Notes:

1. Data include both domestic and international students, and exclude offshore students. In any given year, some students may be enrolled in more than one program. Since these students are included in the headcount of each program they are enrolled in the sum of the program headcounts will include some students more than once, producing an overstated program headcount total. Each number has been rounded to the nearest five. The effects of rounding may result in totals in different reports not matching exactly when they would be expected to match. Numbers less than 10 have been masked with an *. Cells with no value are left blank. Data are restated annually to maintain accuracy and reflect institutional updates.

2. Due to small counts, data does not include where age information is not available

3. Academic Year (AY) is from September 1 to August 31.

4. This report uses Statistics Canada Classification of Instructional Program (CIP) 2016 codes to identify relevant programs. For a detailed description of CIP codes, please refer to the following web site:

[Classification of Instructional Programs \(CIP\) 2016](#)
