Hi Everest,

When searching tracking number 100396950 it shows the status as New, this means the application was never submitted through the system. You may still have access to the information when logging in to you BCeID and you can submit the application and make payment accordingly. This application was not part of the list of submissions prior to January 2023.

Yes, we are ready to make payment. I noticed you did not include application 10039650 in the list, does that one require payment to move forward or what do you need from us?

Please note that the applications were submitted through the Ximen BCeID but the water license/land owner is not Ximen.

Thanks,  
Everest

Hello Everest,

Ximen Mining Corp had five applications with outstanding application fees that were started in 2022. As per the email sent on July 31, 2023, action was required by August 18, 2023 to move the applications forward in the process. In addition to the July 31<sup>st</sup> email, six emails were previously sent for each application as a reminder of payment due.

Outstanding Application Fees:

100384560 - \$1000.00

100384440 - \$1000.00

100384511 - \$1,500.00

100384314 - \$2,000.00

100383588 - \$2,000.00

If Ximen Mining Corp is ready to make payment on the outstanding application fees, please let us know and the applications can move forward once payment is received. If Ximen Mining Corp is not able to proceed, a new application can be submitted when ready, a copy of each application has been attached for your convenience.

## ELIGIBILITY

Please answer the following questions related to your Water Licence Application.

Question	Answer	Warning
- Are you the owner of land or a mine in British Columbia where the water will be used?	Yes	
- Are you entitled to possession of land or a mine in British Columbia where the water will be used?		
- Do you have a substantial interest in the land, mine, or an		

undertaking in British Columbia where the water will be used?

- Are you a holder of a certificate of public convenience and necessity issued under the Public Utilities Act, the Utilities Commission Act or the Water Utility Act?
- Are you a municipality, regional district, improvement district, development district or water users' community?
- Are you representing the government of British Columbia or Canada?
- Are you representing a commission, board or person having charge of the administration of Crown land or a mine or an undertaking on Crown land, administered by British Columbia or Canada or controlled by a ministry, department, branch or other subdivision of the government of British Columbia or Canada?
- Are you representing the Greater Vancouver Water District or any other water district incorporated by an Act?
- Are you representing the British Columbia Hydro and Power Authority?
- Are you applying as an agent on behalf of an eligible applicant as described above?

#### TECHNICAL INFORMATION

#### GOVERNMENT AND FIRST NATION FEE EXEMPTION REQUEST

Do you belong to, are you applying on behalf of, or are you:

- A provincial government ministry
- The Government of Canada
- A First Nation for water use on reserve land
- A person applying to use water on Treaty Lands
- A Nisga'a citizen
- An entity applying to use water from the Nisga'a Water Reservation?

No

#### WATER DIVERSION

Do you currently hold a valid Water Licence? No

Select the source of the new water diversion being applied for: Surface water

#### PURPOSES OF WATER USE

Please select the purpose for which the diverted water will be used. Please note that the purpose you indicate may be changed during the application review process to better reflect the use of the water, in which case you will be notified of the change. For definitions of Water Use Purpose, click [here](#).

NOTE: A water licence is not required for groundwater that is used for a domestic purpose. Domestic groundwater users have deemed rights for domestic use of up to 2 m3/day (2000 litres per day) under the Water Sustainability Act and it is therefore not possible to submit an application for a licence.

Purpose	Quantity	Use of Water	Comments	Fee
Fresh Water Bottling	88,888 m3/year	Year Round	Water has been used historically for drinking, bottling and homesteading.	\$1,000.00
Irrigation	888,888 m3/year - Area: 65.1 ha	Year Round	Irrigation used for growing crops, and for livestock historically and will continue.	\$500.00

Total: \$1,500.00

## WORKS

Works are the physical equipment used to move the water from its source to where it will be used. For example, works can include a screened intake, pump, pipeline, irrigation system, dugout, storage structure etc. Scroll down the list provided to see all the options available for selection. For a formal definition of “works”, refer to Section 1(1) of the Water Sustainability Act.

NOTE: For works not on the list, please describe them in the box below. Hover over the works list to see a quick definition of the work.

Works	Status
Pipe	Fully Constructed

Please provide details about the works selected above, and your water system:

There are 3 wells and an outdoor tap. Well 1 and two are connected to each other, the tap and the house. The shop is separate.

## SOURCE OF WATER FOR APPLICATION

### SURFACE WATER SOURCES

Source	Flows into	Width	Depth
Jolly Jack Creek	Boundary creek and kettle river	3.00000	1.00000
Describe the location of the proposed point of diversion or storage on stream: Landmark references:			

### JOINT WORKS

Are your works connected to the works of another person or group of persons?

If you share or are connected to another person's works, it is recommended that a Joint Works Agreement-outlining each party's role and responsibilities-be completed and uploaded

Do you share or are you connected to another person's works? No

## PERMIT OVER CROWN LAND

For any works that cross or otherwise affect (e.g. flood) Crown land, you will require permission. A Permit Over Crown Land (PCL) means an authority issued under the Water Sustainability Act which allows you to construct, maintain, or operate works on Crown land or to flood Crown land.

Please answer the following questions to determine whether an authorization to occupy Crown Land will be required with your Water application. If a Permit Over Crown land is required, the applicable fee, if any, will be automatically calculated and added to your application.

You should indicate 'Yes' to the following question if any of the following circumstances apply to your application:

- any of your works will be located on or crossing Crown land
- your well is or will be located on Crown Land
- you are proposing to flood Crown Land

Do any of the above apply to your application? No

Based on your answer you do not appear to be affecting or flooding Crown land and neither a Permit over Crown land nor a Crown land tenure appears to be required.

## ADDITIONAL QUESTIONS

In many cases you might require other authorizations or permits in order to complete your project. In order to make that determination and point you in the right direction, please answer the questions below. More information can also be found on the Government Water website. In addition, your application may be referred to other agencies for comments.

Are you planning to cut timber on Crown Land? Unknown

Are you planning to use an open fire to burn timber or other materials? No

Are you supplying potable water to consumers? Unknown

Will fish or wildlife habitat be affected? No

Are you planning to undertake mineral exploration? Unknown

Do you need to construct a road to the dam (if there are no existing roads)? No

Do you want to construct works within an existing forest road right-of-way on Crown land? No

Do you want to transport heavy equipment or materials on an Unknown

existing forest road?

Do you want to use the water for livestock watering on Crown land? No

Does any work occur within the public road allowance or has to cross a public road? No

## LOCATION INFORMATION

### LAND DETAILS

List all parcels of land where the water will be used. Click "Add Land Information" button to add each parcel of land.

#### Description

Private Land  
Parcel ID: 014-842-181  
Legal Description: DL 738S Similkameen Division Yale District

### DRAWINGS

A Drawing to Scale is required that meets the Application Drawing Standards. Choose one of the options below to submit the required map/drawing.

Additionally, it is recommended that you provide a topographical map showing the general location of the property where the water is proposed to be used and the works constructed in relation to nearby communities, highways, railways and other water sources.

(this additional map will not be necessary if your Drawing to Scale is provided using the Geomark Service or a spatial file such as .KML or .KMZ)

☒ I have map(s) saved to my computer and wish to provide these with my application

### MAP FILES

Do you have a PDF or image file of a drawn map? You can upload it here.

#### Description

Property map and boundaries.

## PRIVACY DECLARATION

### PRIVACY NOTE FOR THE COLLECTION, USE AND DISCLOSURE OF PERSONAL INFORMATION

Personal information is collected by FrontCounter BC under the legal authority of section 26 (c) and 27 (1)(a)(i) of the Freedom of Information and Protection of Privacy Act (the Act).

The collection, use, and disclosure of personal information is subject to the provisions of the Act. The personal information collected by FrontCounter BC will be used to process your inquiry or application(s). It may also be shared when strictly necessary with partner agencies that are also subject to the provisions of the Act. The personal information supplied in the application package may be used for referrals or notifications as required. Personal information may be used by FrontCounter BC for survey purposes.

For more information regarding the collection, use, and/or disclosure of your personal information by FrontCounter BC, please contact FrontCounter BC at 1-877-855-3222 or at:

FrontCounter BC Program Director  
FrontCounter BC, Provincial Operations  
441 Columbia Street  
Kamloops, BC V2C 2T3

☒ Check here to indicate that you have read and agree to the privacy declaration stated above.

## REFERRAL INFORMATION

Some applications may also be passed on to other agencies, ministries or other affected parties for referral or consultation purposes. A referral or notification is necessary when the approval of your application might affect someone else's rights or resources or those of the citizens of BC. An example of someone who could receive your application for referral purposes is a habitat officer who looks after the fish and wildlife in the area of your application. This does not apply to all applications and is done only when required.

Please enter contact information below for the person who would best answer questions about your application that may arise from anyone who received a referral or notification.

☒ I hereby consent to the disclosure of the information contained in this application to other agencies, government ministries or other affected parties for referral or First Nation consultation purposes.

## IMPORTANT NOTICES

Please review the "Important Notices" below and then check the declaration at the bottom confirming that everything in this application is complete and accurate.

- I understand that the submission of this water licence application does not provide authority under the Water Sustainability Act to divert, use or store water other than to test the quality or quantity of water or to conduct a flow test in accordance with Section 6(2)(b) of the Water Sustainability Act. I understand that the submission of this water licence does not provide authority under the Water Sustainability Act to divert, use or store water from a well or other ground water sources to construct works. I also understand that my application must first be investigated and a decision made on the application as to whether a water licence may be granted and, as part of that review, additional information may be requested of me.
- The application may be subject to further requirements under the federal Fisheries Act. Please refer to Fisheries and Oceans Canada's "Projects Near Water" webpage (<http://www.dfo-mpo.gc.ca/pnw-ppe/index-eng.html>) for information on how to ensure your project complies with the Fisheries Act.
- Once you click 'Next' the application will be locked down and you will NOT be able to edit it any more.

## DECLARATION

☒ I declare that the information contained on this form is complete and accurate.

## OTHER INFORMATION

Is there any other information you would like us to know?

I am intending this application be for an existing use water license. Please see the file, "Late Submission Reason and Evidence" for more details. Please contact Everest at 604-488-3900 with any questions.

## ELIGIBILITY

Please answer the following questions related to your Water Licence Application.

Question	Answer	Warning
- Are you the owner of land or a mine in British Columbia where the water will be used?	Yes	
- Are you entitled to possession of land or a mine in British Columbia where the water will be used?		
- Do you have a substantial interest in the land, mine, or an		

undertaking in British Columbia where the water will be used?

- Are you a holder of a certificate of public convenience and necessity issued under the Public Utilities Act, the Utilities Commission Act or the Water Utility Act?
- Are you a municipality, regional district, improvement district, development district or water users' community?
- Are you representing the government of British Columbia or Canada?
- Are you representing a commission, board or person having charge of the administration of Crown land or a mine or an undertaking on Crown land, administered by British Columbia or Canada or controlled by a ministry, department, branch or other subdivision of the government of British Columbia or Canada?
- Are you representing the Greater Vancouver Water District or any other water district incorporated by an Act?
- Are you representing the British Columbia Hydro and Power Authority?
- Are you applying as an agent on behalf of an eligible applicant as described above?

#### TECHNICAL INFORMATION

#### GOVERNMENT AND FIRST NATION FEE EXEMPTION REQUEST

Do you belong to, are you applying on behalf of, or are you:

- A provincial government ministry
- The Government of Canada
- A First Nation for water use on reserve land
- A person applying to use water on Treaty Lands
- A Nisga'a citizen
- An entity applying to use water from the Nisga'a Water Reservation?

No

#### WATER DIVERSION

Do you currently hold a valid Water Licence? No

Select the source of the new water diversion being applied for: Groundwater

#### PURPOSES OF WATER USE

Please select the purpose for which the diverted water will be used. Please note that the purpose you indicate may be changed during the application review process to better reflect the use of the water, in which case you will be notified of the change. For definitions of Water Use Purpose, click here.

NOTE: A water licence is not required for groundwater that is used for a domestic purpose. Domestic groundwater users have deemed rights for domestic use of up to 2 m3/day (2000 litres per day) under the Water Sustainability Act and it is therefore not possible to submit an application for a licence.

Purpose	Quantity	Use of Water	Comments	Fee
Fresh Water Bottling	88,888 m3/year	Year Round	Water has historic usage for bottling and drinking water for mining activities, homesteading and irrigation.	\$1,000.00
Irrigation	888,888 m3/year - Area: 9.8 ha	Year Round		\$500.00
				Total: \$1,500.00

WORKS

Works are the physical equipment used to move the water from its source to where it will be used. For example, works can include a screened intake, pump, pipeline, irrigation system, dugout, storage structure etc. Scroll down the list provided to see all the options available for selection. For a formal definition of “works”, refer to Section 1(1) of the Water Sustainability Act.

NOTE: For works not on the list, please describe them in the box below. Hover over the works list to see a quick definition of the work.

SOURCE OF WATER FOR APPLICATION

WELL WORKS

Is the water you are applying for coming from a well? Yes

If your works are not fully constructed, (e.g. under repair), please provide details in the "Comments" field below.

Works	Common Well Name	Status	Comments
Well	690 Lind Well	Fully Constructed	Well is not registered.
Well Tag Number:	Well ID Plate Number:		
Depth of Well:	20 metres		
Location of well:	Latitude: 49.083034 Longitude: -118.675813 Decimal Degrees		
Method of location measurement:	Google Earth		
Is the well a flowing artesian well at any time of the year?	Unknown		
Is the well head in a pit or a sump?	Unknown		
Are there other wells on the property that are not in use?	Unknown		

PROXIMITY TO SURFACE WATER

In order to consider all relevant factors concerning your licence application, it is necessary to understand any potential connections between the aquifer from which you propose to withdraw water and connected surface water.

Does any documentation, such as a well construction report, indicate that there is a hydraulic connection between the well and a surface water source? No

### JOINT WORKS

Are your works connected to the works of another person or group of persons?

If you share or are connected to another person's works, it is recommended that a Joint Works Agreement-outlining each party's role and responsibilities-be completed and uploaded

Do you share or are you connected to another person's works? No

### PERMIT OVER CROWN LAND

For any works that cross or otherwise affect (e.g. flood) Crown land, you will require permission. A Permit Over Crown Land (PCL) means an authority issued under the Water Sustainability Act which allows you to construct, maintain, or operate works on Crown land or to flood Crown land.

Please answer the following questions to determine whether an authorization to occupy Crown Land will be required with your Water application. If a Permit Over Crown land is required, the applicable fee, if any, will be automatically calculated and added to your application.

You should indicate 'Yes' to the following question if any of the following circumstances apply to your application:

- any of your works will be located on or crossing Crown land
- your well is or will be located on Crown Land
- you are proposing to flood Crown Land

Do any of the above apply to your application? No

Based on your answer you do not appear to be affecting or flooding Crown land and neither a Permit over Crown land nor a Crown land tenure appears to be required.

### ADDITIONAL QUESTIONS

In many cases you might require other authorizations or permits in order to complete your project. In order to make that determination and point you in the right direction, please answer the questions below. More information can also be found on the Government Water website. In addition, your application may be referred to other agencies for comments.

Are you planning to cut timber on Crown Land? Unknown

Are you planning to use an open fire to burn timber or other materials? No

Are you supplying potable water to consumers? Unknown

Will fish or wildlife habitat be affected? No

Are you planning to undertake mineral exploration? Unknown

Do you need to construct a road to the dam (if there are no existing roads)? No

Do you want to construct works within an existing forest road right-of-way on Crown land? No

Do you want to transport heavy equipment or materials on an existing forest road? Unknown

Do you want to use the water for livestock watering on Crown land? Unknown

Does any work occur within the public road allowance or has to cross a public road? Unknown

## LOCATION INFORMATION

### LAND DETAILS

List all parcels of land where the water will be used. Click "Add Land Information" button to add each parcel of land.

#### Description

Private Land

Parcel ID: 012777161

Legal Description: Block R, Plan KAP46, District Lot 879, Similkameen Div of Yale Land District, UNDIVIDED MAMONT M C, Manufactured Home Reg.# 20511

### DRAWINGS

A Drawing to Scale is required that meets the Application Drawing Standards. Choose one of the options below to submit the required map/drawing.

Additionally, it is recommended that you provide a topographical map showing the general location of the property where the water is proposed to be used and the works constructed in relation to nearby communities, highways, railways and other water sources.

(this additional map will not be necessary if your Drawing to Scale is provided using the Geomark Service or a spatial file such as .KML or .KMZ)

☒ I have map(s) saved to my computer and wish to provide these with my application

## PRIVACY DECLARATION

### PRIVACY NOTE FOR THE COLLECTION, USE AND DISCLOSURE OF PERSONAL INFORMATION

Personal information is collected by FrontCounter BC under the legal authority of section 26 (c) and 27 (1)(a)(i) of the Freedom of Information and Protection of Privacy Act (the Act).

The collection, use, and disclosure of personal information is subject to the provisions of the Act. The personal information collected by FrontCounter BC will be used to process your inquiry or application(s). It may also be shared when strictly necessary with partner agencies that are also subject to the provisions of the Act. The personal information supplied in the application package may be used for referrals or notifications as required. Personal information may be used by FrontCounter BC for survey purposes.

For more information regarding the collection, use, and/or disclosure of your personal information by FrontCounter BC, please contact FrontCounter BC at 1-877-855-3222 or at:

FrontCounter BC Program Director  
FrontCounter BC, Provincial Operation  
441 Columbia Street  
Kamloops, BC V2C 2T3

☒ Check here to indicate that you have read and agree to the privacy declaration stated above.

## REFERRAL INFORMATION

Some applications may also be passed on to other agencies, ministries or other affected parties for referral or consultation purposes. A referral or notification is necessary when the approval of your application might affect someone else's rights or resources or those of the citizens of BC. An example of someone who could receive your application for referral purposes is a habitat officer who looks after the fish and wildlife in the area of your application. This does not apply to all applications and is done only when required.

Please enter contact information below for the person who would best answer questions about your application that may arise from anyone who received a referral or notification.

## ELIGIBILITY

Please answer the following questions related to your Water Licence Application.

Question	Answer	Warning
- Are you the owner of land or a mine in British Columbia where the water will be used?	Yes	
- Are you entitled to possession of land or a mine in British Columbia where the water will be used?		
- Do you have a substantial interest in the land, mine, or an		

undertaking in British Columbia where the water will be used?

- Are you a holder of a certificate of public convenience and necessity issued under the Public Utilities Act, the Utilities Commission Act or the Water Utility Act?
- Are you a municipality, regional district, improvement district, development district or water users' community?
- Are you representing the government of British Columbia or Canada?
- Are you representing a commission, board or person having charge of the administration of Crown land or a mine or an undertaking on Crown land, administered by British Columbia or Canada or controlled by a ministry, department, branch or other subdivision of the government of British Columbia or Canada?
- Are you representing the Greater Vancouver Water District or any other water district incorporated by an Act?
- Are you representing the British Columbia Hydro and Power Authority?
- Are you applying as an agent on behalf of an eligible applicant as described above?

#### TECHNICAL INFORMATION

#### GOVERNMENT AND FIRST NATION FEE EXEMPTION REQUEST

Do you belong to, are you applying on behalf of, or are you:

- A provincial government ministry
- The Government of Canada
- A First Nation for water use on reserve land
- A person applying to use water on Treaty Lands
- A Nisga'a citizen
- An entity applying to use water from the Nisga'a Water Reservation?

No

#### WATER DIVERSION

Do you currently hold a valid Water Licence? ☐ No  
Select the source of the new water diversion being applied for: ☐ Both

#### PURPOSES OF WATER USE

Please select the purpose for which the diverted water will be used. Please note that the purpose you indicate may be changed during the application review process to better reflect the use of the water, in which case you will be notified of the change. For definitions of Water Use Purpose, click [here](#).

NOTE: A water licence is not required for groundwater that is used for a domestic purpose. Domestic groundwater users have deemed rights for domestic use of up to 2 m<sup>3</sup>/day (2000 litres per day) under the Water Sustainability Act and it is therefore not possible to submit an application for a licence.

Purpose	Quantity	Use of Water	Comments	Fee
Cooling	79 m <sup>3</sup> /day	Year Round	The setup is described as a small pump located near the source with water being pumped in a 1-inch hose to the drill site. In this case the pit is an old mining pit entrance which is flooded with water. Typically, there are dirt roads and drill pads constructed temporarily at the drill site. These are later reclaimed after drilling is commenced. There is sometimes an access road or trail to the pump.	\$1,000.00

Total: \$1,000.00

#### WORKS

Works are the physical equipment used to move the water from its source to where it will be used. For example, works can include a screened intake, pump, pipeline, irrigation system, dugout, storage structure etc. Scroll down the list provided to see all the options available for selection. For a formal definition of “works”, refer to Section 1(1) of the Water Sustainability Act.

NOTE: For works not on the list, please describe them in the box below. Hover over the works list to see a quick definition of the work.

Works	Status
Pump	Not Constructed

Please provide details about the works selected above, and your water system: there is 2 adits which hold ground water and 1 creek.

#### SOURCE OF WATER FOR APPLICATION

#### WELL WORKS

Is the water you are applying for coming from a well? No

#### PROXIMITY TO SURFACE WATER

In order to consider all relevant factors concerning your licence application, it is necessary to understand any potential connections between the aquifer from which you propose to withdraw water and connected surface water.

Does any documentation, such as a well construction report, indicate that there is a hydraulic connection No

between the well and a surface water source?

### **SURFACE WATER SOURCES**

Source	Flows into	Width	Depth
Iron Creek	Big Sheep Creek		
Describe the location of the proposed point of diversion or storage on stream:			
Landmark references:			

### **JOINT WORKS**

Are your works connected to the works of another person or group of persons?

If you share or are connected to another person's works, it is recommended that a Joint Works Agreement-outlining each party's role and responsibilities-be completed and uploaded

Do you share or are you connected to another person's works? No

### **PERMIT OVER CROWN LAND**

For any works that cross or otherwise affect (e.g. flood) Crown land, you will require permission. A Permit Over Crown Land (PCL) means an authority issued under the Water Sustainability Act which allows you to construct, maintain, or operate works on Crown land or to flood Crown land.

Please answer the following questions to determine whether an authorization to occupy Crown Land will be required with your Water application. If a Permit Over Crown land is required, the applicable fee, if any, will be automatically calculated and added to your application.

You should indicate 'Yes' to the following question if any of the following circumstances apply to your application:

- any of your works will be located on or crossing Crown land
- your well is or will be located on Crown Land
- you are proposing to flood Crown Land

Do any of the above apply to your application? No

Based on your answer you do not appear to be affecting or flooding Crown land and neither a Permit over Crown land nor a Crown land tenure appears to be required.

### **ADDITIONAL QUESTIONS**

In many cases you might require other authorizations or permits in order to complete your project. In order to make that determination and point you in the right direction, please answer the questions below. More information can also be found on the Government Water website. In addition, your application may be referred to other agencies for comments.

Are you planning to cut timber on Crown Land? Unknown

Are you planning to use an open fire to burn timber or other No

materials?

Are you supplying potable water to consumers?

Unknown

Will fish or wildlife habitat be affected?

No

Are you planning to undertake mineral exploration?

Yes

If you are planning to undertake mineral exploration it may be necessary to submit an application for a Notice of Work.

Do you need to construct a road to the dam (if there are no existing roads)?

No

Do you want to construct works within an existing forest road right-of-way on Crown land?

No

Do you want to transport heavy equipment or materials on an existing forest road?

Unknown

Do you want to use the water for livestock watering on Crown land?

Unknown

Does any work occur within the public road allowance or has to cross a public road?

Unknown

Suite 888  
Vancouver BC V6C 3K4  
Letter(s) Attached: Yes (Letter of Agency - Ximen.pdf)

## CORRESPONDENCE E-MAIL ADDRESS

It is recommended to provide your correspondence email in this section.

Email: planning@officeservices888.com  
Contact Name: Everest Hughes

## ELIGIBILITY

Please answer the following questions related to your Water Licence Application.

Question	Answer	Warning
- Are you the owner of land or a mine in British Columbia where the water will be used?	Yes	
- Are you entitled to possession of land or a mine in British Columbia where the water will be used?		
- Do you have a substantial interest in the land, mine, or an		

undertaking in British Columbia where the water will be used?

- Are you a holder of a certificate of public convenience and necessity issued under the Public Utilities Act, the Utilities Commission Act or the Water Utility Act?
- Are you a municipality, regional district, improvement district, development district or water users' community?
- Are you representing the government of British Columbia or Canada?
- Are you representing a commission, board or person having charge of the administration of Crown land or a mine or an undertaking on Crown land, administered by British Columbia or Canada or controlled by a ministry, department, branch or other subdivision of the government of British Columbia or Canada?
- Are you representing the Greater Vancouver Water District or any other water district incorporated by an Act?
- Are you representing the British Columbia Hydro and Power Authority?
- Are you applying as an agent on behalf of an eligible applicant as described above?

#### TECHNICAL INFORMATION

#### GOVERNMENT AND FIRST NATION FEE EXEMPTION REQUEST

Do you belong to, are you applying on behalf of, or are you:

- A provincial government ministry
- The Government of Canada
- A First Nation for water use on reserve land
- A person applying to use water on Treaty Lands
- A Nisga'a citizen
- An entity applying to use water from the Nisga'a Water Reservation?

No

#### WATER DIVERSION

Do you currently hold a valid Water Licence? Yes

Client Number:

Select the source of the new water diversion being applied for: Groundwater

#### PURPOSES OF WATER USE

Please select the purpose for which the diverted water will be used. Please note that the purpose you indicate may be changed during the application review process to better reflect the use of the water, in which case you will be notified of the change. For definitions of Water Use Purpose, click here.

NOTE: A water licence is not required for groundwater that is used for a domestic purpose. Domestic groundwater users have deemed rights for domestic use of up to 2 m3/day (2000 litres per day) under the Water Sustainability Act and it is therefore not possible to submit an application for a licence.

Purpose	Quantity	Use of Water	Comments	Fee
Cooling	78.56 m3/day	Year Round	The proposed use of water is for industrial cooling related to bedrock drilling. The setup is described as a small pump located near the source with water being pumped in a 1-inch hose to the drill site. Typical demand during operations is 12 gallons per minute, which equates to 0.0009092184 cubic meters per second. In addition, water is only used during the operating shift, so if water is in short supply, it is possible to drill only one shift per day. This would result in an effective demand of 0.0004546092 cubic meters per second over a 24-hour period.	\$1,000.00
Fresh Water Bottling	1,000 m3/year	Year Round		\$1,000.00
				Total: \$2,000.00

**WORKS**

Works are the physical equipment used to move the water from its source to where it will be used. For example, works can include a screened intake, pump, pipeline, irrigation system, dugout, storage structure etc. Scroll down the list provided to see all the options available for selection. For a formal definition of “works”, refer to Section 1(1) of the Water Sustainability Act.

NOTE: For works not on the list, please describe them in the box below. Hover over the works list to see a quick definition of the work.

Works	Status
Pump	Not Constructed

Please provide details about the works selected above, and your water system:

The setup is described as a small pump located near the source with water being pumped in a 1-inch hose to the drill site. In this case the water source is an old mining adit entrance which is flooded with water. Typically, there are dirt roads and drill pads constructed temporarily at the drill site. These are later reclaimed after drilling is commenced. There is sometimes an access road or trail to the pump.

**SOURCE OF WATER FOR APPLICATION**

**WELL WORKS**

Is the water you are applying for coming from a well? No

#### **PROXIMITY TO SURFACE WATER**

In order to consider all relevant factors concerning your licence application, it is necessary to understand any potential connections between the aquifer from which you propose to withdraw water and connected surface water.

Does any documentation, such as a well construction report, indicate that there is a hydraulic connection between the well and a surface water source? No

#### **JOINT WORKS**

Are your works connected to the works of another person or group of persons?

If you share or are connected to another person's works, it is recommended that a Joint Works Agreement-outlining each party's role and responsibilities-be completed and uploaded

Do you share or are you connected to another person's works? No

#### **PERMIT OVER CROWN LAND**

For any works that cross or otherwise affect (e.g. flood) Crown land, you will require permission. A Permit Over Crown Land (PCL) means an authority issued under the Water Sustainability Act which allows you to construct, maintain, or operate works on Crown land or to flood Crown land.

Please answer the following questions to determine whether an authorization to occupy Crown Land will be required with your Water application. If a Permit Over Crown land is required, the applicable fee, if any, will be automatically calculated and added to your application.

You should indicate 'Yes' to the following question if any of the following circumstances apply to your application:

- any of your works will be located on or crossing Crown land
- your well is or will be located on Crown Land
- you are proposing to flood Crown Land

Do any of the above apply to your application? Yes

For certain activities or works a Land Act tenure is required. You should indicate 'Yes' to the following question if any one of the following conditions apply to the proposed use of Crown land:

- the purpose for the use of water is either 'Power Commercial' or 'Power General' based on the Water Use Purpose definitions ;
  - any of the works are consider major works (meaning for conveyance of 0.01 m3/s or more, for waterworks purpose or industrial purpose);
  - your works include a dam higher than 9 metres or storage greater than 1,000,000 m3; or
  - your works include a permanent access road, a power house, or transmission lines.

Do any of the above conditions apply to your application? No

Do have an existing Crown Land Tenure, Permit over Crown Land or Mines Lease that covers the affected Crown Land? Yes  
Please provide your Tenure file number or any other information about your existing permission: Mineral Tenure: 259182/517127 Brett

### ADDITIONAL QUESTIONS

In many cases you might require other authorizations or permits in order to complete your project. In order to make that determination and point you in the right direction, please answer the questions below. More information can also be found on the Government Water website. In addition, your application may be referred to other agencies for comments.

Are you planning to cut timber on Crown Land? Unknown

Are you planning to use an open fire to burn timber or other materials? No

Are you supplying potable water to consumers? Yes  
The Drinking Water Protection Act and the Drinking Water Protection Regulation describe the responsibilities of the water supplier, which include supplying potable water to consumers, disinfecting surface water and preparing an emergency response plan. The Local Health Authorities are responsible.<http://www.health.gov.bc.ca/protect/dwact.html>

Will fish or wildlife habitat be affected? No

Are you planning to undertake mineral exploration? Yes  
If you are planning to undertake mineral exploration it may be necessary to submit an application for a Notice of Work.

Do you need to construct a road to the dam (if there are no existing roads)? Unknown

Do you want to construct works within an existing forest road right-of-way on Crown land? No

Do you want to transport heavy equipment or materials on an existing forest road? No

Do you want to use the water for livestock watering on Crown land? No

Does any work occur within the public road allowance or has to cross a public road? No

### LOCATION INFORMATION

### LAND DETAILS

List all parcels of land where the water will be used. Click "Add Land Information" button to add each parcel of land.

**Description**

Provincial Crown Land  
Legal Description: Mineral Tenure #s  
Brett 1: 259182  
Brett 2: 517127

**DRAWINGS**

A Drawing to Scale is required that meets the Application Drawing Standards. Choose one of the options below to submit the required map/drawing.

Additionally, it is recommended that you provide a topographical map showing the general location of the property where the water is proposed to be used and the works constructed in relation to nearby communities, highways, railways and other water sources.

(this additional map will not be necessary if your Drawing to Scale is provided using the Geomark Service or a spatial file such as .KML or .KMZ)

☒ I have map(s) saved to my computer and wish to provide these with my application

**MAP FILES**

Do you have a PDF or image file of a drawn map? You can upload it here.

## PRIVACY DECLARATION

### PRIVACY NOTE FOR THE COLLECTION, USE AND DISCLOSURE OF PERSONAL INFORMATION

Personal information is collected by FrontCounter BC under the legal authority of section 26 (c) and 27 (1)(a)(i) of the Freedom of Information and Protection of Privacy Act (the Act).

The collection, use, and disclosure of personal information is subject to the provisions of the Act. The personal information collected by FrontCounter BC will be used to process your inquiry or application(s). It may also be shared when strictly necessary with partner agencies that are also subject to the provisions of the Act. The personal information supplied in the application package may be used for referrals or notifications as required. Personal information may be used by FrontCounter BC for survey purposes.

For more information regarding the collection, use, and/or disclosure of your personal information by FrontCounter BC, please contact FrontCounter BC at 1-877-855-3222 or at:

FrontCounter BC Program Director  
FrontCounter BC, Provincial Operations  
441 Columbia Street  
Kamloops, BC V2C 2T3

☒ Check here to indicate that you have read and agree to the privacy declaration stated above.

## REFERRAL INFORMATION

Some applications may also be passed on to other agencies, ministries or other affected parties for referral or consultation purposes. A referral or notification is necessary when the approval of your application might affect someone else's rights or resources or those of the citizens of BC. An example of someone who could receive your application for referral purposes is a habitat officer who looks after the fish and wildlife in the area of your application. This does not apply to all applications and is done only when required.

Please enter contact information below for the person who would best answer questions about your application that may arise from anyone who received a referral or notification.

☒ I hereby consent to the disclosure of the information contained in this application to other agencies, government ministries or other affected parties for referral or First Nation consultation purposes.

## IMPORTANT NOTICES

Please review the "Important Notices" below and then check the declaration at the bottom confirming that everything in this application is complete and accurate.

- I understand that the submission of this water licence application does not provide authority under the Water Sustainability Act to divert, use or store water other than to test the quality or quantity of water or to conduct a flow test in accordance with Section 6(2)(b) of the Water Sustainability Act. I understand that the submission of this water licence does not provide authority under the Water Sustainability Act to divert, use or store water from a well or other ground water sources to construct works. I also understand that my application must first be investigated and a decision made on the application as to whether a water licence may be granted and, as part of that review, additional information may be requested of me.
- The application may be subject to further requirements under the federal Fisheries Act. Please refer to Fisheries and Oceans Canada's "Projects Near Water" webpage (<http://www.dfo-mpo.gc.ca/pnw-ppe/index-eng.html>) for information on how to ensure your project complies with the Fisheries Act.
- Once you click 'Next' the application will be locked down and you will NOT be able to edit it any more.

## DECLARATION

☒ I declare that the information contained on this form is complete and accurate.

## OTHER INFORMATION

Is there any other information you would like us to know?

I am intending this application be for an existing use water license. There was an issue with the website which locked me out from doing anything on the Virtual FrontCounter BC website. Please refer to the file "Late submission reason and evidence" for screenshots of the error message and correspondence with

FrontCounter BC giving me an extension on existing use applications. Thank you.

## ELIGIBILITY

Please answer the following questions related to your Water Licence Application.

Question	Answer	Warning
- Are you the owner of land or a mine in British Columbia where the water will be used?	Yes	
- Are you entitled to possession of land or a mine in British Columbia where the water will be used?		
- Do you have a substantial interest in the land, mine, or an		

undertaking in British Columbia where the water will be used?

- Are you a holder of a certificate of public convenience and necessity issued under the Public Utilities Act, the Utilities Commission Act or the Water Utility Act?
- Are you a municipality, regional district, improvement district, development district or water users' community?
- Are you representing the government of British Columbia or Canada?
- Are you representing a commission, board or person having charge of the administration of Crown land or a mine or an undertaking on Crown land, administered by British Columbia or Canada or controlled by a ministry, department, branch or other subdivision of the government of British Columbia or Canada?
- Are you representing the Greater Vancouver Water District or any other water district incorporated by an Act?
- Are you representing the British Columbia Hydro and Power Authority?
- Are you applying as an agent on behalf of an eligible applicant as described above?

#### TECHNICAL INFORMATION

#### GOVERNMENT AND FIRST NATION FEE EXEMPTION REQUEST

Do you belong to, are you applying on behalf of, or are you:

- A provincial government ministry
- The Government of Canada
- A First Nation for water use on reserve land
- A person applying to use water on Treaty Lands
- A Nisga'a citizen
- An entity applying to use water from the Nisga'a Water Reservation?

No

#### WATER DIVERSION

Do you currently hold a valid Water Licence? Yes

Client Number:

Select the source of the new water diversion being applied for: Groundwater

#### PURPOSES OF WATER USE

Please select the purpose for which the diverted water will be used. Please note that the purpose you indicate may be changed during the application review process to better reflect the use of the water, in which case you will be notified of the change. For definitions of Water Use Purpose, click here.

NOTE: A water licence is not required for groundwater that is used for a domestic purpose. Domestic groundwater users have deemed rights for domestic use of up to 2 m3/day (2000 litres per day) under the Water Sustainability Act and it is therefore not possible to submit an application for a licence.

Purpose	Quantity	Use of Water	Comments	Fee
Cooling	79 m3/day	Year Round	The proposed use of water is for industrial cooling related to bedrock drilling. The setup is described as a small pump located near the source with water being pumped in a 1-inch hose to the drill site. Typical demand during operations is 12 gallons per minute, which equates to 0.0009092184 cubic meters per second. In addition, water is only used during the operating shift, so if water is in short supply, it is possible to drill only one shift per day. This would result in an effective demand of 0.0004546092 cubic meters per second over a 24-hour period.	\$1,000.00
Miscellaneous Industrial	150 m3/day	Year Round	Purpose is a) to dewater a mine. The Lexington Mine. Which has been dewatered as early as 2007 by Merit Mining Corp and continues to this day under Golden Dawn Minerals Inc. or its subsidiary 1086359 BC Ltd.	\$1,000.00
Total:				\$2,000.00

WORKS

Works are the physical equipment used to move the water from its source to where it will be used. For example, works can include a screened intake, pump, pipeline, irrigation system, dugout, storage structure etc. Scroll down the list provided to see all the options available for selection. For a formal definition of “works”, refer to Section 1(1) of the Water Sustainability Act.

NOTE: For works not on the list, please describe them in the box below. Hover over the works list to see a quick definition of the work.

Works	Status
Flow measuring device	Fully Constructed
Pipe	Fully Constructed
Pump	Fully Constructed

Please provide details about the works selected above, and your water system:

A pump pumps water out of the Lexington Mine in order to keep the mine dewatered. There is a discharge line (pipe) which is monitored for flow and the water flows into Goosemus creek which is sampled to ensure the discharged water meets

environmental regulations. See the document M-234 Lexington 2020 Annual Reclamation Report\_compressed for detailed information. A diagram of all waterworks at the site has also been uploaded.

## SOURCE OF WATER FOR APPLICATION

## WELL WORKS

Is the water you are applying for coming from a well? Yes

If your works are not fully constructed, (e.g. under repair), please provide details in the "Comments" field below.

Works	Common Well Name	Status	Comments
Well	well 1	Fully Constructed	Wells have not been registered. 49.005947, -118.610305

<b>Well Tag Number:</b>		<b>Well ID Plate Number:</b>

## PROXIMITY TO SURFACE WATER

In order to consider all relevant factors concerning your licence application, it is necessary to understand any potential connections between the aquifer from which you propose to withdraw water and connected surface water.

Does any documentation, such as a well construction report, indicate that there is a hydraulic connection between the well and a surface water source? Yes

Please describe the source of the water: The discharge flows into Goosemus creek and is monitored upstream and downstream to ensure the water pumped out of the mine is clean and clear.

## JOINT WORKS

Are your works connected to the works of another person or group of persons?

If you share or are connected to another person's works, it is recommended that a Joint Works Agreement-outlining each party's role and responsibilities-be completed and uploaded

Do you share or are you connected to another person's works? No

## PERMIT OVER CROWN LAND

For any works that cross or otherwise affect (e.g. flood) Crown land, you will require permission. A Permit Over Crown Land (PCL) means an authority issued under the Water Sustainability Act which allows you to construct, maintain, or operate works on Crown land or to flood Crown land.

Please answer the following questions to determine whether an authorization to occupy Crown Land will be required with your Water application. If a Permit Over Crown land is required, the applicable fee, if any, will be automatically calculated and added to your application.

You should indicate 'Yes' to the following question if any of the following circumstances apply to your application:

- any of your works will be located on or crossing Crown land
  - your well is or will be located on Crown Land
  - you are proposing to flood Crown Land

Do any of the above apply to your application? Yes

For certain activities or works a Land Act tenure is required. You should indicate 'Yes' to the following question if any one of the following conditions apply to the proposed use of Crown land:

- the purpose for the use of water is either 'Power Commercial' or 'Power General' based on the Water Use Purpose definitions ;
  - any of the works are consider major works (meaning for conveyance of 0.01 m3/s or more, for waterworks purpose or industrial purpose);
  - your works include a dam higher than 9 metres or storage greater than 1,000,000 m3; or
  - your works include a permanent access road, a power house, or transmission lines.

Do any of the above conditions apply to your application? No

Do have an existing Crown Land Tenure, Permit over Crown Land or Mines Lease that covers the affected Crown Land?  
Please provide your Tenure file number or any other information about your existing permission:

Yes

Discharge Mining Lease: 216290  
Portal Mining Lease: 216289

In addition to these lease numbers we have mineral claims. Please see land info for details on these parcels.

## ADDITIONAL QUESTIONS

In many cases you might require other authorizations or permits in order to complete your project. In order to make that determination and point you in the right direction, please answer the questions below. More information can also be found on the Government Water website. In addition, your application may be referred to other agencies for comments.

Are you planning to cut timber on Crown Land? Unknown

Are you planning to use an open fire to burn timber or other No

materials?

Are you supplying potable water to consumers?

Unknown

Will fish or wildlife habitat be affected?

No

Are you planning to undertake mineral exploration?

Yes

If you are planning to undertake mineral exploration it may be necessary to submit an application for a Notice of Work.

Do you need to construct a road to the dam (if there are no existing roads)?

No

Do you want to construct works within an existing forest road right-of-way on Crown land?

No

Do you want to transport heavy equipment or materials on an existing forest road?

Unknown

Do you want to use the water for livestock watering on Crown land?

Unknown

Does any work occur within the public road allowance or has to cross a public road?

No

## LOCATION INFORMATION

#### PRIVACY DECLARATION

##### PRIVACY NOTE FOR THE COLLECTION, USE AND DISCLOSURE OF PERSONAL INFORMATION

Personal information is collected by FrontCounter BC under the legal authority of section 26 (c) and 27 (1)(a)(i) of the Freedom of Information and Protection of Privacy Act (the Act).

The collection, use, and disclosure of personal information is subject to the provisions of the Act. The personal information collected by FrontCounter BC will be used to process your inquiry or application(s). It may also be shared when strictly necessary with partner agencies that are also subject to the provisions of the Act. The personal information supplied in the application package may be used for referrals or notifications as required. Personal information may be used by FrontCounter BC for survey purposes.

For more information regarding the collection, use, and/or disclosure of your personal information by FrontCounter BC, please contact FrontCounter BC at 1-877-855-3222 or at:

FrontCounter BC Program Director  
FrontCounter BC, Provincial Operation  
441 Columbia Street  
Kamloops, BC V2C 2T3

☒ Check here to indicate that you have read and agree to the privacy declaration stated above.

#### REFERRAL INFORMATION

Some applications may also be passed on to other agencies, ministries or other affected parties for referral or consultation purposes. A referral or notification is necessary when the approval of your application might affect someone else's rights or resources or those of the citizens of BC. An example of someone who could receive your application for referral purposes is a habitat officer who looks after the fish and wildlife in the area of your application. This does not apply to all applications and is done only when required.

Please enter contact information below for the person who would best answer questions about your application that may arise from anyone who received a referral or notification.

#### IMPORTANT NOTICES

Please review the "Important Notices" below and then check the declaration at the bottom confirming that everything in this application is complete and accurate.

- I understand that the submission of this water licence application does not provide authority under the Water Sustainability Act to divert, use or store water other than to test the quality or quantity of water or to conduct a flow test in accordance with Section 6(2)(b) of the Water Sustainability Act. I understand that the submission of this water licence does not provide authority under the Water Sustainability Act to divert, use or store water from a well or other ground water sources to construct works. I also understand that my application must first be investigated and a decision made on the application as to whether a water licence may be granted and, as part of that review, additional information may be requested of me.
- The application may be subject to further requirements under the federal Fisheries Act. Please refer to Fisheries and Oceans Canada's "Projects Near Water" webpage (<http://www.dfo-mpo.gc.ca/pnw-ppe/index-eng.html>) for information on how to ensure your project complies with the Fisheries Act.
- Once you click 'Next' the application will be locked down and you will NOT be able to edit it any more.

#### DECLARATION

☒ I declare that the information contained on this form is complete and accurate.

#### OTHER INFORMATION

Is there any other information you would like us to know?

I am intending this application be for an existing use water license. Please see the file, "Late Submission Reason and Evidence" for more details. Please contact Everest at 604-488-3900 with any questions.

## 8. An American Badger Burrow

### 1) Definition

*An American Badger (Taxidea taxus) burrow* means an excavated hole that descends below ground that either (1) is currently occupied for denning, shelter, or foraging; or (2) is habitually occupied and still capable of providing for denning, shelter, or foraging (Figure 30).

**Figure 30. American Badger at its burrow.** (Photo: Rich Weir)

### 2) Species Description

The American Badger is a powerful carnivore, about the size of a raccoon (Figure 30). It is squat and muscular with mottled, reddish-brown colouration. Its shaggy hair is short on the back and belly, longer on the sides and gives the body a flattened, short-legged appearance. The wedge-shaped head has distinctive alternating black and white bands; a central white stripe runs from the nose to the back of the neck. Badgers have a short bottlebrush tail and long claws for digging. Badgers run with a characteristic trotting gait. They are most active at night; consequently, badgers are rarely seen during the day.

The American Badger is a *Species at Risk* under the *Forest and Range Practices Act* and is Red-listed in British Columbia. It is designated as *Endangered* by COSEWIC.

### 3) What to Look For

Optimum badger habitats are grasslands and open ponderosa pine and Douglas-fir forests along the major valleys of the southern Interior of British Columbia. Sites with fine, sandy loam soils with few large rocks that are suitable for digging are particularly important for badgers (e.g., loose soils originating from glaciofluvial and glaciolacustrine parent materials). Burrows are typically round or oval in shape and have a mound of loose, freshly dug soil mounded at their entrances that may have track marks (Figure 31).

**Figure 31. A freshly dug badger burrow.** (Photo: Luke Robertson)

Burrows are used by badgers for birthing sites, safe resting areas, food storage, and protection from the elements, particularly during winter when they may enter a state of torpor. Burrows may persist for up to a decade, depending on soil conditions, and are re-dug and re-used several times. Natal dens are burrows used for rearing young (kits). Females may move litters to new burrows throughout the rearing season (April–August). Table 32 summarizes what to look for when identifying an American Badger burrow.

The main threats to American Badger populations are mortality from vehicle collisions and habitat loss related to forest encroachment, intensive agriculture, rural development, and urban sprawl, as well as rodent (prey species) control programs. Table 33 provides information to consider when conducting primary forest and range activities adjacent to a burrow.

***Note: American Badger burrows that are excavated into a constructed road (i.e., within the road prism or grade slope) are not considered a wildlife habitat feature.***

**Table 32. American Badger burrows: what to look for.**

American Badger Burrow Description
<ul style="list-style-type: none"> <li>Burrows are usually found in grassland and sparsely treed habitats.</li> <li>Burrows generally extend several metres underground.</li> <li>Identifying features include: <ul style="list-style-type: none"> <li>large oval or elliptical-shaped entrance (20–30 cm wide and 15–25 cm high (about the size of a volleyball);</li> <li>often a large mound of loose dirt at the front of the entrance;</li> <li>horizontal claw marks (approximately 1.5 cm between claw marks) on the sides of recent burrows;</li> <li>sweeping marks along the main route into the burrow created by underbelly hair from moving badgers; and</li> <li>badger hair at the entrance.</li> </ul> </li> <li>Coyote or fox may defecate at the entrances of badger burrows, making burrow identification challenging.</li> <li>The presence or evidence of young (kits) is the only reliable way of differentiating a natal (maternal) den from a burrow used for foraging or shelter.</li> </ul> <p><b>Note:</b> Coyote and red fox burrows are often triangular in shape, with claw marks that run vertically downward along the sides from the peak of the entrance. Additionally, coyote and fox dens may have more feces and prey remains at their entrances than badger dens.</p>

**Table 33. Information to consider when conducting primary forest or range activities near badger burrows.**

Information to Consider
<ul style="list-style-type: none"> <li>If you are unsure whether an American Badger is using a burrow, or whether use is recent, consult a qualified professional biologist to identify the species.</li> <li>Activities conducted near a burrow that result in soil disturbance or compaction may damage the burrow (e.g., road or skid trail construction, felling/yarding, ground skidding, mechanical site preparation [mounding/trenching], and broadcast burning). To avoid damage to badger burrows: <ul style="list-style-type: none"> <li>Maintain herbaceous and shrub ground cover around burrows.</li> <li>Avoid developing any new road access near clusters of known active burrows.</li> <li>Establish a no machine zone around burrows to protect them from collapse under heavy harvesting equipment (Figure 32). <ul style="list-style-type: none"> <li>Zone size of 5–7 m around single burrows.</li> <li>Establish a larger zone of at least 20 m around clusters of burrows or single natal den.</li> <li>For natal dens, avoid disturbance during the breeding season (April 15–August 15).</li> <li>Flag zones with brightly coloured tape to alert equipment operators.</li> <li>Do not harvest trees within a zone unless a mechanical harvester can reach in to extract them.</li> <li>Do not harvest trees that provide stability to a burrow or are located within 1 m of a burrow entrance.</li> <li>Retain trees harvested along the periphery of a zone as “high stubs” to prevent log-skidding through the zone and also to provide some residual stand structure for other species.</li> </ul> </li> </ul> </li> <li>Erect enclosure fencing if damage from livestock is degrading the vegetative structure or threatening the collapse of burrows. <ul style="list-style-type: none"> <li>Avoid placing livestock attractants (e.g., salt licks, water troughs, feeding sites) within 250 m of the burrow.</li> </ul> </li> <li>During the maternal period (April 15–August 15), do not construct range developments within 250 m of active burrows.</li> </ul>

**Figure 32. A no machine zone (green treed area in centre) established around an American Badger burrow (tan-coloured mound at red arrow). Note stub trees left around the perimeter of the zone. (Photo: Melissa Hogg)**

#### **4) Regional Information – Kootenay Boundary**

In this section, we provide specific timing windows and guidance on disturbance buffers for the Kootenay Boundary Region. This information may vary from provincial guidance and may not be applicable outside of the Kootenay Boundary Region because of regional specificity.

The American Badger is a wide-ranging resident species that is commonly found near valley bottoms and in open areas, such as grasslands in the East Kootenay and Boundary (Figure 33, Table 34). No specific regional guidance is available on buffers for burrows; follow the “Information to Consider” provided in Table 33.

American Badgers are most sensitive during the late July and August breeding season, with young born between March and April. This creates a potential *sensitive period of April 15–August 15*.<sup>1</sup> Based on site observations, the length of this sensitive period can be refined. The period of *least risk is August 15–April 15*.

Company/Organization

**Relationship to Individual or Company/Organization?**

Employee

### Application Information

**Type of Notice of Work**

Mineral

**Type of Application**

New Permit

### One Year, Multi-Year or Multi-Year Area-Based Permit

**Permit Type**

Multi-Year, Area-Based Permit

### Mine Information

**Mine Number**

1630111

**Name of Property**

Bud Elk

**Tenure Number(s)**

513141, 394733, 394735, 393112, 394737, 394738, 393363

**Crown Grant/District Lot Number**

-

**Directions to Site**

The property is accessed from the city of Greenwood, via the Motherlode road which leaves Highway 3 near the south end of the community. The Motherlode road passes through the centre of the property. Several 2 and

4 wheel drive gravel roads south and west of Motherlode creek provides additional road access. The Buckhorn and Moreen showings are reached by following the Motherlode road from Highway 3 for 1.5 kilometres, then turning left onto Goodeve road for 1.8 kilometres before turning right at the sharp switchback junction. Just past this junction, turn right onto a secondary logging/exploration road for 400 meters to a clearcut logged area where the Moreen showing is located. An old exploration road heads north through the clearcut, for several hundred metres to the Buckhorn showing. The Morrison showing is reached by following the Motherlode road west from Greenwood for 5.5 kilometres.

## Description of Work Program

**Description of Work**

See attached document.

## Time of Proposed Activities

**Proposed Start Date**

2021-05-16

**Proposed Authorization End Date**

2026-05-15

## Maximum Annual Tonnage

**Proposed Annual Maximum Tonnage**

0.00

**Adjusted Annual Maximum Tonnage**

-

## Access

### Access presently gated

No

### Do you have the required access authorizations in place?

No

### Please provide the type and authorization numbers for each access authorization application or exemption to use the road(s)

-

### Key provided to the inspector

No

## Present State of Land

### Present condition of the land

Mining, exploration and logging has been intermittently underway for the past 120 years. Two shafts are present on the property from underground mining between 1897-1907. The property was drilled twice by two separate companies in the 1960's. Modern work on the property consists of some trenching from 2012 and some surface drilling in 2005. There are also some recent and old cut blocks throughout the claim.

### Type of vegetation

The Bud Elk property is situated on two biogeoclimatic zones: Interior Douglas Fir and Interior Cedar Hemlock. The majority of the property lies within the Interior Douglas Fir zone but changes to Interior Cedar Hemlock at higher elevations to the south west of the property.

### Physiography

The terrain is rolling and is upwards towards the southwest. Elevation of the property ranges between 840-1120m. There are two creeks that flow through the property - Motherlode and Buckhorn Creek. Both creeks flow south east and drain into the larger boundary creek that runs through Greenwood.

### Current means of access

The property is accessed from the city of Greenwood, via the Motherlode road which leaves Highway 3 near the south end of the community. The Motherlode road passes through the center of the property. Several 2 and 4 wheel drive gravel roads south and west of Motherlode creek provide additional road access to the rest of the property.

### Old Equipment

Historic shaft, trenches and pits.

### Recreational trail/use

None

## Access to Tenure

### Do you need to build a road, create stream crossings or other surface disturbance that will not be on your tenure?

No

## Land Ownership

**Application in a community watershed**

No

**Proposed activities on private land**

Yes

**Activities in park**

No

**Do you have authorization by the Lieutenant Governor in Council?**

No

## Cultural Heritage Resources

**Are you aware of any protected archaeological sites that may be affected by the proposed project?**

No

**Plan to protect the archaeological site**

-

## First Nations Engagement

**Have you shared information and engaged with First Nations in the area of the proposed activity?**

No

**Describe your First Nations engagement activities**

-

**As a result of the engagement, are you aware of any cultural heritage resources in the area where the work is proposed?**

No

**Describe any cultural heritage resources in the area**

-

## Work Plan

### Access Roads, Trails, Helipads, Air Strips, Boat Ramps

Access Type	Length (km)	Disturbed Area (ha)	Merchantable timber volume (m <sup>3</sup> )
Excavated Trail - New	1.60	0.49000	2.18
Existing Access Modification	3.26	0.97000	0.00

### Bridges, Culverts, and Crossings

**Are you proposing any bridges, culverts, and crossings?**

No

**Describe the changes and reference the locations needed on the map later**

-

### Equipment

Quantity	Description	Capacity
----------	-------------	----------

No Data

### Reclamation Program

**Proposed reclamation and timing for this specific activity**

The newly excavated trails will be recontoured to match the natural topography and will be seeded. The reclamation will be conducted once the trail is not required for future exploration activities

**Estimated Cost of reclamation activities described above**

\$3,270.00

### Cut Lines and Induced Polarization Survey

Total Line (km)	Disturbed Area (ha)	Merchantable Timber Volume (m <sup>3</sup> )
32.00	3.20000	35.90

## Reclamation Program

### Proposed reclamation and timing for this specific activity

Any trees cut from creating the exploration grid will be bucked and laid flat on the ground.

**Estimated Cost of reclamation activities described above \$3,590.00**

## Exploration Surface Drilling

### Drilling

Activity	Number of Sites	Disturbed Area (ha)	Merchantable Timber Volume (m <sup>3</sup> )
Diamond Drilling - Surface	24	0.24000	1.20

## Support of the Drilling Program

### The Drilling program will be

At a warehouse rented in the town of Greenwood., BC. Lat: 49°05'46.4"N Long: 118°40'50.0"W

## Reclamation Program

### Proposed reclamation and timing for this specific activity

Upon completion of drilling, drill sites and sumps will be levelled. Disturbed areas will be reseeded with an approved seed mix. Any timber disturbed will be bucked into lengths and laid flat. Sites will be monitored for noxious weeds and sprayed if needed.

**Estimated Cost of reclamation activities described above \$2,400.00**

## Mechanical Trenching/Test Pits

Activity	Number of Sites	Disturbed Area (ha)	Merchantable Timber Volume (m <sup>3</sup> )
Trenches and Test Pits	14	0.26000	1.33

## Equipment

Quantity	Description	Capacity
No Data		

## Reclamation Program

### Proposed reclamation and timing for this specific activity

Topsoil will be used to construct a protective berm around the trench. Upon completion of the trenching program, topsoil will be backfilled and trench areas will be recontoured within 4 months of work completion. The disturbed area will be seeded with approved range seed mix. Monitor for noxious weeds and spray if needed. Any timber disturbed will be bucked into lengths and laid flat.

### Estimated Cost of reclamation activities described above

\$2,660.00

## Water Supply

Source	Activity	Water Use	Pump Size (in)	Intake Location	Estimate Rate
Buckhorn Creek	Other, please specify:	For diamond drilling	2.00	Buckhorn Creek	0.2500000m³/s
Motherlode Creek	Other, please specify:	For diamond drilling	2.00	Motherlode Creek	0.5000000m³/s

## Summary of Reclamation

### Total merchantable timber volume (m³)

40.61

Activity	Total Affected Area (ha)	Estimated Cost of Reclamation
Cut Lines and Induced Polarization Survey	3.20000	\$3,590.00
Exploration Surface Drilling	0.24000	\$2,400.00
Mechanical Trenching / Test Pits	0.26000	\$2,660.00
Access Roads, Trails, Helipads,	1.46000	\$3,270.00

# Archaeological Chance Find Procedure

## Bud Elk Property Ximen Mining Corp.

There are more than 32,000 archaeological sites currently recorded in British Columbia with many more being added to the provincial inventory every year. For this reason, it is very likely that you will encounter an archaeological site during your lifetime either knowingly or unknowingly. This protocol has been established to increase awareness of this important resource and to assist in planning future developments.

The remnants of British Columbia's earliest cultures are represented in today's landscape by a wide variety of site types, most of which are related to art, habitations, resource gathering and production, tool making, and traditional ceremonial or ritual activities. Some sites that may be immediately visible to a non-archaeologist include:

- Rock art, including pictographs and petroglyphs.
- Tree art and Culturally Modified Trees (CMT'S) such as bark stripping and planks.
- Surface features such as depressions created by former habitations, earthen fortifications, rock cairns, fish traps, clam gardens, burned rock and middens.
- Artifacts that have become visible on the land surface owing to erosion or recent land altering activity. These may be produced in a variety of materials such as stone, bone, antler, wood, or shell.
- Buried cultural remains that may be sighted in a cut-bank, excavation, eroded shoreline, or other exposed deposit.

All workers on the Bud Elk mineral exploration site must receive training in identification of archaeological sites and in the implementation of this Chance Find Procedures policy document. All workers will be provided with a copy of the Yukon government publications **Handbook for the Identification of Heritage Sites and Features** and **Mineral Exploration Best Management Practices for Heritage Resources** and are required to familiarize themselves with the content of the documents as they pertain to archaeological sites.

### If you discover what you suspect may be a possible archaeological site:

- Stop all work in the area and flag the site to avoid damaging the site.
- **Do not disturb any archaeological remains that you may encounter.**
- Record the GPS location of the site. Record a brief description of the site including an estimate of the site extent, the date and time of the discovery and the persons present at the time of discovery. If possible, photograph the discovery.
- Report your discovery to **Kevin Standing, Ximen Mining Corp., cells.22** , who will provide further instructions.
- If you are unable to contact the above representatives of Ximen Mining Corp, contact the company's archaeological consultant **Ian Cameron, Ursus Heritage Consulting, 250-938-4662** for further instructions, or failing that, the **Archaeology Branch, 250-953-3334**

### If you discover what you suspect may be a possible human remains:

- Stop all work in the area to avoid damaging the site.
- **Do not disturb any possible human remains that you may encounter.**
- Record the GPS location of the site. Record a brief description of the site including an estimate of the site extent, the date and time of the discovery and the persons present at the time of discovery. If possible, photograph the discovery.
- Report your discovery to **Kevin Standing, Ximen Mining Corp., cells.22** who will provide further instructions.
- If you are unable to contact the above representatives of Ximen Mining Corp. and the suspected human remains appear to be current, contact the **Midway RCMP at 250-449-2244**
- If you are unable to contact the above representatives of Ximen Mining Corp. contact the company's archaeological consultant **Ian Cameron, Ursus Heritage Consulting, 250-938-4662** for further instructions, or failing that, the **Archaeology Branch, 250-953-3334**

**The following steps will generally be followed:**

- The Coroner's Office and local policing authority are notified and the Coroner's Office determines whether the matter is of contemporary forensic concern.
- If the remains are not of forensic concern, the branch will attempt to facilitate disposition of the remains.
- If a cultural affiliation for the remains can be determined, the branch will contact an organization representing that cultural group. If the remains are of aboriginal ancestry, the branch will attempt to contact the relevant First Nation(s).
- Generally, if remains are still buried and are under no immediate threat of further disturbance, they will not be excavated or removed. If the remains have been partially or completely removed, the branch will facilitate disposition.
- The branch may arrange for a qualified anthropologist or archaeologist to provide an assessment of the remains.

Application Agency -> Lands	
Application Agency -> Water	
Application Agency -> Forests	
Application Received Date	
Completed by NRS / Date	
Status Run By / Date	s.15; s.22 - 2021-05-04
<p>Purpose: The purpose of this status summary is to present the information gathered by each person involved in the status phase to form the complete status package. The status summary sheet should be used in conjunction with the ILRR Custom Theme Report to provide a full status package. The information on the summary is meant to benefit the business leads, decision makers and others who are preparing the tenure documents and decision summary to streamline the process by avoiding duplicate parties researching information at multiple stages in the process.</p>

## Kootenay Boundary Referral Assessment

<b>File Number</b>	129288102-001
<b>Referral Type</b>	Notice of Works
<b>Applicant</b>	XIMEN Mining Corp
<b>Reviewer</b>	Lisa Tedesco

### Step 1. Admin Values Screening

This referral was classed as:					
Low value		Potential Value		Known Value	X

\*Optional - insert screen shot below

- If low value, send template response. Close file.
- If Known or Potential value proceed to step 2.

## Kootenay Boundary Referral Assessment

### Step 2. Confirm Values

\*\*\*QGIS report here\*\*\*

Value classification is:

	Category	Value type	Next Step
X	High	Known value	Risk benefit evaluation
	High	Potential value matrix	Risk benefit evaluation
	Moderate	Potential value matrix	Risk benefit evaluation
	Low	Potential value matrix	Send low risk template

Site condition	Grey Field	Brown Field	Green Field
<i>Probability</i>			
<i>Unlikely – beyond migration</i>	LOW	LOW	MOD
<i>Possible – moderate distance</i>	LOW	MOD	HIGH
<i>Probably – within range</i>	MOD	HIGH	HIGH

### Step 3. Risk Benefit Evaluation

Value	Likelihood of impact	Magnitude of impact	Benefit of response	Response Classification
WISA suitable habitat – moderate, low and very low	1	1	1	1
WISA Critical Habitat	1	1	1	1
Badger CH	2	2	2	2
CROR and PICA critical habitat	1	1	1	1
UWR – mule deer, small areas	1	1	1	1
OGMA along Motherload Creek	1	1	1	1
OVERALL				1

Action:

Include badger clause with NoW template response

The Terrestrial Section of the Ministry of Forests, Lands, Natural Resource Operations & Rural Development has reviewed the above noted Notice of Works application. We have assessed this referral to be a moderate risk to wildlife and their habitats based on the information available. Primary concerns relate to implementation of the Kootenay Boundary Wildlife Habitat Features Order and protection of badger critical habitat. Standard guidance information is provided for invasive plants, access management, timing windows and protection of aquatic values.

#### Wildlife Habitat Features Order

The proposed removal of timber will require a license to cut (free use permit) under the Forest Act, triggering the requirement to comply with the Kootenay Boundary Wildlife Habitat Feature Order. This Order came into effect in 2018 through Government Actions Regulation Ministerial Order No. 213. The Order identifies 14 wildlife habitat features that Forest Act and Range Act agreement holders must manage for during activities. Forest Act agreement holders must not damage or render ineffective a feature with the activities or operations associated with their Forest Act agreement. The Wildlife Habitat Features website ( [gov.bc.ca/Kootenay-Boundary-Wildlife-Habitat-Features-Order](http://gov.bc.ca/Kootenay-Boundary-Wildlife-Habitat-Features-Order) ) provides information on how to view feature location data, submit reports and includes a detailed field guide with information on identification and management of features.

#### Badger

The proposed work areas overlap with badger critical habitat. Badger burrows are one of the 14 designated Wildlife Habitat Features. We request that the standard mines Badger Permit Conditions be included and that the attached Wildlife habitat Features Field Guide chapter for badger burrows be provided to the proponent.

#### Invasive Plants

The introduction and spread of invasive plants is of significant concern. Invasive plants are typically introduced to British Columbia through human activities. These invasive plants lack natural predators and pathogens that would otherwise keep their populations in check. Invasive plants often establish themselves in soils disturbed from development of roads, utility lines, trails, commercial recreation sites, agriculture, etc. Once established, invasive plants have a tremendous capacity to invade adjacent, undisturbed natural plant communities displace wildlife and disrupt natural ecosystem functions.

Under Section 2 of the provincial *Weed Control Act*, an occupier of land is responsible for controlling noxious weeds growing or located on that land. The provincial Invasive Alien Plant Program should be reviewed to determine what invasive species have been documented in and around the proposed work site(s). Best management practices should be applied during operations and an invasive plant management strategy developed. The Invasive Plant Council of BC has prepared a best management practice (BMP) document for managing invasive plants on during forestry operations that is generally applicable to exploration activities. The applicant should review this BMP and apply relevant guidance. [https://bcinvasives.ca/wp-content/uploads/2021/02/BMP\\_Forest\\_Management\\_Activities\\_2015.pdf](https://bcinvasives.ca/wp-content/uploads/2021/02/BMP_Forest_Management_Activities_2015.pdf)

For more information on individual species visit the Invasive Species Council of BC website at [www.bcinvasives.ca](http://www.bcinvasives.ca) and go to "resources". For local support on invasive plant management the applicant can contact the Boundary Invasive Species Society at [info@boundaryinvasives.com](mailto:info@boundaryinvasives.com)

#### Access Management and Impact Mitigation

The application identifies the need to construct 1.6 km of new trail and modify 3.26 km of existing access. Efforts should be made to minimize total length required and avoid areas with existing invasive plant infestations or high value wildlife trees (e.g. large old trees). All new roads should be completely rehabilitated upon completion of works to prevent future vehicle access. Recontouring of the road, seeding with a grass seed mix and distribution of log and stump debris and material on the rehabilitated surface are recommended.

The application also identifies 32 km of exploration grid line to be developed within the permit area. Across the region we are seeing increases in off-road vehicle use (e.g. dirt bikes, ATVs, side-by-side) with participants taking advantage of unconventional clearing as new access routes. To prevent future use of exploration grid lines as access routes we request any exploration lines where timber is cut to enable access and activities have debris placed back on the exploration line at completion of works.

#### Least Risk Timing Windows

Nesting birds are protected from harm under Section 34 of the provincial *Wildlife Act*, along with year-round protection of nests of eagles, peregrine falcons, gyrfalcon, osprey, heron, and burrowing owls. Vegetation clearing should be avoided in the following nesting windows:

- a. February 1 to August 15 for raptors and herons
- b. April 1 to August 31 for most other bird species

If clearing must occur during the above time periods, the proponent must hire a qualified professional to survey for active nests within the proposed disturbance areas and provide appropriate mitigation. The applicant should also be aware of requirements under the *Migratory Bird Convention Act* for addressing incidental take. More information can be found at <https://www.canada.ca/en/environment-climate-change/services/avoiding-harm-migratory-birds/overview.html>

#### Protection of Aquatic Values

Materials generated from drilling and/or sump creation must be managed and disposed of in such a manner that, whether containing water or not, any creeks, lakes and wetlands (i.e. bogs, fens, ponds, swamps etc) are not impacted and materials cannot make their way into any of the systems mentioned. Settling ponds should be located as far as possible from any permanent and seasonal water sources. Water should not be withdrawn from wetlands and marshes or streams during low flow periods of July 1 to Sept 30. These water features, and the species that rely on them, are extremely sensitive to changes in hydrology.

The Terrestrial Section of the Ministry of Forests, Lands, Natural Resource Operations & Rural Development has reviewed the above noted Notice of Works application. We have assessed this referral to be a moderate risk to wildlife and their habitats based on the information available. Primary concerns relate to implementation of the Kootenay Boundary Wildlife Habitat Features Order and protection of badger critical habitat. Standard guidance information is provided for invasive plants, access management, timing windows and protection of aquatic values.

#### Wildlife Habitat Features Order

The proposed removal of timber will require a license to cut (free use permit) under the Forest Act, triggering the requirement to comply with the Kootenay Boundary Wildlife Habitat Feature Order. This Order came into effect in 2018 through Government Actions Regulation Ministerial Order No. 213. The Order identifies 14 wildlife habitat features that Forest Act and Range Act agreement holders must manage for during activities. Forest Act agreement holders must not damage or render ineffective a feature with the activities or operations associated with their Forest Act agreement. The Wildlife Habitat Features website ( [gov.bc.ca/Kootenay-Boundary-Wildlife-Habitat-Features-Order](http://gov.bc.ca/Kootenay-Boundary-Wildlife-Habitat-Features-Order) ) provides information on how to view feature location data, submit reports and includes a detailed field guide with information on identification and management of features.

#### Badger

The proposed work areas overlap with badger critical habitat. Badger burrows are one of the 14 designated Wildlife Habitat Features. We request that the standard mines Badger Permit Conditions be included and that the attached Wildlife habitat Features Field Guide chapter for badger burrows be provided to the proponent.

#### Invasive Plants

The introduction and spread of invasive plants is of significant concern. Invasive plants are typically introduced to British Columbia through human activities. These invasive plants lack natural predators and pathogens that would otherwise keep their populations in check. Invasive plants often establish themselves in soils disturbed from development of roads, utility lines, trails, commercial recreation sites, agriculture, etc. Once established, invasive plants have a tremendous capacity to invade adjacent, undisturbed natural plant communities displace wildlife and disrupt natural ecosystem functions.

Under Section 2 of the provincial *Weed Control Act*, an occupier of land is responsible for controlling noxious weeds growing or located on that land. The provincial Invasive Alien Plant Program should be reviewed to determine what invasive species have been documented in and around the proposed work site(s). Best management practices should be applied during operations and an invasive plant management strategy developed. The Invasive Plant Council of BC has prepared a best management practice (BMP) document for managing invasive plants on during forestry operations that is generally applicable to exploration activities. The applicant should review this BMP and apply relevant guidance. [https://bcinvasives.ca/wp-content/uploads/2021/02/BMP\\_Forest\\_Management\\_Activities\\_2015.pdf](https://bcinvasives.ca/wp-content/uploads/2021/02/BMP_Forest_Management_Activities_2015.pdf)

For more information on individual species visit the Invasive Species Council of BC website at [www.bcinvasives.ca](http://www.bcinvasives.ca) and go to "resources". For local support on invasive plant management the applicant can contact the Boundary Invasive Species Society at [info@boundaryinvasives.com](mailto:info@boundaryinvasives.com)

#### Access Management and Impact Mitigation

The application identifies the need to construct 1.6 km of new trail and modify 3.26 km of existing access. Efforts should be made to minimize total length required and avoid areas with existing invasive plant infestations or high value wildlife trees (e.g. large old trees). All new roads should be completely rehabilitated upon completion of works to prevent future vehicle access. Recontouring of the road, seeding with a grass seed mix and distribution of log and stump debris and material on the rehabilitated surface are recommended.

The application also identifies 32 km of exploration grid line to be developed within the permit area. Across the region we are seeing increases in off-road vehicle use (e.g. dirt bikes, ATVs, side-by-side) with participants taking advantage of unconventional clearing as new access routes. To prevent future use of exploration grid lines as access routes we request any exploration lines where timber is cut to enable access and activities have debris placed back on the exploration line at completion of works.

#### Least Risk Timing Windows

Nesting birds are protected from harm under Section 34 of the provincial *Wildlife Act*, along with year-round protection of nests of eagles, peregrine falcons, gyrfalcon, osprey, heron, and burrowing owls. Vegetation clearing should be avoided in the following nesting windows:

- a. February 1 to August 15 for raptors and herons
- b. April 1 to August 31 for most other bird species

If clearing must occur during the above time periods, the proponent must hire a qualified professional to survey for active nests within the proposed disturbance areas and provide appropriate mitigation. The applicant should also be aware of requirements under the *Migratory Bird Convention Act* for addressing incidental take. More information can be found at <https://www.canada.ca/en/environment-climate-change/services/avoiding-harm-migratory-birds/overview.html>

#### Protection of Aquatic Values

Materials generated from drilling and/or sump creation must be managed and disposed of in such a manner that, whether containing water or not, any creeks, lakes and wetlands (i.e. bogs, fens, ponds, swamps etc) are not impacted and materials cannot make their way into any of the systems mentioned. Settling ponds should be located as far as possible from any permanent and seasonal water sources. Water should not be withdrawn from wetlands and marshes or streams during low flow periods of July 1 to Sept 30. These water features, and the species that rely on them, are extremely sensitive to changes in hydrology.

Ministry of Forests, Lands and Natural Resource Operations, Habitat Management - Nelson  
Egan, Dianne J ENV:EX

Notice of Work  
Referral Number: 129288102 - 001  
Reference Number: 574262  
Request Sent: May 10, 2021  
Response Due: June 9, 2021

You are requested to comment on the attached Notice of Work and Reclamation Program within 30 days. If no response is received within the 30-day time period, we will consider that to be a positive response.

Unless you are informed by us to the contrary, the application will be adjudicated in a manner consistent with your response. Also, be advised that we may forward your comments directly to the applicant for action or implementation.

Your comments may be disclosed to the public to justify decisions made.

If you require more information, please do not hesitate to contact our office at [MMD-Cranbrook@gov.bc.ca](mailto:MMD-Cranbrook@gov.bc.ca)

This is a Notice of Work for Mineral Exploration - Surface.

Proponent: XIMEN Mining Corp.

Authorization Type: Mines Act Permit

BCGS Mapsheet: 82E.017 & 82E.007

Legal Description/Mineral Tenure Number: 513141, 394733, 394735, 393112, 394737, 394738, 393363

Area of Disturbance in ha. (approx.): 5.16

Volume of Timber Removed (if applicable): 40.61 m3

Please note for Municipal/Local Government:

In the event the applicant must apply for re-zoning, rezoning would not preclude the issuance of a Mines Act Permit.
