Just had a phone update from Tom.

Weather has remained same with moderate and heavy bursts. Warmed up as well but still snowing and expected to keep snowing through day.

Chain up still in effect with staging commercial at Sowaqua. Hill was almost clear but congestion of chain up trucks extending down below Box Canyon happening and spun out trucks in both lanes had stopped traffic for now. Continual towing up hill clearing but not able to keep up 100% is impacting lowering operations.

No mention of any breakdowns or issues outside normal. CVSE had a report late last night of a truck impeding an operating snowplow. Truck was contacted at Zopkios Brake Check and I believe a coupon was given to the driver. Nice to see that process working.

Justin is set to relieve Tom shortly as Protocol continues. Tom will update more as he gets a chance.

Subject: Fwd: Snowshed Protocol Feb 28/2017, 0:430

Hey guys

Currently at Zopkios we have an air and road of -1. Snow is light and gets moderate at times. Temps seem to be warming up a lot. More down by box canyon to Shylock almost turning into rain.

VSA is heading down to do an application of brine in both lanes south and north bound below box canyon. Once that has kicked in and the weather calms down near the hill a bit more. I will have VSA start salting and sanding the hill so we can possibly shoot for having the chain up lights off.

Earlier in the night. They were staging trucks at Sowquaw when the commercial traffic was busy. Around 0:200 traffic turned pretty light and staging was no longer needed.

No major incidents since last update. Just a few spun out trucks on the hill. Weathernets latest update said the heaviest of snow is over but will continue with light snow until late morning.

CVSE and AEL both have replacements coming this morning. I'm good till about 11:30 and Justin will be here to relieve me if still needed.

Thank You
Tom Agar

Subject: Fwd: Snowshed Protocol Feb 28/2017, 0:100

Not to much change with the weather here. Zopkios still light to moderate snowfall. Air and road temp of -1 blowing snow with limited visibility. Snow is a lot lighter down near Portia and Shylock.

Total accumulations so far are approximately 12.5cm. All lanes are plowed to spec. VSA just did a 3 truck sweep up and down the hill and VSA 8 and myself are monitoring sections well if and when in need of any attention.

No major incident since last update just a couple more spin outs on the hill. Chain up still in effect.

Thank You
Tom Agar

Subject: Snowshed Protocol Feb 28/2017, 23:00

Hi guys

Merritt to kingsvale was in great shape. Roads were bare and dry when I came up at 21:00. Air and road temp -5.

Light snow started around Juliet on my way to Zopkios. Currently at Zopkios we have an air and Road temp of -3. Light to moderate snowfall with blowing snow and limited visibility. Chain up is in effect.

VSA has 9 operators for tonight. As for Now they have 8 trucks out and a grader if and when needed.

VSA 8, myself, Brad, CVSE, Al Quiring and AEL traffic control are all present and ready. Fraser valley Rcmp is also in the area helping out till about 0:300.

Commercial truck traffic is quiet heavy tonight. No major incidents as of yet. Have had a few spin outs on the hill with chains on and had a jackknifed truck down near Portia that was quickly dealt with by Marios towing.

If Volumes get heavier down near box canyon chain up. Staging is ready at Sowaqua when needed as a preventative measurement for congestion and reduce the risk of a possible closure.

Weathernets latest update said snow was supposed to intensify from 24:00 to 0:300 then turn to a light snow fall.

Thank You
Tom Agar

Subject: Fwd: Snowshed Protocol March 2/17, 12:00

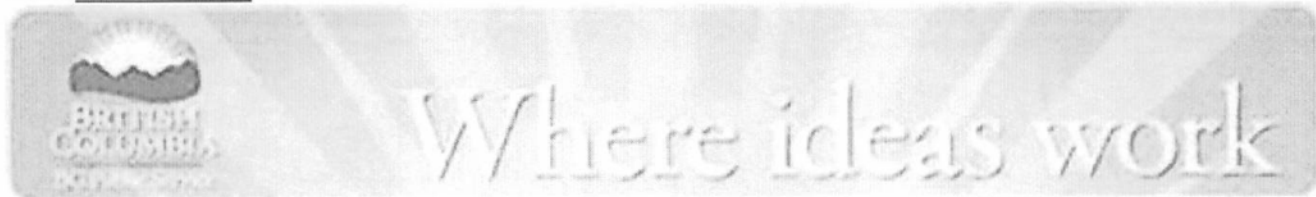

Currently Zopkios is light snow and temps have warmed up a lot. Air and road temp of 2 degrees.

The roads are all in great shape. Wet with some slushy sections. There has been no spin outs or any major incidents in the last 2 hours. Chain up lights are off and hill is in great shape.

Weather nets is saying this light snow will continue throughout the day then some heavy snowfall after 8pm is expected. Im good to stay here till about 6pm if needed and Justin will be up here for 7pm as requested from Coldwater 10. AEL has new replacements here and are currently working with VSA shadowing there works along the highway. (Grader and Snow blower). CVSE will be here for 8pm tonight along with Al Quiring.

As of now this looks like it suppose to continue right through into tomorrow. We all know have fast things can change though

Thank You

Subject: Snowshed Protocol March 2/17, 0:730

Good morning

I arrived at Zopkios at 0:430. Merritt to Kingsvale was bare and dry. Light snow started around Juliet but no major accumulations as the snow has been on and off there throughout the night.

Currently at Zopkios we have light snow fall with an air and road temp of -1. It has been snowing all night here but just a light snow fall.

There has been the odd spin out and jack knife on the hill mostly because of trucks blowing a gear. Had it shut down for 15 min or so but things are back to normal. The hill right now is in great shape and chain up lights are off.

VSA has 4 tandems snow plows out, one tow plow, 2 graders and a loader. VSA 12, Coldwater 10, myself, AEL and Al Quiring are all present. CVSE left around 15:00 yesterday but with what snow is expected throughout the day and night I'm sure there will be a plan made for them to be down this way soon. Coldwater 10 will be making a plan with Glenn.

Traffic control is still set up if staging is needed at Sowaqua. This helps a great deal when the chain up lights turn on at Box canyon and the road is blocked. Really nice to see this is going on.

VSA has all lanes into spec and currently a loader is working at all rest areas and pull outs making snow storage. We are currently doing are Rounds monitoring the hill and will be sending a couple trucks down to make a pass from box canyon and Shylock. Salting, sanding and juicing is in progress

Thank You

Some photos from the Coquihalla today. There hasn't been as much snow today as forecast, so VSA has been focusing on clean up (deicing, pushing back shoulders, and clearing pullouts) to get ready for the next snowfall which is supposed to start after midnight, and bring up to 40cm of snow through tomorrow.

Thanks Bob I just spoke with Tom regarding the Travel Advisory. I am crafting one now with Trent which I will have posted to RTMC shortly. Yes Tom had the severe weather lights out on. Keep us posted as the night goes on. It will be interesting to see if traffic dies off a bit with an advisory.

Calling RTMC now for advisory.

Sent from my iPhone

On Mar 3, 2017, at 7:50 PM, Agar, Thomas TRAN:EX <Thomas.Agar@gov.bc.ca> wrote:

Hey guys

Things have really picked up here. We are getting heavy snow right from Zopkios to Shylock. Chain up lights are on and many spin outs on hill even when there chained causing traffic to be stopped at box canyon and Sowaqua.

AV hazard is at considerable now so anytime we have a blockage on hill that will take longer then 5 min Sowaqua will hold traffic as we can't have people sitting below box in Avalanche zones.

Severe winter weather warning lights have been turned on north and south bound and travel advisory has been issued for the rest of the night.

Bob is on his way to relieve me for 20:00. Things are busy so have to keep this update short. Hope some of the info has helped

Thank You

Subject: Fwd: Snowshed Protocol March 3/17, 16:30

Still light snow at Zopkios with an air and road temp of 0 degrees.

The hill is in great shape and we were able to shut off the chain up lights around 16:00. Since last update there was a few spin outs on hill and no major incidents.

Traffic seems to be moving along well. Traffic control is still set up and ready at Sowaqua if needed.

Weathernets latest update said snow is suppose to continue now till midnight with heavy periods at times. After midnight things are suppose to taper off. Temperatures are suppose to start dropping after 17:00.

CVSE has now left and has new replacements coming up for 20:00.

Thank You

Hi everyone

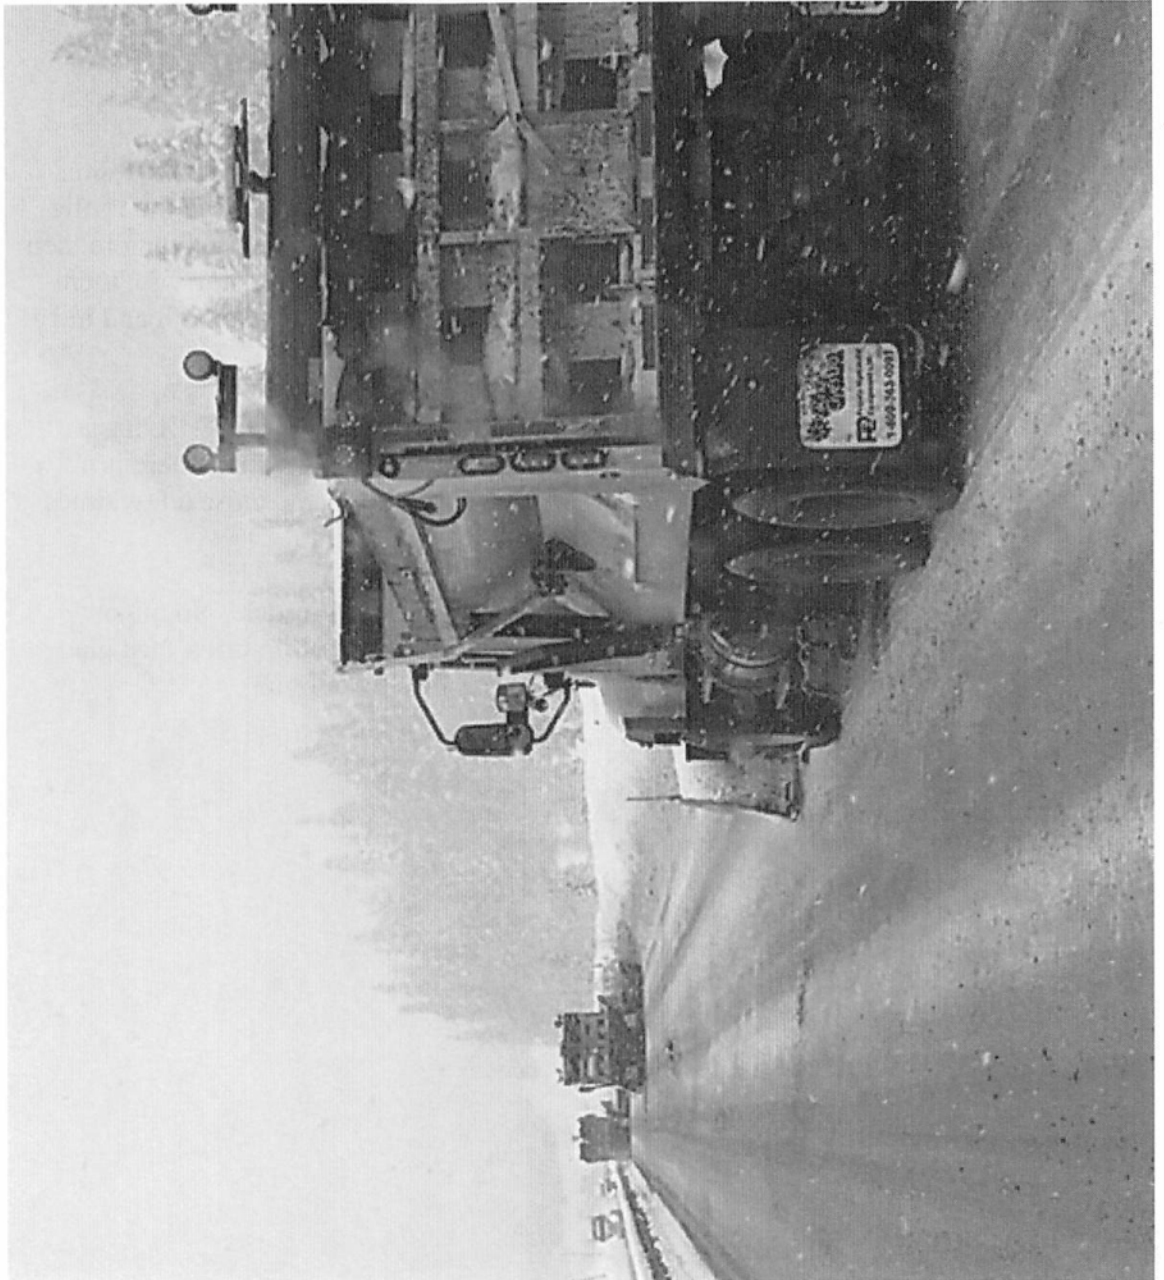

Things have been busy since my arrival. Haven't really had a chance to update until now. Merritt to Kingsvale was in great shape and then once I got to the top of Larson hill is where the snow started.

Currently snowing light at Zopkios changing to a moderate at times . Things have warmed up. We have an air and Rd temp of 2 degrees. AV hazards are now at a moderate.

We have had many spin outs on the hill. With that, we have shut traffic down at box canyon until the hill is clear. When the traffic gets stopped at box canyon and we know it's going to be more then 5 min. They will hold traffic at Sowaqua and continue with there staging. Right now everything seems to be going smooth and hill is in good shape.

CVSE, AEL, Coldwater 10, VSA 12 are all present. AEL has a third flagger here to manage things at Zopkios incase there is a closure southbound on the hill as we have came close a few times to closing.

VSA has 5 tandems out, 2 tow plows and 2 graders. No major incidents. Just a few smaller accidents with no injuries. Just glad we have been able to keep the traffic flow moving.

Thank You

Subject: SnowShed Protocol March 6/17, 08:30.

Hey guys

This snow just don't want to go away. So this is another one of those quasi type protocols. There is a lot of mixed forecasting.

I left Merritt this morning around 0:5:00. Merritt to Kingsvale was bare and dry with an air and road temp of -6. Once I got to the top of Larson hill to Zopkios we had one Bare lane and the fast lane was compact. Further up was compact both lanes and slippery with sanding and plowing in progress.

Currently at Zopkios air and road temp is -4. Snow is light and chain up is in effect. VSA is making a few good sweeps on the hill and laying the sand down hard and we should see the lights come off soon.

There has been a few spin outs on the hill. No major incidents as of yet. Weather nets predictions are heavy squalls this morning with up to 10cm then another 10 early afternoon. VSA is fully prepared even though other forecasts are predicting next to nothing.

VSA 12, Coldwater 10, myself , AEL and Al Quiring are all present. VSA has 5 tandems out and 1 tow plow along with a grader. CVSE is not present but might show up for some snow plow enforcement as this protocol shouldn't last to long by the looks of things.

Thank You

Tom Agar

Subject: Re: Snowshed Protocol March 8/9 2017 , 08:30

Just had a discussion with Coldwater 10 and weathernet. Protocol is officially over for today. S.22
S.22

The fforecast for tonight is for two big waves to come. First one is 8-10 cm in a short time span of 1700-2000. After that there will be a lull until 0400 when we will see 15-20 cm before 1200.

We decided to put protocol in place for 1600, including sowaqua staging. And the plan is to run it continously until the storm tomorrow is done. There is a considerable gap in between the two waves, but with the forecasting lately, we thought it wise to play it safe and be prepared throughout the whole evening / morning.

Bob is going to take the first shift, starting at 1600 today.

Last night went well. We had a handful of heavy snow squalls, but managed to stay on top of it without incident.

Since midnight VSA has definitely had there 15cm of snow that was not called for. Because of that they had AEL here working chain up and tow trucks were working the hill from different companies causing more of a problem then help. With that, we did another weathernet call and they said there will be a few heavy squalls tonight with up to 5cm a squall so then it was decided to put protocol on.

We have been fairly quiet up here since the last update. At midnight we had a short period of heavy snowfall. Right now another one is starting. Road and air temp -2.

Nobody has had any trouble with traction on the hill yet, vsa is staying on top of accumulations and slippery sections.

No incidents to report.

Subject: Re: Protocol Mar 09 2017

It was all miss last night. Chain up never came on. We'll take that any day over a massive storm!

VSA has definitely changed how they plow. Single trucks only plow the right lane. Any of the tandem plowing they saw only plowed the middle and far right lanes. We tried it but it was unnecessary. We did hear about some cars passing on right but we never witnessed any opportunity to pass on the right because of how they plow.

They all know to give it a shot if chain up is off so we'll see how it goes tonight

>>> Merritt to juliet was lightly raining, air and road of 1. Roads were wet. At juliet the rain started to transition into snow and became heavy by Britton Creek all the way to shylock.

>>>

>>> Its a really wet snow that is incredibly slick and hard to plow completely. Accumulations are good throughout, traction will be the focus tonight.

>>>

>>> Weathernet is saying now that we will get 15 cm before things taper off close to midnight
>>>
>>> Ael is in place, cvse could not get man power enough to get out here. Al Quiring will be here momentarily.
>>>
>>> Chain up lights turned on at 2000, along with avalanche forecast of moderate. Everyone is putting beacons on now.
>>>
>>> With the avalanche risk, there was mention of sowaqua staging, but I think we'll be OK on that front. Saturday evenings are generally low traffic volumes, coupled with the fact that without cvse lots of these guys are blowing the chain up. We'll monitor it and make the call if needed.
