

This report summarizes all deaths that occurred at the locations listed below between July 21st, 2015, and December 31st, 2016, and were reported to the BC Coroners Service (BCCS).

The BCCS operates in a live database environment. The data are considered preliminary until all investigations have been completed. Data are subject to change, and are not directly comparable to published counts from previous years.

Limitations: The search was based on the address and/or name of facilities as entered in the BCCS database. As such, the search may not have retrieved all such cases.

Calculations of average, minimum, and maximum # of days between the date of death (DOD) and CNO (case notification date) were not included for cases still under investigation as dates of death may not be finalized. The total number of cases reported have been represented.

^[1] DOD = Date of death; CNO = Date of coroner notification

^[2] Calculations of average, minimum, and maximum # of days between DOD and CNO exclude cases that are still under investigation.

* Calculation not possible, as all cases at this address are still under investigation.
