Subject: Elephant Hill Fire

I would like to know why you are doing nothing to stop the Ministry of Forest burning down all our forest and killing our wildlife. I don't know if you think we are stupid people, maybe there are some who actually think the ministry is actually trying to put out the fire, this is a total lie. The equipment operators are not aloud to make proper guards, helicopters can't drop water on certain areas it might stop the fire. How many homes are you going to burn , how many animals are going to kill, was this part of your platform wipe out the interior of BC. Even people in the Ministry say they are not trying to put out the fire, what is going on. I would like to hear a answer, if you intend to lie save your breath. There are to many people who know this is wrong someone is pocketing a lot of money. 30 homes burnt last night at pressy lake, dead cows all over the road how long does this continue, people will speak out, you are distroying our livelihood. Instead of riding around in a helicopter maybe you should be on the ground looking at the half burnt alive animals people with Know homes. Nice for you to ride around on a parade float having a great day as we burn in hell. s.22
