

Intergovernmental Relations Working Group

s.13; s.16

s.13; s.16 For the purpose of these decision notes we have been asked to focus on the following areas:

- Housing
- Childcare
- Transportation and Infrastructure
- Energy and Mines
- Tourism and Arts

s.13; s.16

The

Throne Speech of September 23, 2020 highlighted creating a Canada-wide early learning and childcare system, augmenting the National Housing Strategy and reaching net zero emissions by 2050, all which align with current priorities of BC.

s.13; s.16

s.13; s.16 Canada provided a \$407 million loan for construction of modern irrigation infrastructure and significantly expanding irrigable land in Alberta, and \$295million to Ford Canada in Ontario towards retooling facility for EV production.^{s.13; s.16}

Decisions required:

The following Decision Notes lay out key priorities for the BC government within the assigned areas.^{s.13; s.16}

February 26, 2021

The Right Honourable Justin Trudeau, PC, MP
Prime Minister of Canada
House of Commons
Ottawa, ON K1A 0A6

Dear Prime Minister:

I would like to thank you for your ongoing commitment to work jointly with British Columbia to manage the COVID-19 pandemic and make progress towards a strong and sustainable economic recovery. Getting through the pandemic is a team effort to ensure that the health and safety of British Columbians and all Canadians is safeguarded. British Columbians are stepping up to do the right thing and have demonstrated incredible resilience. I am convinced it is by building on this resilience and focusing on what matters most to people that the economy will regain its strength.

I am pleased that priorities in Canada's Fall Economic Statement 2020 align with those of British Columbia. My government's plan to support British Columbians through the pandemic and the economic recovery is to invest in health care, get people back to work, help businesses and communities, and build the clean, innovative economy of the future.

January 14, 2021

Via Email

Honourable John Horgan
Premier of British Columbia
PO BOX 9041
STN PROV GOVT
Victoria, BC V8W 9E1
Email: Premier@gov.bc.ca

Dear Premier Horgan:

We are writing in follow up to our letter of September 17, 2020 in which we gave advice that B.C. should adopt a program that addresses competitiveness by protecting eligible emissions intensive trade exposed (EITE) industries from the full carbon tax and considers alignment with Canadian and international programs. We committed to forming a Working Group to advise government on principles and process for an approach.

We agreed to a governance process and the following principles that guided our work. The principles are:

- **Enhance incentives to reduce emissions**
Stimulate innovation and the development of viable emissions-reducing technologies that result in lower abatement costs for EITE industries and assists BC in meeting climate objectives.
- **Minimize competitiveness and carbon leakage risks**
Minimize carbon leakage by limiting impacts on competitiveness from carbon pricing for large industrial facilities in a way that brings congruity within Canada and in other competing jurisdictions and recognizes the incremental abatements costs in BC.
- **Consistency across sectors**
The broad framework for assessing and addressing EITE competitiveness issues should be consistent across sectors and firms.
- **Transparency to promote fairness and encourage broad support**
Ensure continuous improvement through a review of the system after some time period.
- **Simple to implement, administer and comply with and also be easily communicated**

We are pleased to report that we had productive discussions at the Working Group on further details for a trade protection program for EITE industries that we believe improves upon on the current CleanBC Industrial Incentive Program (CIIP) and is aligned with the mandate letters.

.../2

Premier John Horgan
January 14, 2021
Page Two

The Working Group led solutions-oriented discussions to improve the CIIP. These discussions subsequently informed conversations at the Climate Solutions Council and with members of the Business Council of B.C. These groups will each be providing advice to the Minister of Environment and Climate Change.

As a Working Group, while we discussed broad competitiveness issues faced by B.C. industries, notably sales tax, we are agreed that the development of an improved CIIP program for EITE industries is the most expedient approach at this time to address the competitiveness risks that B.C.'s low carbon content commodities face in a changed and increasingly more competitive global economy. We believe that the approach we are proposing can be viewed as a component of Clean BC's goal to build a low-carbon economy while protecting against carbon leakage.

We would be pleased to discuss further as required with government officials.

Sincerely,

Merran Smith
Executive Director
Clean Energy Canada

Hello,

Thanks for printing out the brief. This is a report that we discussed and I told Geoff I'd get you to print a copy and give to him. It is not too long.

And, would you be able to set us up a meeting in about two weeks? I've copied Lyndsey here to work with.

Thanks,
Merran

Subject: Fwd: Wood Pellet Association of Canada's Asian Wood Pellet Conference: Invitation to Give Welcoming Address

[EXTERNAL] This email came from an external source. Only open attachments or links that you are expecting from a known sender.

Dear Amber,

I'm following up on our invitation to Premier Horgan to give welcoming remark of perhaps five minutes at our upcoming virtual Asian Wood Pellet Conference. The conference begins at 4 p.m. Feb 16, which is the same as 9:00 a.m. Japan Standard Time.

We realize that Premier Horgan has a demanding schedule, so if he can't make the actual date, we'd be happy with a short pre-recorded video.

Our industry aligns with the government's public messaging about climate change:

"We're working towards a future where buildings and new vehicles produce no emissions at all; where we use less energy and create less waste; where communities and businesses are ready for a changing climate; and where industries are the cleanest in the world. By finding clean, efficient solutions as we prepare for the climate changes ahead, we will strengthen B.C.'s economy and create opportunities for people across the province."

"Our CleanBC plan puts our province on the path to a cleaner, better future with a low-carbon economy that creates opportunities for all. B.C. is committed to reducing greenhouse gas emissions to 40% below 2007 levels by 2030. We are also preparing for the impacts of a changing climate so our communities and economy continue to thrive."

We use waste from sawmills and logging operations to make a clean, sustainable, low carbon fuel that is used to produce heat and electricity around the world. Canada is the world's second largest producer of wood pellets, and BC accounts for about 75% of Canada's production.

Do you have any advice for us as to how to confirm Premier Horgan?

All the best,

Gordon Murray, RPF, CPA, CMA
Executive Director
Wood Pellet Association of Canada
Tel/mob: +1 (250) 837-8821

Dear Premier Horgan,

On February 16, 2021, the Wood Pellet Association of Canada, together with Canada's Trade Offices in Japan, South Korean and Taiwan will hold an online Asian Wood Pellet Conference. This year's theme is Energizing Asia with Sustainable Low-Carbon Biomass. It will bring together 300 leaders in the North American and Asian bioenergy sectors, including power utilities, trading companies, ports, stevedoring companies, shipping companies, equipment and service suppliers, pellet producers, research institutions, NGOs and policy makers.

On behalf our members, I am inviting you to deliver the opening remarks to the conference, shortly after 4 PM Pacific Time on February 16. We believe your messaging on the importance of Asian markets

to British Columbia forests and the CleanBC strategy would be well received. If you are unable to deliver the opening remarks in person, pre-recorded welcoming comments are also possible.

Please see the attached invitation letter which gives more information.

All the best,

Gordon Murray, RPF, CPA, CMA
Executive Director
Wood Pellet Association of Canada
Tel/mob: +1 (250) 837-8821

January 4, 2021

The Honourable John Horgan
Premier of British Columbia
PO Box 9041
STN PROV GOVT
Victoria, BC V8W 9E1

Re: Invitation to deliver welcoming remarks to (Virtual) Asia Wood Pellet Conference.

Dear Premier Horgan:

On February 16, 2021, the Wood Pellet Association of Canada, together with Canada's Trade Offices in Japan, South Korea and Taiwan will hold its Asia Wood Pellet Conference. This year's theme is *Energizing Asia with Sustainable Low-Carbon Biomass*. It will bring together 300 leaders in the North American and Asian bioenergy sectors, including power utilities, trading companies, ports, stevedoring companies, shipping companies, equipment and service suppliers, pellet producers, research institutions, NGOs and policy makers.

On behalf our members, I am inviting you to deliver the opening remarks to the conference, shortly after 4PM Pacific Time on February 16. We believe your messaging on the importance of Asian markets to British Columbia forests and the CleanBC strategy would be well received. If you are unable to deliver the opening remarks in person, pre-recorded welcoming comments are also possible.

This year's Conference topics include:

- ***Energizing Asia:*** Expert analysis of global markets, a focus on Japan, South Korea, and Taiwan.
- ***Examining Political Trends:*** Developing government policies in Asia and their impacts for biomass.
- ***Evolving Requirements in Sustainability:*** New biomass and GHG requirements currently under development in Japan.
- ***Responsible, Renewable and Sustainable:*** The Canadian wood pellet advantage.

- ***Verifying the Pellet Carbon Story:*** *Presenting results of a Canada-Japan GHG study.*
- ***New Horizons for Biomass:*** *A look at Taiwan and other Asian opportunities.*

British Columbia is the largest producer of wood pellets of any sub-national jurisdiction in the world, and we currently export 99% of our 2.5 million tonnes of pellets to Asia and Europe. Today, thousands of British Columbians are employed in the sector producing pellets, solidifying biomass as the gateway to the innovation economy while meeting the global demand for responsible, renewable and clean energy.

As BC looks to advance its ambitious CleanBC agenda, our sector has a significant role to play – creating more value and more jobs from every tree harvested in the province, reducing waste and displacing fossil fuels with renewable energy; while highlighting BC's carbon advantage.

We sincerely hope your schedule can accommodate this request, and we will follow up with your Scheduling Branch regarding specific timing and logistics.

Yours truly,

Gordon Murray
Executive Director
Wood Pellet Association of Canada

Hi all,

Attached is the draft legislative agenda based on yesterday's conversation. You'll see there are 6 sections in the document:
s.12

Noting there will be additions to this list based on Donna's work, the substance of what we discussed is reflected in sections 1-3. My folks have also reached out to leg counsel to confirm the drafting readiness of the items identified in sections 1 and 2, I will provide an update once we hear back. In your review if you find I tagged items to the wrong session, please let me know and I will update.
