Highway Classification

Class	Definition
A	high volume traffic (over 5,000 winter average daily traffic count) or commuter routes and certain expressways and freeways through mountain passes. For the purposes of Classification, a freeway is a multi-lane highway with fully controlled access. Class A are heavy commuter traffic routes extended to include the bulk of vehicles commuting daily to a center and cut-off where traffic drops below a 2,500 winter average daily traffic count. These include, but are not limited to, high volume ski hill and commuter routes;
B	trunk and main routes (or portion thereof as designated by the Province) not included in Class A, with a cut-off traffic volume of 1,000 winter average daily traffic count. These include but are not limited to lower volume ski hill and commuter routes;
C	school bus routes and industrial (truck) traffic routes (more than 25% trucks) not included in Class A and B;
D	other regularly maintained winter routes;
E	other irregularly maintained winter routes; and
F	roads not maintained or not open in the winter, or not maintained by the Contractor.
