Michelle

Unfortunately, even though CHRIS can be used for historic purposes, it is not the place to look for this information as these changes might or might not have been recorded in CHRIS. I believe that the best place to look for this information would be the Article VI's as Maintenance Class is one of items that would have a major play on the Contractors life. All of the yearly reports from CHRIS beginning from 2003/04 fiscal year can be found on the Public Drive (we did not start running reports for every Inventory Type until 2014/15).

Drive: P:\HQ\CMB\MPS\CHRIS\Reports

Directory: Inventory

Reports are found under each of the fiscal year directories

- e.g. – it looks like 2003/04 report states that Mound Road had a MC of 6D for 7.334km and a MC of 8F for 1.467km (this seems to match your findings)*

ps – RIMS/CHRIS started roughly around 1999/2000 – this was the beginning of when all of the information from all of the Service Areas was entered into the new system – when I set CHRIS back to 2000, I cannot find any basic Inventory for this road, but when I set it to 2004 I do see the Inventory and interestingly it is a MC of 6C (Y for School Bus) from 0.000 to 7.334; then a MC of 6D (N for School Bus) from 7.334 to 8.801 – BUT this was not was entered in the 2003/04 contract

Thank You Very Much

Hi Brandon, HNY!

I would first do a search thru all the Article 6's to see if Mound Rd is on any of them (you may recall there was a spreadsheet started with all the Article changes for the first 12 years that would be easiest search). If nothing found for Mound Rd that matches I would then research further back (maybe something in the road file to help).

Hello

Am researching historic classification of Mound Road 2147 (stakeholder dispute with school board & wants not to reclassify road

) if there any way that you can advise whether Mound Road 2147 was Class C from LM 59530 to 59550 in year 2000? Mound r Road is in Area C. I found a LM report from 2004 and it showed road was class D and class F . Mound Road is near Clinton Area C .

Hi Michelle,

I pulled out the attached pages from a PDF entitled "r2&3sa16" which covers Round 2 and 3, from 1991 – 1996.

ROUND II (1991-1994) (started staggering)	ROUND III (1994-1995/96) R2 EXTENSIONS
Whiteline Road Maintenance Ltd. Dec 1/91-Jun 13/94	Caribou Road Services Ltd. Jun 14/94-Jun 13/96 (2 years)

And from the Round 4 PDF (I think both of these pages are the same).

ROUND IV (1995/96-2000/01) EXCEPT for SA03 & SA15 4.5 Years
Interior Roads Ltd. Jun 14/96-Jun 13/01

Hope this helps!!

Dear Sir:

RE: Mound Road, Clinton

Please excuse the delay in responding to your letter regarding a portion of Mound Road.

A field inspection has been conducted in the area of greatest concern. With regard to your Items 1 through 4, we agree the existing vertical and horizontal alignment is not the best. Given the rugged terrain of the valley and the historical location of this road, there is very little potential for improving the alignment.

Depending on other priorities, we hope to conduct a more detailed survey of the section of road to determine what improvement, if any, could be made to the grade, width and horizontal alignment. We point out that at present we do not have right-of-way beyond the maintained width of the road. Also to be given due consideration are existing gas, hydro and telephone utilities on this section of road.

Comments to your Items 5, 6 & 7 would be that this road receives the appropriate priority after the main highway and school bus routes have been attended to. To suggest that this route be designated a bus route merely to attain a higher level of service causes us to wonder what the exact intent is. Given the small number of students on this road and the proximity to Clinton, would a bus route designation be warranted?

Mr. Bill Telford,
District Manager
Department of Highways
Ministry of Transportation & Highways
100 Mile House, B.C.

Dear Mr. Telford,

Re: Mound Road, Clinton

The Board of School Trustees has been asked by a number of parents who live on Mound Road to consider putting a school bus into this area. Of major concern to the Board, is the state of the roadway down the side of the valley to Mound Ranch:

1. The width of the roadway
2. The grade of the roadway
3. The number of tight corners
4. Lack of pull-outs for passing
5. Inadequate drainage during rain and spring breakup
6. Infrequent sanding and plowing during winter
7. Regular grading and maintenance during the rest of the year.

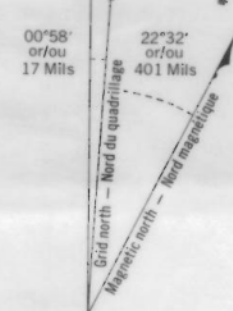

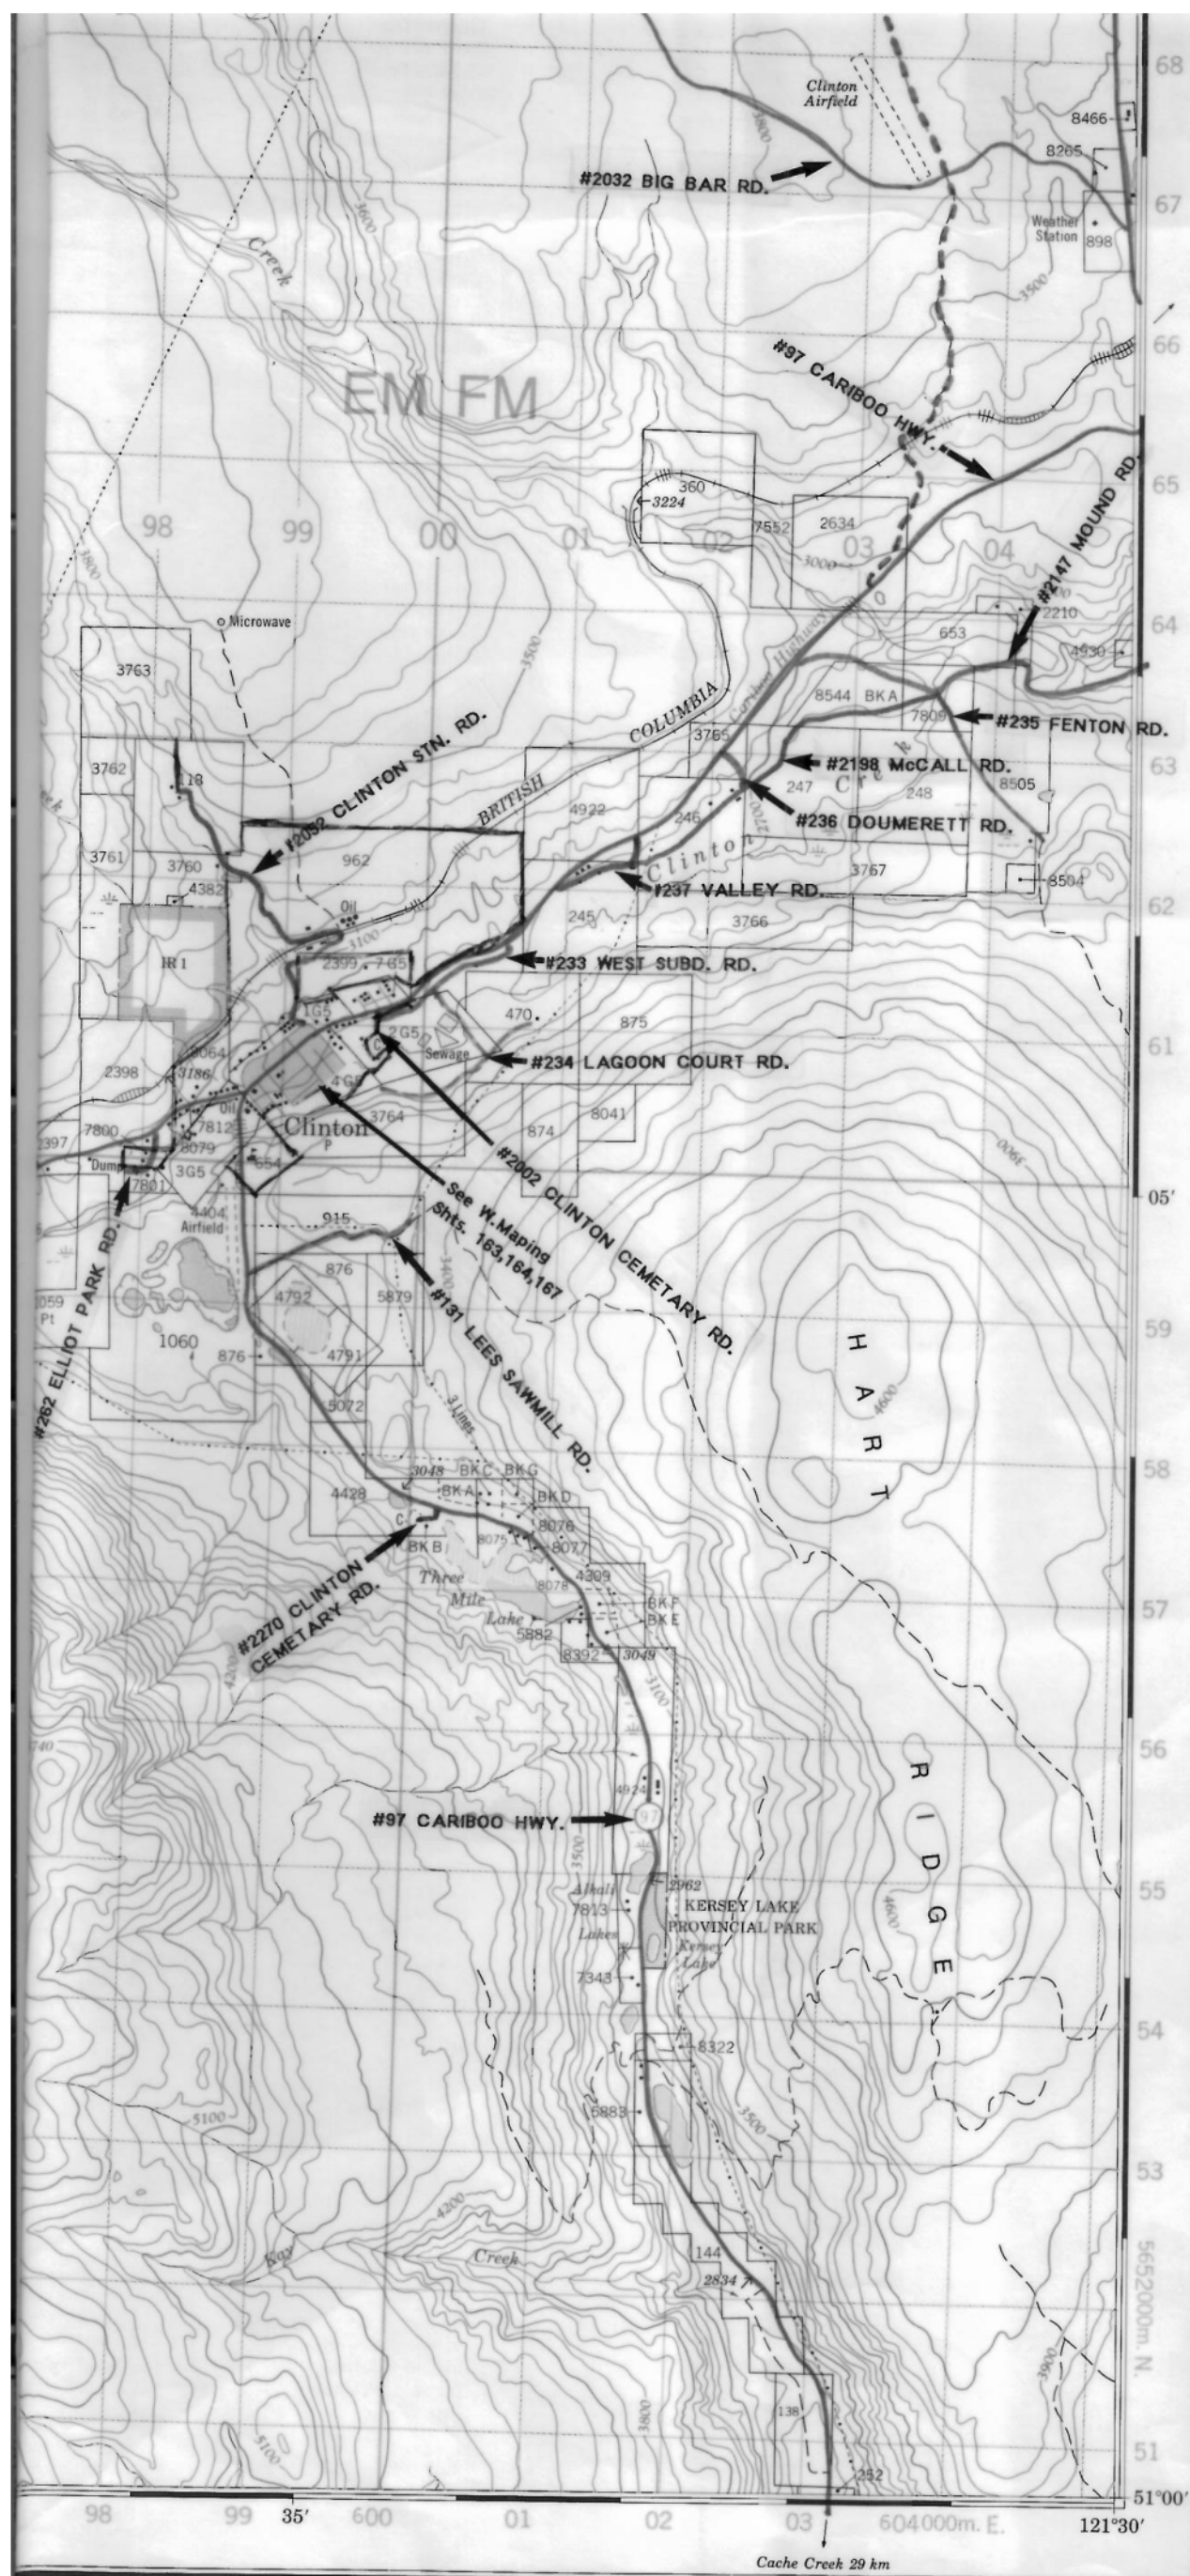

The parents requesting this bus service feel that your Department will pay more attention to this road if it is designated a school bus route. The Board would appreciate your advice as to which of the above areas would be attended to by your Department if and when this road became part of a school bus route on a regular basis.

Thank you for your assistance.

Yours truly,
