Subject: FW: follow up on traffic light from UHill elementary discussion

Hi Melissa,
MLA Eby's office has reached out with a request from a group of his constituents (PAC Group) re installation of a traffic light at UBC on University Blvd. (red dot on the attached map).
There is an elementary school on campus and due to the recent development at the University in Block F (Lelam) there will be more traffic in this area. The PAC Group is requesting this for safety reasons.
Does this road fall under us? Or should this go to the UBC Planning Group?
Thanks
Lynne

Subject: RE: North Shore News interview on portable digital messaging signs

Here you go Bowinn – hope this helps.

1. Now that the contract has been awarded, can you please confirm the length of the pilot, the locations, and screen sizes?

- The pilot will run for 6 months. If all parties agree the pilot will be extended for an additional 6 months.
- See attached map for locations. 15 of 16 locations have been confirmed, the NB 15th Street location in West Vancouver has received some opposition from the community and the MoTI & DWV are working to find an alternate location.
- There will be two different PDMS used:
 - MoTI roads: Large Highway Signs -75" x 141"
 - Muni roads: Mid Muni Signs – 60" x 84"

2. What is the lag time for new information to be pushed to the screens expected to be, and what is the flow of information to the screens? I.e. Who sends the messages and how do they know what's happening?

- The MoTI Regional Transportation Management Centre (RTMC) will be responsible for updating the PDMS. The PDMS will serve as an extension to DriveBC. The information will be updated instantaneously.
- RTMC staff will monitor the area via cameras and dialogue with the Maintenance Contractor and update as road conditions change.

Here is a bit more detail on the PDMS:

Highway:

The PDMS will be a 75" x 141" plug-and-play message board that has a full matrix display panel with up to 3 lines of 8 characters (18" in character height) per line and a trailer with a battery

Municipal:

The PDMS will be a 60" x 84" plug-and-play message board that has a display panel with up to 3 lines of 12 characters (12" in character height) per line and a trailer with a battery.

Regards,
Lynne

Lynne – I found this paragraph in the “Offence Act” – if I read it correctly – a minimum fine can be established under the Motor Vehicle Act – and a justice must not impose a fine of less than the minimum established.

So can you ask staff – how one would go about lobbying that a minimum fine for violation of section 149 of the MVA be established? Is this now back in the hands of MOTI? Thanks Nan

Subject: RE: RE: Section 149 MVA Act Stopping for School Bus

Hi Nan,
Thank you for your patience. Here are some bullet points that may assist in responding to your constituent:

RE: Section 149 of the MVA and statutory minimum fines

- Passing a school bus that has stopped to pick up or drop off children is extremely reckless and dangerous driving behaviour and the Ministry continually monitors the effectiveness of current penalties in deterring drivers from failing to stop for a school bus.
- As you know, the current unreduced ticketed amount for failure to stop for a school bus (under section 149 of the *Motor Vehicle Act*) was raised in 2016 to \$368, up from \$167. Drivers who are convicted of the offence also receive three driver penalty points, meaning they may be required to pay further financial penalties and be subject to other sanctions depending on their driving record.
- Violation ticket fine amounts, including the fine amount for the offence under section 149 of the *Motor Vehicle Act*, are established under the *Offence Act*, in the *Violation Ticket Administration and Fines Regulation* (VTAFR). The VTAFR provides for a reduced ticketed amount of \$343 for failure to stop for a school bus if paid on or before 30 days of service of the violation ticket. While the *Offence Act* provides courts with discretion to impose lesser fine amounts in certain circumstances when a ticket is disputed, the Ministry cannot comment on such cases as this level of discretion rests with the courts.

To: Pecora, Talea PSSG:EX

Subject: Section 149 MVA Act Stopping for School Bus

Hi Talea:

Our constit is still working on his project to encourage judges not to reduce the fines for not stopping for school buses.

He has asked a question regarding the "statutory minimum" that the judge cannot go below. He has heard the judge reference this statutory minimum several times in court. His question is can the statutory minimum be raised so that the fine will be more effective in reducing the number of cars that do not stop for a parked school bus.

I have found the Violation Ticket Administration Regulations at http://www.bclaws.ca/Recon/document/ID/freeside/89_97_04 that spells out the fine under section 149 of the MVA but I don't see any reference to a statutory minimum.

Can you point me in the right direction where I can find what the statutory minimum is and what would be the process to amend it. Thanks so much. Nan

Subject: Re: Messaging request

Hi Andrea,

This is an operational matter outside the Coastal Ferry Service Contract. Here are the key messages from the minister's response as well as other messaging. Let me know if you need anything more.

- I appreciate you sharing with me information about BC Ferries' planned maintenance on the Baynes Sound Connector cable ferry and the effect this will have on after-hours emergency transportation for Denman and Hornby islands.
- As BC Ferries operates independently of the provincial government, the company is in the best position to discuss its prior commitments relating to the introduction of the cable ferry service and any changes to its operations. After hours emergency services is not part of the Coastal Ferry Services Contract.
- The BC Ambulance Service coordinates emergency medical transportation in the province. I encourage you to discuss with the BC Ambulance Service your concerns regarding the availability of after-hours emergency transport when the Baynes Sound Connector is undergoing maintenance.

Subject: RE: Hwy 17A

Hi Dylan,
Sorry for the delay in responding to you on this.
Yes, these roads are on the priority route list for snow removal today.

Snow removal (plowing and salting) was completed through the storm event by our contractors on these routes. Once temperatures start to rise from the minus 8 - 9 degrees C we saw overnight, the salt and brine applications become effective and melt snow.

Subject: RE: follow up on traffic light from UHill elementary discussion

Hi Dulcy,
So sorry for the delay in responding.

This road does fall under us. Our traffic engineers have reviewed the Development Approval and have concluded that a signal does not meet warrant, however; our engineers are going to take another look at the signal warrant through the collection of traffic counts. We are also going to conduct a site visit and review operations around the area.

I will provide you with an update once staff have conducted a site visit.

Hope this helps,
Best,
Lynne

Subject: FW: follow up on traffic light from UHill elementary discussion

Dear Lynne,

I'm wondering if you could help us with an issue up at UBC. We have an elementary school up there on campus, UHill Elementary, where the students use a walking path that brings them to an intersection. Due to recent development at the University in Block F (Lelem) there will be more traffic at one of the crossings that they use. Parents are wondering what to do to try to bring a potential traffic light into the planning for this development, so that the walking path across campus still works for students. In addition to being important for the environment, there is very little parking available at UHill Elementary, and many families don't have cars available on campus, so there is a very high proportion of "active commute" families/students at this particular school.

The intersection in question is in this map attached. The email below has been forwarded with permission of constituent.

Thanks so much for your help. I'm thinking I should also try to bring to the attention of UBC Planning folks, but thought I'd try to start with you.

All the best,

Dulcy

Subject: Two Surrey Panorama Businesses - Enquiring at Jinny's MLA Office

Hi Lynne

As discussed we have two businesses that are start-ups who wish to be put in contact with the Ministry. They are:

1. Tangerine Traffic is a traffic control start up with 10 trucks looking to bid on new contracts that the Ministry might be tendering. I have attached their contact and information to this email.
2. Balbir Gurm is the consultant for a Surrey company that has LED advertising and wishes to gain permission to place these on Highways in the lower mainland. Balbir's contact details are as follows: 604 599 2267 (tel) Balbir.Gurm@kpu.ca

Thank you Lynne!

Subject: eviction and Pattullo

Hi Jen,

Here are the details. This is from a constituent of MLA Darcy. On reading it more fully I noted the constituent is not the property owner but the tenant. Still worth looking into though.

"...a constituent who has received an eviction notice. The reason cited was that the home had just been acquired by the Provincial Government and it would be demolished for the construction of the replacement Pattullo Bridge. She was wondering if the acquisition had already occurred, as she had been told that the Province would be notifying her directly, and the eviction notice has come from her landlord. She was also wondering if there was any relocation effort or compensation of tenants due to the eviction.

Subject: 282052 Cabinet Mandate, (Aviation is missing)

s.22

Good evening Honorable Minister Trevena

I was reviewing the invitation I received to the Premier and Cabinet lunch coming up for December 10th at the Hyatt regency in Vancouver.

As the participants are encouraged to sit with a cabinet minister whom they would like to discuss business with, I naturally thought of you as you have been very involved with many North Island issues.

As I reviewed your mandate letter from Premier Horgan as Minister of Transportation and Infrastructure, I was disappointed to note that there was no mention of Aviation as being a key component of your mandate.

I am either missing something, or perhaps you can enlighten me as to whether this is covered in your portfolio or perhaps another Cabinet Ministers?

I was hoping to discuss the concept of providing varying aspects of Orientation training to local Vancouver Island which of course would include First Nations candidates.

If you have any thoughts that could help I would be very grateful.

Best regards

To: Ostropolski, Melissa TRAN:EX <Melissa.Ostropolski@gov.bc.ca>

Subject: road maintenance and ploughing E Sooke Rd

Hi Melissa,

Could I get staff to provide some bullet points to assist MLA Dean's office respond to the following:

One of MLA Dean's constituents resides on the Beecher Bay First Nation. East Sooke Rd runs through the reserve to and from Metchosin and East Sooke. In an event that the Sooke Highway 14 is shut down East of Gillespie at the 17 mile pub, detouring through Beecher Bay First Nation is one of few, if not, the only option. The responsibility of snow condition maintenance of the portion of East Sooke Road in Beecher Bay seems to be a grey area. Last Friday there were half a dozen commuters who abandoned their vehicles in front of the cemetery just past Speyside Lane because the road wasn't plowed. Who has the responsibility to plow the portion of East Sooke Rd in Beecher Bay FN?

I assume it is Mainroad Contracting, but wonder if there was some issue last week because of the huge demand on clearing other roads.

Thanks,
Lynne

Subject: RE: Kootenay Lake Ferry

Hi Laurie,

Please feel free to craft your responses from the following bullet points.

- The inland ferry system is a vital part of the ministry's regional transportation network, and I appreciated the chance to review your concerns. As you likely know, in 2016, the ministry identified two practical approaches to address marine and landside challenges with the Kootenay Lake ferry service: relocate the terminal to Queens Bay, or update the existing terminal, replace the existing vessel and improve the navigational approach through the West Arm. The ministry launched an extensive public consultation and engagement process to gather input on the proposed options.
- More than 3,000 participants provided their feedback between June 15 and October 6, 2016, with 76 per cent of responses indicating they favoured retaining the terminal in Balfour. Later that year, the former minister announced the ferry terminal would not be relocated. You can review the detailed results of the public consultation, as well as the further consultations that took place in 2018, by [visiting the project website](#).
- We have posted the record of the consultations that took place in 2018, which you can review online by visiting the [Kootenay Lake Ferry Improvements Public Consultation website](#). Once complete, we will also be sharing information about our refined plans for dredging, a new replacement vessel for the MV Balfour and upgrades to both the Balfour and Kootenay Bay ferry terminals. I am confident these improvements will ensure the continued safe operation of the Kootenay Lake ferry for years to come.
- Please do not hesitate to contact Callum Campbell, Marine Manager, should you have any questions. He can be reached by telephone at 778 974-5056 or by email at Callum.J.Campbell@gov.bc.ca and would be pleased to assist you.

Let me know if there is anything else I can assist with,

Best

Lynne

Subject: 156 St and Hwy 1 exit HOV lane

Hi Melissa,

This request came in from MLA Begg's office a week ago and must have slipped through the cracks.

It is regarding the HOV designation of the 156 St exit from Hwy 1.

According to local residents there was a highway expansion some years ago, and an exit lost due to this. Now there are unnecessary back logs of traffic on the north side of the highway, 160 St exit and 152 St exit of the Highway.

Local residents are requested the possibility of removal of this HOV designation on 156 St.

Would it be possible to get information on this? Was there was initially an exit that was lost and what are the prospects for the removal of this HOV designation on the 156 St exit?

Thanks Melissa,
Lynne

To: Shah, Amna LASS:EX <Amna.Shah@leg.bc.ca>
Subject: RE: 156St & Hwy 1 exit

Hi Amna,
Sorry for the delay in getting this information to you.

- The highway expansion project is referring to the PMH1 project. The Surrey and Langley sections were completed in 2012. There were extensive consultations as part of the PMH1 project with at least 3 dedicated open houses for the interchanges in Surrey and Langley.
- Removal of the 152nd Slip lane access was included as part of the project scope of work due to concerns about speeding and "rat-running" in the Fraser Heights Community. This was a significant issue with the Fraser Heights Community Association (FHCA) and closing the slip lane was extensively consulted with the FHCA prior to actual closure.
- However, with the PMH1 project, single occupant vehicles have two ways of accessing the highway travelling WB. Car can travel straight through 156th to 104th and access the 152nd interchange to access the Port Mann Bridge or they can travel to 160th Interchange and have access to the highway (both EB and WB). Note that the 152nd Street is a half interchange (i.e. cars can only go WB but not EB on the highway).
- The PMH1 also designated 156th as HOV ramps and this was also consulted with the public extensively. This was also done with support from the City of Surrey. With 156th designated as HOV ramps, this allows a rapid bus transit to be introduced from Langley to Burnaby with predictable schedule and access for transit services. The structure at 156th was also cost-shared with City of Surrey.
- Removing the HOV designation at 156th will significantly draw more traffic than anticipated to the intersection at 156th and this will create back ups that will impact transit reliability.

Let me know if you need anything else.
Best regards,
Lynne

Subject: 156St & Hwy 1 exit

Hi Lynne,

I hope you are doing well. The Fraser Heights Community Association is appreciative of the Ministry's efforts in collaboration for the GEC Connector project. One thing that was brought up in the last meeting (although unrelated) was the HOV designation of the 156 Street exit from Highway 1. They have mentioned that due to the highway expansion some years ago, there was an exit lost to the residents of Fraser Heights and due to this, there are unnecessary back logs of traffic on the north side of the highway, 160 St exit and 152 St exit of the Highway. They have requested the possibility of removal of this HOV designation on 156 St.

I was hoping to get some information from you about whether there was initially an exit that was lost to the Fraser Heights residents and what the prospects are for the removal of this HOV designation on the 156 St exit.

I look forward to hearing from you.

Sincere Regards,

Amna Shah

Hi Lana

I am emailing today to enquirer about fuel prices on Vancouver Island

We are paying \$1.27.9 per litre at a time when oil is at its lowest price.

Toronto is paying \$1.00 per litre in comparison to Victoria while other cities are paying as low as \$.89 cents per litre

I know there are road taxes in our fuel. Having said that I would have to believe that the other cities have their road taxes also included in their fuel prices

I am unsure how the prices are set in Victoria, but do feel that some sort of price fixing must be in place as oil prices continue to plummet, yet our prices in Victoria continue to stay the same

At \$100.00 for each fuel fill x 3 fills per month I am paying up to \$75.00 per month more than the rest of Canada

When you start to fill a fleet of vehicles this makes a big difference each month. It also has a direct impact on the price Victorians pay for food, materials etc

I do not know if you are the right person to express my concern - so I thought I would start with you and maybe you can point me in the right direction

Regards

Alex

Hi Andrew,
Hope the following assists you in responding to this constituent.

Mainroad is responsible for the plowing and maintenance of East Sooke Road in Beecher Bay FN up to the Metchosin municipal boundary. If ever there is a maintenance issue that needs to be dealt with they should first try using the 24-hr hotline, these calls are tracked and followed up on.

24hr Hotline 1.877.391.7310

More information, contact information is available at the link below:

<https://mainroad.ca/our-companies/mainroad-south-island-contracting>

Alternatively, you can reach out to our local Roads Area Manager, Shawn Haley. Shawn can be reached at Shawn.Haley@gov.bc.ca

Best,
Lynne

Subject: FW: New submission from Contact Us

Hello Lynne,

Hope all is well, I'm sure with everything and the snow you are pretty busy. Great news Highway 14 west of Sooke is now open – thanks for the update. (funny timing too, as I had just opened this email to send to you).

We received the following email yesterday evening from a constituent. Do you have any information about who has the responsibility to plow the portion of East Sooke Road in the Beecher Bay First Nation (see email below) or any other information that might be helpful in responding here?

Please let me know if you have any questions and thanks for any help you may be able to provide.

Andrew

Subject

Snow removal on East Sooke Rd.

Message

Hello. I reside on Beecher Bay First Nation in your riding. I understand that East Sooke Rd is a Provincial Road. It runs through the reserve to and from Metchosin and East Sooke. In an event that the Sooke Highway 14 is shut down East of Gillespie at the 17 mile pub, detouring through Beecher Bay First Nation is one of few, if not, the only option. The responsibility of snow condition maintenance of the portion of East Sooke Road in Beecher Bay seems to be a grey area. Last Friday there were half a dozen commuters who abandoned their vehicles in front of our cemetery just past Speyside Lane because the road wasn't plowed.

Hello Lynne,

Thank you for your response. I have subsequently held discussions with some residents about the points raised by your ministry staff. They insisted that I accompany them on a ride on Highway #10 from the Scott Road intersection to the 184th intersection. Between 182nd street and 176th street the speed limit gets reduced to 60 km and then to 50 km. So they are right that the speed on this stretch of Hwy 10 varies from 80 to 50 Km/hr depending on the density. I will talk to Thomas Chunn, the district Manager for this area for further clarifications. I believe this is not the last that we have heard on this subject as the residents are pretty upset at the perceived brush off. Will keep you posted on the developments and may seek further assistance from you if the need arises. Thanks and Regards.

Hi Param,

I checked with staff at the ministry and they have received similar requests in the past on both noise and speed reduction for this section of Hwy 10.

Thomas Chunn is the District Manager for this area and would be very pleased to speak with you and constituents if necessary. He can be contacted at Phone: 604-527-2228 or email through global directory.

He also provided the following information to assist you in responding to the constituents.

Noise Wall,

At this time, there are no plans to install any additional sound walls on this section of Highway 10 through the City of Surrey. However, as the ministry continues to provide new and upgraded highway facilities, the ministry's policy is to install noise mitigation measures such as sound walls for all existing residential areas where the post construction noise levels are predicted to increase beyond a critical limit. Many of the existing sound walls were installed as part of a project and after assessments were completed in consultation with the impacted communities and local government to determine what would be the most cost-effective way in mitigating highway noise as a result of the project.

I understand your concern regarding the increased noise as a result of the growth in traffic volume on the corridor since the time you had purchased your property, however, this is deemed to be part of living along an urban corridor. But as residential and commercial development increases along the

highway, and further improvements are made to the corridor in the future, the ministry can revisit the noise assessments to see if they need to be updated.

Traffic Speeds,

I appreciate your continued observations regarding the traffic circulation at the above noted location, public safety is always our top priority when setting speed limits, and we regularly carry out engineering and traffic studies to ensure existing speed zones are working well. The speed limits in this section of highway is posted to reflect the maximum speed that is considered to be safe and reasonable for drivers using the roadway under favourable conditions and we have no plans to reduce the speed limit. The use of a consistent speed zone through an area ensures the smooth flow of traffic; reducing the speed limit for a short section of highway can actually have a negative impact and increase the number of rear end accidents at an intersection

Please let me know if I can assist in any other way. I am happy to talk more about this.

Best regards,

Lynne

Subject: Traffic Calming on the #10 Hwy section/corridor between 120 Street and King George Hwy

Hello Lynne,

In reference to our discussion, as requested, these are four screen shots of the intersection and the section of # 10 Hwy which the local residents of Surrey Panorama have an issue with. Over 110 residents living adjacent to the #10 HWY near the 120th Street intersection have signed a petition seeking help with the Traffic Calming issue. Today, two more households requested noise barriers to be erected to address the issue of noise pollution. It seems they are the only two houses without sound barriers as all rest have them near the 132 Street and #10 Hwy intersection. The speed limit varies between 70 Kms to 80 Kms on this stretch and they want it to be reduced to 60 KMs as there has been significant densification and development in the last 5 years.

I would appreciate your assistance in determining whose jurisdiction this matter falls under and in resolving it. Thanks, Param

Subject: Port McNeil to Port Hardy

To whom it may concern,

Let me start out by saying that I was impressed with your level of service over the late fall and early winter on the North Island. Our employees and our freight trucks are commuting great miles over these roads. I myself drive from CR to Port Hardy and back weekly. The last week has been a real let down. Roads coming up on Tuesday were horrific from Sayward to the Zeballos turn-off but I figured it was a "one-off" and let it be. This morning I had numerous people complain to me how bad the roads were and some were quite late in waiting for the roads to thaw or get salted. Worst of all, one of our employees hit black ice, slid off the road and rolled

over his small truck. Thankfully he is unharmed. I realize that conditions change quickly on the North Island but please take this as a gentle suggestion that Mainroad look at their levels of service. I understand that you are now based out of Port McNeil and not Port Hardy, not sure if this has helped or hindered. Thanks in advance for any improvements you can make, I understand it is not easy. As our representative I would like to tell you how poorly our new road maintenance contractor is doing. People are sliding off our roads up here due mostly to lack of brine or sand. Sand has yet to be seen on our roads. ICBC will rate the Northern end of the island as a high accident area due in part by this lack of maintenance. Which will drive my rates up again.

I was under the impression that once EMCON was gone we would have better roads. This is not the case. People are going die up here because of incompetence.

Something I wanted to say.

Thank You

Meeting with Claire in Gold River – this is not 100% confirmed yet, but we are looking at Claire coming to Gold River on Thursday, March 14th. Just checking if that day works for her – does it also work for a meeting with Mayor and Council?
Also on the webcams. We have received a couple of emails and staff has been responding. I have copied below part of the response – for your interest and information.
Best regards,
Lynne

“...Thank you for your email regarding the BC Highway Cameras on Highway 28 (Gold River Highway). Outages with these cameras are of concern to us as we know how much residents and other highway users rely on seeing weather and road conditions in advance of driving. We do have challenges with two camera locations on Highway 28 and are continuing to work on a solution to these issues. Due of the lack of local available power sources, cell networks, or telephone wire line to deliver images to the Ministry servers, out of necessity we rely on solar power and satellite communications at these locations. Unfortunately during the winter months the sun is lower on the horizon and is unable to consistently recharge the current systems over extended periods of time. We are looking into a new and more efficient battery and solar technologies that will hopefully carry the camera system through extended low solar power days. Additionally, satellite communications are often affected by heavy precipitation and cloud cover--this can result in intermittent “Transmission Delayed” notifications as you see for the Gold River Highway camera. In general these intermittent communications outages don't last long –it's usually a brief time before the connection is re-established and we start to see updated images.

The Crest Lake camera in particular has had more than its fair share of troubles over the last couple of years; the most frustrating have had to do with vandalism and theft of the solar charging components. After some upgrades we are confident now that we've installed extra security and hardened the cabinets, they are a sufficient deterrent to that type of activity. In terms of maintenance, our electrical folks have visited the camera location several times this year, once to swap out batteries and other times to recharge the existing batteries. Unfortunately the batteries get drained within a week or two and the charging system can't get enough solar energy to recharge on its own. We continue to seek a viable option to power the camera so we can reliably delivering images through all the seasons and types of weather. I do appreciate your concerns but I would like to assure you that we have, and will continue to work to improve our camera network and its reliability...."

Subject: RE: Port McNeil to Port Hardy

Hi Alycia,
I met with Fred last week along with Allison and Heather at the District of Port Hardy office. We went over concerns from the public and the DoPH. One concern that was made clear is Mainroad choosing to move the maintenance yard to Port McNeill (and MoTI accepting that proposal). And generally, public patience in waiting for Mainroad to get fully up and running is starting to wear thin. I let them know that Mainroad is continuing with getting all their equipment and technology (i.e. AVI) in place and that we MoTI is working with the contractor to ensure that happens.

Subject: chain up areas

Hi Melissa,

The Premier's constituency office has requested some messaging/bullets on potential chain up area.

This is in particular to the Malahat and big rigs and vehicles that are floundering on the hills.

I understand from the minister that CVSE were out doing a stellar job in that last snowfall on the Malahat, but maybe the Premier's constituency office is hearing differently.

Hope this makes sense, let me know if not.

Thanks

Lynne

Subject: salt on roads and enviro safety

Hi Melissa,
Here is another one – from MLA Leonard's office:

Do we have any information regarding the environmental impact of road over salting. Is there are any ministry guidelines regarding how much salt can be put on the road, or other ways they might be mitigating environmental impact.

Thanks
Lynne

Subject: Denman Hornby routes

Hi Kirk,
MLA Fraser's office is requesting bullet point to assist them in responding to constituent questions re the Hornby and Denman routes:

Is it possible to get some additional bullet points regarding Route 21 (Buckley Bay to Denman) and 22 (Denman to Hornby)?

I note in the Q&A it states "BC Ferries previously restored service to levels on these routes recommended by the FACs."

But I am just looking for some additional information in order to respond to constituents.

With thanks,
Lynne

Subject: RE: Q+As: Ferry announcement

Does this help. I think it answers your initial question:

- Since the cuts occurred in 2014, Ferry Advisory Committee Chairs have been requesting that some of the services be reinstated.
- In response to the request from the FAC Chairs, BC Ferries has already added back the mid-day sailings during the off-peak period.
- This has added over 290 round-trips per year on each of these two routes.
- There are no additional round-trips being added to these routes as a result of the announcement on Friday February 22, 2019.
- BC Ferries continues to monitor sailing waits and will consider additional sailings when it makes sense to do so.

Subject: RE: Correspondence Re: Environmental impact of road salt

Hi Matt,
Hope this helps:

- In our highway maintenance contracts we do not specify how much salt can be used on the highway.
- However, our Maintenance Contractors are required to develop a Quality Management System (QMS) based on the principles of ISO 9000 including an environmental management plan that follows the Provinces "Environmental Best Practices for Highway Maintenance Activities. https://www2.gov.bc.ca/assets/gov/driving-and-transportation/transportation-infrastructure/engineering-standards-and-guidelines/environment/references/envir_best_practices_manual_complete.pdf
- In addition, contractors are required to develop and follow a salt management plan based on the best practices described in the Transportation Association of Canada's (TAC) "Salt Management Guide" as required by Environment Canada under the Code of Practice: road salts environmental management.
- The Transportation Association of Canada's (TAC) "Salt Management Guide" provides a comprehensive description of the environmental impact of road salt including its impact on surface water, soils, groundwater, vegetation, wildlife, human health, vehicles, and infrastructure. <https://www.tac-atc.ca/en/publications/ptm-saltmgmt-e>. One of the guide's guiding principles is to optimize winter road maintenance practices so as not to jeopardize road safety, while minimizing the potential for harm to the environment.
- As part of the Code of Practice, our maintenance contractors are required to annually report to Environment Canada the amount of salt and other de-icers used each season.
- Contractors are required to calibrate their equipment to ensure that the correct amount of salt is applied to the road and to ensure that salt stays on the road.
- Alternate de-icers are increasingly being used by our contractors where & when appropriate such as calcium chloride.
- Our contractors are also using more liquid de-icers and anti-icing liquids which require approximately ¼ of the amount of salt chemicals to achieve the same result.
- Some contractors such as VSA on the Coquihalla are using beet juice to dilute the de-icers without reducing the effectiveness of the anti-icing properties.

Let me know if you need anything else,
Best
Lynne

Lynne

Is there an update for this?

Thanks
Paul

Lynne

I was hoping we could work on an update for the request to meet with the Minister, to pass along to Ken McCormack.

As you probably know, we are in Victoria on March 26 for the regular ARA NDP caucus lunch.

Perhaps we could arrange to see the Minister beforehand?

Thank you for your help.

Paul

P.S. The later afternoon on the 25th could be workable as well.

Subject: RE: SOOKE CONSTIT -- Malahat Chainup areas

Hope this helps Bruce and Hans,

There are no official pullout locations for chain-up of commercial vehicle on either side of the Malahat. An overhead sign near Colwood advises of chain-up requirements, supported with a DMS sign near Westshore Parkway (N/B). Southbound the overhead Highway signs near Mill Bay and Bamberton are used to indicate chain-up in effect. In both locations CVSE staff work with flagging crews directly on the highway occupying the slow lane and shoulder to allow for safe chain-up activities or provide assistance in turning the commercial vehicles around.

Two locations have been identified as possible sites for chain up areas (and are already used informally when required during weather events).

1. At Leigh road interchange for NB traffic
2. At Bamberton interchange
