Subject: Mobile Cold Storage Solutions in British Columbia

Good morning Aaron,

My name is Neil Merchant. I am the VP of business development with CoolerTrailers.ca, a BC business based in Penticton. We provide mobile cooler solutions to industry and government. I am writing you to ask you how our mobile refrigerated storage solutions could be of benefit to the BC Coroner's service and to offer our solutions to conveyance contractors requiring cold storage, transportation, crime scene deployment, multi casualty.

Our mobile refrigerated trailers come in various sizes, are customizable to our customer's needs and are easy to deploy. We deliver, set up, pick up and transport the trailers. Features include: Shoreline or Genset 110Vt powered, temperature controlled, WiFi monitored temp, wheel locks, smooth stainless and epoxy inside finishes.

We rent (short term), lease (long term) and also sell custom built mobile coolers. These units can be designed and equipped and delivered fit for purpose, discreet and stealth like in appearance and may be parked anywhere i.e. hospitals, funeral homes, police detachments or a secure compound.

CoolerTrailers.ca is well qualified. We have a company health and safety program, s.21 in commercial general liability (certificate attached) and WCB insured.

If you have any additional questions about our products and services please do not hesitate to contact me. My office number is 250.462.0127 if you would like to chat on the phone.

Regards

Neil Merchant

Hi there Neil,

Thanks for the photos. That's a neat looking product you've got there. I'll be sure to hold onto your contact information in case this need should arise.

For everyday use, bodies are kept at hospital morgues or funeral homes while the coroner conducts the investigation. It would only be situations where those places were overwhelmed by volume that storage would pose a problem for us. That being said, we've come close to that point in the recent past and looked into refrigerated shipping containers as a contingency, so it's always good to have options.
