Extremely hot off the press. However, I took a quick look at the tables and they didn't include the last question, so I've asked them to add it in and re-send ASAP. I had a quick summary ready to go and have inserted the %s and pasted below.

- 1. On a scale of 1 to 5 where "1" means you are not aware of the project and "5" means you are very familiar with the project, how informed are you about the BC government's announcement to build a new Royal BC Museum?
- 84% of BC residents are aware of the RBCM project.
 - 48% say they are informed (score of 4 or 5)
 - 26% are in the middle (3)
 - 26% have low familiarity or are not aware (16%)
- 2. Which of these is closer to your views?
 - 21%: 'With the 50-year-old Royal BC Museum at the end of its life and at risk of collapse in an earthquake, replacing the museum makes sense because it will mean preserving our province's history, supporting our tourism industry, and growing our economy.
 - 79%: 'The \$1 billion cost of replacing the Royal BC Museum should be spent on other priorities like new schools and hospitals, more affordable housing, and reducing costs for British Columbians.
 - *Results consistent across province and among age groups.
- 3. Are you aware that the Royal BC Museum (RBCM) buildings are seismically unsafe and that they contain hazardous materials such as lead paint, arsenic, and asbestos?
 - 49% Yes across BC. 69% in Greater Victoria
 - Awareness significantly higher among those who are older.

- 4. On a scale of 1 to 5 where "1" means not at all important and "5" means extremely important, how important is it to yourself personally and the province of BC to have an accessible museum to educate BC families and visitors on our province's history, while supporting our tourism industry?
 - 25% Important personally (4 or 5)
 - 43% to province of BC. Highest in Greater Victoria (61%
- 5. If the financial cost to tear down and rebuild the museum is similar but less than the cost of renovating the museum and keeping the exhibits open, which option would you prefer?

- Rebuild: 40% - Renovate: 31% - Don't know: 29%

6. Level of Convincing.

For years engineers have said the RBCM is structurally unsound and	4/5 Convincing	1 or 2 Not Convincing
could collapse in an earthquake, threatening some of BC's most treasured artifacts. A new museum will ensure those items are properly protected for future generations to safely enjoy and learn from.	41%	25%
RBCM does not meet current building standards and contains hazardous materials, like asbestos, that pose a risk to both visitors and staff if disturbed. For example, the presence of these materials would make damage from a seismic event even more dangerous.	42%	25%
The cost of replacing the museum is less than the cost of doing necessary renovations. While it is closed, temporary exhibits will allow British Columbians around the province to experience some of the museum's treasures in their local communities.	38%	29%
RBCM is a great asset, but it does not adequately represent the experiences of Indigenous and immigrant communities. There are also parts of RBCM that are inaccessible, meaning people living with disabilities cannot access the full experience of the museum. Replacing it will not only address pressing safety issues but will also provide an opportunity to reimagine the museum in a way that tells BC's history in a more inclusive way, in a more accessible facility.	34%	31%
RBCM has served us well for 50 years and is BC's second-biggest tourist attraction, but it is time for a new museum for the 21st century. The new building will not only ensure the security of priceless artifacts, it will also be a world-class architectural icon, made with BC materials, that will attract even more people from around the world, helping to strengthen our economy.	34%	32%

Let me know of any q's, Allan

Allan Dawe Vice-President

Extremely hot off the press. However, I took a quick look at the tables and they didn't include the last question, so I've asked them to add it in and re-send ASAP. I had a quick summary ready to go and have inserted the %s and pasted below.

- 1. On a scale of 1 to 5 where "1" means you are not aware of the project and "5" means you are very familiar with the project, how informed are you about the BC government's announcement to build a new Royal BC Museum?
- 84% of BC residents are aware of the RBCM project.
 - 48% say they are informed (score of 4 or 5)
 - 26% are in the middle (3)
 - 26% have low familiarity or are not aware (16%)
- 2. Which of these is closer to your views?
 - 21%: 'With the 50-year-old Royal BC Museum at the end of its life and at risk of collapse in an earthquake, replacing the museum makes sense because it will mean preserving our province's history, supporting our tourism industry, and growing our economy.
 - 79%: 'The \$1 billion cost of replacing the Royal BC Museum should be spent on other priorities like new schools and hospitals, more affordable housing, and reducing costs for British Columbians.
 - *Results consistent across province and among age groups.
- 3. Are you aware that the Royal BC Museum (RBCM) buildings are seismically unsafe and that they contain hazardous materials such as lead paint, arsenic, and asbestos?
 - 49% Yes across BC. 69% in Greater Victoria
 - Awareness significantly higher among those who are older.
- 4. On a scale of 1 to 5 where "1" means not at all important and "5" means extremely important, how important is it to yourself personally and the province of BC to have an accessible museum to educate BC families and visitors on our province's history, while supporting our tourism industry?
 - 25% Important personally (4 or 5)
 - 43% to province of BC. Highest in Greater Victoria (61%
- 5. If the financial cost to tear down and rebuild the museum is similar but less than the cost of renovating the museum and keeping the exhibits open, which option would you prefer?

Rebuild: 40%Renovate: 31%Don't know: 29%

6. Level of Convincing.

	4/5	1 or 2 Not Convincing
For years engineers have said the RBCM is structurally unsound and could collapse in an earthquake, threatening some of BC's most treasured artifacts. A new museum will ensure those items are properly protected for future generations to safely enjoy and learn	41%	25%

from.		
RBCM does not meet current building standards and contains hazardous materials, like asbestos, that pose a risk to both visitors and staff if disturbed. For example, the presence of these materials would make damage from a seismic event even more dangerous.	42%	25%
The cost of replacing the museum is less than the cost of doing necessary renovations. While it is closed, temporary exhibits will allow British Columbians around the province to experience some of the museum's treasures in their local communities.	38%	29%
RBCM is a great asset, but it does not adequately represent the experiences of Indigenous and immigrant communities. There are also parts of RBCM that are inaccessible, meaning people living with disabilities cannot access the full experience of the museum. Replacing it will not only address pressing safety issues but will also provide an opportunity to reimagine the museum in a way that tells BC's history in a more inclusive way, in a more accessible facility.	34%	31%
RBCM has served us well for 50 years and is BC's second-biggest tourist attraction, but it is time for a new museum for the 21st century. The new building will not only ensure the security of priceless artifacts, it will also be a world-class architectural icon, made with BC materials, that will attract even more people from around the world, helping to strengthen our economy.	34%	32%

Let me know of any q's, Allan

Hi Sage,

Attached are the tables with the last question attached. There's a bit more support toward the RBCM replacement after informing participants in the survey (21% --> 29%), but is still weighted heavily towards the sentiment that the money should be spent on other priorities.

Given what you now know about the Royal BC Museum project, which of these is closer to your views?

- 29%: 'With the 50-year-old Royal BC Museum at the end of its life and at risk of collapse in an earthquake, replacing the museum makes sense because it will mean preserving our province's history, supporting our tourism industry, and growing our economy.
- 71%: 'The \$1 billion cost of replacing the Royal BC Museum should be spent on other priorities like new schools and hospitals, more affordable housing, and reducing costs for British Columbians.

*Results consistent across province and among age groups.

Let me know of any questions.

Subject: Re: Draft Options

My message tomorrow:

we are going to delay the museum project

- We need to take a step back and engage with British Columbians to better understand what they want for their museum
- We need to surface the discussions that occurred between the RBCM Board and the Province so that citizens can have their say
- This engagement needs to be broad and deep
- We need to develop and market a multi-year strategy/itinerary for pop-up exhibits around the province
- And in light of the delay, we need to develop a plan to reopen the 3rd floor in the interim.

Anything else?

Hi Eric,

We have prepared 2 one pagers on the topics of site selection and indicative design. They are attached. Let me know if these work for the purpose.

s.12 I have asked Nick and

Claire to try to get this to you today so that you can fine tune tomorrow. I will be in the air between 12 and 6 pm today so it will be coming to you directly from Nick and I will not have reviewed. Happy to make myself available tomorrow though if you have any questions.

RBCM Modernization Site Analysis

- With the approval of the concept plan TACS was directed by Treasury Board to submit service delivery options prior to development of the business case.
- 4 service delivery options were considered 2 consolidated site options and 2 separate site
 options

Option 1	Consolidated museum and research and collections facility on a new site.
Option 2	Museum on a new site and a research and collections facility on a separate new site.
Option 3	Consolidated museum and research and collections facility on the existing site.
Option 4	Museum on the existing site and a research and collections facility on a separate site.

- A scan was conducted supported by MIRR, Citz and Devoncore Real Estate Advisor.
- Results were analyzed in a two-step process.

Step 1: Evaluate sites against minimum mandatory requirements of:

Site Considerations	Assessment Criteria
Location	 Museum site must be located in downtown Victoria Research and Collections Facility site must be within 32 km from the existing employment location (collective bargaining agreement stipulation).
Buildable Area	 Consolidated Museum site must accommodate minimum buildable floor space of 42,000 m2* Museum only site must accommodate minimum buildable floor space of 25,000 m2* Research and Collections Facility site must accommodate a minimum floor space of 22,000 m2*
Logistics	 Ability to accommodate shipping/receiving from 53' trailers Ability to accommodate a minimum of two buses in drop off/loading zone

^{*}Note that floor space requirements were point in time and no longer reflect current program size. (Approved gross program area for Museum is 21,300 sq metres and CRB is 15,500 sq metres)

- 34 sites were identified at that time s.17
- Identified sites were then analyzed against the minimum criteria resulting in a short list of 20 sites which were further reduced to 5 in step 2 by analyzing the sites against key considerations of net cost, assembly complexity, accessibility, transit, geotechnical, etc.
- A comparison of shortlisted sites to the four service delivery options resulted in no viable site options for either a consolidated museum and research and collections facility or for

Page 1 of 2

- establishing the museum on a new site downtown. Note this was based on the size of the programs at the time of analysis.
- Options 3 (consolidated on existing site) and 4 (museum on existing and research and collections building on a new site) were then analyzed using a multi-criteria analysis against the project objectives and criteria resulting in a 2 site delivery option being the recommended approach.
- The 2019 report back received approval for the two-site delivery model with the museum on the downtown site and the collections and research building being built on a new site.
- The 2020 business case submission resulted in approval to purchase the Royal Bay site in Colwood for the new collections and research building and further work required for the downtown site which was subsequently approved in the 2021 business case.

s.17

s.17

RBCM Indicative Design Background

- Through the development of the museum business case there have been several indicative design iterations reflecting the evolution of the program and vision.
- The indicative design, sometime referred to as concept massing, is developed to assist in
 costing and to ensure that the functional program and required adjacencies are achievable
 on the site.
- Releasing the indicative design publicly includes the following potential risks or implications:
 - Public Misperception gives the public the perception that the design is finalized which isn't accurate and potentially adding to project communications and issues management challenges.
 - Procurement influences teams competing in procurement s.17
 s.17
 - o Innovation does not support the objective of innovation and bringing new and fresh ideas to the table by proponent teams.
 - o Relationships may impact First Nation relationships as current indicative design does not honor local nation culture or design influence.
- The most recent of three indicative designs produced for the downtown site is reflected below.
- The final design will ultimately be brought forward by proponent teams as part to the procurement process and design competition.

Royal BC Museum – Stopping and Engaging with Public June 22, 2022

Key Messages

- We are stopping the plan to build a new Royal BC Museum.
- British Columbians made their views clear that we got it wrong.
- We heard, we listened, and we're responding.
- The museum will remain open, while we begin a new, robust public engagement process with all options on the table.
- This museum belongs to the people of this province and decisions about its future should reflect their priorities.
- This public engagement will determine how we address the longstanding structural issues of the museum's buildings.
- We remain committed to protecting our collective history and are proceeding with a new collections facility to house BC's historic and priceless artifacts.

QA

Why did you publicly support this project?

- The problems facing the RBCM have been evident for a long time, including the need to repatriate Indigenous objects, obsolete building systems that put collections at risk, and more.
- We listened to those warnings, which were ignored for too long.
- British Columbians have made themselves clear that it isn't what they want to see at this time.
- We're listening now too. We intend to stop the plan to rebuild and engage with people on the future of the museum.

Will the \$789 million price tag for RBCM now be used for other capital priorities, like building new schools and seismically upgrading them?

- This has never been an either-or situation.
- I am very proud of our historic capital plan to build and upgrade schools across the province.
- We're spending \$1.3 billion to build and expand schools over the next three years, and nearly \$800 million to seismically upgrade even more.
- This is double what the old government spent for school capital.
- Ultimately, the museum does need serious modernization but at this time, we do not know what recommendations will come out of the public engagement or what the final costs will be.

Will you bring back Old Town? Will the third floor be reopened?

- Large sections of the third floor have already been carefully disassembled.
- Given the recent work on the third floor there are increased concerns around asbestos abatement.
- We have encouraged the museum to think about how to best use that space until future plans for the museum are settled.
- The Old Town exhibition has been digitized and will be available online.

Will the IMAX remain open?

*Yes. We have asked the museum to suspend plans to close the museum, including the IMAX theatre.

Isn't the delay just going to increase costs of whatever option is chosen?

- People have been clear that they didn't like the proposal we put forward.
- It wasn't right for the moment we are in.

s.13

Are you just putting this off until after the next election, and then doing it anyways?

- Not at all we have heard from British Columbians that they want a say in the future of their museum.
- That's why we are stopping the project and conducting a robust engagement.
- This is the people's museum, and its future should reflect their priorities.
- We're not putting a time constraint on the process. We will take the time that is needed to achieve a solution that we can all support.

What options will be considered in the public engagement and what will it involve?

- Everything is on the table.
- We have been clear with the public about the information we received on the current condition of the buildings and the challenges that need to be dealt with.
- The key is that any solution must protect and preserve our collective heritage and make that heritage accessible to British Columbians and to visitors.
- We've asked RBCM to put together a very broad and inclusive public engagement plan so that people can make themselves heard on the future of the museum.

s.13

- I expect the museum will also find ways to hear from visitors, as the galleries remain open, about what they want to see in their future visits.
- There will also be ongoing engagement and consultation with First Nations.

How will you keep the museum open and safe for visitors?

- There will be some necessary maintenance and remediation needed.
- We have asked the museum to review and prioritize maintenance and safety work needed to keep the current exhibits open to visitors.
- There will be costs involved, but this is what people have said they want to see right now.
- In the long run, more needs to be done to modernize the museum. But we will engage people on what that looks like.

s.13
