the most humane option is to euthanize the bear and requested the bystanders move on.

1125 hrs, CO Hamlyn euthanized bear and moved the carcass to the roadside for carcass collection. Mainroad contracting removed carcass.

Original caller was s.22

Rumour mill and social media in overdrive about this cub spotted near comox. Lots of chatter cos killed him/her? Is that true?

Tap to Load Preview

globalnews.ca

Heya. ^{s.22}

but I am aware of a scenario that involved a yearling, sick and injured BB up by Royston. COs attending, assessed and euthanized it. It was in rough shape.

COs moved it off the road and Mainroads came and picked it up as per there contract.

Their*

Is that the same bear in this global video?

I haven't seen the global video. We are only aware of one juvenile BB in that area and it's the one I described above.
