To: 'Danielle CLARK'
Subject: RE: Sicamous Fire

Good morning Danielle

I would send all in – Looking to see if same products or different in certain hit areas

Fluid sample will be to see if any fuel in same – A larger area of hydrocarbons were identified where the rear of the boat was positioned during the fire – trying to ascertain whether this was from the boat or not – I would guess the fluid is just contaminated water but test will help rule this in or out.

Thanks Rick

Hi Rick,

I thought I would give you a quick email to touch base. Based on what you saw, should all the exhibits be sent to our lab for processing or are there certain ones that you feel should be sent?? I am back to work Wednesday and plan to send out the exhibits. Let me know what you think otherwise I'll try to give you a shout on Wednesday.

Thanks,

Danielle
