Hi Nick,

See attached – there is overlap with existing PNG tenure.

It appears Land Act tenures issued by the OGC (associated with activities) were used in the analysis that was done for you as opposed to the actual PNG tenures.

Let me know if you have any questions.

Cheers,

Matt

Hi Matt,

Since I do not have the shapefile for the potential coal reserve for HRFN I made a map of our active tenures in the same area for review.

Hi Elle,

Could you please review the completeness of the PNG info MARR has used?

Thanks,

Matt

. Chris Pasztor may

be able to assist.

If it is the area with the High Elevation Winter Range and covered by the PNCP, then I would agree with Matt that the objective is as per the interim direction, which is the following:

1. Proposed development activities and associated mitigation (including offsetting) can be demonstrated to result in a net neutral or positive effect on the viability of South Peace Northern Caribou within 10 years of receiving approval; and,
2. Proponents are responsible for developing Caribou Mitigation and Monitoring Plans (CMMPs) and resourcing the management actions required to meet Principle 1.

The guidance document that we produced to support the development of a caribou mitigation and monitoring plan was guidance on how to do this. It does get into details around offsetting approaches, but I don't think this is what you are looking for based on the description below.

Jeff

Just left you a voice message I need your input on cutting and pasting from the two attached documents for a request from the Negotiators for the Coal Strategy.

Will call you tomorrow.

Hi Stewart,

Not sure exactly what "Mitigation Objectives" are aside from saying we're looking to achieve a neutral or better result for caribou within 10 years for any activities in high elevation winter range. Beyond that we spell out how to achieve that through financial and habitat offsetting. Attached are the relevant (still draft) docs.

Cheers,

Matt

Hi Matt

s.12,s.16

Jenn will complete the map outlining caribou locations in the Green Zone. Your paragraph will provide the summary of the Mitigation Objectives and Measures

Thanks

Stewart

Hi Jennifer

Further to our telephone conversation yesterday, could you confirm with Matt Austin and Cynthia Cole that you have the current High Elevation Caribou shape file for the PNCP to lay over the Green Zone as discussed and outlined in the email below.

Thanks

Stewart

Greetings NE Region FLNRO:

s.13,s.16

Brooks will send all of us the current link to the Green Zone maps. The negotiations in the Green Zone will include the following:

s.12,s.13,s.16

s.13,s.16

Jenn Brooks has agreed to develop the maps. We need input on any other Specific Resource Values that may not have been raised in the negotiations. Secondly we need to identify our information sources for these values and appropriate mitigation for potential impacts. Caribou is in place under the PNCP. We require inventory layer for goats, moose and access management as well as any existing mitigation approaches.

The negotiators require this input and information before the end of February. I will work with all parties to ensure we can meet this deadline.

Thanks

Stewart

Looks good on this end, thx.

- The Peace Moberly Tract was recognized as a significant area for the Saulteau First Nations and as part of the New Relationship and Reconciliation Agreement. As part of the agreement, tenure in the Peace Moberly Tract was relinquished last year. The operator in the area – Crew Energy – was issued new tenure further east.
- The order in council, [found here](#), formalizes this tenure exchange.
- **Note:** there were no existing wells or production activity taking place on the tenure in the Peace Moberly Tract.
- Complete details of New Relationship and Reconciliation Agreement can be found here: <https://news.gov.bc.ca/stories/bc-saulteau-first-nations-reach-historic-agreement>. Crew Energy released information following the announcement also, found here: <http://www.crewenergy.com/news-releases/crew-energy-inc-announces-closing-northeast-bc-montney-petroleum-and-natural-gas>
